

## THE FINNISH MARKET REVIEW.

## THE MONEY MARKET.

The state of the money market remained unchanged, on the whole, in January and the beginning of February. Though the market was still characterised by a very easy tone, there were signs of a growing demand for credit at the same time, as is usually the case at this time of year.

As the banking statistics have been rearranged in a manner that we will describe later, the figures regarding the Joint Stock banks for this year are not entirely comparable to those for last year. The greatest difference lies in the fact that credits granted to, and deposits received from other Finnish financial institutions - Joint Stock banks, mortgage institutions, savings banks, co-operative credit societies etc. - are now kept separate from other business with the public, but there are other changes, too.

In January actual deposits in the Joint Stock banks increased by 24.6 million marks to $5,659.6$ millions, but cheque accounts were reduced by 29.3 million marks to $1,244.2$ millions, so that total deposits from the public fell off by 4.7 millions. At the same time the balances of Finnish financial institutions in the Joint Stock banks grew by 47.9 million marks to 774.2 millions, chiefly in consequence of the savings banks having, as usual, large supplies of cash at the beginning of the year, which they deposited in their Central bank. On the other hand the credits granted by the Joint Stock banks to the public increased in January by
70.4 million marks to $7,326.7$ millions, while credits to Finnish financial institutions decreased by a faw millions. The cash of the banks was reduced in the course of the month by 115.2 million marks to 284.1 millions in comparison with 438.5 millions a year ago.

The position of the Joint Stock banks towards foreign countries improved still more, credit balances increasing and indebtedness falling off. The net foreign palances of the banks thus bounded up by 79.3 million marks and established a fresh record at 451.0 millions.

The weekly statements of the Bank of Finland are also marked by the larger demand for credit. The total credits of the Bank grew in January by 31.6 million marks to 704.1 millions and were therefore at the same level as a year ago, but considerably lower than in previous years. During the first fortnight in February credits increased by a further 36.1 millions, which is in accordance with the usual seasonal development. The rise of the Bank of Finland's reserve of foreign currency that had proceeded since June, 1934, reached its culminating point in January. At the end of January the Bank's credit balances with its foreign correspondents amounted to $1,329.8$ million marks or 1.8 millions more than at the end of last year, but by February 15th the reserve of foreign currency had fallen off by 62.7 million marks. This decrease is a result of the conversion operations that are being carried out. Owing to these circumstances the note reserve of the

Bank of Finland was reduced in January by 12.3 millions and during the first half of February by 66.5 millions. The note reserve amounted to $1,057.3$ million marks on that date compared with 865.7 millions a year ago.

As usual, the notes in circulation were at their lowest on Jianuary 23rd, after which date their customary seasonal rise set in. On February 15th the note circulation was $1,286.8$ million marks against $1,196.7$ millions a year ago.

The level of prices did not undergo any great change in January. The wholesale price index remained unchanged at 90 , while the cost of living index - as usual in January - dropped 8 points to 993 against 974 e year ago.

## TRADE AND INDUSTRY.

Foreign trade was lively for the time of year. The value of exports amounted to 362.4 million marks compared with 284.1 millions in the previous year, while the value of imports amounted to 344.4 million marks against 289.2 millions in January, 1934. There was thus a surplus of exports amounting to 18.0 millions in comparison with a surplus of imports of 5.1 millions last year; in 1933 and 1932 there was a considerable surplus of exports in January.
The position in the timber market is still uncertain; the selfing season has not started in earnest, whereas last year considerable quantities had already been disposed of by this time. Comsumption in Great Britain is expected to be goed, but stocks of timber are considerably heavier than at the same date last year. The negotiations for the importation of Russian
timber have, indeed, been concluded, but the inclusion of the baisse clause has called forth opposition in many quarters. For these reasons both importers and exporters still maintain an expectant attitude. It is clear, however, that prices will be slightly lower than last year, especially in the case of poorer qualities, while the best qualities are in a better position.

Representatives of the European cellulose manufacturers held a meeting in Malmö during the last days of January. It was resolved, in spite of the increased consumption of cellulose during 1934, to maintain the former decision to restrict production by 25 per cent of the productive capacity.

