

## THE FINNISH MARKET REVIEW.

## THE MONEY MARKET.

After the tightening of the money market in Finland in the first two months of the year a change occurred in March and the position again grew easier. Both the earlier and the later tendency was principally due to ordinary seasonal fluctuations.

The credits granted by the Joint Stock banks, which had increased in an unusual degree in January and February, also grew in March, though only by 82.4 million marks, while the increase last year amounted to 184.7 millions. Since the beginning of this year the increase amounts to 516.2 million marks as against 550.7 millions in 1937. The increase in deposits in the Joint Stock banks in March was of record proportions, viz., 340.7 million marks in comparison with 239.1 millions in the previous year. During January-March the increase in deposits amounted to 591.8 million marks as against 480.7 millions last year. At the end of March deposits in the Joint Stock banks totalled $10,622.0$ million marks as compared with $9,078.7$ millions a year ago and $8,119.4$ millions two years ago. The corresponding figures for the credits of the Joint Stock banks were $9,124.8$ millions, $7,923.5$ millions and $7,520.0$ millions. The surplus of deposits over credits in the Joint Stock banks, which was already large, but had been slightly reduced in January and February, grew in March by 958.3 million marks to $1,497.2$ millions.

In the foreign payment position of the Joint Stock banks there was a change in March. their indebtedness growing from 274.7 to 307.6 million marks. As their foreign balances remained almost unaltered, 582.8 as against 581.2 millions, their net foreign balances fell off slightly. The reduction amounted to $\mathbf{3 1 . 3}$ million marks, so that at the end of March the net foreign balances amounted to 275.2 millions as against 274.1 millions a year ago.

The weekly statements of the Bank of Finland do not record the same relaxation as in the case of the Joint Stock banks. The credits granted by the central bank, indeed, increased considerably less in March than during the previous month or by 124.4 million marks as against 175.0 millions in February, but the increase was appreciably larger than in the previous years. During the first half of April the credits increased still further by 53.5 mil lions. The notes in circulation grew in March by 102.8 million marks or rather less than in March, 1937, when the increase represented 156.1 millions, but owing to the gradual increase in the course of last year the note circulation established a record of $2,291.5$ millions at the end of March last. In spite of the adverse state of the balance of trade the Bank of Finland's balances with its foreign correspondents increased in March by 48.8 million marks and reached a record figure of $2,320.9$ millions at the end of the month. The gold reserve in-
creased by a small amount that was transferred from the item "Gold abroad not included in the note cover". The note reserve decreased appreciably or from 389.2 to 247.7 million marks, so that it was less than it had been for many years. For the sake of comparison we can mention that at the end of March, 1937, it amounted to 436.5 millions and a year before to 769.7 millions. By the middle of April the note reserve had decreased still further to 205.9 million marks.

The level of prices displayed a continued falling tendency in March. The wholesale price index dropped 1 point to 100 , if $1926=100$, and was 3 points lower than a year ago. The fall in prices was considerably heavier in the case of articles of import and export. The index for articles of import dropped 2 points in March to 99 as against 110 a year ago and the index for articles of export fell 3 points to 106 as against 117 in March, 1937. The consumption price index also displayed a falling tendency. All these indices were higher, however, than at the same date in 1936.

## TRADE AND INDDUSTRY.

With regard to the season of the year foreign trade was of record extent. The value of imports amounted to 680.3 million marks in March as against 578.1 millions in February and 569.2 millions in March, 1937. The value of exports increased rather less; in March it amounted to 546.8 millions in comparison with 473.3 millions in February and 483.8 millions in March, 1937. In this way the balance of trade yielded a surplus of imports of 133.5 million marks compared with 85.4 millions in the previous year and a slight surplus of exports in March, 1936. For the period from January to March the balance of trade recorded a surplus of imports amounting to 402.4 million marks as against 237.3 and 32.7 millions in the two previous years. This change for the worse in the balance of trade is characteris-
tic of such a weakening of the cyclical position as dominates economic development at present.

