## THE FINNISH MARKET REVIEW.

## THE MONEY MARKET.

In our previous reviews we emphasised that a greater liveliness than usual was characteristic of the money market in Findand during the first quarter of the year. Work in the forests, undertaken on a large scale, in particular caused an especially great demand for money in the banks. The Joint Stock banks, however, were able to satisfiy the increased credit requirements with comparative ease, partly owing to home deposits coming in very plentifully, partly also owing to foreign deposits increasing (see table 10). It is true that during these months the demand for credit at the Bank of Finland also grew, but not more than is usual for this time of year.

Under such circumstances the strain on the money market increased only in a slight degree and it would seem as if the culminating point in this respect had already been paseed in April.

The loans of the Joint Stock banks, it is true, increased again by 85.5 million marks, but this increase was very small in comparison with the increase in the previous months, viz., 141.s million marks in February and 210.0 million marks in March. Of the increase in April the greater part, viz., 71.3 million marks, referred to bills. In Finland a large demand for credit may be observed regularly towards the end of the winter, arising principally from the export industry. Before the war export business usually began to repay its credits already in June, but now that advances on exports are taken up to a greater extent than before the war, it is possible that a reduction may be expected to set in a little later.

The deposits of the public in the Joint Stock baniks rose by 53.1 million marks, an amount which may be considered satisfactory, if compared with the corresponding figures for the preceding month, and especially with the same
month of the previous year. This increase was reached by means of long-term deposits increasing by 69.1 million marks, while current accounts decreased by 16.0 million marks. In general, long-term deposits have grown very much in the course of the current year. In the first four months of 1.929 the increase in these deposits amounted to 92.6 million marks, whereas during the corresponding period in 1923 it was 286.3 million marks. If this greater increase than before in long-term deposits be taken into consideration and the fact that loans, as already mentioned, increased considerably, chiefly in connection with short-terim loans, it looks as though the position of the money market were continuing to improve.

As stated above, the debts of the Joint Stock banke to foreign countries, of which about $90 \%$ is made up of foreigners' deposits in Finnish marks, grew continuously. The increase in April was 38.5 million marks and since the beginming of the year 145.6 millions. This arooe mainly from the fact that Finnish marks were sold from Finland, i. e. they were bought for speculative purposes for abroad. This increase of foreign deposits was in so far advantageous as it helped to make it possible to satisfy the increased credit requirements. But, at the same time, it should be borne in mind that the amounts in Finnish marks purchased for speculative purposes are in a great measure exchanged again for foreign currency as soon as Finnish marks are again regulated by gold and the value of the mark ceases to rise.

Among the changes which occurred during April in the position of the Bank of Finland special attention is due to the circumstance that the supply of foreign currency, taking each month as a whole into account, decreased for the first time this year, viz., by 43.4 million marks. The supply of foreign currency at the end of April was, nevertheless, still 61.6 mil-
lion marks greater than at the turn of the year. That this should be the case, in spite of the excess of imports for the same period amounting to 547.5 million marks, is partly owing to the fact that the excess of imports was paid for, to a great extent, out of the advances received on exports, and partly to foreign currency having come into the country through the sale of marks referred to above.

Apart from the falling-off in the supply of foreign currency and the reduction of the Government's current account by 31.8 million marks, the position of the Bank of Finland shows an unbundening: current accounts with others than Government (i. e. with the Joint Stock banks) rose by 65.3 million marks, loans decreased slightly by 10.1 millions, the note reserve increased by 11.3 millions, and the note circulation decreased by 64.3 millions. At the end of April the amount of notes in circulation was 75.4 million marks or $5.3 \%$ greater than at the corresponding date in the previous year.

The value of the Finnish mark abroad continued comparatively strable. The average rate of exchange for dollans for the month of April, viz., 36:43, was only slightly below the average rate for the month before, viz., $36: 45$.

