

## THE FINNISH MARKET REVIEW.

## THE MONEY MARKET.

In July and in the beginning of August the money market displayed the same tendency towands increasing easiness that had marked the position for a long time. Such a tendency should, of course, be welcomed with great satisfaction, if it is a case of the market relaxing after a period of strain. In reality, however, the present easiness of the market indicates that there is little investment enterprise and that the pace of economic progress has grown slower, or in obher words that recovery has slackened.

Deposits by the public in the Joint Stock banks increased in July by the insignifioant sum of 3.4 million marks, to which an increase of 25.2 millions in deposits from other credit institutions must be added. Last year the total deposits of the Joint Stock banks decreased in July by 70.2 million marks. Credits to the public fell off by 47.1 million marks. In July, 1934, however, the decrease was appreciably larger or 143.4 millions. At the end of July the total deposits in the Joint Stock banks amounted to $8,111.6$ million marks and thus exceeded credits by 476.1 millions. A year ago the corresponding difference was only 235.1 millions and in previous years credits were generally considerably in excess of deposits. The Joint Stock banks have tried to find investments for their plentiful and still growing funds, among other things, in bonds; their hold-
ings of the latter increased in July by 92.9 million marks and reached a record figure of 744.8 millions. In spite of this the cash of the banks grew by 48.4 million marks, so that it attained a record level of 598.7 millions.
The position of the Joint Stock banks towards foreign countries was also marked by the same plentiful supply of money and by the favourable balance of trade. The net balances of the Joint Stock banks increased in July by 30.5 to 198.0 million marks in comparison with only 59.3 and 86.5 millions respectively on the same date in previous years.
In the weekly statements of the Bank of Finland the present easiness of the money market is principally evident in a reduction of credits granted. In July the reduction amounted to 67.1 million marks as compared with 54.3 and 22.6 millions in July, 1934 and 1933. During the first fortnight in August credits fell off still more by 16.7 million marks, so that on August 15th the total credits amounted to 766.6 millions as against 840.8 and 906.1 millions one year and two years ago. The reserve of foreign currency increased in July by 19.0 million marks, but decreased again during the first half of August by 27.4 millions, so that by the middle of that month it amounted to $1,325.4$ million marks as compared with $1,032.2$ and 840.1 millions one year and two years earlier. The note circulation fell off slightly as usual in July, but has con-
stantly maintained itself at a level of about 100 million marks above last year. The note reserve of the Bank of Finland fell off in July by 39.6 million marks and remained practically unohanged during the first half of August. On August 15th it amounted to 861.9 million marks as against 781.6 and 712.3 millions on the same date in 1934 and 1933.

To illustrate the easy state of the money market we may add that deposits in the Savings banks and other Savings institutions have grown considerably more this year than in previous years. The increase or decrease during January -June was as follows:-

The level of prices did not experience any great changes in July. The wholesale price index has now remained unchanged at 90 for twelve months, though the indices for special classes have recorded small changes during that time.

## TRADE AND INDUSTRY.

Foreign trade was very lively during July; in volume imports were 8.4 per cent and exports 1.9 per cent larger than in July, 1934. The value of imports amounted to 490.9 million marks in comparison with 472.6 millions in June and 418.4 millions in July, 1934. The value of exports, indeed, at 712.5 million .marks exceeded the corresponding figure for June, 612.4 millions, but failed to come up to the same figure as in July, 1934, when their value amounted to 761.0 millions. The balance of trade for July thus yielded a considerable surplus of exports amounting to 221.6 million marks, though this was less than the corresponding figures for the previous years, 342.6 and 342.2 millions respectively. For the seven com-
pleted months of this year the surplus of exports amounted to 193.4 million marks as agains $t$ 523.3 and 636.8 millions in the two preceding years.

Sales of sawn timber from Finland were estimated at 700,000 standards at the end of July in comparison with almost 800,000 stds a year ago. In July about 90,000 stds were disposed of, the greater part or about 65,000 stds in Great Britain. Timber has been sold on a smaller scale to Belgium and small parcels to Holland, but there have been few sales to other countries. Exporters expect that, in view of the considerable demand that is still likely from Great Britain and the possibility of disposing of smaller quantities in other countries and taking into consideration the anticipated reduction in supplies, it should be possible to sell the greater part of the balance of this year's supplies, so that no considerable stocks are likely to be left over for the winter.
The state of the market for sulphite cellulose has forced the pulp manufacturers in different countries to resume negotiations for restricting' production.

