

BANK OF FINLAND

1925

YEAR BOOK

COMPILED BY THE

STATISTICAL DEPARTMENT OF THE BANK OF FINLAND

VOLUME VI

HELSINKI — HELSINGFORS 1926

HELSINKI — HELSINGFORS 1926
GOVERNMENT PRINTING OFFICE

The sixth annual issue of the Year Book of the Bank of Finland is now submitted to the public. It is compiled on the same plan as previous issues. The number of tables has been increased by a new one (No. 19) which illustrates the business at the head office and separate branches of the Bank. In the letterpress it was deemed suitable to deal with the reform of the currency and to publish in connection with this the most important laws necessitated by it. As in previous issues of the Year Book, the most important series of figures illustrating the business of the Joint Stock banks have again been published in the present tables. In the letterpress it appeared as superfluous as last year to deal with the business of the Joint Stock banks. Only in the English edition has such a review been retained.

The Year Book has been compiled in the Statistical Department of the Bank of Finland, the undersigned head of the Department being principally responsible for its contents. As in former years the Year Book is published in Finnish, Swedish and English.

A. E. TUDEER. Ph. D.
Head of the Statistical Department.

Bank of Finland, Helsinki (Helsingfors).

April 14, 1926.

I. REVIEW OF THE ECONOMIC POSITION IN FINLAND IN 1925.

The trend of economic life in Finland in 1925, continued in the same satisfactory direction as during the previous year. The harvest was above the average, industry worked without any interruptions worth recording and extended production in several important spheres, the balance of trade resulted in a surplus of exports and the money market was characterised by an obvious easing with a resultant lowering of rates of interest. On the dark side may be mentioned the unfavourable state of prices on the timber market, which made the profitableness of sawmilling doubtful, and the again increased difficulty of balancing Government revenue and expenditure. The most significant event in the economic sphere was undoubtedly the currency reform carried out in December. This reform is, on the one hand, good evidence of the fact that economic life has again become stable after the disturbances caused by the Great War and its consequences, and is, on the other hand, likely to strengthen the foundations on which future economic activity in Finland is to be based. — These points are dealt with more fully below.

Economic policy of the Government. The general economic policy of the Government was carried on in accordance with the same principles as before. Some measures adopted in 1925 should, however, be referred to.

As a result of the policy of stabilisation during the preceding years, the currency reform could be put into operation in 1925, by which means the monetary system of the country was again based on gold. This measure, perhaps the most important of a national economic character during 1925, is described later.

In consequence of a rise in Government expenditure, the development of the system of taxation was subjected to lively discussion. Of the pro-

posals which have led to positive results, the new tax on sweetstuffs should be mentioned, which is levied at the rate of 20 % of the taxation value of the goods; the change in the excise on matches and the law regarding the deduction of the income and property tax in paying dividends. According to this latter law limited liability companies, in distributing dividends, are to withhold 8 % of the dividends in payment of the income and property tax, which payment the person to whom the dividend is due is entitled to deduct in paying this tax. The long discussed question of introducing a new, stable Customs tariff was not yet settled in the course of the year, and the Diet was obliged to fix the rates of duty for only one year in advance. In the rates levied during the previous year several changes were made, which came into force from the beginning of 1926. Among these special attention should be drawn to the increased rates of duty on sugar, coffee and wheaten flour and a considerable reduction in the rate of duty on spirit. In export duties the change was made that firewood was declared entirely free of duty, while, on the other hand, the rate on match splints was doubled.

In order to secure a uniform scheme of railway construction, the Diet passed a law in regard to certain railway construction during 1926—1930 in which it is laid down, what railway lines shall be built during the period of the next five years and during what year work shall be started on each line; it is not determined in the law, however, what sums out of Government means shall be employed annually for the purpose, but it is left to the Diet to decide this in dealing with the Budget for each year.

At the beginning of 1925 a State loan of 10 million dollars was taken up abroad and these funds were chiefly used as loans for encouraging agriculture, 90 million marks being set aside at the same time for erecting the power station at Imatra and 25 million marks for the housing scheme of the Government.

Among other measures in political economy reference should also be made to the trade agreements with Spain, the United States and Japan; the organising of export credits by means of a special law; the law relating to the principles of assessment for municipal Customs dues during 1926 and 1927; and the inclusion of representation abroad in the ordinary estimates from the beginning of 1926.

Trade and Industry. Agriculture proceeded under fairly favourable conditions and the harvest was above the average. The satisfactory results

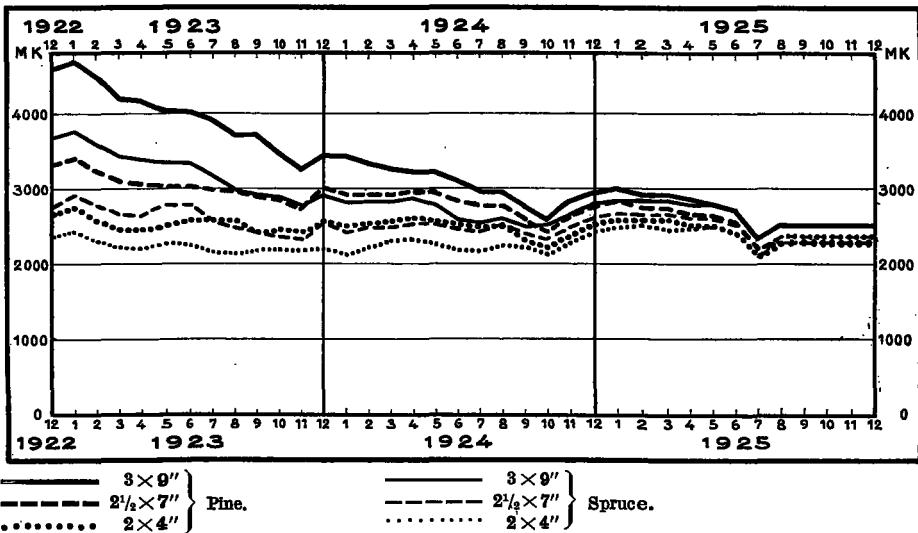

of 1924 and 1925 have once more placed farming on a level basis after the losses it suffered through the bad harvest in 1923. The crops of the most important plants were as follows (in tons); the figures for 1925 are preliminary ones.

	Rye.	Barley.	Oats.	Potatoes.	Hay.
1921	297,004	133,126	505,795	623,001	1,685,470
1922	267,488	140,773	539,586	525,182	2,089,013
1923	239,203	84,760	381,807	462,312	2,124,858
1924	286,016	129,952	492,236	634,132	2,400,086
1925	348,940	142,297	583,300	732,423	2,426,487

In the sphere of cattle farming production increased considerably. This is apparent, for instance, from the export figures for meat, butter and cheese, which were 40—60 % higher than for the year before. It should be noted that the butter exports in 1925 attained the same level as in 1913, while the exports of meat and cheese were now much larger than before the war. The price of corn fell appreciably from February up to the autumn, only to rise again during the last month of the year, but remained very considerably below the level of prices in December, 1924. Prices for farm produce, on the other hand, were considerably higher in December, 1925, than a year earlier.

The sawmills continued in 1925, as in the previous year, to work under unfavourable conditions. The position is, indeed, such that doubts are expressed in initiated circles as to whether sawmilling can be considered at all worth while, when carried on purely by itself and not helped out by any industry which consumes the waste material. By the end of the year about twice as much had been sold as a year before and the level of prices was rising. The satisfactory state of the market in January and February was, however, succeeded by a change for the worse in March. The reason lay partly in competition from Russia, partly in the prolonged labour dispute in the building trade in Denmark, and after it had been settled, in the gradual rise of the Danish crown which led to difficulty in business activity, and finally in part in the depressed economic position in France, Germany and Belgium. As it also proved that production had exceeded expectations, the market was disturbed and prices fell rapidly during the spring and summer. When the position began to get threatening for producers, an agreement was come to in August among the Finnish sawmill owners not to sell timber below certain minimum prices. Owing to a great many sawmill

MOVEMENT OF PRICES FOR SAWN WOODGOODS 1923—1925;
FMK. PER STD.

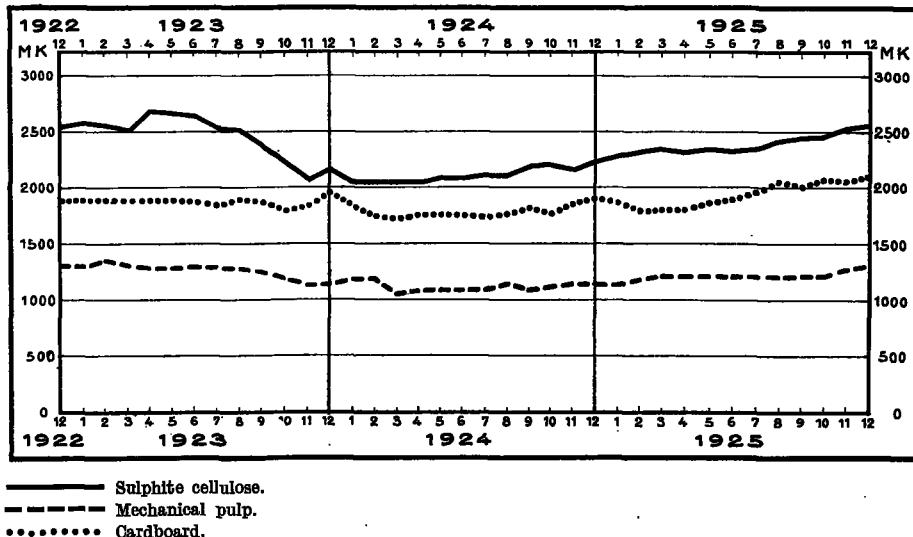

owners not belonging to the Finnish Sawmill Owners' Association adopting the resolutions of this agreement and the Swedish Timber Export Association also adhering to it, the market was, however, stabilised in spite of the resistance of buyers at the start. At the end of the year the sawmillers here held no unsold stocks worth mentioning.

Exports of sawn goods exceeded the previous year's record figures and amounted to 1,039,900 standards, the largest annual quantity hitherto exported from Finland. At the same time these exports were probably larger than from any other country during 1925.

In the paper industry the position was satisfactory, although the growing competition of Canada and Germany threatens to make sales in this market more difficult. — Prices improved in general, but towards the end of the year the market grew weaker again in regard to newsprint and brown wrapping paper. New papermaking machinery was not required, but by introducing technical improvements the production could, nevertheless, be raised. Exports were greater than in any previous year and reached 211,400 tons. Considerable quantities of this total were delivered to Russia.

MOVEMENT OF PRICES FOR WOODPULP AND CARDBOARD 1923—1925;
FMK. PER 1,000 KG.

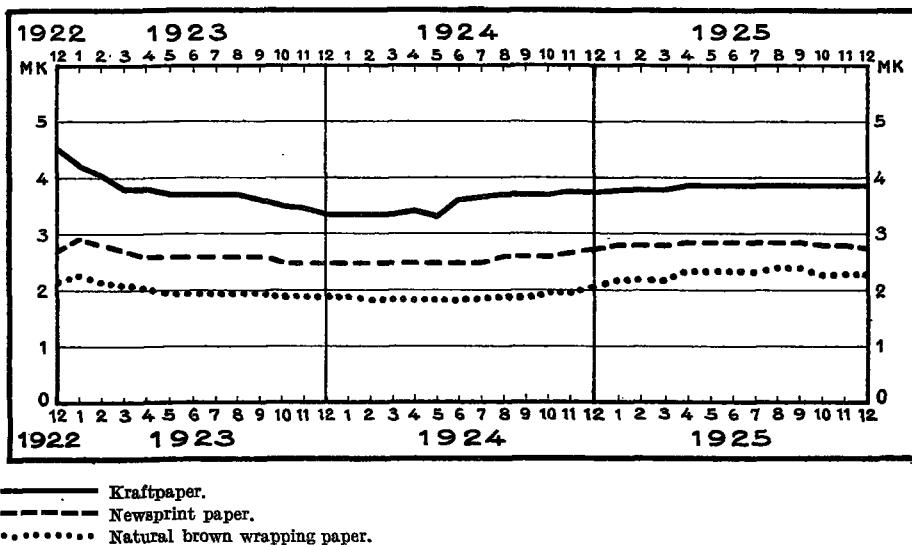

The cellulose industry worked successfully, seeing that production was increased and satisfactory prices were obtained for the products, rising during the year. Exports reached a fresh maximum of 294,300 tons dry weight. Of the production in 1926 already approximately 75 % has been disposed of at satisfactory prices.