## TRADE AND INDUSTRY.

Finland's balance of trade in April was again very unfavourable. The value of exports amounted to 195.5 million marks, or only $53.1 \%$ of the value of imports which grew to 368.0 million marks. From the beginning of the year to the end of April the excess of imports represented 547.5 million marks. The corresponding amount during 1922 was only 91.9 million manks.

This unfavourable situation in the balance of trade is not due to the fact that exports were less. If last year's and this year's exports during the first four months are calculated at the same prices, the result proves that the value of exports this year was greater than in 1922. The difference between the value of exports oalculated according to the prices ruling at the respective dates is quite insignificant: in 1922 the value of exports during the period in question was 718.8 million marks and this year 699.3 millions.

The cause of the unfavourable balance of trade may, in fact, be laid entirely to the account of imports. Last year the value of imports during the first four months amounted to 810.7 million marks, but this year it was 1,246.8 million marks. An even greater
difference is provided by the volume of imports which in 1922 was $61.7 \%$; but this year 112.2 \% of the value of imports for the corresponding period in 1913. The increase in imports can only partly be explained by the fact that this year large quantities of grain were bought and imported by rail from Russia, whereas last year, on the contrary, grain was imported from other countries only by sea and therefore to an insignificant extent during the winter, when navigation is curtailed by ice conditions. It is therefore difficult to find any other cause for the increased imports than the stimulating influence on imports of the more favourable rates of exchange.

Seeing that the unfavourableness of the balance of trade is due entirely to the greater imports and that it is known that unsawn timber has been sold in greater quantities than before, the opinion is expressed on many sides that the balance of trade for the whole year, in spite of an excess of imports of over half a milliard in the first four months of the yar: need not be unfavourable.
As most of the ports were icebound very late this year, the exportation of timber began later than: usual, in North and East Finland only in the latter part of May. During May, therefore, an unfavourable position of the balance of trade may still be expected.
Sales of timber from Finland have again been lively. By the middle of May about half of the year's production of sawn timber which is estimated to amount at the least to 850,000 standards, had been sold.
In the paper, chemical and meahanical pulp markets no changes worth recording have occurred.

The weather conditions which had given rise to very pessimistic views regarding the autumn prospects, have improved. It is impossible, however, to say to what extent the rainier and warmer weather of the last few weeks has brought on the shoots which had been damaged by the dry weather and cold of April.

## THE LABOUR MARKET.

Labour conditions which had been especially good ever since last summer, were to some extent unsettled in. April and at the beginning of May owing to sundry small strikes occurring. In general, however, these strikes were merely local and shortlived and ended by a return to practically the same conditions as before. As the cost of living had gone down, the demands for higher wages had no real foundation.

## CONTENTS OF THE TABLES.

1. MONEY MARKET.
2. Bank of Finland, balance sheet.
3. " ", ", note issue.
4. , " $"$, note circulation and foreign correspondents.
5. ". " " , bome loans and note reserve.

| 1923 | 145 | 148 | 142 | 142 |  |  |  |  |  |  |  |  | 1923 |

According to flgures published in the *Mercator*.
This revised index series which differs somewhat from those we have given in the past, is based on the prices bid at the end of each month for 18 representative securities, viz., 4 bank, 12 industrial and 2 other kinds of shares. By multiplying the price bid for each security by the number of shares in the corresponding company the so-called oFfxchange values has been arrived at for the share capital of the company, the sum of which values has been calculated in $\%$ of the total nominal palue of the share capital of the same companies. These percentages in the above table usually show a fall during March and April owing to the payment of dividends.

The above table is based on the monthly report on the Publio Debt published by the Treasury in the Ofticial Gazette. Internal loans are given at their nominal value. Foreign loans are given in Finnish currency according to the rate prevailing on the date of the raising of the loan. AB a result of this, loans of an earlier date than 1914 are set down at par.
if Calculated as follows: The losns raised in the country, have been calculated in doilars, according to the average rate of exchange of each month. The loans, negociated abroad, which are all issued in different ourrencies, are grouped according to the proportion of currencies, showed by the coupons paid, and reduced to dollars at the rate of exchange just mentioned.
15. - MISCELLANEOUS STATE RECEIPTS COLLECTED BY CUSTOMS.