## THE LABOUR MARKET.

The number of unemployed was reduced at the end of July, when the season is the most favourable of the whole year, to only 3,700 as compared with 11,000 a year ago and 19,700 two years ago. According to the index of working hours in industry that is drawn up by the Research Office of the Ministry for Social Affairs, the position of the labour market at the beginning of the third quarter of the year was 103.9 as against 98.1 a year ago. The increase referred principally to home industries, the index for which rose from 107.5 to 120.9 , while the index for the exporting industries recorded a slight drop from 93.9 to 93.1 owing to the position of the sawmills having grown worse.

| July | 909 | 956 | 1101 | 913 | 1333 | 1175 | 1854 | 996 | +13 | July |

The index is calculated by the Research Office of the Ministry for Social Affairs according to monthly reports from 30 different centres. It ts based on the cost of living for the first hall of $1914=100$ and refers to the normal budget of a workman's family. The index for the total cost of living is the average of the weighted group indices.
36. - WHOLESALE PRICE INDEX.

The index is calculated by the Central Statistical Office, and is based on the average prices for $1926=100$. The first group of indices refers to goods appearing in local wholesale trade in Finland, whereas the indices for imported and exported goods refer to the total quantities of goods imported or exported, including the movement of such goods that are in no way intended for wholesale trade in Finland. An indirect weighting has been applied, by means of which each class of goods is represented by the number of commodities corresponding to the calculated importance of this class in wholesale trade. The averages are arithmetical ones.
37. - INDEX OF WORKING HOURS IN INDUSTRY.

## CERTAIN PARIICULARS ABOUY FINLAND.

## 1. FORM OF GOVERNMENT.

Finland formed a part of the kingdom of Sweden from 1154 to 1809 ; from 1809 it was an autonomous Grand Duchy connected with Russia up to December 6th, 1917, when Finland declared its independence, which was acknowledged by all the Powers including Soviet Rusaia. It became a republic in 1919. The legislative power of the country is vested in the Diet and the President. The highest executive power is held by the President chosen for a period of 6 years. The present President P. E. Svinhufvud is elected for the term March 1st, 1931, to March 1st, 1937.

The Diet, composed of 200 members, is elacted by universal suffrage. The proportions of the different parties in the Diet elected in 1933 are as follows:

Number
Social-Democratic party . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 78
Agrarian party ......................................................... 53
Swedish party . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 21
Unionist party . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 18
Patriotic National Movement's party ............................ 14
Progressive párty ...................................................... 11
Small farmers' party ................................................. . . . 3
People's party
2

## 2. LAND.

THE AREA is 388,217 square kilometres $=149,900$ square miles (Great Britain's area is $89,047 \mathrm{sq}$. m. and Italy's area 117,982 sq. m .). Of the total area $11.6 \%$ are lakes. On an average $11.8 \%$ of the land in the south of Finland is cultivated, $1.1 \%$ in the North, $6.6 \%$ of the whole land. Of the land area 25.3 mill. ha ( 62.5 mill. acres) or $73.6 \%$ are covered by forests.

THE AVERAGE TEMPERATURE in the coldest month is in S. W. Finland - $5^{\circ}$ to - $6^{\circ} \mathrm{C}$., in Lappland - $15^{\circ} \mathrm{C}$. and during the warmest month $+15^{\circ}$ and $+13^{\circ}$ to $+14^{\circ} \mathrm{C}$. reşp. The average temperature in Helsinki (Helsingfors) is $+4.6^{\circ}$ (in Oslo $+5.4^{\circ}$, in Montreal $+5.4^{\circ}$, in Moscow $+3.6^{\circ}$ ). The grownd is covered by snow in the South for about 100 days, in Central Finland for 150 to 180 days, in Lappland about 210 days.

## 3. POPULATION.

NUMBER OF INHABITANTS (1933): 8.7 millions (ot whom 0.2 million emigrants), Sweden (1933) 6.2, Switzerland (1932) 4.1, Denmark (1932) 3.6 and Norway (1983) 2.9 millions.

DENSITY OF POPUIATION (1933): In South-Finland 18.9, In North-Finland 2.6 and in the whole country an average of 10.9 inhabitants to the square kilometre.