The demand for cardboard grew perceptibly, so that the mills were able to apply their whole productive power for the production of cardboard without being forced to employ their cardboard machinery for producing woodpulp. Exports advanced from about 33,000 tons to 51,000. The production of woodpulp declined to a corresponding degree, as production was rendered more difficult besides by the dearth of water caused by the snowless winter.

The plywood industry, too, worked successfully. Exports were raised from 38,200 tons to 43,900 and thus achieved a new record.

For most of the branches of industry employed in supplying the home market the year 1925, or at least its second half, proved comparatively favourable and the greater purchasing power of the country population, thanks to the good harvest, contributed to this result to a great extent.

MOVEMENT OF PRICES FOR PAPER 1923—1925;
FMK. PER KG.

The leather, glass and tobacco industries, however, continued to experience considerable trouble.

The peaceful conditions which prevailed on the labour market during the previous year, continued and at the turn of the year 1925—1926 the position was even better than a year before. Unemployment did, indeed, occur early in the year to some extent in consequence of the absence of snow, and towards the end of the year the usual seasonal want of employment was apparent, but this state of affairs was not of any great extent. Interruptions of work only occurred in a few cases and even these were of short duration and of a purely local character. The level of wages remained, as a rule, unchanged. In consequence of the hard times for the sawmill industry, however, wages fell to some extent at the sawmills pretty generally.

Foreign Trade. The foreign trade of Finland was more extensive during 1925 than ever before. The value of Finnish imports and exports and their »volume» calculated on the basis of prices for 1913, were as follows during recent years.

	Imports. Mill. mks.	Exports. Mill. mks.	Surplus of imports (-) or exports (+) Mill. mks.	Volume in %/ (1913 = 100). Imports. Exports.	
1921	3,585.7	3,389.4	-196.3	54.5	69.0
1922	3,969.9	4,467.6	+497.7	74.7	93.5
1923	4,600.8	4,392.5	-207.8	101.5	94.8
1924	4,715.5	4,970.6	+255.1	99.3	112.7
1925	5,519.5	5,573.5	+ 54.0	105.9	123.9

The surplus of exports was 54.0 million marks or appreciably less than for the previous year. Had imports not been especially heavy during December in consequence of some increases in the rates of duty coming into force from the beginning of 1926, the surplus of exports would have been considerably greater. These extra imports, however, are, of course, liable to reduce the quantities imported during 1926 to a corresponding degree. It may be noted with satisfaction that Finland's balance of trade, which was in a great degree unfavourable prior to the war, seems to have become permanently favourable during the last few years.

Different branches of trade contributed to the increased exports in a way illustrated by the figures below.

	Exports in 1924.		Exports in 1925.		Increase.	
	Mill. mks.	%	Mill. mks.	%	Mill. mks.	%
Timber industry	2,850	58.4	3,022	54.4	172	6.0
Paper industry	1,354	27.7	1,537	27.7	183	13.5
Agriculture.....	550	11.3	773	13.9	223	40.5
Other branches	131	2.6	220	4.0	89	67.9
Total	4,885	100.0	5,552	100.0	667	13.7

Exports of sawn timber, plywood, cellulose and paper, which had already in 1924 been larger than ever before, reached a fresh maximum in 1925. As regards exports of pulpwood, they rose to such an extent that doubts began to arise from the point of view of national economy as to their utility. The growth of exports of agricultural products was also, as already mentioned, especially strong.

The greater volume of imports was in a great measure a result of the heavy imports during December, the cause having to be sought in the rise in rates of duty referred to above. But even apart from this imports were, as regards volume, rather larger than in the years preceding the war.

The distribution of imports according to their purpose will be seen on the next page.

Imports divided according to purpose.

Year.	Articles of consumption.				Articles for productive purposes.			
	Foodstuffs and luxuries.		Finished products of industry.		Raw materials and semiproducts.		Means of transport, machinery etc.	
	Mill. mks.	%	Mill. mks.	%	Mill. mks.	%	Mill. mks.	%
<i>Value and ratio of total imports.</i>								
1921	1,577.2	44.0	681.5	19.0	834.4	23.3	492.6	13.7
1922	1,449.7	36.5	801.7	20.2	1,271.9	32.0	446.6	11.3
1923	1,474.3	32.0	1,087.5	23.6	1,460.5	31.8	578.0	12.6
1924	1,666.2	35.3	936.8	19.9	1,529.2	32.4	583.3	12.4
1925	2,061.9	37.3	998.3	18.1	1,759.2	31.9	700.1	12.7
<i>Value according to prices in 1913 and quantity index, if 1911—13 = 100.</i>								
1911—1913	187.2	100	88.3	100	150.7	100	43.8	100
1921	101.4	54	65.0	74	73.9	49	49.0	112
1922	126.0	67	81.2	92	122.2	81	54.5	125
1923	153.1	82	131.7	149	157.7	105	79.4	181
1924	166.9	89	104.0	118	160.1	106	76.5	175
1925	186.8	99	107.6	122	169.6	113	80.7	184

In all these groups of commodities imports increased in 1925 both in respect of quantity and value. It should be noted that the extraordinary imports referred to above and caused by the raised rates of duty, come under the heading of foodstuffs and luxuries; apart from them, the share of the commodities belonging to this group in the total imports would have been less than in 1924. In comparison with the average for 1911—13 imports rose most in the machinery and means of transport group. This is due, above all, to the rapidly rising imports of motor cars and other motor vehicles.

If a calculation were to be made for 1925 of the same kind as for previous years with the object of determining, to what extent goods were included among the imports, which should be looked upon as capital investment (machinery, means of transport, metals, bricks, cement, furniture, works of art etc. of an estimated period of use of at least 10 years), the final result would be 1,046 million marks or 19 % of the value of imports. As imports of such articles have been considerable every year, a respectable capital investment has been made, which should be taken into account, when forming an opinion of the increase in the foreign indebtedness of Finland.

As during the preceding three years, Finnish imports in 1925 were lower in price than the exports. The difference, however, has grown less

year by year. For 1925 the import price index stood at 1,052, and the export price index at 1,111.

The value of imports and exports for each month was as follows (in millions of marks).

Month.	Imports.	Exports.	Surplus of imports (-) or exports (+).
January	321.8	240.4	— 80.9
February	285.0	221.4	— 63.6
March	399.0	230.0	— 169.0
April	403.6	258.6	— 145.0
May	438.5	457.7	+ 19.2
June	454.5	545.6	+ 91.1
July	458.6	802.0	+ 343.4
August	448.8	687.9	+ 239.6
September	536.8	702.0	+ 165.2
October	531.1	607.3	+ 76.2
November	535.7	490.1	— 45.6
December	707.1	330.5	— 376.6
Total	5,519.5	5,573.5	+ 54.0

The Money Market. The tightness of the money market which had existed during the preceding years, continued at the beginning of 1925. The more the year advanced, however, the more clearly signs became apparent of an approaching improvement in the position. A return to more normal conditions was also visible in the fact that the variations in the deposits and credits of the banks, the reserve of foreign currency and other circumstances again approached the regularly recurring seasonal fluctuations that characterised the money market in Finland before the war. A return to a wholly normal state was still hampered by the circumstances referred to below, which during last year mainly left their impression on the money market, but the effect of which was weakened to a great extent during the year under review. Foreigners' deposits in marks continued to be withdrawn from the banks, but whereas this reduction amounted to approximately 380 million marks in 1924, it only represented 98 million marks last year. At the beginning of the year the Government still had large deposits in the Joint Stock banks and their amount was reduced during the year by about 235 million marks. The largest Joint Stock banks tried expressly to get free of such uncertain deposits that disturbed the money market, and repaid them fully to the Government. At the beginning of the year, too, the Industrial Mortgage Bank, established the year before, had consi-

derable deposits in the Joint Stock banks, which it withdrew during the earlier months of the year in order to grant loans to industrial concerns. On the other hand it should be remarked that the Mortgage Association of Finland deposited the loan it received from the Government, amounting to 100 million marks, in the Joint Stock banks, only about 15 million marks of this sum having been tied up in credits on real estate in 1925.

The following table shows how the money market was affected by all these circumstances.

Deposits in the Joint Stock banks in mill. marks.¹⁾

End of month.	Home deposits.					Total.	Foreign mark deposits.	Total.			
	Deposits by the public.			Government deposits.	Deposits by Industrial Mortgage Bank.

¹⁾ Government deposits here include both Treasury and Colonising Fund deposits, but not the means of a number of smaller funds, deposited in the banks and

Long-term deposits (deposit and savings accounts) which most accurately represent the placing of money in the Joint Stock banks by the actual public, were increased, it will be seen, in 1924 by approximately 210 million marks, but in 1925 by about 470 million marks or more than twice as much. As in the previous year this amount was required, however, in its entirety for the repayment of other deposits referred to above. Besides, the Joint Stock banks, which had increased their borrowing from the Bank of Finland during the early months of the year, reduced their re-discounts in the course of the year by about 132 million marks to 25.9 million marks at the end of the year. Owing to these circumstances the position was not improved from the point of view of the public requiring credit. On the contrary, the credits granted by the Joint Stock banks fell off by 264 million marks — part of this reduction, however, being caused by the transfer of industrial credits to the Industrial Mortgage Bank — and the augmentation of direct credits by the Bank of Finland did not suffice to make good the reduction.

In connection with deposits in the Joint Stock banks the ever livelier business of the Savings banks and institutions merits attention. Depositors' balances (in million marks) were increased in the following way:

	1924	1925.
In the Savings banks	217.8	1) 288.0
In the Post Office Savings Bank.....	18.1	14.1
On the Consumers' Co-operative Societies'		
Savings account.....	42.8	53.9
Total	<u>278.7</u>	<u>356.0</u>

In March the Government took up a foreign loan amounting to 10 million dollars, but at the same time some foreign indebtedness was paid off. Beyond the amortisations proposed in the amortisation schemes, which amounted to approximately 70 million marks, the Government paid extraordinary amortisation by means of redeeming its foreign bonds to a value of about 74 million marks. With regard to exporters' short-term foreign credits, a reduction of about 200 million marks occurred during the

administered by the Treasury. The data regarding foreign mark deposits (*conti lori*) are based on detailed information supplied by the banks. The difference between these figures and the indebtedness to foreign correspondents given up in the bank statistics consists of the indebtedness of the banks in *foreign currency* (*conti nostri*).

1) Interest calculated approximately.

year. It should also be mentioned that such credits were arranged through the intermediary of the Bank of Finland in a much more advantageous manner than before.—In forming an opinion of the balance of payments abroad it must further be borne in mind that the net indebtedness of the Joint Stock banks was reduced by approximately 129 million marks and that the position of the Bank of Finland, too, was strengthened in a great measure in this respect, especially by a considerable increase in the reserve of foreign currency. The net foreign balances of all banks were raised by about 820 million marks.

While the state of the money market was improving, the Bank of Finland twice lowered its rates of interest. The lowest bank rate was reduced on August 14th from 9 % to 8 % and on October 29th again to 7½ %. The Joint Stock banks did not at first follow this lead in general, as they only lowered their highest rates of interest, but from the beginning of December they, too, lowered their rates both on deposits and credits. Thereafter the credit rates of the larger banks were 8½—11 % and of the smaller banks 9—13 %. On long-term deposits the larger banks paid 6½—6¾ % and the smaller ones 6½—7½ %, for cash on current account 5 % and 5½—6½ % respectively.