The term import; covers all imported goods which have been let out into the market either immediately after importation or after storage.

Export covers all goods exported from the open market, including re-exports.
Goods are notified to the Customs by their owner, who must at the same time state the value of the goods as calculated at the trontiers of the couniry. Consequently, imports are given according to their C. I. F. value and exporta F. O. B.

* Preliminary figures subject to minor alterations.

According to figures supplied by the Statistical Department of the Board of Customs.
Up to Dec. 31,1917 the last port of shipment and the first port of discharge were used in determining the respective countries of import and export. In the case of transportation of goods over land frontiers, the country from which goods arrived or that to which they were transferred was used in a similar sense, with the exception of a part of the exchange of goods with Russia, which was not put down to that country but to the actual countries of import or export. From January 1,1918 the country of import indicates the fand in which goods were purchased, and country of export the land to which goods were sold.

* Preliminary figures subject to minor alterations.

| Jan.-Dec. |  |  |  |  |  |  |  |  | Jan--Dec. |

The import- and export-indices have been calculated by the Statistical Dept. of the Board of Customs in the following manner: the quantities of imports and, respectively, exports for the current year have been multiplied by the average price for the class of goods in question in 1913, after which the import (or export) value for the current year has been calculated in percentage of the sum thus obtained for purposes of comparison.

The goods chosen for the setting-up of a total-Index have been divided, according to their use, into the groups: foodstuffs, clothing, agricultural requirements and other goods. The three last-named have been further divided, according to their purpose into raw-materials, machlnery and industrial products.

## 22. - EXPORT-PRICE INDEX.

| Year <br> Month | Total <br> All Kinds | Details |  |  |  |  |  |  |  | Year Month |

This table, prepared from the weekly reports of the Labour Exchange Department of the Ministry of Social Affairs, shows the number of unemployed registered in the books of the communal labour exchanges in the majority of towns and a very Itttle part of the rural centres of population at the close of the week nearest to the month's end. As agricultural labonrers and skilled industrial workers proper register, up to the present, only in a minority of cases at the communal labour exchanges, the table does not give a complete review of the number of unemployed, but is to be regarded more as symptomatic.

${ }^{2}$ ) From the beginning of 1921 onwards a new official index has been drawn up differing from that published in the Bulletin for 1922 In that the whole first half of 1914 forms the basis $(=100)$ for the same, and that the rise in taxation is also included.

The index is calculated by the Social-Statistical Department of the Central Statistical Office and is based on monthly reports from 21 different centres; it shows the rise in the cost of living for a workingmin's family of normal size, the income of which amounted during the years 1908-1909 to 1600-2000 Fmk., presupposing that the average monthly consumption within the same remained unaltered. The index for total cost of living is the average based on weight of the different indices.

## CERTAIN PARTICULARS ABOUT FINLAND.

## 1. FORM OF GOVERNMENT.

Finland was a Grand Duchy connected with Russia, with an autonomy of its own, from 1809 until December 6th. 1917, when it became an independent Republic. The Diet together with the President possess the legislative power of the country. The highest executive power is held by the President chosen for a period of 6 years. The Diet, composed of 200 members, is elected by universal suffrage.

The proportions of the different parties in the Diet are at present as follows:

| Right | $\left\{\begin{array}{r} \text { Swedish people's party } \\ \text { (Swedish speaking po } \\ \text { pulation) } \end{array}\right.$ | Numb |  | Percent. |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  | 12.5 |  |

|  | Progressive party | 15 | 60 | 6 | 30 |
|  | Social-Democrats | 53 |  | 26.5 |  |
|  | Communists |  | 80 | 13.5 | 40 |