DISTRIBUTION (1933): 79.8 \% of the population inhabit the country, $20.2 \%$ the towns and urban districts. The largest towns are (1933): Helsinki (Helsingfors), the capital, 268,592 inhabitants, Vilpuri (Wiborg) 71,817, Turku (Abo) 69,041, Tampere (Tammerfors) 58,220 .

OCCUPATION (1930): agriculture $59.6 \%$, industry and manual labour $16.8 \%$, commerce $4.3 \%$, transport $8.8 \%$, other occup-. ations $1.5 .6 \%$.

LANGUAGE (1930): Finnish speaking $89.4 \%$, Swedish speaking 10.1 \%, others $0.5 \%$.

RELIGION (1933): Lutheran 96.2 \%, Greek-Orthodox $1.8 \%$, others $2.0 \%$.

EDUCATION (1930): Amongst persons over 15 years of age only. $0.9 \%$ are illiterate. There are three universitien founded in 1640, 1917 and 1920.

INCREASE OF POPULATION (1933): Births $17.4 \%$, deaths $12.9 \%$ (in France in $193116.2 \%$ and in England in $193112.3 \%$ \%), natural increase $4.5 \%$.

## 4. TRADE AND COMMUNICATIONS.

FOREST RESOURCES. The growing stock of the forest is 1,620 million $\mathrm{m}^{3}$ ( 57,214 million cubic feet). The merchantable timber
(measuring 20 cm at breast height $=6 \mathrm{in}$. at a height of 18 ft .) amounts to 1,557 million trees. Of this number pine is represented by $60.7 \%$, spruce by $28.1 \%$, the conifers thus constituting $88.8 \%$ or 1,388 million trees; leaftrees, mostly birch, $11.2 \%$ or 174 million trees. The annual increment is 44.4 million $\mathrm{m}^{3}(1,568$ million cub. ft.). The aningal fellings according to earller calculations are 40 million $\mathrm{m}^{3}$ ( 1,413 million cub. ft.). In North Finiand the increment is much larger than the fellings, but in South Finland excess felling occurs locally.

AGBICULIURE (1938): Cultivated land 2.2 million hectars, divided as follows: area under cultivation $0.3-10$ hectars $\mathbf{3 3 . 4} \%$, $10-50 \mathrm{ha} 52.1 \%, 50-100 \mathrm{ha} 8.4 \%$, over $100 \mathrm{ha} 6.1 \%$. Cultivated land is divided between the different kinds of crops as follows: $50.7 \%$ hay, $18.9 \%$ oats, $9.6 \%$ rye, $5.4 \%$ barley, $3.3 \%$ potatoes, $12.1 \%$ other. The number of dairies in 1933 amonnted to 627.

OWNERSHIP OF LAND. The land area is distributed among different classes of owners approximately as follows: private $52.1 \%$. State $30.7 \%$, Joint Stock Companies $6.5 \%$, communities $1.7 \%$.

INDUSTRY (1933): Number of industrial concerns 3,527, hands 140,736, gross value of products of industry 10,837 million marks.

LENGTH OF RAILWAYS (1933): $5,574 \mathrm{~km}$, of which 5,319 km State railways and 255 km private. The gauge is 1.524 m .

COMMERCLAL FLEET (1934): Steamships 548 (251,890 reg. tons net), motor vessels 157 ( 17,323 r. t.), sailing ships 218 ( 61,168 r. t.). Total 923 (330 381 r. t.).

## 5. FINANCE AND BANKING.

CURRENCY. Since 1860 Finland has its own monetary system. From 1877 up to the Great War the currency maintained its stable gold value and after the disturbances caused by the war Finland has again from January 1st, 1926, a gold standard. The unit of currency is the mark (Finnish omarkkar) $=100$ pennia. According to the monetary law of December 21st, 1925, a gold coin of 100 marks' value shall contain $3^{15} / 10$ grams of tine gold. Since October 12th, 1031, the redemption of bank notes in gold is, however, suspended.

STATE FINANCES. According to the belance sheet for 1984 the State revenue was $4,135.7$ miliion marks of which $3,366.9$ million marks were current revenue, and State expenditure $4,100.7$ million marks, of which $2,599.2$ million marks were current expenditure. The princlpal sources of revenue were as follows: State property and undertakings (net) 320.8, direct taxes 485.0, indirect taxes $1,815.6$, stamp duty 165.7 , charges 94.8 , interest and dividends 184.2 and capital revenue 768.8. The value of State property in 1922 is estimated at $11,150.6$ million marks. For PubHe Debt see table 19 in this issue.