Investment of fresh capital in limited liability companies in 1925 and previous years is shown in the following statistics compiled by the Central Statistical Office:

	New companies.		All companies.		
	Number.	Capital. Mill. mks.	Number.	Increase. Mill. mks.	Capital. Mill. mks.
1922	518	126.3	6,763	+ 346	4,446.0
1923	580	200.5	7,175	+ 412	4,631.7
1924	564	323.6	7,611	+ 436	4,876.3
1925	593	171.3	8,070	+ 459	5,117.6

As these figures show, the capital of new companies established in 1925 was considerably smaller than of those formed in 1924. As the increase of the capital of old companies, on the other hand, was greater, the growth of capital in all companies in 1925 was almost as great as in the preceding years.

The easier tone of the money market is further indicated by the following circumstances.

The turnover on the Helsingfors Stock Exchange amounted to 145.5 million marks or an appreciably higher sum than in the previous three years. The rise in the turnover referred chiefly to the last few months of the year. Quotations were lower at the beginning of the year than at the corresponding time in previous years, but rose in the course of the year and reached a higher point in November and December than during the preceding years.

The reduction in the number of protested bills, too, particularly during the latter half of the year, pointed to an improvement in the situation. The number of protested bills fell from 9,418 in 1924 to 6,524 in 1925 and their total amount from 56.9 to 36.7 million marks. The easing of the money market is also evidenced by the reduction in the number of bankruptcies from 1,179 in 1924 to 891 in 1925. In this respect, too, the improvement refers principally to the last few months of the year.

Government Finance. During 1923—1925 Government revenue and expenditure were as follows (in million marks).

	1923	1924	1925
Ordinary revenue	3,062.5	3,158.2	3,316.2
Extraordinary revenue.....	10.1	1.7	1.6
Revenue outside of Budget	64.0	57.1	12.6
Total	3,136.6	3,217.0	3,330.4
Loans	776.9	—	352.6
Sums disposed of out of cash reserve of previous years	—	—	269.5
Grand total	3,913.5	3,217.0	3,952.5
<i>Expenditure:</i>			
Ordinary expenditure	2,256.5	2,530.3	2,829.4
Extraordinary expenditure	1,201.1	605.2	1,122.4
Transfers to funds	27.0	—	—
Expenditure outside of Budget	12.8	13.9	0.7
Total	3,497.4	3,149.4	3,952.5
Surplus.....	416.1	67.6	—
Grand total	3,913.5	3,217.0	3,952.5

The cash reserve of Government funds at the end of these years was as follows:

1923	1,099.8	mill.	mks
1924	1,166.9	>	>
1925	897.4	>	>

The Government finances for 1925 do not, therefore, reflect as favourable a result as for the preceding years. Expenditure as well as revenue grew considerably, the former much more than the latter. As a result, a foreign loan proved necessary for covering expenditure and, besides, part of the cash reserve of Government funds accumulated during previous years had to be drawn upon. Altogether the expenditure exceeded the actual revenue by 622.2 million marks. Such a state of affairs is, however, not as serious as it would appear at first sight. It must be taken into consideration that unusually large sums were set aside in 1925 for purposes that are productive of revenue for the State, as for State business undertakings and lending activities, and that part of such sums was only to be employed in 1926. The final amount of this kind of expenditure is not yet known, but according to the revenue and expenditure estimates such expenditure amounted to more than 770 million marks. Over and above this the expenditure includes amortisation of State indebtedness to an amount of about 180 million marks. Under such circumstances the result for 1925, although it was not as favourable as in the preceding years and undoubtedly indicates a stringency in Government finances, does not give cause, as such, for uneasiness.

The *National Debt* grew to some extent during 1925. At the end of 1924 the booked value of the National Debt constituted 2,279.4 million marks, of which amount 1,396.8 million marks represented foreign and 882.8 million marks internal indebtedness. During the year the Government, on the one hand, raised a new foreign loan, on the other it redeemed its former loans, as already stated. The result was that the Debt, according to the booked value at the end of the year, amounted to 2,475.3 million marks, of which 1,714.0 million marks represented foreign and 761.3 millions internal debt. The booked value of the National Debt had thus increased by 195.9 million marks; the increase in the foreign debt was 317.4 million

marks, while the internal debt was reduced at the same time by 121.5 million marks. As has been pointed out in former annual reports, these figures only give a fully correct impression of the actual position in regard to internal indebtedness, as foreign loans in Finland, as is customary, too, in other countries, are entered in the books in the country's own currency at the rate of exchange current at the time the loan was taken up, loans negotiated before the war, consequently, almost at the par rate of exchange. The amount referred to thus includes Finnish marks of differing value. In order to determine more exactly the amount of the National Debt, the Treasury has calculated every month, what sum in marks would have been necessary at each date in order to pay off the whole National Debt at current rates of exchange. According to this calculation the Finnish National Debt at the beginning of 1925 amounted to 3,367 million marks and at the end of the year to 3,640 million marks or 273 million marks more. This considerable increase as compared with the rise in the booked value of the Debt, is chiefly due to the rise in the value of the Norwegian crown, but the rise in Danish crowns and pounds sterling also contributed to it.

The National Debt of Finland is entirely funded and both absolutely and per head of population considerably smaller than that of the other northern countries.

Foreign Currency. At the end of 1924 the Finnish mark had attained such a firm value that it could be taken for granted that the final stabilising of the mark should be undertaken approximately on the basis of the current dollar rate of exchange. Since November 5th of that year the dollar had been quoted at 39:70 and this rate of exchange remained unaltered throughout the whole of 1925, too. As the general economic state of the country during the latter year was a favourable one and the reserve of foreign currency of the Bank of Finland was in process of growing, no difficulties presented themselves in maintaining this rate. Indeed, by the end of the year it proved possible to take the last step on the road to stabilisation and carry out the currency reform on the basis of the dollar rate of exchange alluded to.

In the *internal purchasing power* of the mark some fluctuations occurred during 1925, to be seen clearly from the following review.

1924	Wholesale price index.	Increase or decrease.	Cost of living index.	Increase or decrease.
December	1,139	+19	1,217	-5
1925				
January	1,137	-2	1,199	-18
February	1,141	+4	1,191	-8
March	1,131	-10	1,210	+19
April	1,133	+2	1,201	-9
May	1,122	-11	1,176	-25
June	1,129	+7	1,191	+15
July	1,118	-11	1,218	+27
August	1,142	+24	1,266	+48
September	1,133	-9	1,242	-24
October	1,121	-12	1,228	-14
November	1,118	-3	1,227	-1
December	1,120	+2	1,197	-30

The changes illustrated by these series of figures do not in any way imply that changes occurred in the value of the mark, but are to be ascribed wholly to commodities, i. e. partly internal seasonal fluctuations, partly variations in the level of prices abroad. The level of prices was, on an average, slightly higher than for the year before. The average wholesale price index in 1924 stood at 1,100, but in 1925 at 1,129, for the cost of living index the corresponding figures were 1,170 and 1,212. The actual rise, however, occurred already in 1924. The result of the fluctuations in 1925 was, on the other hand, that the level of prices in December was slightly lower than a year before.

II. THE CURRENCY REFORM.

The Committee's proposals. In November, 1924, the Bank Supervisors of the Diet appointed a Committee, as mentioned in the Year Book for 1924, to prepare the question of reverting to a gold standard. In its report dated April 1st, 1925, the Committee submitted the results of its labours: an investigation of the possibilities of a return to a gold standard and proposals as to how this should be done.

The general conditions for the reform of the currency were as follows in the opinion of the Committee:

- 1) that the note circulation is not increased for the purpose of providing the requirements of the Government;
- 2) that serious disturbances in the country's balance of payments can be avoided; and
- 3) that foreign credit is available for Finland in such measure that the rates of exchange for foreign currency are only affected within normal limits by such an exceptionally large demand or reduction of offerings of foreign currency as may possibly be expected to occur.

Seeing that stability had been attained in the Government finances and the balance of payments also did not appear to give cause for uneasiness, provided the Government authorities did not adopt measures likely to disturb the conditions of the country's industrial and other productive activities, the Committee considered it right to proceed with measures that would provide safeguards against chance disturbances of the nature referred to in clause 3. This was to be done by strengthening the position of the Bank of Finland. — In view of the fact that the stability of the value of gold could not be considered to be sufficiently guaranteed, so long as a gold standard only obtained in a few countries, Finland should, in the opinion of the Committee, wait until Great Britain had returned to a gold standard before the currency reform was carried out here.

According to the proposals of the Committee the currency reform should be put into operation on the following principles:

- 1) devaluation should be effected at the actual value of the paper mark;
- 2) the unit of currency should be maintained unchanged;
- 3) the Government should redeem its bonds in the possession of the Bank of Finland;
- 4) the gold reserve of the Bank of Finland should be revalued at the new unit of currency and the capital of the Bank be raised by the difference between the new and the old value;
- 5) the position of the Bank of Finland should be strengthened in other ways, too;
- 6) the regulations for the note issue should be revised; and
- 7) the redemption of bank notes should be provided for in accordance with the principles for a gold exchange.

For the purpose of carrying out these clauses the Committee had drawn up: a) proposals for a new monetary law; b) proposals for a law containing certain regulations evoked by the reversion to a gold standard; and c) proposals for a law for altering §§ 18, 19 and 20 in the regulations for the Bank of Finland.

In dealing with the matter the Supervisors of the Bank approved the proposals of the Committee in their main points. After having also drawn up proposals for altering the regulations for the Bank of Finland in such parts, too, which the Committee had not had occasion to deal with, the Bank Supervisors requested the Government, in their letters dated May 7th and September 11th, to lay before the Diet proposals with regard to such laws and measures as the return to a gold standard called for. The Government submitted such proposals to the Diet, which passed them almost without alteration. Changes were only made in a couple of clauses which will be dealt with later in connection with an account of the most important points of the currency reform. — The laws referred to were confirmed by the President of the Republic on December 21st, 1925.

The unit of currency. When the Committee began its labours, well-nigh complete unanimity had already been attained with regard to the fact that the reversion to a gold standard in the currency system of Finland without either deflation or inflation ought to be carried out on the basis

of the value at which the Finnish mark had in reality been stabilised and which was expressed in the dollar rate of exchange of 39: 70. At the same time there were various opinions as to the most suitable unit of currency. The Committee proposed as a new unit of currency a gold mark, the value of which should correspond to the gold value of the paper mark in relation to foreign gold currency. Against this it was urged that by such means too small a unit of currency would be obtained, which would be both impracticable and disadvantageous in regard to foreign credit. In favour of this opinion one vote was given, when the question was dealt with by the Bank Supervisors, but otherwise the opinion of the Committee was approved, principally in order to avoid unnecessary anxiety among the public, which feared that the change to a larger unit of currency would occasion a rise in the level of prices.

The new monetary law is based on this foundation. According to it, gold coin is to be struck of 100 and 200 marks in value, the former containing $3 \frac{15}{19}$ and the latter $7 \frac{11}{19}$ grammes of fine gold. For making these coins minted gold is to be used containing nine parts of gold and one part of copper in weight. Of two kilogrammes of minted gold 475 gold coins of 100 marks are thus to be struck and of four kilogrammes of minted gold the same quantity of gold coins of 200 marks' value. — Free importation and exportation of gold, as well as free coining, are to be provided for.

The gold reserve. At the time of carrying out the currency reform the gold reserve of the Bank of Finland was booked at a value of 43.3 million marks. After revaluation in new gold marks, 7.66 to 1 old one, the gold reserve amounted to 331.6 million marks. The augmented value thus obtained of 288.3 million marks, was transferred to the capital of the Bank to strengthen it.

Raising of the capital and reserve fund. With the object of strengthening the position of the Bank of Finland its capital was raised from 100 to 500 million marks. The means necessary for this purpose were obtained partly by the revaluation of the gold reserve referred to, partly by transferring to the capital such funds as had been set aside in previous years for strengthening the position of the Bank, and the profits for the preceding year. It is further provided for in the new regulations that the total profits

of the Bank shall be transferred to the reserve fund until it reaches 500 million marks, and that subsequently a third part of the profits shall further be transferred annually to this fund.