## THE LABOUR MARKET.

The number of unemployed increased in January from 19,200 to 22,000 . Compared with conditions in the previous years, when the number of unemployed was 43,200 at the end of January, 1934, and 76,900 at the end of January, 1933, the state of the labour market shows a great improvement.

According to the market statistics of the Research Office of the Ministry for Social Affairs the index of the number of working hours in industry was 103.2 for the first quarter of this year against 88.9 a year ago, the corresponding quarter in $1926=100$. There was a considerable improvement in industry supplying the home market, this index having risen to $\mathbf{1 1 6 . 2}$ from 95.3 in the previous year, while the increase in the exporting industries was rather less or from 82.7 to 90.0 .

The term imports covers all imported goods which are placed on the market either immediately after importation or after storage. Expor's covers all goods exported frem the open market, including re-exports. Goods are declared to the Customs by their owner, who must at the same time state the value of the goods as calculated at the frontiers of the country.

* Preliminary figures subject to minor alterations,

23.     - VALUE OF IMPORTS AND EXPORTS IN DIFFERENT GROUPS OF GOODS.*

| October | 903 | 958 | 1083 | 906 | 1333 | 1175 | 2010 | 998 | $+11$ | October |
| November | 942 | 958 | 1083 | 905 | 1333 | 1175 | 2010 | 1022 | +24 | November |
| December | 922 | 958 | 1083 | 897 | 1333 | 1175 | 1854 | 1001 | $-21$ | December |
| January | 908 | 958 | 1083 | 901 | 1333 | 1175 | 1854 | 993 | - 8 | 1935 January |

The index is calculated by the Research Office of the Ministry for Social Affairs acoording to monthly reports from 30 different centres. It is based on the cost of living for the first half of $1914=100$ and refers to the normal budget of a workman's family. The index for the total cost of living is the average of the weighted gronp indices.
36. - WHOLESALE PRICE LNDEX.

| Month | Index for goods In the Finnish wholesale trade |  |  |  |  |  |  |  |  |  |  |  |  |  |  | ```T'otal index lor exported goods``` |  |  | Month |

| Whole year | 89 | 90 |  | 74 | 73 |  | 92 | 93 |  | 93 | 93 |  | 85 | 86 |  | 77 | 80 |  | Whole year |

The index is calculated by the Central Statistical Office, and is based on the average prices for $1926=100$. The first group of indices refers to goods appearing in local wholesale trade in Finland, whereas the indices for imported and exported goods refer to the total quantities of goods imported or exported, including the movement of such goods that are in no way intended for wholesale trade in Finland. An indirect weighting has been applied, by means of which each class of goods is represented by the number of commodities corresponding to the calculated importance of this class in wholesale trade. The averages are arithmetical ones.
37. - INDEX OF WORKING HOURS IN INDUSTRY.

## CERTAIN PARTICULARS ABOUT FINLAND.

## 1. FORM OF GOVERNMENT.

Finland formed a part of the kingdom of Sweden from 1154 to 1809 ; from 1809 it was an autonomous Grand Duchy connected with Russia up to December 6th, 1917, when Finland declared its independence, which was acknowledged by all the Powers including Soviet Russia. It became a republic in 1919. The legislative power of the country is veated in the Diet and the President. The highest executive power is held by the President chosen for a period of 6 years. The present President P. E. Svinhufvud is olected for the term March 1st, 1981, to March 1st, 1937.

The Diet, composed of 200 members, is elected by universal suffrage. The proportions of the different parties in the Diet elected in 1933 are as follows:

Number
Social-Democratic party .......................................... . . . . 78
Agrarian party ....................................................... . . . 53
Swedish party ........................................................ . . . 21
Unionist party . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 18
Patriotic National Movement's party ............................ 14
Progressive party ...................................................... 11
Small farmers' party . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 3
People's party

## 2. LAND.

THE AREA is 388,217 square kilometres $=149,900$ square miles (Great Britain's area is $89,047 \mathrm{sq}$. m. and Italy's area 117,982 sq. m.). Of the total area $11.5 \%$ are lakes. On an average $11.8 \%$ of the land in the south of Finland is cultivated, $1.1 \%$ in the North, $6.6 \%$ of the whole land. Of the land area 25.3 mill. ha ( 62.5 mill. acres) or $73.6 \%$ are covered by forests.