MUNICIPAL FINANCES. According to the Budget for 1934 expenditure amounted to $1,429.1$ million mariss. Income from taxation was calculated at 466.4 million marks, taxed income at $4,978.4$ million marks. The municipal income tax (non-progressive) averaged $9.4 \%$ of the ratepayers' income.

THE BANK OF ISSUE. The Bank of Finland, (founded in 1811) is a State Bank. Its head-office is in Helsinki (Helsingfors) with branches in Turku• (Abo), Porl (Björneborg), Vaasa (Vasa), Oulu (Uleaborg), Kuopio, Joensuu, Sortavala, Vijpuri (Wiborg) Mikkeli (S:t Michel), Tampere (Tammerfors), Hämeenlinna (Tavastehus), Jyvaskyla and Kotisa.

THE JOINT STOCK BANKS (1935): Number 9, possess 475 offices, where all kinds of banking business is transacted. Including all banks, there is one banking establishment per 7,300 inhabitants.

The largest banks are: Kansallis-Osake-Pankki, Ab. Nordiska Föreningsbanken and Helsingfors Aktiebank, all with head offices in the capital.

OTHER BANKS (1935): Mortgage banks 6, Savings banks 482, Co-operative Credit Socleties 1,342 and a Central Bank for the latter.

# FINLAND'S BALANCE OF PAYMENTS FOR 1934. 

BY<br>A. E. TUDEER, PH. D.<br>STATISTICIAN TO THE BANK OF FINLAND.

## PRINCIPLES OF CALCULATION.

The Central Statistical Office has now completed its calculations of Finland's balance of payments for last year. As one could have realised beforehand on account of the very positive balance of trade, the balance of payments recorded an unusually large surplus of income over expenditure. The final calculation shows that the surplus of income was actually larger than for any previous year. Before giving the figures in the balance of payments, horwever, we must say a few words regarding the principles acoording to which they are calculated.

In the first place, the Finnish calculation of the balance of payments only includes the actual income from abroad and the expenditure made there, but neither issues of loans, nor redemption of debt or any other items that in their essence represent the movement of capital. Also, a recond of the actual payments made between Finland and other countries during this period has not been aimed at, but an attempt has been made to elucidate, how Finland's balance of payments would have turned out, in case all payments had been made in cash. In other respects, too, the same principles have been adopted in the main on which the calculation of Finland's balance of payments has previously been based (see, e.g., No. 8, 1934, of this Bulletin.) The fluctuations in the value of some foreign currencies, of course, introduces an element of uncertainty into the oalculations that it has
been impossible to avoid. As far as possible the conversion of all amounts in foreign currene: has, however, been made according to rates actually paid.

As we have pointed out in previous reviews, the following colculation of the balance of payments cannot be considered exact in its details. In some respects the figures of income and expenditure are based on precise statistical data, but in other points only on more or less summary calculations. On the whole, however, they provide a correct idea of the balance of payments and the changes occurring in it from year to year.

## INCOME.

The income in the balance of payments has been calculated by the Central Statistical Office at the following amounts:-

|  | 1933 |  | 1934 |  |
| :---: | :---: | :---: | :---: | :---: |
|  | $\begin{aligned} & \text { Mill. } \\ & \text { mks. } \end{aligned}$ | $\begin{aligned} & \text { Mill. } \\ & \text { mks. } \end{aligned}$ | $\begin{aligned} & \text { Mill. } \\ & \text { mks. } \end{aligned}$ | Mill. |
| Exports | 5,300 |  | 6,230 |  |
| stowage charges not included | 30 | 5,330 | 15 | 6,245 |
| Harbour charges .... |  | 60 |  | 70 |
| Shipping freights |  | 310 |  | 385 |
| Emigrants' and seamen's remittances. |  | 150 |  | 100 |
| Foreign travel . |  | 170 |  | 210 |
| Foreign insurance |  | 110 |  | 130 |
| Post Office, Telegraph |  |  |  |  |
| Office and State |  |  |  |  |
| Railways' revenue |  |  |  |  |
| from abroad |  | 25 |  | 10 |
| Foreign representatives |  | 15 |  | 15 |
| Interest from abroad |  | 20 |  | 25 |