Redemption of Government bonds. To enable the Bank of Finland to accumulate a reserve of foreign currency large enough to guarantee the stability of the Finnish mark even in case a temporary stringency should arise in the relation between the supply and demand of foreign currency, the position of the Bank was further strengthened by the Diet resolving, in passing the bills drafted for the purpose of reverting to a gold standard, that the Government bonds held by the Bank of Finland and made out in Finnish currency to a value of 338.7 million marks, should be redeemed before the end of 1928 in foreign currency. The resolution refers to the loan of 350 million marks which was granted in 1919 for strengthening the position of the Bank of Finland; already in 1923 it was decided to redeem the Government's short-term obligations to the Bank, which is effected at the rate of 12 million marks a year and will be completed in 1928.

Note issue and note cover. The so-called contingent system adopted for a long time past, was retained, although some changes were made in it. The ordinary cover consists of the Bank's gold reserve and undisputed claims on its foreign correspondents. Above that the Bank may issue notes to an amount not exceeding 1,200 million marks, but with the proviso that supplementary cover is available. The Committee had proposed that the contingent in force up to that time of 1,500 million marks, should be brought down to 1,000 million marks and that, in order that the contingent system should work more elastically, the President of the Republic should be empowered, at the suggestion of the Bank Supervisors, to grant permission temporarily to exceed the note amount provided for. The Diet, however, omitted this last measure as unsuitable in its opinion and instead raised the contingent to the amount stated.

As supplementary cover, according to the new provisions, only home and foreign bills may serve, foreign bonds quoted on foreign Stock Exchanges, interest coupons in foreign currency which have fallen due for payment and foreign bank notes. As of late, since 1918, owing to the force of conditions at that time, Government bonds and certain Government liabilities

could also be included in the note cover, the change represents in this respect, too, a return to normal conditions.

Redemption of notes. In accordance with the proposal of the Committee regarding the introduction of a gold exchange, not an actual gold standard, it is provided in the regulations that the Bank of Finland shall be bound to redeem its notes either a) in Finnish gold coin, or b) in gold ingots, or c) in cheques made out in foreign gold currency, and that it is left to the Bank to decide, which of these methods of redemption shall be employed in each case. This is in harmony with the provision contained in the monetary law that everyone shall be bound to accept notes of the Bank of Finland as legal tender. Albeit gold coin is to be struck according to the monetary law, notes will, as hitherto, retain their place as the most important means of payment. As the notes remain unchanged and the small change is also not to undergo any alteration, the currency reform thus implies no change in the former conditions for the general public.

Special provisions. In order that no uncertainty should arise anywhere as to the fact that the currency reform does not constitute any alteration in the value of the Finnish mark, a law was passed at the same time in which it is expressly provided that Bank of Finland notes, irrespective of their date of issue, shall be redeemed at the value possessed by the Finnish mark according to the new monetary law, and that in discharging liabilities incurred in Finnish currency, the mark shall likewise have the value stated, irrespective of the date on which the liability was incurred. In order to emphasize that fluctuations in the value of the currency had ceased, the provisions occurring in certain laws and ordinances were repealed, according to which the payment of wages and pensions and some other disbursements were to be made on the basis of so-called sliding scales.

The most important points of the currency reform, as well as the changes rendered necessary thereby in the position of the Bank of Finland, are shown in detail in the verbatim translations given below of: a) the monetary law; b) the law containing certain regulations evoked by the reversion to a gold standard; and c) §§ 1—14 and 30 of the regulations for the Bank of Finland.

Monetary Law.

Given in Helsinki (Helsingfors) on December 21, 1925.

§ 1.

The monetary system of Finland is founded on gold as the sole measure of value.

§ 2.

The monetary unit is called a mark. The mark is divided into one hundred penni.

§ 3.

Gold coin shall be struck of one hundred and two hundred marks' value. The former shall contain $3 \frac{15}{19}$ grammes and the latter $7 \frac{11}{19}$ grammes of fine gold.

§ 4.

For the coining of gold coin nine parts of fine gold and one part of copper in weight shall be melted together to standard gold.

Of two kilogrammes of minted gold four hundred and seventyfive coins of one hundred marks shall be struck and of four kilogrammes a like number of coins of two hundred marks. A one hundred mark coin shall therefore weigh $4 \frac{4}{19}$ grammes and a two hundred mark coin $8 \frac{8}{19}$ grammes.

§ 5.

From the fineness and weight of gold coin fixed in §§ 3 and 4 such deviations shall be admitted as do not exceed $\frac{15}{10000}$ above or below the standard fineness and $\frac{20}{10000}$ above or below the standard weight. The deviation in weight of a quantity of coin struck from ten kilogrammes of minted gold shall not, however, exceed five grammes.

§ 6.

Small change shall consist of coins of one mark and of fifty and twentyfive penni, which shall be struck of nickelled bronze, as well as copper coins of ten and five penni.

§ 7.

The alloy of which the nickelled bronze coin is made shall consist of twentyfive parts of nickel and seventyfive parts of copper in weight.

For copper coin pure copper shall be employed or an alloy consisting of ninetyfive parts of copper, four parts of tin and one part of zinc in weight.

§ 8.

The coin made of nickelled bronze shall weigh:

- a one mark piece 5.100 grammes,
- a fifty penni piece 2.550 grammes and
- a twentyfive penni piece 1.275 grammes.

These coins, if weighed in quantities of two thousand marks, may deviate from the standard weight by:

- one mark pieces not more than $\frac{5}{1000}$,
- fifty penni pieces not more than $\frac{10}{1000}$ and
- twentyfive penni pieces not more than $\frac{15}{1000}$.

§ 9.

The copper coin shall weigh:

- a ten penni piece 5 grammes and
- a five penni piece 2.5 grammes.

The copper coin, if weighed in quantities of one hundred marks, may deviate from the standard weight by $\frac{2}{100}$.

§ 10.

Every person submitting not less than 40 grammes of gold to the Finnish Mint for coining, is entitled, after the weight and fineness of the gold have been examined, to receive from the Bank of Finland gold coin of a value corresponding to that of the fine gold, after one-third per cent of the aforesaid value has been deducted for covering the cost of coining. For such coining no other charges or taxes may be made.

Gold may freely be imported into the country and exported thence.

§ 11.

Small change may not be coined for anyone but the State.

Small change shall be coined, when the Bank Supervisors appointed by the Diet give notice of the need for such coin in the business of the Bank of Finland, to amounts corresponding to the requirements notified.

§ 12.

Besides gold coin, everyone shall be compelled to accept Bank of Finland notes as legal tender.

The Bank of Finland is compelled to redeem its notes in the manner provided for in the regulations of the Bank.

§ 13.

Small change shall be accepted without restriction as payment at Government offices or the Bank of Finland; other persons shall not be compelled to accept in one payment a larger amount than one hundred marks in one mark pieces, twenty marks in fifty and twentyfive penni pieces, and ten marks in copper coin.

The Bank of Finland is compelled to exchange small change free of charge, subject to the regulations in force for the redemption of the Bank's notes, however not in smaller amounts than full hundreds of marks.

§ 14.

Coin which has been made smaller or damaged by means of rubbing, cutting or boring or by means of soldering or other similar action, shall not be valid as legal coin.

§ 15.

Gold coin which through wear has lost more than one half per cent of its standard weight shall no longer be valid as legal tender; nevertheless, gold coin shall be accepted in payment at Government offices at its original value, provided it has not lost more than two per cent of its legal weight. A one hundred mark coin should therefore not weigh less than $4 \frac{18}{95}$ grammes and a two hundred mark coin not less than $8 \frac{36}{95}$ grammes in order to count as legal tender in payments between private individuals, and a one hundred mark coin not less than $4 \frac{12}{95}$ grammes and a two hundred mark coin not less than $8 \frac{24}{95}$ grammes in order to be accepted at Government offices.

Small change which through wear has been so defaced that the design cannot be clearly distinguished shall no longer constitute legal tender in general. Nevertheless, such coin shall be accepted as payment at Government offices at its face value, provided it can safely be established that the coin is genuine.

§ 16.

Coin which is no longer valid as legal tender, as well as small change which has lost more than four per cent of its legal weight, shall not, after being received at any of the Government offices or at the Bank of Finland, again be put into circulation.

§ 17.

Coin which no longer constitutes legal tender except to the State, may be exchanged in the Bank of Finland for current coin of the same kind. For such coin the Bank is entitled to receive in exchange at the Finnish Treasury good coin to a corresponding amount.

The Bank of Finland is at all times entitled to receive from the Finnish Treasury gold coin in exchange for small change.

§ 18.

Small change coined in accordance with regulations hitherto in force shall remain valid as small change at its face value in marks and penni.

§ 19.

Regulations regarding the size and design of the coins, their inscription and appearance in general shall be drawn up by ordinance.

§ 20.

This law enters into force on January 1, 1926, when the law regarding the currency of the Grand Duchy of Finland of August 9, 1877, and the ordinance issued on the same date regarding the adoption of a gold standard shall cease to be valid.

This shall be observed by all whom it may concern.

Law containing certain regulations evoked by the reversion to the gold standard.

Given in Helsinki (Helsingfors) on December 21, 1925.

§ 1.

Bank of Finland notes shall be redeemed, irrespective of the date of their issue, at the value which the Finnish currency has according to the Monetary Law of December 21, 1925.

§ 2.

In fulfilling liabilities incurred heretofore in Finnish currency one mark shall be equal to one mark of the currency fixed in the Monetary Law of December 21, 1925.

§ 3.

Hereby the regulations are annulled in sundry laws and ordinances, according to which the extent of salaries, pensions and other payments is dependent on the fluctuation in the level of prices, with the exception of the regulations in this respect contained in the laws concerning the remuneration of the clergy of the Evangelical-Lutheran parishes and bellringers-organists.

This shall be observed by all whom it may concern.

Regulations for the Bank of Finland.

Given in Helsinki (Helsingfors) on December 21, 1925.

Fundamental rules.

§ 1.

The object of the Bank of Finland is to maintain stability and security in the monetary system of Finland and to assist and facilitate the circulation of money in the country.

§ 2.

The Bank carries on its business under the guaranty and supervision of the Diet.

§ 3.

The Bank has the sole right of issuing bank notes in the Republic.

§ 4.

The funds of the Bank consist of:

the capital, which shall be increased to five hundred million marks and maintained at that amount; and

the reserve fund, which shall be increased as provided for later in these regulations and in which may not be included the value of the real estate, furniture of the Bank nor the value of shares belonging to the Bank.

§ 5.

The Bank carries on its business at a Head Office and at Branch offices, as well as through agencies, when necessary.

The Head Office shall be situated in the capital of the Republic.

The note issue.

§ 6.

The amount of the Bank's notes in circulation may not exceed one thousand two hundred million marks in excess of the aggregate amount of the gold reserve of the Bank and the undisputed balances of the Bank with its foreign correspondents.

In case the amount of the Bank's notes in circulation should exceed the total amount of the assets specified in clause 1, the cover for the notes must consist of:

bills payable abroad in foreign currency;

foreign bonds quoted on foreign Stock Exchanges;

interest coupons in foreign currency which have fallen due for payment;

foreign bank notes; or

inland bills falling due not later than within three months' time and for the payment of which at least two trustworthy persons or firms are responsible.

The assets of the Bank in foreign currency, specified in clauses 1 and 2, may not be booked higher than at rates of exchange corresponding to the Stock Exchange quotations in countries with gold currency, converted into

Finnish marks at gold parity, bonds, however, not higher than their nominal value.

The drafts of the Bank in Finnish currency and other liabilities payable on demand, as well as the undrawn balances of advances on cash credit and overdrafts shall equally be considered as notes in circulation.

§ 7.

The gold reserve shall be considered as consisting of gold coin and bullion of the Bank, either here or in course of transport for the account of the Bank.

The gold reserve shall be maintained at not less than three hundred million marks.

§ 8.

The Bank is obliged to redeem its notes on demand either:

in Finnish gold coin;

in gold ingots; or

in cheques made out in foreign gold currency and payable at sight at the current rate of exchange, which may not exceed the parity by more than one per cent.

It is at the option of the Bank, which of these methods of redemption provided for in clause 1 shall be employed in each case.