## 2. LAND.

the average temperature in the coldest month is in S. W. Finland $-5^{\circ}$ to $-6^{\circ} \mathrm{C}$, in Lappland - $15^{\circ} \mathrm{C}$. and during the warmest month $+15^{\circ}$ and $+13^{\circ}$ to $+14^{\circ}$ C. resp. The average temperature in Helsingfors is $+4.6^{\circ}$ (in Christiania $+5.5^{\circ}$, in London $+9.9^{\circ}$, in Montreal $+5.5^{\circ}$, in Chicago $+9.1^{\circ}$, in Vladivostock $+4.4^{\circ}$, in Moscow $+3.6^{\circ}$ ). The ground is covered with snow in the South during about 100 days, in Central Finland during 150 to 180 days, in Lappland about 210 days.
tae area (the new province of Petsamo included) is 387 , 565 square kilometres ( $=149,640$ square miles, Great Britain's area is $89,047 \mathrm{sq}$. m. and Italy's area $110,632 \mathrm{sq} . \mathrm{m}$.). Of the total area $343,279 \mathrm{sq} \mathrm{km}$. $(88.6 \%)$ consist of land, while $44,286 \mathrm{sq} . \mathrm{km} .(11.4 \%)$ are lakes. On an average $10.8 \%$ of the land in the south of Finland is cultivated, $0.8 \%$ in the North, $6.1 \%$ of the whole land.

## 3. POPULATION.

number of inhabitants (1921): 3.4 millions, of which (1.2 million emigrants, [in Sweden (1921) 6.0, in Switzerland (1920) 3.9, in Denmark (1921) 3.3 and in Norway (1920) 2.6 millions].
density of poptlation (1920): In South-Finland 17.2, in Nortb-Finland 2.3 and in the whole country an average of 10.1 inhabitants to the square kilometre.
language (1920): Finnish speaking $89 \%$, Swedish speaking $11 \%$.
religion (1920): Lutheran $98 \%$, Greek-Orthodox $2 \%$.
distribution (1921): $83.9 \%$ of the population inbabits the country, $16.1 \%$ the towns. The greatest towns are (1921): Helsinki (Helsingfors), the capital, 200,208 inhabitants, Turku (Åbo) 58,694, Tampere (Tammerfors) 48,475, Viipuri (Viborg) 30,748.
education (1920): Amongst persons over 15 years of age only $0.8 \%$ are illiterate (in France there were in $191112.2 \%$ illiterate persons over 15 years old, in Italy $39.2 \%$; see Annuaire international de Statistique).
increase of population (1921): Birtbs $24.3 \%$ \% deaths $14.0 \%$ (in France in $191915.0 \%$, and in England in $192012.4 \%$, natural increase $10.3 \%$.

## 4. INDOSTRRIAL AND BUSINESS CONDITIONS.

proportions of occupations of the population (1920): agriculture $65.1 \%$ industry and manual labour $14.8 \%$, commerce $3.4 \%$ other occupations $17.7 \%$.
amicultore (1990): Cultivated land 2.0 million hectars, divided as follows: area under cultivation $0.5-10$ hectars $33.8 \%, 10-50$ ha. $48.9 \%$, $50-100$ ha. $9.3 \%$ over $100 \mathrm{ha} .8 .0 \$.$% . The above mentioned surface$ of cultivated land was divided between the different kinds of crops as follows: $45.8 \%$ bay, $19.6 \%$ oats, $11.2 \%$ rye, $5.8 \%$ barley, $35 \%$ potatoes, $14.1 \%$ other. The number of dairies in 1920 amounted to 455.
rndustry (1921): Number of industrial concerns 3,141, hands 120,317, gross receipts of industry (1921) 6.533 .8 million marks.
length of railways (1923): $4,458 \mathrm{~km}$., of whicb $4,162 \mathrm{~km}$. State railways and 296 km . private.
comueronal fleet (1921): Sailing ships 683 ( 102,111 reg. tons net.) steamships 781 ( 92,032 r. t.), motor boats 124 ( 18,649 r. t.), lighters 3,229 ( 274,505 r. t.). Total 4,817 (486,797 r. t.).
finanges: Since 1860 the currency unit is the Finnmark ( $=100$ pennies) $=1$ French franc. The redemption in gold of bank notes was cancelled on April 15th, 1915.
the central bank. The Bank of Finland, (founded in 1811) is a State Bank. Its head-office is in Helsinki (Helsingfors) with branches in Turku (Åbo), Pori (Björneborg), Vaasa (Vasa), Oulu (Uleåborg), Kuopio, Joensuu, Sortavala, Viipuri (Viborg), Mikkeli (S:t Michel), Tampere (Tammerfors), Hämeenlinna (Tavastehus), Jyväskylä and Kotka.
the joint stock banks (1923): Number 20, possess 396 branch offices, where all kinds of banking business is transacted. Including all banks, there is one banking establishment per 7,900 inhabitants.
the savings banis (1992): Number at the end of the year 466.