THE AVERAGE TEMPERATURE in the coldest month is in S. W. Finland $-5^{\circ}$ to $-6^{\circ} \mathrm{C}$., in Lappland $-15^{\circ} \mathrm{C}$. and during the warmest month $+15^{\circ}$ and $+13^{\circ}$ to $+14^{\circ} \mathrm{C}$. resp. The average temperature in Helsinki (Helsingfors) is $+4.6^{\circ}$ (in Oslo $+5.4^{\circ}$, in Montreal $+5.4^{\circ}$, in Moscow $+3.6^{\circ}$ ). The ground is covered by snow in the South for about 100 days, in Central Finland for 150 to 180 days, in Lappland about 210 days.

## 3. POPULATION.

NUMBER OF INHABITANTS (1933): 3.7 millions (of whom 0.2 million emigrants), Sweden (1933) 6.2, Switzerland (1932) 4.1, Denmark (1932) 3.6 and Norway (1983) 2.9 millions.

DENSITY OF POPULATION (1933): In South-Finland 18.9, in North-Finland 2.6 and in the whole country an average of 10.9 inhabitants to the square kilometre.

DISTRIBUTION (1933): 79.8\% of the population inhabit the country, $20.2 \%$ the towns and urban districts. The largest towis are (1933): Helsinki (Helsingfors), the capital, 268,592 inhabitants, Vilpuri (Wiborg) 71,817, Turku (Åbo) 69,041, Tampere (Tammerfors) 58,220.

OCCUPATION (1930): agriculture $59.6 \%$, industry and manual labour $16.8 \%$, commerce $4.3 \%$, transport $3.8 \%$, other occupations $15.5 \%$.

LANGUAGE (1930): Finnish speaking $89.4 \%$, Swedish speaking $10.1 \%$, others $0.5 \%$.

BELIGION (1933): Lutheran $96.2 \%$, Greek-Orthodox $1.8 \%$, others $2.0 \%$.

EDUCATION (1930): Amongst persons over 15 years of age only $0.9 \%$ are illiterate. There are three universities founded in 1840, 1917 and 1920.

INCREASE OF POPULATION (1933): Births $17.4 \%$, deaths $12.9 \%$ (in France in 1931 16.2 $\%$, and in England in $193112.3 \%$, natural increase $4.5 \%$.

## 4. TRADE AND COMMUNICATIONS.

FOREST RESOURCES. The growing stock of the forest is 1,620 million $\mathrm{m}^{3}$ ( 57,214 mallion cubic feet). The merchantable timber
(measuring 20 cm at breast height $=6 \mathrm{in}$. at a height of 18 ft .) amounts to 1,557 million trees. Of this number pine is represented by $60.7 \%$, spruce by $28.1 \%$, the conifers thus constituting $88.8 \%$ or 1,383 million trees; leaftrees, mostly birch, $11.2 \%$ or 174 million trees. The annual increment is 44,4 million $\mathrm{m}^{8}(1,568$ million cub. ft .). The annual fellings according to earlier calculations are 40 million $\mathrm{m}^{3}$ ( 1,413 million cub. ft.). In North Finland the increment is much larger than the fellings, but in South Fipland excess felling occurs locally.

AGRICULTURE (1933): Cultivated land 2.2 million hectars, divided as follows: area under cultivation $0.3-10$ hectars $33.4 \%$, $10-50$ ha $52.1 \%, 50-100$ ha $8.4 \%$, over 100 ha $6.1 \%$. Cultivated land is divided between the different kinds of crops as follows: $50.7 \%$ hay, $18.9 \%$ oats, $9.6 \%$ rye, $5.4 \%$ barley, $3.3 \%$ potatoes, $12.1 \%$ other. The number of dairies in 1933 amounted to 627.

OWNERSHIP OF LAND. The land area is distributed among different classes of owners approximately as follows: private $52.1 \%$. State 39.7 \%, Joint Stock Companies $6.5 \%$, communities $1.7 \%$.

INDUSTRY (1933): Number of industrial concerns 3,527 , hands 140,736 , gross value of products of industry 10,837 million marks.

LENGTH OF RAILWAYS (1933): $5,574 \mathrm{~km}$, of which 5,319 km State railways and 255 km private. The gauge is 1.524 m .