Altogether the income in the balance of payments amounted to 7,190 million marks last year. It was consequently 1,000 millions larger than in the previous year. This considerable increase was principally due to langer exports. The consequences of livelier foreign trade proving favourable to the balance of payments are also visible in the increased income from harbour charges and shipping freights. The income from foreigners' travels in Finland and from foreign insurance also grew. The income in interest derived from Finnish investments abroad also increased slightly. On the other hand the income from emigrants' remittances fell off by one-third. The reduction in the revenue of the Post Office, Telegraph Office and State Railways is not actual, but is due to the adoption of a different method. On the whole it is clear that the increase of income in the balance of payments is due to the economic recovery; the same applies to the expenditure.

## EXPENDITURE.

The principal items of expenditure for 1934 and 1933 are estimated to amount to the following round figures:-

|  | 1933 |  | 1934 |  |
| :---: | :---: | :---: | :---: | :---: |
|  | $\begin{aligned} & \text { Mill. } \\ & \text { mks. } \end{aligned}$ | $\begin{aligned} & \text { Mill. } \\ & \text { mks. } \end{aligned}$ | $\begin{aligned} & \text { Mill. } \\ & \text { mks. } \end{aligned}$ | Mill. |
| Imports | 3,930 |  | 4,780 |  |
| less: marine and |  |  |  |  |
| transport insurance paid to Finnish com- |  |  |  |  |
| panies . ........... | 20 | 3,910 | 10 | 4,770 |
| Smuggling . . . . . . . . |  | 30 |  | 5 |
| Post Office, Telegraph |  |  |  |  |
| Office and State |  |  |  |  |
| Railways' expenditure abroad |  | 20 |  | 10 |
| Representation abroad and share in international expenses .. |  | 35 |  | 35 |
| Remittances to emigrants |  | 15 |  | 10 |
| Travel abroad ...... |  | 160 |  | 190 |
| Insurance premiums and claims ........ |  | 120 |  | 150 |
| Interest |  | 550 |  | 450 |
| of which: |  |  |  |  |
| State | 252 |  | 196 |  |
| banks | 5 |  | 5 |  |
| other | 293 |  | 249 |  |

The total expenditure thus amounted to 5,620 million marks in 1934, representing an increase of 780 millions over 1933. This increase was principally due to heavier imports. In addition expenditure was increased on Finnish citizens' journeys abroad and on insurance. On the other hand there was a striking reduction of expenditure in the case of smuggling and of interest on long-term and short-term foreign credits. The latter reduction is a direct consequence of Finland's foreign indebtedness having fallen off and of some loans having been converted at lower rates of interest. The actual redemption of debt is not included in these figures, as already mentioned.

## THE DIFFERENCE BETWEEN INCOME AND EXPENDITURE.

If we compare the figures for income and expenditure in the ibalance of payments, we will find that the former exceed the latter by no less than 1,570 million marks. This is the largest surplus of income that the Finnish balance of payments has recorded for any year. The nearest approach to it was in 1933, 1,350 million marks, as the diagram and table on the next page show.

Regarding the question as to how these considerable surpluses of income in the Finnish balance of payments have arisen, we find thrat the balance of trade proves the deciding factor. If smuggling is included among the imports, to which it actually belongs, although it is not included in the trade statistics, and if we take into aocount the corrections of the value of exports and imports made in the tables, the result shows that the balance of trade provided a surplus of exports amounting to 1,470 million marks in 1934 as against 1,390 millions in 1933. At the same time the table on page 25 shows that interest (i. e., expenditure in interest less income in interest) represented a net expenditure last year of 425 million marks in comparison with 530 millions in 1933. Besides, it is evident from the previous tables that a net income was obtained from

shipping (including harbour charges) of 455 against 370 million marks, from emigrants' and seamen's remittances of 90 against 135 millions, from tourist traffic and foreign travel of 20 against 10 millions and so on. Adding up all the items excepting those included in the balance of trade and interest, the result is that they yielded a surplus of income amounting to 525 million marks in 1934 and to 490 millions in 1933. It will thus be seen that this income balanced the amount of net expenditure in interest on the whole; in 1933 the former did not quite equal the amount of the latter, but last year it exceeded the amount of the latter by 100 million marks. As is seen from the table on the next page, this is the customary position. The result of this is that the balance of trade and the changes in it are of paramount importance in forming the balance of payments in different years.