# JOINT STOCK BANKS IN FINLAND IN 1922. <br> Bx 

KAARLO J. KALIIALA, M. A.
statistician to the bank of finland.

#### Abstract

NUMBER OF BANKS. At the end of 1921 there were 21 Joint Stock banks in Finland. One of these, Privatbanken i Helsingfors Ab., however, gave up business from beginaing of 1922 in consequence of its amalgamation with the largest bank in the country, A. B. Nordiska Föreningsibanken, the amalgamation having been decided upon already in 1921 . As no new banks were established during the year, there were only 20 a.t the end of 1922. As the closing of this bank, properly speaking, must be reckoned as in 19:21, it can be said that the year 1922 which was so diffioult for the banks of many other countries. did not inifluence the number of banks in Finland at all. At the end of 1929 the Joint Stock banks had 396 branch-offices throughout the country, both in the towns and in the country, where all kinds of banking lbusiness is transacted, and, besides, a number of agencies of different grades, particularly for accepting depposits. Taking the headoffices of the Joint Stock banks as well as the Bank of Findand and its 13 branch-offices into account, there were 430 banking offices in Finland or one banking-office to every 7,900 inhabitants.

BALANCE SHEETS AT THE END OF 1922.
The totals of the balance sheets of the Joint Stook bands for the years 1920 to 1922 are shown below:

We shall examine the most important points of the above table separately.

## THE BANKS' OWN FUNDS.

Of the banks' own funds the mosit important, viz., capital and reserve funds, have here been selected for examination. As the changes in the banks'own funds which are dependent on the net profits for the year, do not yet appear in the yearly bailance sheets of the banks, but only in the first balance sheet after the ordinary meeting of the ishareholders, the banks' own fumdis, mentioned in the taible below, are taken acconding to their position at the end of March in each year, when the meetings of the shareholders of the banks were helid.

|  |  | Movement |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | 31/81923 | 1020 | 1021 | 1022 |
|  |  | Mill. mk. | Mill. mk. | Mill. mk. | Mill. mk |
| Capital |  | 863.0 | +191.7 | -63.0 | +58.0 |
| Reserve | funds | 2254.4 | + 83.5 | -47.2 | -34.5 |
|  | Total | ,1117.4 | + 275.2 | -110.2 | +18.5 |

The :above figures show that the banks' own funds which during the preceding year decreased by 110.2 million marks; increased again in 1922 by 18.5 million marks. The movement in the capital and in the reserve funds, however, worked out in opposite directions.
The capital of two of the baniks increased by 53 million marks, of which 50 million marks on the part of one and 3 million marks on the part of the other. The greater increase of capital just mentioned was prooduced in the largest Joint Stock bank of the country by taking the amount mentioned out of the extra reserve fund in onder to issue free shares to the shareholders. The sum total of reserve funds decreased by 34.5 million marks. This sum resulted from the circumstance that the reserve funds of 12 banks increased by a total of 11.4 million marks and decreased in 6 banks by 45.9 million marks. Here it must be noted, however, that 35.0 million marks referred to the llaage bank mentioned above which increased its capital ( 50 million marks decrease in order to issue the free shares and 15 million marks increase out of the net profits of 1922). The idearease of the reserve funds on account of losses consequently amounted to $\mathbf{1 0 . 9}$ million marks only. $71.8 \%$ out. of the total of these cappitalls and $80.0 \%$ of the re-
serve funds belonged to the four largest banks, viz., A. B. Nordiska Föreningsbanken, Kansallis-Osake-Pankki, Unionbaniken i Finland A. B. and Helsingfors Aktiebank.