COMMERCIAL FLEET (1934): Steamships 548 (251,890 reg. tons net), motor vessels 157 ( 17,323 r. t.), sailing ships 218 ( 61,168 r. t.). Total 923 ( 330,381 r. t.).

## 5. FINANCE AND BANKING.

CURRENCY. Since 1860 Finland has its own monetary system. From 1877 up to the Great War the currency maintained its stable gold value and after the disturbances caused by the war frinland has again from January 1st, 1926, a gold standard. The unit of currency is the mark (FInnish omarkkay) $=100$ pennis. According to the monetary law of December 21st, 1925, a gold coin of 100 marks' value shall contain $3^{15} / \mathbf{1 g}$ grams of fine gold. Since October 12th, 1931, the redemption of bank notes in gold is, however, suspended.

STATE FINANCES. According to the balance sheet for 1938 the State revenue was $3,300.5$ million marks of which $2,872.6$ million marks were current revenue, and State expenditure 3,247.2 million marks, of which $2,543.6$ million marks wexe current expenditure. The principal sources of revenue were as follows: State property and undertakings (net) 186.3, direct taxes 458.8, indirect taxes $1,521.3$, stamp duty 171.3 , charges 85.7 , interest and dividends 145.1 and capital revenue 427.9. The value of State property in 1922 is estimated at $11,150.6$ million marks. For Public Debt see table 19 in this issue.

MUNICIPAL FINANCES. According to the Budget for 1934 expenditure amounted to $1,429.1$ million marks. Income from taxation was calculated at 466.4 million marks, taxed income at 4,978.4 million marks. The municipal income tax (non-progressive) averaged $9.4 \%$ of the ratepayers' income.

THE BANK OF ISSUE. The Bank of Finland, (founded in 1811) is a State Bank. Its head-office is in Helsinki (Helsingfors) with branches in Turku (Abo), Pori (Björneborg), Vaasa (Vasa), Oulu (Uleảborg), Kuopio, Joensuu, Sortavala, Viipuri (Wiborg), Mikkeli (S:t Michel), Tampere (Tammerfors), Hämeenlinna (Tavastehus), Jyvăskyl\& and Kotka.

THE JOINT STOCK BANKS (1934): Number 9 , possess 474 offices, where all kinds of banking business is transacted. Including all banks, there is one banking establishment per 7,200 inhabitants.

The largest banks are: Kansallis-Osake-Pankki, Ab. Nordiska Föreningsbanken and Helsingfors Aktiebank, all with head offices in the capital.

OTHER BANKS (1934): Mortgage banks 6. Savings banks 481, Co-operative Credit Societies 1,388 and a Central Bank for the latter.

# FOREIGN TRADE IN 1934. 

BY
VERNER LINDGREN, M. A.
HEAD OF THE STATISTICAL DEPARTMENT OF THE BOARD OF CUSTOMS.

## GENERAL REVIEW.

If we had to indicate the size of Finland's total foreign trade in 1934 by a single figure in comparison with the extent of trade in the previous years, we could not make use of the figures only for the value of trade. In the course of years prices have fluctuated very much and a comparison of the values for different periods consequently gives an idea of trade that is, to some extent, incorrect or at any rate one-sided. But if we eliminate fluctuations in price and measure the actual volume of trade, we get a more correct idea of the extent of the turnover in trade. If we take the year 1926, which can be described as a normal year in Finland's economic progress, as a starting point for such a comparison, we obtain the following view of foreigu trade in 1934.

The foreign trade of Finland was at its highest level during the last period of prosperity in 1928, when the combined volume of imports and exports exceeded foreign trade in the basic year by almost 30 per cent. During the subseruent depression and period of crisis the rolume contracted year by year, so that in 1932 it was even a few points below the volume of trade in the basic year. Since then, however, there has been a distinct improvement. In 1933 the volume of trade increased by 16 per cent and last year by a further 21 per cent and was thus a few points above the level of the record year 1908. Measured in this way foreign trade was larger in 1934 than in any previous rear. It cannot therefore be considered to bear
any signs of depression. - If, however, we now turn to the figures for the value of trade, we get a slightly different impression. For 1934 the total value of foreign trade has been calculated at 11,000 million marks, an amount that is about 2,000 million marks in excess of the figures for the previous year and quite 3,000 millions above the lowest level attained a couple of years earlier, but it is still a long way to the 13,000 and 14,000 million marks for the value of foreign trade in the most prosporous years.