§ 9.

A torn bank note shall be redeemed, if on part thereof are either both signatures with one of the numbers or the righthand number with some part of the signatures, and if the value of the note can also be established. In case doubt should arise as to the validity of a note, it is for the Board of Management to decide whether the note shall be redeemed.

A dilapidated or torn note may not again be put into circulation.

§ 10.

In case clever counterfeits of the Bank's notes appear in circulation, the Government may, on the proposal of the Bank, decide and announce that notes of such series must be presented to the Bank for redemption or exchange within a time, specified in the announcement, which shall not

be less than three years, on pain of their no longer being redeemed or exchanged thereafter.

The value of notes which have not been presented shall be credited to the Reserve Fund of the Bank.

The business of the Bank.

§ 11.

The Bank of Finland is entitled:

- 1) to carry on the exchange of money;
- 2) to buy and sell gold coin and bullion;
- 3) to buy and sell foreign currency;
- 4) to discount bills;
- 5) to grant other credit than that on bills, provided that such credit shall only be granted against security in gold, bonds or mortgages and that the aggregate amount shall not exceed the half of the Bank's own assets; and
- 6) to carry on other business appropriate to ordinary banking operations.

With regard to the duties which the Bank has to perform for the State special provisions are made.

§ 12.

The assets of the Bank may be invested in shares only to such extent as is necessary for supplying the requisites for note production and the printing of notes.

§ 13.

The Bank is entitled to pay interest on the balances on current account of its foreign correspondents.

In other cases interest may not be paid on deposits in the Bank, unless it has been decided to make an exception owing to special circumstances. The payment of interest must be discontinued, as soon as the reasons for which it was granted cease to exist.

§ 14.

In case a loan for which security has been given, is not repaid on the due date, the Bank is entitled without notice to the borrower and at its own option to realise the security.

Should the security be sold at auction, the Bank may purchase the security, but the latter must be realised as soon as the interests of the Bank permit.

Employment of profit.

§ 30.

Until the capital and reserve fund of the Bank have severally risen to five hundred million marks, the annual profit of the Bank shall be employed in its entirety to increase the same. Thereafter, at least one third of the annual profit shall be transferred to the reserve fund. Such part of the profit as is not utilised for increasing the funds of the Bank, may, according to the decision of the Diet, be employed for public purposes.

Should the business of the Bank result in a loss, the latter shall be covered out of the undisposed profits of the Bank. Should these not prove sufficient for the purpose, the deficiency shall be covered out of the reserve fund. Should the reserve fund have been reduced in this manner, the profit of the following year shall be utilised in the first instance to bring up the fund to its former amount.

III. THE BANK OF FINLAND IN 1925.

I. THE NOTE ISSUE.

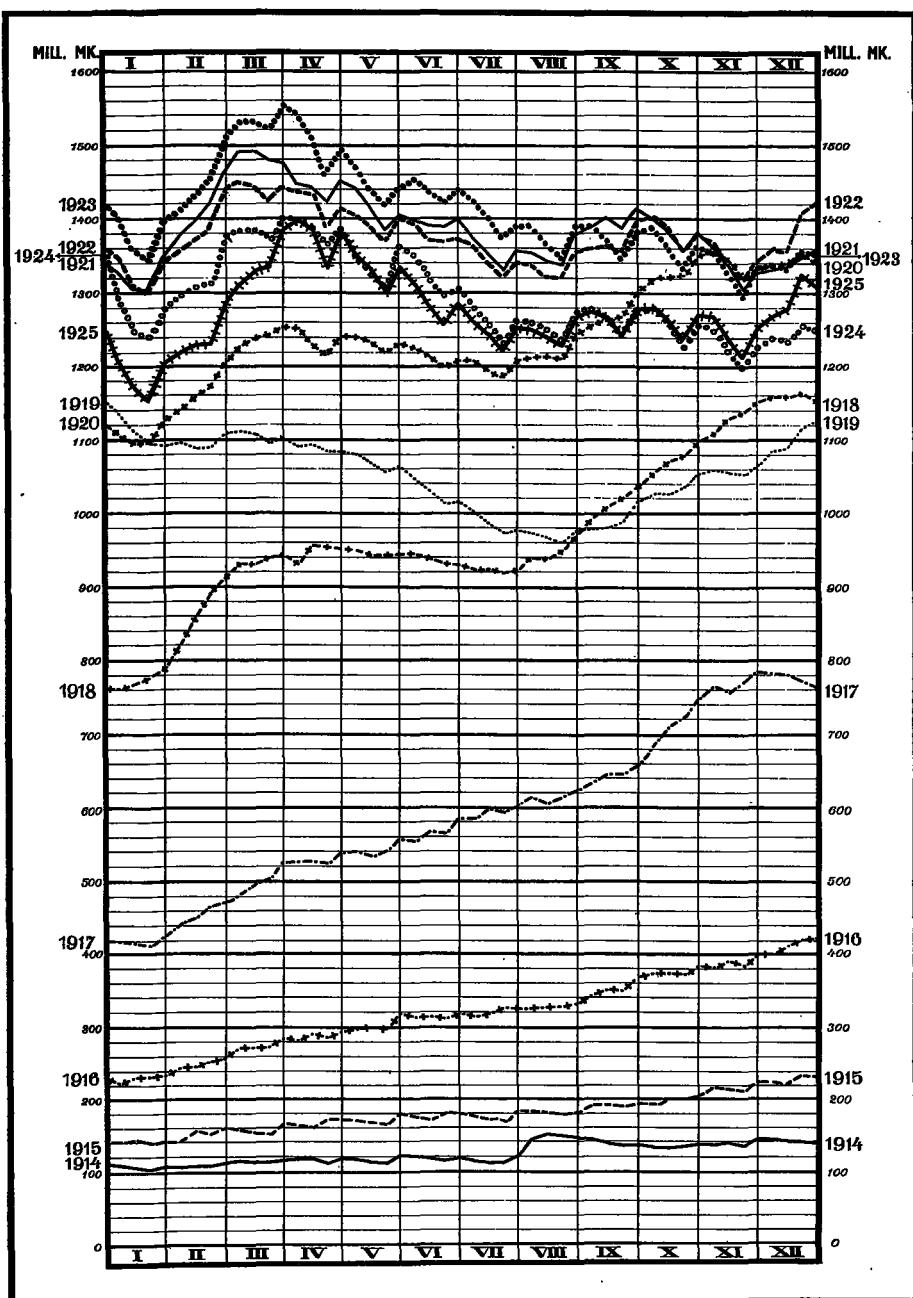

The note issue of the Bank of Finland is illustrated in tables 1—10 in the statistical part of the present publication. Of these, table 1 refers only to 1925, whereas in the others a review is given partially for previous years. The tables are based on both the weekly and monthly balance sheets of the Bank, excepting table 2 which is based exclusively on the monthly returns. With regard to the latter table it should be borne in mind that the note issue is generally larger towards the end of a month than at other times. In these, as in several later tables, the figures in the last balance sheet for 1925 have, as a rule, been left out of account, when calculating the highest, lowest and average figures for the whole year, as that balance sheet, drawn up in accordance with the provisions of the new monetary law and the new regulations for the Bank of Finland, is not comparable in all respects with the other balance sheets during the year.

The Right of Issue. Up to the last balance sheet of the year the note issue of the Bank of Finland was regulated on the basis of the law of December 30th, 1921. According to the latter the Bank's right of issue was equivalent to the amount of its gold reserve and foreign credit balances plus 1,500 million marks, though with the proviso that such part of the note circulation and liabilities payable on demand as was not covered by gold or foreign balances, was covered by assets included in the so-called supplementary cover.¹⁾

According to the above provisions that part of the right of issue which was not already covered by assets included in the supplementary cover, has been deducted from the right of issue in the calculations (see table 21)

¹⁾ A more detailed account of the provisions for the note issue of the Bank of Finland will be found in the Year Book for 1922.

BANK OF FINLAND NOTES IN CIRCULATION IN 1914—1925.

which are published in connection with the balance sheets of the Bank of Finland, or in other words the difference between 1,500 million marks and the supplementary cover. As, however, the latter is increased proportionately, for instance, on bills being discounted, this deduction should, nevertheless, in reality be considered as part of the right of issue. In accordance with this the *total* right of note issue has been included in table I of this Year Book. In the new regulations for the Bank of Finland, issued on December 21st, the provisions with regard to the right of note issue were altered in the manner already explained.

Leaving the last balance sheet of the year out of account, the right of note issue was, on an average, 2,609.1 million marks. As the average for the year before was 2,158.2 million marks, the increase which was due to the rise in the reserve of foreign currency, amounted to approximately 450 million marks. — The provisions of the new regulations did not cause any particular change in this respect, seeing that the increased value of the gold reserve was almost balanced by a reduction in the uncovered contingent.

The Note Circulation. During the first half of 1925 and up to the middle of September notes were generally in circulation to a slightly smaller amount than during the previous year, but during the last few months of the year the supply of notes exceeded the amount of the year before. The average note circulation was 16.3 million marks less than in 1924, as will be seen from the following figures (in million marks):

	Notes in circulation.		
	Maximum.	Minimum.	Average.
1922	1,449.9	1,300.2	1,374.0
1923	1,555.1	1,298.1	1,409.8
1924	1,399.6	1,198.6	1,292.9
1925	1,399.9	1,154.8	1,276.6

The accompanying diagram makes it clear, and it has been pointed out in previous issues of this Year Book, that the need for a medium of exchange varies considerably in Finland at various seasons of the year. The increase in the note circulation early in the year is most to be noted. From the third week in January the note supply rises rapidly up to the middle or end of March. This is very likely due to large quantities of notes being sent to distant parts of the country for forest work, whence the notes only come

back into circulation gradually. Another smaller increase occurs in September—October, probably owing to the increasing circulation of money in agriculture during harvest time. A third insignificant increase towards the end of the year is to be explained by payments consequent on annual agreements etc. Between these heights lie valleys in January, August and November, in each case in the third week of the month. Apart from these more important changes it will be seen that the note supply is greater at the end of the month for easily intelligible reasons.

The periodical changes indicated above have been very clear and regular since November, 1920, when the inflationary increase of notes may be said to have ceased.

The Constitution of the Note Circulation. The constitution of the note circulation, as illustrated in table 8, has been almost unchanged for the last few years which goes to show that conditions in this respect, too, have become stabilised.

As regards the number of notes, the following quantities of the different denominations were in circulation at the end of 1921—1925, disregarding older issues, among which in 1923 and 1924 all types of notes issued prior to 1909, and in 1925 all types except those of the 1922 issue, are classed.

Actual notes.	1921	1922	N u m b e r.		1924	1925
			1923			
1,000 marks ...	416,042	428,520	404,168		362,347	361,139
500 » ...	459,982	482,620	430,964		378,432	413,438
100 » ...	4,642,405	5,230,546	5,013,081		4,828,349	4,735,797
50 » ...	2,031,546	2,138,603	2,225,407		2,009,196	2,047,300
20 » ...	3,011,691	2,271,547	613,461		227,860	—
10 » ...	4,224,442	4,176,731	6,252,930		6,567,824	7,137,598
5 » ...	4,921,498	5,043,078	5,158,900		5,415,000	5,082,499
Total	19,707,606	19,771,645	20,098,911		19,788,954	19,777,771

The temporary small notes (at 1 mark and 50 and 25 penni) that were in circulation in 1920 to a number of 34.2 million notes, have gradually had to give way to the nickel coins. At the end of 1924 — figures for 1925 are not available — 9.9 millions of these notes were still in circulation according to the books, but a considerable part of them must in reality have been worn out or been lost in some other way.

Nickel coins were in circulation at the end of 1922—1925 in the following quantities (marks):

	1 mark.	50 penni.	25 penni.	Total marks.
1922	16,335,273: —	4,870,632: 50	2,047,680: 75	23,253:586: 25
1923	17,687,094: —	4,801,661: 50	3,745,783: —	26,234,538: 50
1924	17,951,151: —	5,211,036: —	4,261,588: 25	27,423,775: 25
1925	19,335,661: —	5,607,138: —	4,732,736: —	29,675,535: —

Production and Destruction of Notes. The number of notes printed last year (1922 design) at the note printing works was 10,210,000, their value constituting 264,300,000 marks. The notes withdrawn from circulation and destroyed amounted in number to 15,990,278 to a monetary value of 614,639,805 marks. Their destruction was carried out by means of burning in the central furnaces of the Bank.