## A REVIEW OF THE YEARS 1922-1934.

In order to illustrate the course pursued by the balance of payments we give the following figures for the income and expenditure in it during all the years for which it has been calculated. In doing so the data for the earlier years have been corrected in accordance with subsequent alterations, i.e., with improvements
in the method of calculating the balance of payments.

| Year. | Income. Mill. mks. | Expenditure. Mill. mks. | Surplus of income ( + ) or ex penditure (-). Mill. mks. |
| :---: | :---: | :---: | :---: |
| 1922 | 4,984 | 4,465 | + 509 |
| 1923 | 4,962 | 5,189 | 227 |
| 1924 | 5,639 | 5,327 | + 312 |
| 1925 | 6,312 | 6,172 | $+\quad 140$ |
| 1926 | 6,437 | 6,367 | + 70 |
| 1927 | 7,218 | 7,140 | + 78 |
| 1928 | 7,256 | 8,861 | -1,605 |
| 1929 | 7,440 | 7,917 | - 477 |
| 1930 | 6,345 | 6,156 | + 189 |
| 1931 | 5,315 | 4,328 | + 987 |
| 1932 | 5,630 | 4,453 | + 1,177 |
| 1933 | 6,190 | 4,840 | + 1,350 |
| 1934 | 7,190 | 5,620 | +1,570 |

This shows that in general Finland's balance of payments has recorded larger income than expenditure. The only exceptions are 1923 and 1928-1929. If we add up the surpluses on the one hand and the deficits on the other for the whole period from 1922 to 1934, the net result is a surplus of income amounting to approximately 4,000 million marks. As already stated, the changes in the balance of payments are closely connected with the changes in the balance of trade. This accordance between the balance of payments and the balance of trade is clearly evident in the diagram above and is also illustrated by the following figures:-

| Year. | $\begin{aligned} & \text { Surplus of ex- } \\ & \text { ports }(++ \text { or or } \\ & \text { imports (-). } \\ & \text { Minl. mes. } \end{aligned}$ | Ehxcess of expenditure on interest over income from interest. Mill. mks. | Other Items in the balance of payments. Mill. mks. |
| :---: | :---: | :---: | :---: |
| 1922 | + 468 | -227 | + 278 |
| 1923 | - 245 | -252 | + 269 |
| 1924 | + 238 | -266 | + 340 |
| 1925 | + 61 | -325 | + 404 |
| 1926 | - 38 | -285 | + 393 |
| 1927 | - 40 | -318 | + 436 |
| 1928 | -1,740 | -3500 | $+485$ |
| 1929 | - 515 | -410 | + 478 |
| 1930 | + 180 | -412 | + 421 |
| 1931 | + 990 | - 436 | $+433$ |
| 1932 | + 1,145 | -583 | $+615$ |
| 1933 | +1,390 | -530 | + 490 |
| 1934 | +1,470 | -425 | + 525 |

## THE BALANCE OF PAYMENTS AND MOVEMENT OF CAPITAL.

If complete and exact data were available regarding all the items that affect a country's balance of payments as well as the movement of capital to and from the country, they should agree fully with each other. As we have already explained, however, the balance of payments is based partly on more or less approximate calculations and it is only to be expected that some item may have been omitted for want of data. Nor is exhaustive information obtainable with
regard to the movement of capital. Entire conformity can, therefore, not be expected between the net results of the balance of payments and the movement of capital, but in broad lines the available data support each other.

Regarding the movement of capital in 1934 the principal known items are as follows. New bond loans were negotiated abroad to a value of about 200 million marks. Besides, mediumterm credits were taken up to an amount of quite 100 million marks. On the other hand at least 800 million marks or possibly slightly more were employed for regular redemption and for sinking fund purchases of bonds from abroad. Finland's funded (or medium-term) foreign debt swas thus reduced last year by at least 500 million marks. With regard to shortterm debt the amount is estimated to have decreased by about 340 million marks. In addition, owing to the favourable balance of payments, short-term investments and other foreign balances increased by about 570 million marks. Altogether these items represent a net capital movement of 1,410 million marks, by which Finland's net foreign indebtedness was reduced.