The parts played by imports and exports in the course of trade from its lowest level a few years ago to last year's record figures were very dissimilar.

## EXPORTS.

In spite of the world crisis exports proceeded, on the whole, more smoothly. From the highest point, reached during the boom in 1929, to the severest point of the depression the volume of exports only fell off by 10 per cent and their value by 30 per cent, and last year exports very nearly reached the level of 1929 in value, while in volume they were even 20 per cent higher. The progress of exports will be seen in the following table:-

| Year. | Value, f. o. b. <br> Mill. mks. |  |  |
| :---: | :---: | :---: | :---: | | Volnume, |
| :---: |
| $1926=100$. |

The favourable timber exports proved the deciding factor for the development of trade in 1934. These exports that represented about half of the total Finnish exports in normal times, had been gravely affected by the depression, but 1934 marks a change. The output of the sawmills increased by over 200,000 stds to close on $1,200,000$, of which about $1,100,000$ stds were exported. Exports of round timber and wooden articles of various kinds also developed well, and as a result of the timber exports in 1934 the official statistics register an amount of 3,020 million marks or 750 millions more than for the year before. Products of the paper and pulp mills, that had competed successfully with timber during the last few years for the first place in regard to quantity in the foreign trade of Finland, record a smaller increase in exports than timber, from 2,110 million marks in 1933 to 2,280 millions in 1934. The output of mechanioal woodpulp increased by over 50 million kgs to 290 millions, of which 250 millions were exported; the output of chemical pulp increased by almost 100 million kgs to 1,020 millions, of which over 800 millions were exported; while the output of paper increased by close on 50 million kgs to 420 millions, of which 360 millions were exported. Finland's third large class of exports, consisting of animal foodstuffs, had, on the contrary, to overcome great difficulties owing to increased restrictions of imports in several of its old markets, so that its total value
fell off from 478 to 399 millions or only about 6 per cent of the total value of exports.

## IMPORTS.

Imports have been far more susceptible to changes in market conditions than exports. From their highest point during the period of prosperity, attained already in 1928, to their lowest level imports decreased in volume by over 40 per cent and in value by about 60 per cent. From this lowest level imports have rapidly recovered and in 1934 alone the volume of imports grew by close on 30 per cent and their value by over 20 per cent. The general course of imports during recent years is shown in the following table:-

| Year. | Value, c.i.f. Mill. mks, | $\begin{gathered} \text { Volume, } \\ 1926=100 . \end{gathered}$ |
| :---: | :---: | :---: |
| 1928 | 8,013 | 141 |
| 1929 | 7,001 | 125 |
| 1930 | 5,248 | 109 |
| 1931 | 3,465 | 91 |
| 1932 | 3,502 | 79 |
| 1933 | 3,928 | 95 |
| 1934 | 4,772 | 122 |

The feature that, above all, characterises the increase in Finland's import trade during recent times are the increased imports of goods for productive purposes. In comparison with imports during the year of depression, 1931, imports of machinery and similar means of production in 1934 were 231 million marks or 45 per cent and imports of raw materials 871 millions or 65

per cent larger, but imports of foodstuffs and luxuries only 149 million marks or 22 per cent and imports of other finished articles for consumption 56 millions or 6 per cent larger. Economic development during the last few years has encouraged self-support to a growing extent in various spheres of production in Finland, but what the country has to import in any case are different kinds of raw materials and other means of production.

Another pronounced tendency that has become apparent in Finland's import trade of late is its increased orientation towards Great Britain, chiefly at the expense of Germany. During 1934 imports from Great Britain increased by 282 million marks or 35 per cent, whereas imports from Germany were reduced by 92 million marks or 9 per cent, while exports to Great Britain increased by 481 million marks or 20 per cent and to Germany by 109 millions or 21 per cent.