The Note Reserve. The difference between the right of note issue and the total liabilities payable on demand (which are referred to in table 1 under the heading »Used Right of Issue«) indicates the amount of the note reserve of the Bank of Finland. In that table the note reserve, both conditional and unconditional (see page 31), is included.

Calculated according to the method last mentioned, the note reserve in 1925, leaving out of account the last balance sheet of the year, averaged 740.8 million marks or almost exactly twice as much as for the year before, when the corresponding amount came to 369.1 million marks. The minimum amount of 539.6 million marks (on March 31st) was only slightly lower than the maximum amount for the previous year, viz., 597.5 million marks, and several times as high as the minimum for that year, 143.6 million marks. The proportion between the note reserve and the total right of issue varied between 22.5 % and 33.0 %, being 28.3 % on an average. These proportional figures are considerably higher than the corresponding figures for any year since the outbreak of the war, and are already almost as high as was the rule before the war. — According to the balance sheet on the last day of December the corresponding proportional figure was 26.0 %.

2. COVER FOR THE NOTE ISSUE.

The Bank of Finland's cover for the note issue is shown in tables 11—15. These tables are based on weekly, as well as monthly balance sheets, with the exception of table 15 in which only the cover for the note issue at the

end of 1925 is dealt with, as it was taken at the closing of the books in accordance with the new regulations for the note issue.

A. The Ordinary Cover.

The ordinary cover, i. e. the sum of the gold reserve and balances with foreign correspondents, varied in 1925, if the last balance sheet of the year be set aside in this case, between 832.9 million marks on January 8th and 1,413.1 million marks on December 23rd and averaged 1,109.1 million marks. As the corresponding average for the previous year was 658.1 million marks, the increase in the ordinary cover was approximately 450 million marks. According to the balance sheet for December 31st the ordinary cover amounted to 1,739.6 million marks, or, consequently, an appreciably higher total than before.

The Gold Reserve. No actual changes occurred during the year in the extent of the gold reserve. At the same time its value in the books was altered owing to the reform of the currency. The gold reserve had constantly been booked at its nominal value according to the old currency law, i. e. one kilogramme of fine gold at Fmk 3,444: 44, in contradistinction to other items in the balance sheet which were booked in paper marks without regard to the fluctuations in their value. Since the new monetary law came into force the gold reserve was revalued in new gold marks, its value being appreciated to 331.6 million marks.

The proportion of the gold reserve to the amount of notes and of the gold reserve to all liabilities payable on demand, will be found in tables 13 and 14. These comparative figures are, however, of slight importance, as the value of the gold reserve is calculated in old gold marks and the liabilities compared with it in papermarks. The figures calculated according to the last balance sheet for 1925, which are not included in the tables referred to, are of greater interest. On December 31st the gold reserve constituted 25.3 % of the notes in circulation and 15.3 % of all liabilities payable on demand. The gold reserve and balances with foreign correspondents together amounted to 132.9 % of the notes in circulation and 80.1 % of all liabilities payable on demand.

Balances with Foreign Correspondents. At the end of 1924 the Bank of Finland's reserve of foreign currency, including a foreign credit negotiated

with a view to strengthening it, amounted to 793.9 million marks. When the credit expired early in February, the agreement was renewed for another year. Owing to the rise in the rate of exchange for pounds, the amount of the credit rose from 244.8 to 256.2 million marks. When the funds belonging to the loan taken up abroad by the Government reached Finland in the first days of April, the reserve of foreign currency rose rapidly to 1,133.2 million marks. During the spring and summer a great deal of foreign currency was required, partly for repayment of current indebtedness, so that the Bank of Finland's reserve of foreign currency sank gradually and reached its lowest point at the beginning of September, viz., 954.5 million marks. The usual seasonlike accumulation of foreign currency at the Bank during the later months of the year increased the reserve of foreign currency again to 1,407.9 million marks by the end of the year. The Bank has never before had such a large reserve of foreign currency as regards its nominal amount.

B. The Supplementary Cover.

The reform of the currency involved, as mentioned on page 20, a change in the composition of the supplementary cover, seeing that not all the funds could be referred to it, as previously. Below these funds are touched on, at first, in accordance with table 11, that continue to be considered as supplementary cover.

Inland Bills. The largest item forming the supplementary cover is composed of inland bills. Before the currency reform they averaged about 49.8 % of the total sum of the supplementary cover in 1925, but according to the balance sheet for December 31st the corresponding proportion had risen to 80.5 %. The inland bills are referred to in greater detail in connection with other home loans.

Foreign Bills. In 1925 the Bank of Finland discounted foreign bills altogether for 434.9 million marks or considerably less than the year before, when the corresponding value was 605.4 million marks. But, while the foreign bills in former years were mostly bills payable at sight that are presented for encashment at once, so that there were only a few millions' worth in the portfolio of the Bank, their total rose quickly from June, 1925,

so that in the middle of November it exceeded 100 million marks. In the portfolio their amount varied during the year between 0.0 and 112.1 million marks and was on an average 38.1 million marks. For 1924 the corresponding average was 2.1 million marks.

Foreign Notes and Coupons. No great importance attaches to notes and coupons in foreign currency as supplementary cover. At the end of the year the Bank held them to a value of 1.5 million marks.

With regard to such funds as were no longer included in the supplementary cover in the balance sheet for December 31st, the following may be said.

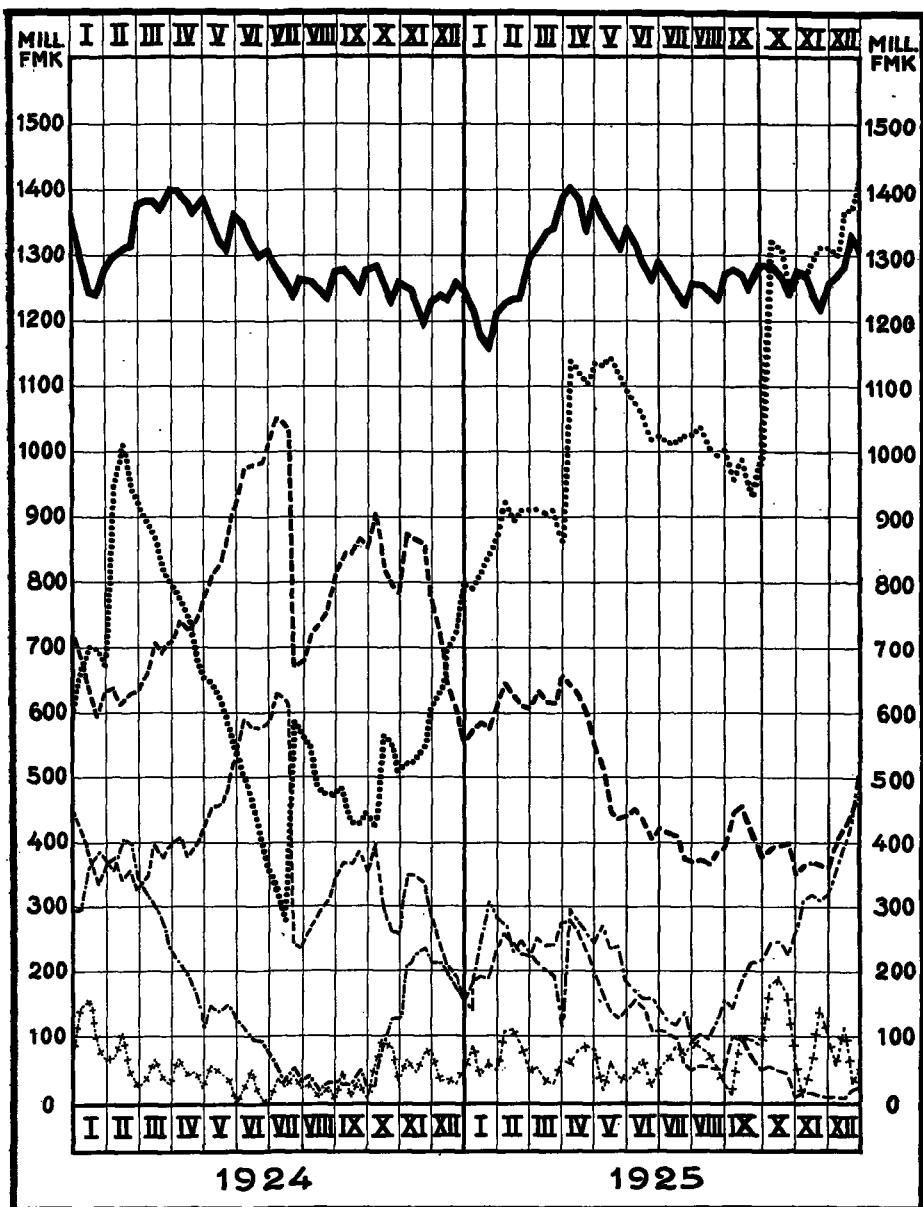

Finnish Silver Coin. Minted Finnish silver coin continued to be booked at its nominal value and no change worth mentioning has occurred in its amount since it disappeared from circulation in 1918. At the end of 1925 its value in the books stood at 547,900 Finnish marks.

Bonds in Foreign Currency. During 1925 the Bank of Finland acquired bonds issued in foreign currency to considerable amounts so that the value of such funds rose from 3.8 million marks at the beginning of the year to 17.6 million marks at its end. The greater part of these bonds belonged to the Finnish Government's foreign loans.

Finnish Government Bonds in Finnish Currency. Before the regulations for the Bank of Finland were altered, Government bonds in Finnish currency formed an important part of the supplementary cover, seeing that in 1925 they averaged 41.2 % of the total. Their value was reduced considerably in the course of the year, from 434.1 million marks at the beginning of the year to 325.2 million marks at the end. The falling off was due principally to the redemption of bonds belonging to the Communications Loan of 1918, but also in part to regular amortisation of bonds and depreciation of their booked value.

Government Short-Term Liabilities. The Bank of Finland's claims against the Government included in the balance sheets under this heading are made up of a compensation which the Government has undertaken to repay to the Bank in the course of a few years for certain Russian securi-

THE PRINCIPAL ACCOUNTS OF THE BANK OF FINLAND IN 1924—1925.

— Notes in circulation.

- - - Credits to the public and banks.
- - - Bills re-discounted.

..... Foreign credit balances.

- - - - Treasury's current account.
+ + + Other current accounts.

ties, now rendered worthless. At the beginning of 1925 the amount in question was 48 million marks and of this 12 million marks were repaid during the year in accordance with the decision of the Diet passed on March 2nd, 1923. As, according to this decision, these liabilities are to be paid off annually at the same rate, this account will disappear entirely from the balance sheet of the Bank at latest in 1928. No interest is paid by the Government on the amounts due.

3. HOME LOANS.

The home loans of the Bank of Finland to the Joint Stock banks and the public for each week during 1925 are shown in table 17 and the loans at the end of each month during 1918—1925 in table 18. Thus these tables do not include the indebtedness of the Government to the Bank which is included in table 11 only.

Credits to the Banks. Credits to the banks which took the form of re-discounts exclusively, amounted to 158.1 million marks at the beginning of the year and grew, though not uninterruptedly, until the beginning of April, when the total was 278.1 million marks. This was followed by a reduction up to the end of August, and after a slight rise at the beginning of September, again to the middle of December. From the lowest point of 10.7 million marks, which was reached at that date, re-discounts rose again, so that at the end of the year they amounted to 25.9 million marks. Whereas the re-discounts in 1924 averaged 373.6 million marks, the corresponding amount dropped in 1925 to only 125.5 million marks. The reduction in the Joint Stock banks' requirements of credit at the Bank of Finland to next to nothing goes to show clearly, to how high a degree the Finnish money market had improved during 1925. While the re-discounts at the end of 1923 represented 62.0 % of the credits granted by the Bank of Finland to the banks and the public and the corresponding proportion at the end of 1924 was still 28.7 %, it had come down to only 5.4 % by the end of 1925.