## ITEMS.

The State Budget for 1936. The Government has completed its estimates for the State Budget for 1936. The principal items, compared with the corresponding items in the Budget passed for this year, are given in the following table:-

The current expenditure has been increased by 53.5 million marks. For the greater part this increase is due to larger grants for defence and education and other cultural objects, though several other main groups also record an increase. On the other hand, expeaditure on interest is reduced on account of the conversion of loans and the reduction of the short-term indebtedness of the State. The increase in the capital expenditure amounts to 390.9 million marks, the greater part of which consists of the redemption of loans. In order that the latter should not prove too heavy a burden on the Budget, it is proposed to convert a large
part of the matured loans. This is the explanation of the great rise in the capital revenue, which includes loans to an amount of 300 million marks. The current revenue is estimated to be 133.1 million marks larger than for the present year. It is calculated that the greater part of this increase will be obtained by the increased yield of taxation as a result of the improvement in economic conditions. The increase in revenue wrould have been. estimated even higher, if the Government had not at the same time drawn up proposals for reducing taxation. These consist partly of a reduction of the income and property tax for the lowest classes of taxpayers and of greater benefits to families with children, and partly of lower duty on some articles of general consumption, such as sugar and coffee.

The Budget estimates and taxation proposals will be submitted to the Diet which meets on September 2nd.

Increase of capital. Oy. Arabia Ab., which principally manufactures chinaware, recently decided to raise its share capital from 20 to 32 million marks by issuing new shares at par. The funds obtained by the new issue are to be employed for stabilising the 'company's liabilities.

Iron and steel works under construction. Work was started lately on the iron and steel works planned by Oy. Vuoksenniska in the valley of the Vuoksen in Eastern Finland. The work is to be done in three stages, the first of which will cost 30 million marks, while the total cost is estimated to be 75 millions. The object is to work up the iron ore obtained from the Outokumpu copper mine. The machinery for the works is being manufactured mostly in Finland.

Crop prospects. During the latter part of July and the first half of August the temperature

Was in general favourable to growth. Some frost occurred at night, it is true, in the northernmost parts of the country, but the damage done was generally slight. The rainfall varied very much in different parts of the country, so that, while the western parts suffered from a shortage of rain, the rainfall was sufficient or even too heavy in some of the eastern districts.

The mowing of the rye had not been completed by the middle of August, when a rainy period set in and interfered with harvesting and adversely affected the quality of the crop. The spring sowings improved during the period under review, but harvesting was delayed by the rainy weather. Haymaking was begun in favourable conditions and the hay that was harvested early is of good quality. In those cases, in which harvesting was started later, it wais interfered with by the raing weather, which also made the quality worse. On the whole, however, the crop prospects were rather more favourable in the middle of August than a month earlier.

According to the preliminary estimates of the Board of Agriculture the prospects were as follows in the middle of August. In the table a scale of figures is employed, 8 signifying a very good crop, 7 a good crop, 6 above medium, 5 medium, 4 below medium, 3 a poor orop, 2 almost a failure of crop, and 1 a failure of crop.

|  |  | Midale | Au |  |
| :---: | :---: | :---: | :---: | :---: |
|  | 1935 | 1934 | 1933 | 1932 |
| Autumn wheat | 5.4 | 5.1 | 6.3 | 6.0 |
| Spring wheat | 5.4 | 6.0 |  |  |
| Rye | 5.3 | 6.0 | 6.1 | 6.0 |
| Barley | 5.0 | 5.9 | 4.8 | 5.6 |
| Oats | 5.0 | 6.2 | 4.7 | 5.4 |
| Potatoes | 5.8 | 5.8 | 5.8 | 5.9 |
| Hay | 6.1 | 5.3 | 4.5 | 5.1 |

As the figures indicate, the crop prospects are generally medium and in all cases, with the exception of hay, worse than last year, when the harvest was a record one, and in some cases, too, slightly worse than in 1933 and 1932. Much will depend, of course, on the state of the weather during the next few weeks.

## THE BANK OF FINLAND MONTHLY BULLETIN

is sent free of charge to anyone wishing to receive it. Finnish booksellers are, however, allowed to sell it at a price of 2 marks per copy. Back numbers are also willingly supplied. Should extracts from the Bulletin be printed, the source should be stated. Correspondence with regard to the Bulletin should be addressed to the Bank of Finland, Statistical Department, Helsinki (Helsingfors), Finland.