## THE BALANCE OF TRADE.

As already mentioned, Finnish exports were, on the whole, only slightly affected by the depression and have, on the contrary, expanded considerably during the last few years, whereas imports have been restricted by the force of the depression and new tendencies in Finnish production. This has resulted in the balance of trade recording a considerable surplus of ex-
ports in recent years. In 1931 there was a surplus of exports of 22 per cent, in 1932 of 25 per cent and in 1933 of 26 per cent, or about 3,500 million marks for these three years together. For 1933 the surplus of exports amounted to 1,370 million marks or more than for any previous year and there was reason to expect that the balance of trade would now begin to adjust itself. This expectation proved correct in so far as the volume of exports only grew by 8 per cent last year; but the volume of imports by 29 per cent. In shaping the balance of trade for 1934, however, the development of prices had a marked influence, and from a financial point of view this fact proved very favourable, the level of prices for imported goods having dropped during the year by 6 per cent, but having risen for exported goods by 8 per cent. As a result the balance of trade for 1934 records an exceptionally large surplus of 1,445 million marks. Such a surplus in the balance of payments is, of course, of great value at a time of general uncertainty and anxiety in international economic conditions. By means of it Finland has been able to improve her economic position considerably and can feel greater confidence in facing the period of a less favourable relation, from the point of view of the balance of payments, between imports and exports that we must now probably expect.

# FINNISH TRADE STATISTICS. 

BY
VERNER LINDGREN, M. A.
HEAD OF THE STATISTICAL DEPARTMENT OF THE BOARD OF CUSTOMS.

In the statistics of foreign trade different systems are adopted in different countries in recording the country of import and export. Each country has its special rules regarding the terms "country of import" and "country of export". Apart from minor variations there are the following three main kinds of system:-

For imports.
I. The country of despatch.
II. The country of purchase.
III. The country of production.

For exports.
I. The country of destination.
II. The country of sale.
III. The country of consumption.

In the case of countries possessing a large production and consumption and well developed trade connections the choice of a system for recording the different countries plays no great part. Goods are mostly sold and despatched directly from the producing country to the consuming country without any question of middlemen or transhipment arising. In such circumstances the result is the same on the whole, whichever of the systems referred to is used. The case is different in regard to smaller countries lying off the beaten track of world trade. Frequently there are no direct trade and transport communications with the corresponding countries of production and consumption. Consequently imports from a certain country may be quite different in extent, if
the goods are treated as being imported from the country in which they were produced, from which they were sold or in which they were loaded; divergences also occur, if the country, to which goods are sold, or to which they are despatched or in which they are inteaded to be consumed, is considered the country of export.

In the Finnish trade statistics the first of the three systems mentioned above was used up to 1918; the last country, in which goods were loaded was considered the country of import, and the first country, in which goods were discharged, was looked upon as the country of export. From 1918 - that is after the end of the Great War, when there again appeared to be an opportunity for Finland, recently become independent, to establish a more independent foreign trade - Finland adopted the second of the systems referred to: the country from which goods were purchased was recorded as the country of import, and the country to which they were sold as the country of export.

The tendencies of international trade policy of the last few years that attach importance to a considerable extent to the national origin of goods, leaving questions of commerce and transport out of consideration, have made it necessary to provide statistics of foreign trade, calculated to illustrate, in what countries the goods imported have been produced and the goods exported are intended to be consumed. Such statistics are being worked out. too, in Finland from the beginning of 1935. The
system employed hitherto in recording the countries has, however, not been given up, dual statistics being kept for the present, the one system according to countries of purchase and sale, the other according to countries of pro-
duction and consumption. The recently completed statistics of trade in January provide the following table of Finland's foreign trade with different countries.

FINLAND'S FOREIGN TRADE IN JANUARY, 1935.

| Country | Imports |  | Exports |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Purchased from | Produced in | Sold to | For consumption in |
|  | country specified |  | country specified |  |
|  | Mill. mks. | Mill. mks. | Mill. mks. | Mill. mks. |
| Great Britain | 93.6 | 81.3 | 189.1 | 181.7 |
| Germany .... | 63.4 | 48.8 | 27.0 | 28.5 |
| United States | 33.8 | 42.0 | 44.9 | 45.1 |
| France. | 9.7 | 13.8 | 12.4 | 12.8 |
| Holland | 9.8 | 7.6 | 4.5 | 4.1 |
| Belgium | 17.1 | 10.9 | 13.9 | 13.4 |
| Sweden | 34.9 | 28.1 | 19.6 | 10.3 |
| Denmark. | 14.2 | 9.9 | 8.7 | 8.2 |
| Brazil . | 17.2 | 22.9 | 0.9 | 3.6 |

It will be seen from this table that the different systems yield very different results, which indicates that the present extension of the
statistics of foreign trade is calculated to make clear the composition of Finland's foreign trade.