## HOME DEPOSITS AND OREDITS

The home deposits in the Joint Stock banks have shown the following movement during the last three years:

|  | $30 / 1922$ Mill. mk. | $\begin{gathered} 1920 \\ \text { Mill. } \mathrm{mk} . \end{gathered}$ | $\begin{gathered} \text { Moremen } \\ \text { Mill. mk } . \end{gathered}$ |  | $\begin{gathered} 1922 \\ \text { Mill. mk. } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Current accounts .. |  | +122.1 | - 48.1 |  | $53.2$ |
| Home Cor-respiondents .... . | 406.9 | - 71.8 | + 99.9 |  | $24.6$ |
| Deplosits: | 2,779.9 | $+168.1$ | + 94.8 |  | 231.7 |
| Savings accounts .. | 338.8 | $+10.2$ | + 213.6 |  | 38.0 |
| Total | 4.135 .9 | +228.6 | $+175.2$ |  | 5 |

As is shown by the figures above, the increase of the bank deposits in 1922 was twice as great as the previous year. The difference, so far as the actual deposits of the public are concerned. is in fact still greater, as 90:0 million marks, or more than halle the increase of 19:21, were deposits made by the Government, whereas in 1922 only 23.5 million marks of the increase. were carused by governmental deposits.
Of the aforesaid deposits 80.3 \% fell. to the share of the four big banks referred to.
The following figures show the fluctuations during recent years in the credits gramted by the Joint Stock hanks:

|  | Movement |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | ${ }^{20} / 81922$ | 1820 | 1921 | 1922 |
|  | Mill. mk. | Mill. mk. | Mill: mk. | Mill. mk. |
| Iniland |  |  |  |  |
| Bills | 1,905.3 | 457.4 | + 74.6 | + 321.0 |
| Loanis | 1,8218.9 | 239.0 | + 16.1 | - 114.6 |
| Cash creditits . . . | $757.2$ | - 99.4 | 46.1 | + 10.0 |
| Home Cor-respond- |  |  |  |  |
| Toゅal | ,145.9 | + 1,053.5 | + 4119.2 | +173.1 |

From these figures it will be seen that the credits granted by the Joint Stock banks increased in 19922 only iby 178.1 million marks, or very slightly as compared to the previous year
and especiailly to the year 1920. In this the return from the period of inflation towards normal conditions is clearly noticeable. Attention is also merited by the lfact that the increase in credits granted was smailler than the increase of home ideposits. This restraint in the granting of credits seems to have ibeen brought about chiefly by the desire of the banks to diminish their use of credits from the Bank of Finland. The fact that the baniks were able to use a great part of the increase in the means at their disposal for diminishing their rediscounts clearly shows the improvement in the situation on the money market during 1922.

In regand to the liquidity of the banks, too, 1929 showed an impnovement, namely in so far as the ohief part of the increase in deposits consisted of long-term deposits and iniland bills in the granting of loans became more general.

If the amounts of home deposits and home loans are compared, it will be seen that the banks were able to grant loans to an amount which surpassed the home deposits by $2,010.0$ million marks. This idiffierence is partly explained by the means of the banks themselves, by the deposits of foreigners in Finnish currenay, and by the rediscounts at the Bank of Finland. As was remarked above, the rediscounted bills during the year, however, decreased considerably.
'The rate of interest of the Joint Stock branks in 1922 was $9 \frac{1}{2}$ to $12 \%$. When the Bank of Finland lowered the rate of interest on discounted bills by 1 \% as from the 17th of October, the Joint Stock banks lowered their rate of interest for their mosit reliable clients to a certain degree. The rrate of interesit granted on deposits on current. account was 5 to $5 \frac{1}{2} \%$ anid on long-term laans $61 / 2$ to $7 \%$. The corresponding rate of interest pajid on deposits by certain smaller banks was even ${ }^{1 / 2} \%$ higher than this.