Credits Granted to the Public. Credits granted to the public or in other words the direct credits granted for the requirements of the business world

in the form of discounted bills, loans on mortgage and advances on current account, which had increased appreciably in 1924, grew to some extent, too, during 1925. Credits granted in the form of loans on mortgage and advances on current account were raised several times over, the former from 4.3 million marks at the beginning of the year to 31.1 million marks at its end, the latter likewise from 7.2 to 23.7 million marks. Nevertheless, the discounting of bills is of far greater importance than these forms of credit. The amount of bills discounted directly at the beginning of the year was 381.5 million marks. Decreasing continually at first, this amount reached its lowest point, 282.4 million marks, in the middle of June, after which it slowly rose during the summer and autumn, to rise rapidly in the beginning of December. This rise was caused by the Bank of Finland's conscious endeavour to increase its direct credits in order thereby to force down the level of rates of the Joint Stock banks. At the end of the year the amount referred to was 398.2 million marks, or slightly higher than when the year began. On an average the Bank held directly discounted bills in its portfolio in 1925 to a total of 333.0 million marks or about 60 million marks less than during the previous year.

4. LIABILITIES PAYABLE ON DEMAND.

The liabilities of the Bank of Finland payable on demand during 1925 are dealt with in table 16 which is based on both the weekly and monthly balance sheets. In this connection the remark should be repeated that the total of these liabilities does not correspond exactly to the total used right of issue given in table 1, as the balance sheets do not include in the former amount the undrawn amount of advances on current accounts which figures only in the calculations respecting the right of note issue.

The liabilities payable on demand are treated below in the order in which they appear in the balance sheets of the Bank.

Notes in Circulation. Owing to their special importance the notes in circulation have been dealt with separately in chap. I to which the reader is referred.

Bank-Post-Bills in Circulation. Bank-post-bills issued by the Bank of Finland are put into circulation either by the Bank's own or by the pub-

lic's remittances of money in this form. Such bills are sold by the Bank without commission. During the last four years the Bank of Finland issued and redeemed bank-post-bills to the following amounts (in millions of marks):

	Issued.	Redeemed.	In circulation at end of year.
1922	442.0	439.4	5.4
1923	525.8	524.2	7.0
1924	800.6	799.5	8.1
1925	1,031.1	1,031.1	8.1

According to these figures the business of the Bank of Finland in bank-post-bills increased very much in 1925. The amount of bank-post-bills in circulation varied in the course of the year between 5.1 and 15.7 million marks and averaged 8.8 million marks.

Current Accounts. Next to the notes in circulation the amounts deposited on current account usually form the largest item of the Bank of Finland's liabilities payable on demand and the Bank does not pay any interest on such amounts.

The Government's balances on current account fluctuated between 95.3 and 505.7 million marks and amounted on an average to 229.7 million marks or an amount about 60 million marks above the average for 1924.

The amounts deposited on current account by others than the Government, which consist principally of the cash of the Joint Stock banks, varied between 14.0 and 189.2 million marks and averaged 73.8 million marks, also an appreciably higher amount than for the previous year.

Bills Collected. Under this heading sums are included in the balance sheet of the Bank of Finland which have come in through the encashment of bills and which have not yet been accounted for. The bills entrusted to the Bank for encashment were almost exclusively received from abroad. The equivalent of the bills collected in Finnish marks was almost the same in 1925 as in the year before or 101.6 million marks. The liabilities of this nature included in the balance sheets in 1925 averaged 1.0 million marks and varied between 0.1 and 4.1 million marks.

Annuities. This group of the Bank of Finland's liabilities originated owing to the Bank, acting as agent by agreement, redeeming coupons and

drawn bonds chiefly of Government, but also of certain Municipal loans. For the due date the respective issuers of the bonds remit the amounts required for redemption, but as all the holders of coupons and bonds do not draw the amounts due to them on that date, the Bank has almost always some funds in hand on this account. In 1925 the amount of these liabilities varied between 0.4 and 11.1 million marks and averaged 2.3 million marks.

Foreign Correspondents. One of the largest items among the liabilities payable on demand is made up of debts due to correspondents abroad. This debt consists of the credit balances of the Bank's correspondents in Finnish marks (*conti lori*) on which the Bank pays interest according to agreement. The amount of these varied in 1925 between 3.3 and 10.6 million marks and averaged 5.9 million marks or considerably less than in the previous years, when the corresponding averages were 13.1 million marks in 1924 and 26.7 million marks in 1923.

Foreign Credit. The foreign credit taken up by the Bank of Finland in February, 1924, for strengthening its reserve of foreign currency and renewed a year later, which has been dealt with in the foregoing, is included in the balance sheet as a liability payable on demand in order not to increase the Bank's right of note issue, which would not have been compatible with the object of existing provisions.

Sundry Accounts. In these accounts, also belonging to the liabilities payable on demand, advances are chiefly entered, i. e. funds set aside for payments which have been received before the due date. Such liabilities fluctuated between 8.0 and 28.0 million marks and averaged 15.2 million marks.

5. BALANCE SHEET AND RESOURCES OF THE BANK.

The balance sheet of the Bank of Finland at the end of the Year. The balance sheet at the end of 1925 is given in table 20. A comparative review of the balance sheets of the Bank at the end of 1921—1924 and 1914—1920 is included in tables 21 and 22. These tables are drawn up

in accordance with the results published in the Bank's annual reports, but with the difference that among »Other assets» some minor items have been combined.

All the more important items in the Bank's balance sheet have already been dealt with above excepting the Bank's own resources which are treated in detail below.

Resources of the Bank. The Bank of Finland's funds during 1871—1925 appear in table 23.

The capital of the Bank at the beginning of 1925 was 100 million marks and its reserve fund 50 million marks. In connection with the currency reform the capital of the Bank was raised to 500 million marks. This was accomplished by the enhanced value of the gold reserve, 288.3 million marks, as also an amount of profits at disposal for previous years, amounting to 111.7 million marks, being transferred to capital. The balance of the latter funds was transferred to the reserve fund, so that the latter rose to 50.7 million marks. At the end of the year the profits for the past year became available for disposal, 82.7 million marks, which according to the new regulations for the Bank have to be transferred in their entirety to the reserve fund.

Those assets which correspond to the value of the premises and furniture of the Bank amounted at the end of 1925 to 12 million marks or the same amount as a year before. The Bank of Finland owns, in addition to the premises in which its head office is situated, two houses in Helsingfors for the staff and premises for branch offices in 10 other towns. The booked value of the premises, 12 million marks, is only a fraction of their actual value.

6. EARNINGS AND EXPENSES AND DISPOSAL OF PROFITS.

Earnings and Expenses. The earnings and expenses of the Bank of Finland during 1919—1925 are seen in table 24 which constitutes a summary of its Profit and Loss accounts for those years published in the Annual Reports.

The earnings of the Bank of Finland amounted to 113.3 million marks in 1925, a slightly smaller amount than in 1924. The reduction was due

chiefly to home loans having fallen off and the bank rate having been lowered. On the other hand foreign investments brought in considerably more than during previous years. The expenditure amounted to 30.7 million marks, so that they, too, were appreciably less than in former years, due to the fact that such large depreciation was not necessary as in the past.

The net profits of the Bank for 1925 were 82.7 million marks as compared with 65.4 million marks for the previous year and 10.5 and 13.5 million marks respectively for 1922 and 1923. Consequently, in this respect, too, it will be noticed that the business of the Bank again stands on a normal basis.

The net profits would have been considerably higher in 1925, if stocks and shares in the possession of the Bank had not been depreciated by 36.4 million marks. As the market value of the stocks, seeing that the Bank owns mostly 5—6 % paper, is much less than their face value (70—80 % of it) owing to the current high rate of interest, the Bank has of late years continuously reduced the booked value of its holding of stocks, in order to obtain values corresponding to the market prices. — As the Bank acquired shares to a value of 2.3 million marks during the year under review in the paper mill, in which the paper for its bank notes is produced, their value was completely written off the Bank's books in accordance with the method previously adopted.

Appropriation of Profits. At the end of 1924 there were, on the one hand, profits at disposal available to an amount of 47.0 million marks, which were to be employed, according to the decision of the Diet, in strengthening the position of the Bank of Finland, and on the other hand the profits for that year, 65.4 million marks, the employment of which had not been decided. All these funds were used, as already stated, in connection with the currency reform to strengthen the capital and reserve fund of the Bank. Likewise the profits for 1925, 82.7 million marks, were transferred, without any special decision, to the reserve fund of the Bank, the amount of which in the first balance sheet for 1926 thus amounted to 133.4 million marks.

7. VARIOUS BRANCHES OF BUSINESS.

Clearing Operations. The clearing operations at the head office of the Bank of Finland which began on September 1st, 1906, will be found illustrated in table 26, embracing the years 1907—1925, and the clearing operations at five branch offices which were started in May, 1922, in table 27, which refer to the years 1923—1925.

The progress of clearing operations at the head office of the Bank is shown in the following review.

Year.	Bank-Post-Bills.				Cheques.				Total.	
	Number.		Amount.		Number.		Amount.		Number.	Amount. Mill. mks.
	Quant.	%	Mill. mks.	%	Quant.	%	Mill. mks.	%		
1921.....	339,525	82.3	3,772.8	45.8	73,204	17.7	4,461.5	54.2	412,729	8,234.3
1922.....	422,969	82.5	4,155.6	40.3	89,587	17.5	6,161.1	59.7	512,506	10,316.7
1923.....	546,406	80.5	4,583.8	34.9	132,142	19.5	8,555.1	65.1	678,548	13,138.9
1924.....	556,950	78.6	4,800.3	40.2	151,528	21.4	7,128.0	59.8	708,478	11,928.3
1925.....	607,589	76.8	5,034.9	41.5	184,014	23.2	7,103.0	58.5	791,573	12,137.9

According to these sets of figures the number of bank-post-bills and cheques increased considerably during 1925, as in the preceding years. The amount of bank-post-bills also rose continuously, while, on the contrary, the amount of cheques, which began to fall in 1924, was now, too, reduced to some extent.

A continual reduction can be observed during the last few years in the average size of bank-post-bills and cheques, as is shown in the following averages:

	Bank-post-bills. Marks.	Cheques. Marks.
1921	11,112	60,946
1922	9,825	68,810
1923	8,389	64,742
1924	8,619	47,041
1925	8,287	38,600

The clearing operations at the branch offices rose from 3,618.4 million marks in 1924 to 3,818.1 million marks in 1925 and amount to almost one third of the clearing operations at the head office. In this connection it should be remarked that both bank-post-bills and cheques were, on an average, much smaller in the clearing operations of the branch offices than in those of the head office, the bank-post-bills being of greater im-

portance in comparison with the cheques in the branches than in the head office.

Deposits. For a long time the Bank of Finland has accepted, on prescribed conditions, valuables as safe deposits in sealed packets as well as securities or so-called open deposits. With regard to the latter particulars will be found in table 28. As this table shows, this branch of the Bank's business has of late been falling off. At the end of 1925 the number of open deposits left in the custody of the Bank was only 15 to a total value of 128.1 million marks; the corresponding figures for the previous year were 25 and 132.2 respectively. The deposits left in the care of the Bank in regard to which the Bank watches the drawing of bonds, encashment of coupons etc., amounted to 31 in number to a total value of 10.6 million marks; at the end of 1924 the corresponding figures were 38 and 10.8 respectively.

IV. THE JOINT STOCK BANKS DURING 1925.

As the business of the Bank of Finland and the changes occurring in its position are greatly influenced by the general state of the money market; a number of tables illustrating the position of the Joint Stock banks (tables 34—37) and at the same time the state of the money market, are included in this year-book. The following particulars with regard to the Joint Stock banks are based partly on these tables and partly on other information contained in the official statistics concerning the Joint Stock banks. These statistics are published in the middle of May by the Bank Inspectorate of Finland.