## ITEMS.

Finland's short-term foreign accounts. Complete information is not available with regard to all Finland's foreign short-term indebtedness and balances, but the principal items have been compiled, partly according to precise data and partly according to approximate estimates, in the following table which illustrates the position at the end of 1932-1934. The foreign currencies have been converted into Finnish marks at the par rate of exchange ruling prior to the abandonment of the gold standard.

| Indebtedness. | Dec. 31, Dec. 30, Dec. 31, 1934.1933 .1932. Mill. mks. Mill. mks. Mill. mks. |  |  |
| :---: | :---: | :---: | :---: |
|  |  |  |  |
| State | 59 | 310 | 230 |
| Municipalities | 80 | 6 | 28 |
| Joint Stock banks | 247 | 184 | 132 |
| Bank guarantees | 433 | 815 | 890 |
| Importers' debts | 500 | 250 | 50 |
| Other known debts | 178 | 268 | 238 |
|  | 1,497 | ,833 | 1,568 |

These figures give a striking picture of the improvement in the foreign payment position of Finland during the last few years, for it should be noted that, although part of the short-term indebtedness was converted in 1930 into long-term loans, the funded debt is at present less than at the beginning of the period. The explanation of the great improvement in the payment position must be sought in the balance of trade that has been in a high degree favourable for several years in succession.

The Public Debt. According to figures compiled by the Treasury the Public Debt of Finland amounted to the following sums at the end of January and on some earlier dates:-

|  | Jan. 31, 1935. Mill. mks. | Dec. 31, 1934. Mill. mks. | $\begin{aligned} & \text { Dec. 30, } 1933 \\ & \text { Mill. mks. } \end{aligned}$ |
| :---: | :---: | :---: | :---: |
| Funded debt: |  |  |  |
| Foreign .. | 2,566.4 | 2,282.6 | 2,384.0 |
| Internal | 990.7 | 990.7 | 716.0 |
| Floating debt: |  |  |  |
| Foreign | 59.0 | 59.0 | 358.9 |
| Internal | 50.0 | 49.5 | 48.8 |
| Total | 3,666.1 | 3,381.8 | 3,507.7 |

While the total Public Debt was reduced last year by 125.9 million marks, the figures for last January record an increase of 284.3 millions. The increase is due to the fact that the new State loan of 10 million dollars is included in the
calculation for the first time. As the proceeds of this loan are to be employed for redeeming the dollar loans of 1925 and 1928, the Public Debt will drop again, when the dates of maturity of these loans come round, partly on February 1st and partly on March 1st.

Shipping and ice conditions. On account of the heavy ice in the eastern part of the Gulf of Finland navigation closed at Kotka on February 16th, when the Sampo helped the last steamer to leave by the channel through the islands. Navigation at Helsinki (Helsingfors) is mostly maintained without the assistance of icebreakers, though with the help of the Tarmo in case of need, through the islands partly through solid ice to Porkkala, where the Jääkarhu is stationed. The Sampo is at present in Hanko (Hangö) which is practically free from ice. The Murtaja assists traffic between Hanko and Turku (Abo) through the islands, where there is soft ice in some places and broken ice and pack-ice in others. From Turku the channel leads through solid ice to Löfskär, where the Apu affords assistance in case of need. Navigation through the Ahvenanmaa (Åland) islands continues without interruption. The Voima keeps navigation open at Rauma and Mäntyluoto, where there are some belts of pack-ice, though otherwise the sea is clear of ice.

## THE BANK OF FINLAND MONTHLY BULLETIN

is sent free of charge to anyone wishing to receive it. Finnish booksellers are, however, allowed to sell it at a price of 2 marks per copy. Back numbers are also willingly supplied. Should extracts from the Bulletin be printed, the source should be stated. Correspondence with regard to the Bulletin should be addressed to the Bank of Finland, Statistical Department, Helsinki (Helsingfors), Finland.

[^0]:    ${ }^{1}$ ) Included in home loans, see table 4. Re-discounted Bills according to the monthly statements of the Bank of Finland.
    The figures in brackets [] indicate the position at the end of the previous year.