## THE SITUATION IN REGARD TO FOREIGN OOUNTRIES.

With the exception of shorter periods, the position of the Joint Stock banks before the war towards foreign countries was such that their assets surpassed their debts. Since 1917 the
situation has changed. In 1918 to 1920 , when Finland's balance of trade was veny unfiavonrabble and the scarcity of foreign currency, particularly since the middle of 1919, was fairly constant, foreign currency was bought by selling Finnish marks abroad. These sales were generally effected so that the account of the fareign seller wais credited with the sales-price in Finnmarks at the banks here. In this way considerable amounts of deposits in Finnish currency accumulated in the banks here on foreigners' accounts and ait the end of the year amounted to more than $90 \%$ of the foreign debts of the baniks.

The following flluctuations in the foreign debts and assets fof the banks took place in the different montihs of 1922.

| Month | Mill. mk. | $\begin{aligned} & \text { Debts } \\ & \text { Mill.mk. } \end{aligned}$ | Net indebtedness Mill. $m$ | $\begin{gathered} \text { Monthly } \\ \text { movement. } \\ \text { Mill. mk. } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: |
| January | 96.8 | 944.8 | 848.0 | -59.8 |
| February | 1116.2 | 936.4 | 820.2 | - 27.8 |
| March | 86.8 | 9447.6 | 8.60 .8 | + 40.6 |
| April | H103.6 | 1,034.6 | 931.0 | + 70.2 |
| May | 84.7 | 1,0136.3 | 951.6 | 20.6 |
| June | 81.8 | 999.9 | 918.1 | 33.5 |
| July | 1115.1 | 4,001.4 | 886.3 | 31.8 |
| Augrust | 1.07 .4 | 988:4 | 881.0 | 5. |
| September | d.19.9 | 998.5 | 878.6 | 2.4 |
| October | 92.1 | 1,088.1 | 994.0 | +115.4 |
| November | 79.2 | 1,078.8 | 999.6 | + 5. |
| Decamber | 72.2 | 971.8 | 899.6 | -100 |

The above figures show that the net indebtedness of the Joint Stock banks increased in March and May, in October and November, and decreased in the other months. The increase in the spring and that in the autumn were nevertheless of a different nature. As was mentioned albove, the sale of Finnmarks, which undoubtedly caused the above rise rof the net indelbtedmess, was due to the scarcity of foreign currency. The sales effected in the spring were proibably also chiefly due to this reason. But in the autumn the cause was certainly another one; then more foreign currency than was needed was offered. The sale of Finnish currency was caused this time partly by the fact that Finnmarks were offered abroard by Finland so as to prevent too rapid an increase in the value
of the Finnmark, partly by the fact that considerable amounts of Finnish currency were bought abroad, partly for speculation and partly for subsaribing to the Government loan of 1922 in Finnish curnency. The decrease of the net indelbtedness in December was caused to some extent by the fact that the Bank of Finiand bought back Finnmarks from abroad in order to stabilize the value of the Finnmark.

At the end of the last 6 years the situation of the Joint Stock banks towards foreign countries was as fiollows:

| Year | $\xrightarrow{\text { Assets }}$ Mk. | $\begin{gathered} \text { Deabts } \\ \text { Mill. mk. } \end{gathered}$ | $\begin{gathered} \text { Net indebt- } \\ \text { diness } \\ \text { Mill. mk. } \end{gathered}$ | Movement indebtedness. Mill. mk. |
| :---: | :---: | :---: | :---: | :---: |
| 1917 | 57.9 | 75.6 | 17.7 | + 18.3 |
| 1918 | 160.6 | 158.7 | 98.1 | + 80.4 |
| 1919 | 108.9 | 5,61.3 | 452.4 | +354.3 |
| 1920 | 54.6 | 795.9 | 741.3 | + 288.9 |
| 1921 | 86.8 | 994.6 | 907.8 | + 166.5 |
| 1922 | 72.2 | 971.8 | 899.6 | 8.2 |

As the above figures indicate, the net indebtedness idecreased somewhat in 1922, viz., by 8.2 million marks, and was almost 900 million marks at the end of the year. If the foreign assets and debts :of the Banik of Finland are taken into account. the net indelbtedness to foreign countries of all the ibanks at the end of 1922 was only $\mathbf{2 2 0 . 7}$ million marks.