The state of the timber market shows no improvement. On the contrary the publication of the new Russian stock notes, containing appreciably reduced prices, has made the position worse. As the consumption of timber is still large in the United Kingdom and the heavy stocks held at the beginning of the year have been reduced, sellers have hopes that sales will gradually get under way, provided they keep cool heads. The level of prices is low, however, and means a loss to those numerous exporters, who bought their raw materials at peak prices last year. Up to the middle of April about 270,000 standards of sawn timber had been sold by Finland, which does not represent more than one-third of the quantity sold a year ago.

The market for cellulose and paper is also sombre. Both buyers and sellers are adopting a waiting attitude, so that scarcely any new contracts of any size have been concluded. The European association of sulphite manufacturers, Sulphite Pulp Suppliers, passed a decision at the beginning of April to restrict sales of sulphite cellulose for this year by 20 per cent in the hope that this would improve the market.

## THE LABOUR MARKET.

Work in the forests has been completed to a great extent and timber floating is starting, a few weeks late in North Finland owing to the great quantity of snow this winter. Building is still lively and shows no signs of falling off. The position on the Finnish labour market is therefore good, notwithstanding the falling off in international trade. The number of unemployed registered at the Labour Exchanges decreased from 4,544 at the end of February to 3,635 at the end of March and was considerably less than at the same date in the previous year (4.482).

${ }^{1}$ ) According to data sapplied by the Treasury. Internal loans are given at their nominal value and foreign loans in Finnish currency according to the rates ruling on the dates of the issue of the loans. - 2) Calculated as follows: the outstanding amounts of both internal and foreign loans have been converted into Swlss Francs at the monthly average rates of exchange of the respective currencies. From September, 1936, the amounts have been converted into Swiss Francs of former gold value, in order to eliminate the influence of fluctuating currencles.

Calculated by the Central Statistical Office. The first group of indices refers to prices of goods appearing in local wholesale trade in Finland, whereas the indices for imported and exported goods refer to foreign trade prices. An indirect weighting has been applied, each class of goods being represented by the number of commodities corresponding to the calculated importance of this class in wholesale trade. The averages are arithmetical ones.

## 2. LAND

THE ARTA (excluding lake Laatokka) is 382,801 square kllometres $=147,761$ square miles (Great Britain's area is $89,047 \mathrm{sq} . \mathrm{m}$. and Italy's area 117,982 sq. m.). Of the total area $9.0 \%$ are inland waters. On an average $11.8 \%$ of the land in the South of Finland is cultivated, $1.1 \%$ in the North, $6.6 \%$ of the whole land. Of the land area 25.3 mill. ha ( 62.5 mill. acres) or $73.0 \%$ are covered by forests.

THE AVERAGE TEMPERATURE in the coldest month is In S. Finland - $3^{\circ}$ to $-8^{\circ} \mathrm{C}$., in Lapland $-12^{\circ}$ to $-14^{\circ} \mathrm{C}$. and in the warmest month $+16^{\circ}$ to $+17^{\circ}$ and $+12^{\circ}$ to $+14^{\circ} \mathrm{C}$. resp. The average temperature in Helsinki (Helsingfors) is $+4.6^{\circ}$ (in Osio $+5.4^{\circ}$, in Montreal $+5.4^{\circ}$, in Moscow $+3.6^{\circ}$ ). The ground is covered by snow in the South for about 110 days, in Central Finland for about 150 days, in Lapland about 200 days.

## 3. POṖULATION.

NUMBER OF INHABITANTS (1936): 3.8 millions (ot whom 0.2 million emigrants). Sweden (1936) 6.3, Switzerland (1935) 4.2. Denmark (1936) 8.7 and Norway (1936) 2.9 millions,

DENSITY OF POPULATION (1936): In South-Finland 18.7, In North-Finland 2.7 and in the whole country an average of 10.8 inhabitants to the square kilometre.