Number of Banks. At the beginning of 1925 there were altogether 19 Joint Stock banks in Finland, nor did anything occur during the year to alter this figure. Neither was there any need this time for the kind of reorganization that had proved necessary in a few cases in the previous year. The working of the banks has, on the contrary, been restored to a regular basis.

The total number of banking offices amounted at the commencement of the period under review to 466, this figure including the head and branch offices of the Joint Stock banks, as well as the 14 offices of the Bank of Finland. New offices to the number of 27 were opened during the year, bringing the total at the end of 1925 to 493. The ratio of banking offices to population worked out at one office per about 7,200 inhabitants. In addition to these offices, certain banks possess sub-offices, chiefly for the receipt of deposits.

Most of the banks are comparatively small and the business is in a great measure concentrated in the hands of the four largest banks. These account together for about 75 per cent of the aggregate balance sheet for all the Joint Stock banks.

Financial Position of the Joint Stock Banks. The combined Balance Sheets of the Joint Stock banks, at the end of the years 1922—1925, give the following position.

Assets

	1922 Mill. mks.	1923 Mill. mks.	1924 Mill. mks.	1925 Mill. mks.
Cash	245.2	261.7	212.7	291.1

Rediscounted bills	155.6	442.8	152.0	25.7
Sundry liabilities	222.2	228.7	282.1	219.8
Total	6,943.0	7,705.0	7,657.5	7,478.8

The most important items in the above Balance Sheet will be dealt with in the following.

Own Funds. The most important of the banks' own funds, viz., the share capital and reserve funds, are dealt with in the compilation below. As those changes in the banks' own funds which depend on the results for

¹⁾ Comprising chiefly advances on current accounts.

the year cannot be seen from annual Balance Sheets, but from the first Balance Sheet following on the General Meeting of shareholders, the funds in question are given below according to their amount *at the end of March* in each year, by which time every bank had held its General Meeting.

	^{31/3} 1924 Mill. mks.	^{31/3} 1925 Mill. mks.	^{31/3} 1926 Mill. mks.	1923 Mill. mks.	Movement 1924 Mill. mks.	1925 Mill. mks.
Share capital ..	868.0	755.0	756.0	+ 5.0	- 113.0	+ 1.0
Reserve funds ..	283.5	307.2	330.6	+ 29.1	+ 23.7	+ 23.4
Total	1,151.5	1,062.2	1,086.6	+ 34.1	- 89.3	+ 24.4

Share capital has in every case but one remained at its previous level; in the beginning of the present year several banks made decisions to increase their share capital, but this does not yet appear in the figures given above. On the other hand, appreciable movements occurred in reserve funds. Fourteen banks added larger or smaller sums to their reserves, the total increase amounting to 24.6 mill. mks. One bank, which had suffered losses, withdrew 1.2 mill. mks. from its reserves, while four banks kept theirs unaltered. — The development in respect of the combined own funds of the banks is much more favourable than in the previous year, the aggregate amount of these funds standing at the end of last March at 1,086.6 mill. mks.

Home Deposits. The home deposits of the Joint Stock banks (which include a comparatively insignificant amount of long-term deposits of Finnish marks by foreign depositors) amounted at the end of the years 1923—1925 to the following figures.

	1923 Mill. mks.	1924 Mill. mks.	1925 Mill. mks.	1923 Mill. mks.	1924 Mill. mks.	1925 Mill. mks.
Current accounts ..	605.7	643.8	625.4	— 9.6	+ 37.6	— 17.9
Home corresp.	690.2	1,062.5	671.0	+ 283.3	+ 372.4	— 391.5
Deposits	3,056.8	3,273.2	3,684.4	+ 276.4	+ 216.9	+ 411.2
Savings accounts ..	394.2	422.8	484.0	+ 60.4	+ 28.6	+ 61.2
Total	4,746.4	5,401.8	5,464.8	+ 610.5	+ 655.5	+ 63.0

At a first glance the result may seem unfavourable, but in reality the contrary is the case. The great increase in 1924 depended to a considerable extent on the founding of the Industrial Mortgage Bank and the temporary deposit of 230.2 mill. mks. of the funds of that institution in the Joint Stock

banks. As mortgages were granted, the greater part of these means was withdrawn, so that at the end of the year 1925 only 52.0 mill. mks. still remained on deposit. As another disturbing factor the Government deposits in the Joint Stock banks can be accounted. These decreased in 1924 by 74.2 mill. mks., and in 1925 by no less than 235.0 mill. mks. to 123.6 mill. mks. On the other hand it may be remarked that the Mortgage Association of Finland deposited in the Joint Stock banks its Government loan of 100 mill. mks., of which only 15 mill. mks. had been put to their intended use by the end of the year. Long-term deposits (deposits and savings accounts), which best represent the deposits of the ordinary public, increased during 1925 by 472.4 mill. mks., or almost twice as rapidly as in the previous year.

Home Loans. The total credits granted by the Joint Stock banks within the country during the years 1923—1925 appear from the following compilation.

	Movement					
	1923 Mill. mks.	1924 Mill. mks.	1925 Mill. mks.	1923 Mill. mks.	1924 Mill. mks.	1925 Mill. mks.
Inland bills	2,147.2	2,034.4	1,928.2	+ 241.3	— 112.8	— 106.2
Loans	1,916.0	1,975.0	1,894.1	+ 87.1	+ 59.0	— 80.9
Overdrafts	857.5	874.2	932.7	+ 100.4	+ 16.7	+ 58.5
Home corresp.	1,940.9	1,886.8	1,751.7	+ 285.1	— 54.1	— 135.1
Total	6,861.6	6,770.4	6,506.7	+ 713.9	— 91.2	— 263.7

It will be seen that the credits granted by the banks had decreased considerably, this applying equally to bills, loans and home correspondents; only overdrafts have risen slightly. The decrease is due chiefly to the transfer of certain industrial credits during the opening months of the year to the Industrial Mortgage Bank, and to the fact that in the absence of any noteworthy extensions of plant the industrial concerns were able appreciably to diminish their loans at the banks. The Joint Stock banks were consequently enabled to lower the amount of their rediscounts at the Bank of Finland by 126.3 mill. mks., so that at the end of 1925 these stood at only 25.7 mill. mks. The decrease further obviated any difficulties that might have been caused by the withdrawal of foreign mark deposits.

The tension between deposits and loans, from being 1,368.6 mill. mks. at the end of 1924, decreased during 1925 by 326.7 mill. mks. to 1,041.9 at the end of the year.

Position towards Foreign Countries. Before the Great War it was the rule for the outstanding foreign balances of the Joint Stock banks to exceed their indebtedness to other countries. During the war a change occurred in these relations, becoming more pronounced in the years immediately after the war, when indebtedness to other countries assumed considerable proportions. The chief reason for this new state of affairs was that, as the Finnish mark depreciated in value, large quantities of marks were purchased by foreign investors who hoped to benefit by a subsequent rise in the mark and who for the time being were content to deposit their marks in the Finnish banks. During the course of 1923 it began to be apparent, however, that no attempt was to be made to raise the mark to par, and that it would probably be stabilised at about the level at which it then stood. Thus, when it became certain that no profits were to be anticipated, these deposits began to be withdrawn. Between April, 1923, and the end of 1924, foreign indebtedness decreased altogether from 1,117.4 mill. mks. to 451.5 mill. mks., or by 665.9 mill. mks., in which is included indebtedness in foreign currency. The strain on the banks was enormous, but with the help of Government deposits and the relief afforded by the foreign loan of the Industrial Mortgage Bank, the process could be carried out without serious loss. The decrease in foreign indebtedness still continued in 1925, though this time the amount, 117.0 mill. mks., did not occasion appreciable difficulties.

The movement outlined above is likewise apparent in the table appended below, in which indebtedness to other countries comprises also debts in foreign currency (*conti nostri*).

End of year,	Credit balances Mill. mks.	Indebtedness Mill. mks.	Net indebtedness Mill. mks.	Movement in net indebtedness
				Mill. mks.
1917	57.9	75.6	17.7	+ 18.3
1918	60.6	158.7	98.1	+ 80.4
1919	108.9	561.3	452.4	+ 354.3
1920	54.6	795.9	741.3	+ 288.9
1921	86.8	994.6	907.8	+ 166.5
1922	72.3	971.8	899.5	- 8.3
1923	92.1	810.2	718.1	- 181.4
1924	129.1	451.5	322.4	- 395.7
1925	140.9	334.5	193.6	- 128.8

It will be seen from these figures that the decrease in indebtedness was accompanied by a slight increase in credit balances abroad. The decrease in the net indebtedness has thus been particularly rapid, and the trend is

obviously towards a resumption of the relations normally prevailing before the war. As, moreover, the majority of the foreign deposits in marks were sight deposits, their withdrawal has greatly added to the liquidity of the banks.

If we add to the above figures, which reflect the net position towards foreign countries of the Joint Stock banks only, the corresponding figures for the Bank of Finland, the following compilation is obtained.

Year	Net indebtedness (—) or net credit balance (+). ¹
1921	— 704.7
1922	— 220.7
1923	— 128.0
1924	+ 229.3
1925	+ 1,049.1

In 1924 the adverse balance had thus become a balance in Finland's favour, which further improved at a specially rapid rate in 1925. In the course of four years the position of all banks towards foreign countries has improved to a total extent of approximately 1,750 mill. mks.

The Year's Results. In 1925 one of the banks incurred a loss of 1.2 mill. mks.; all others showed profits amounting in the aggregate to 136.1 mill. mks., the net profit for the combined banks being thus 134.9 mill. mks. The net result for 1924, when, too, all the banks except one earned profits, was 117.4 mill. mks., so that the results for last year denote a considerable improvement. Depreciations amounted altogether to 27.1 mill. mks. The chief item in this, viz., 18.4 mill. mks., was in respect of bad debts. For the sake of comparison it may be mentioned that the corresponding figures for the previous year were much higher, viz., 32.1 and 22.1 mill. mks., without including the sums written off in connection with the reorganization of the Union Bank.

The dividends paid by the banks during recent years are given in the following table.

Dividend	1920	Number of Banks				
		1921	1922	1923	1924	1925
No dividend	1	6	5	5	5	4
3— 5 %	3	—	4	2	1	2
6— 7½ »	7	5	3	5	3	1
8— 9 »	5	2	2	2	4	5

Dividend 10—11 %	1920	Number of Banks					1925
		1921	1922	1923	1924		
12—13 »	1	2	1	1	2	1	1
14—15 »	—	—	1	1	1	1	1
16—17 »	1	1	1	1	—	—	1
18—19 »	—	—	1	1	2	2	2
20—22 »	1	1	—	—	—	—	—
Total	23	21	20	21	19	19	19

All the larger banks paid the same dividend in 1925 as in 1924; eight banks increased their dividends and two banks which had paid no dividend in 1924 now paid 5—6 per cent. Three banks devoted the whole of their profits to strengthening their position, and one bank, as already mentioned, incurred a loss.

Summary. The year 1925 was on the whole a comparatively favourable one for Finland from an economic point of view. This is reflected, as the above review shows, also in the position of the Joint Stock banks. A number of factors, such as the withdrawal of Government and foreign deposits, retarded the progress of banking business, it is true, yet the growth in deposits is satisfactory and the position of the banks undoubtedly stronger. As the banks now begin to be free from the bad debts accumulated during the period of inflation, they can face the immediate future with confidence. One cannot, however, regard banking as having returned to a fully normal state until the high rates of interest which continue to weigh heavily on all economic life have been brought appreciably lower. The first step in this direction was taken at the end of 1925, and further progress may probably be expected at an early date.

the Year Book for 1922. Un relevé détaillé des lois concernant le droit d'émission de la Banque de Finlande se

correspondents (1,500 mill. marks) and the supplementary cover (see table 11). This amount thus also constitutes referred to the supplementary cover. With regard to the unconditional note reserve (col. 11) no such conditions (1,500 millions de marcs) et la couverture supplémentaire (voir tableau 11). Cette somme constitue donc en réalité une supplémentaire. Le droit d'émission non utilisé absolu (col. 11) peut être employé sans cette limitation.