## RESULTIS FOR THE YEAR.

As no information, according to the general programme for the official bank-statistics, ${ }^{1}$ ) as to the Proffit and Loss Accounts of the Joint Stock banks for 1922 is yet to hand at the moment of writing, only a few instances of the financial results of the banks in 1922 can be given in this connection.

According to their annual reports the results of four banks amounted altogether to a loss of 13.4 million marks, 8.2 million marks of this falling to the share of one of them alone. Besides this, there was one banik which received the aid
of another bank for settling its losses, and which wrote off its losses already at the end of the year, and the Profit and Loss Account of which formally balanced without any profit or loss. In fact, the loss probably amounted to about 2 million marks. The preceding year two banks suffered losses, the one (Privatbanken) 88.7 million marks and the other 25.3 million marks. These banks which suffered looses, were smadiler banks. The losses were aansed by too liberally granted credits during previous years and partly by guarantees in foreign currency. A drop in prices, - very slight in Finland during 1992. - haid a very small part in the losses.

The 15 other banks made profits. altogether 126.7 million marks. The previous year 19 banks together haid a profit of 112.1 million marks.

These banks hard also naturally to undertake writings-off on credits granted and possibly also on account of losses caused iby guarantees. But it is evident that the considerable writingsoff in this respect have greatly strengthened the position of the banks.
The dividends paid lby the baniks in the last three years are given in the table below:

|  | Number of bank |  |  |
| :---: | :---: | :---: | :---: |
| Dividends | 1920 | 1921 | 192 |
| No dividends | 1 | 6 |  |
| 3-5 \% | 3 | - |  |
| $6-71 / 2$ | 7 |  |  |
| 8-9 | 5 | 2 |  |
| 10-11 | 4 | 4 |  |
| 12-43 | 1 | 2 |  |
| 14-15 | - | - |  |
| 1.6-117 | 1 | 1 |  |
| 18-19 | - | - |  |
| 20-22 | 1 | 1 |  |
|  | 23 | 21 |  |

These figures go to prove that the dividends paid out of the profits of 1922 are somewhat smaller than those paid in the previous year.

## SUBSCRIPTION TO THE BULLETIN.

The Bulletin may be subscribed to at the Akademiska Bokhandeln, Helsingfors, or the Helsingin Suomalainen Kirjakauppa, Helsingfors. The price per annum including postage is 40: - Fmk in Finland and 1: - Dollar in foreign countries. Single copies may be had at a price of Fmk 4: or 10 cents respectively.

[^0]:    at the end of the previous year
    ${ }^{2}$ ) Actual current accounts and home correspondents. $-{ }^{2}$ ) Deposit accounts and savings accounts.

    * Prefiminary figures subject to minor alterations.

[^1]:    * Preliminary figures subject to minor alterations.

[^2]:    ${ }^{1)}$ Fresh meat, excluding pork.

    * Preliminary figures subject to minor alterations.

[^3]:    ${ }^{\text {i }}$ Since 1910 official bank statistics are published in Finland: VII. D. monthly statistics in Finnish and Swedish of the position of the banks at the end of each month; and VII. C. more extensive annual statistics of the position of the banks at the end of the year, annual results otc. Tables appended to the latter statistics are also provided with French wording. Both publications may be ordered from the Government Stationery Office in Helsingfors (Valtioneuvoston Julkaisuvarasto, Statsradets Publikationsförrad). The price of the former publication is Fmk. 24: - post free for abroad, of the latter Fmk. 30: -. Single copies of the former may be obtained at a price of Fmk. 2: - each.