MERCHANT $\mathbb{F L E B T}$ (1937): Steamships 557 (291,104 reg. tons net), motor vessels 172 (19,080 reg. tons net), sailing ships 137 (38,702 reg. tons net). Total 866 (348,886 reg. tons net).

## 5. FINANCE AND BANKING.

CURRENCY. Since 1860 Finland has Its own monetary system. From 1877 up to the Great War the currency maintained its stable gold value and after the disturbances caused by the war Finland has again from January 1st, 1926, a gold standard. The unlt of currency is the mark (Finnish markka, $=100$ penniai). According to the monetary law of December 21st, 1925, a gold coin of 100 marks' value shall contain $3^{15} / 1$ grams of fine gold. Since October 1:2th, 1931, the redemption of bank notes in gold $s$, however suspended.

STATE FINANCES. According to the finance accounts for 1937 the State revenue was $5,984.5$ million marks of which $4,315.6$ million marks were current revenue, and State expenditure 5,898.1 million marks, of which $3,557.2$ milllon marks were current expenditure. The principal sources of revenue were as follows: State property and undertakings (net) 520.s, direct taxes 743.0, indirect traxes 2,199.4, stamp duty 268.3, charges 109.3 , interest and dividends 296.3 and capltal revenue 1,668.9. The value of State property in 1922 was estimated at $11,150.6$ million marks. For Public Debt see table 19 in this issue.

MUNICIPAL FINANCRS. According to the Budget for 1937 expenditure amounted to $1,681.1$ million marks. Income from taxation was calculated at 548.6 million marks, taxed Income at 6,547.5 million marks. The municipal income tax (non-progressive) averaged 8.4 \% of the ratepayers' income.

THE BANK OF ISSUE. The Bank of Finland, (founded in 1811) is a State Bank. Its head-office is in Helsinkt (Helsingors) with branches in Turku (Abo), Pori (Björneborg), Vaasa (Vasa), Onlu (Uleaborg), Kuopio, Joensua, Sortavala, Viipurl (Viborg), Mikkeli.(S:t Michel), Tampere (Tammerfors), Hámeenlinna (Tavastehus), Jyvâskyla and Kotika.

THE JOINT STOCK BANKS (1937): Number 9, possess 464 offices, where all kinds of banking business is transacted. Including all banks, there is one banking establishment per 7,200 inhabitants.

The largest banks are: Kansallis-Osake-Pankki, Oy. Pohjoismaiden Yhdyspankki and Helsingfors Aktiebank, all with head offices $\ln$ the capital.

OTHER BANKS (1987): Mortgage banks 5, Savings banks 482, Co-operative Credit Societies 1,191 and a Central Bank for the latter.

## GENERAL SURVEY.

The lively activity displayed last year in all spheres of economic life was clearly reflected in the business of the Joint Stock banks. On the one hand they had to satisfy a considerably greater demand for credit and on the other to receive larger deposits than for a long time past. All this caused an appreciable extension of banking business, though it remained within the bounds of the existing Joint Stock banks, no new bank being established.

The number of Joint Stock banks remained unaltered at nine. At the same time the number of branch offices grew slightly during the year under review, twelve new branches being opened and six being closed or amalgamating with other branches in the same place. At the end of 1937 the Joint Stock banks had 487 branches, viz., 181 in the towns and 306 in the rural districts. On the average there was one banking office per 7,440 of the population.

The course of banking business during 1937 is dealt with below on the basis of the figures contained in the official banking statistics.

## BALANCE SHEETS OF THE JOINT STOCK BANKS.

If we combine the balance sheets for December 31st, 1937, of the banks that carry on business, and compare them with the corresponding figures for the two previous years, we obtain the following table:-

| Assets | $\begin{gathered} \text { Mill. } \mathrm{mk} \\ \text { Mk } \end{gathered}$ | $\stackrel{1936}{\text { winl. } \mathrm{mk}}$ | $\begin{gathered} 1937 \\ \text { Mill. mk } \end{gathered}$ |

| Total | 0,027.6 | ,823.2 | 12,517. |

The progress of the banks is reflected in the rising figures. The balance sheet totals of the Joint Stock banks increased in 1937 by almost 1,700 million marks, whereas the increase in 1936 was scarcely 800 millions. In the year before the increase only amounted to about 180 millions, while in the preceding years the banks had experienced a period of contraction. It was only last year that the balance sheet totals of the banks attained the same level as
at the peak of the previous period of prosperity in 1928.

The expansion of banking business is still more striking, if we examine the turnover on the banks' cash accounts. This amounted last year to $354,178.7$ million marks in comparison with 264,567.3 millions in 1936 and 231,890.7 millions in 1985. The increase last year was therefore 33.9 per cent, but in the previous year only 14.1 per cent.
The principal items in the combined balance sheets of the Joint Stock banks are dealt with below.

## BANK FUNDS.

The banks' own funds are given in the following table:-

|  | $\begin{gathered} 31 \text { Dec. } \\ 1936 . \\ \text { Mill. } \mathrm{mk} \end{gathered}$ | $\begin{aligned} & 31 \text { Dec. } \\ & \text { Mill. mk. } \end{aligned}$ | $\begin{gathered} \text { Movement } \\ 1937 \\ \text { Mill. } \mathrm{mk} \end{gathered}$ |
| :---: | :---: | :---: | :---: |
| Share capital | 714.3 | 824.3 | +110.0 |
| Reserve funds | 487.1 | 588.9 | +101.8 |
| Pensions funds | 56.8 | 57.7 | + 0.9 |
| Undisposed profits and profit and loss accounts | 128.2 | 139.9 | + 11.7 |
| Total | 1,386.4 | 1,610.8 | + 224.4 |

The share capital of the Joint Stock banks increased last year for the first time since 1928 to any considerable extent. Three banks issued new shares last year. The largest issue was made by Kansallis-Osake-Pankki, the share capital of which was raised 50.0 million marks by the issue, while 55.0 millions were transferred to the reserve funds. The share capital of Oy . Pohjoismaiden Yhdyspankki was raised 40.0 million marks by a new issue, while the reserve fund obtained an addition of 38.3 millions. The Central Bank of the Savings Banks increased its share capital by 20.0 million marks and its reserve fund by 5.0 millions. As several banks transferred part of their profits for 1936 to their funds, the latter increased last year by altogether 212.7 million marks, to which the increase in the undisposed profits and the higher net profits for 1937 must be added. The last occupy a special position, seeing that the greater part of them was distributed to the shareholders after the balance sheets had been adopted.

## HOME DEPOSITS.

The deposit accounts of the Joint Stock banks and the changes in them will be seen from the following table:-

|  | $\begin{aligned} & 31 \text { Dec. } \\ & 1936 \\ & \text { Mill. mk } \end{aligned}$ | $\begin{aligned} & 31 \text { Dec. } \\ & 1937 \\ & \text { Mill. } \mathbf{~ m k} \end{aligned}$ | Movement <br> Mill. $\mathbf{m k}$ |  |
| :---: | :---: | :---: | :---: | :---: |
| Deposits | 6,132.3 | 6,872.9 | $+$ | 740.6 |
| Cheque accounts | 1,541.4 | 1,613.7 | + | 72.3 |
| Finnish credit institutions |  |  |  |  |
| Deposits | 643.5 | 913.2 | $+$ | 269.7 |
| Cheque accounts | 280.8 | 630.4 | $+$ | 349.6 |
|  | Total 8,598.0 | 1.0,030.2 |  | 432. |

The total deposits of the Joint Stock banks increased last year by $1,432.2$ million marks or 16.7 per cent. The increase was considerably larger than in the previous years, when it amounted to 631.8 and 331.4 millions respectively. During the period of depression the deposits in the banks actually decreased.

The greater part of the increase referred to time deposits due to the public. Deposits made by other credit institutions also increased to an appreciable extent. The major portion of these deposits consisted of the cash reserve and funds of the Savings banks, for which suitable investments had not yet been found. The increase in the deposits from other credit institutions thus reflects their greater abundance of money

## HOME LOANSS.

The home credits granted by the Joint Stock banks are shown in the following figures:-

|  | $\begin{gathered} 31 \text { Dec. } \\ 19336 \\ \text { mill. mk } \end{gathered}$ | $\begin{gathered} 31 \text { Dec. } \\ 1937 \\ \text { Mill. }{ }_{2}^{2 m k .} \end{gathered}$ | $\begin{gathered} \text { Movement } \\ \text { 1937 } \\ \text { Mill. mk } \end{gathered}$ |
| :---: | :---: | :---: | :---: |
| Finnish credit institutions | 155.9 | 313.3 | $+157.4$ |
| Inland bills | 1,347.4 | 1,692.0 | + 344.6 |
| Loans | 3,382.8 | 4,076.6 | + 693.8 |
| Cheque accounts | 2,486.8 | 2,526.7 | + 39.9 |
| Total | 7,372.9 | 8,608.6 | +1,235 |

The credits granted by the Joint Stock banks in various forms increased last year by 1,235. million marks, which represents an increase of 16.8 per cent. This considerable rise is all the more worth noting, seeing that the credits of the banks had fallen off almost regularly since
1929. In spite of the appreciable increase last year, which was, of course, a result of the boom and the consequent demand for credit, credits were still approximately 1,000 million marks lower than in 1929.

In absolute figures, however, credits did not increase as much as deposits. The surplus of deposits, which amounted to $1,225.1$ million marks at the end of 1936 as against 517.6 millions for the previous year and a surplus of credits still earlier, thus increased during 1937 by 196.5 million marks to $1,421.6$ millions. The large increase in credits therefore did not satisfy the banks' growing requirements for investments. For this reason, among others, their holdings of bonds grew by 162.1 million marks to $1,368.5$ millions.

## CASH AND CASH RESERVES.

The liquidity of the Joint Stock banks improved again last year as had been the case for several years. This is visible, e.g., from their cash which reached a level that had never occurred before in the history of the Finnish banks. At the end of the year under review the combined cash of the banks amounted to $1,316.9$ million marks as against 851.3 millions a year before and 633.3 and 399.3 millions in 1935 and 1934.

The unusually great liquidity of the Joint Stock banks is distinctly visible, if we compare the cash and cash reserves with the total liabilities payable on demand. The former consist of the cash of the banks, funds deposited on current accounts in the Bank of Finland, extraneous bank-post-bills and cheques and the banks' net credit balances in other banks, commercial bills in foreign currency payable abroad, bonds in Finnish currency issued or guaranteed by the State and bonds listed on foreign Stock Exchanges. The liabilities payable on demand include all the indebtedness of the banks payable at sight and the undrawn amounts of credits granted on cheque accounts. If we combine these figures for the 31st December in the last few years, we obtain the following table:-

| Undrawn on cheque |  |  |  |  |
| :--- | ---: | ---: | ---: | ---: |
| accounts ........ | 862.3 | 955.4 | $1,083.0$ | $1,229.3$ |
| Other sight liabilities | $1,911.4$ | $1,961.9$ | $2,300.8$ | $2,715.3$ |
|  | Total | $2,773.7$ | $2,917.3$ | $3,383.8$ |
| $3,944.6$ |  |  |  |  |

| Ratio of cash and | $\%$ | $\%$ | $\%$ | $\%$ |
| :---: | :---: | :---: | :---: | :---: | ---: |
| cash reserves to | $\%$ |  |  |  |
| sight liabilities .. | 51.9 | 54.5 | 65.3 | 67.2 |

All the series of figures display a pronounced rising tendency, but the cash and cash reserves increased to a greater extent than the sight liabilities, as is seen from the ratios on the lowest line. The actual measure of liquidity is clearly shown by the fact that the ratio prescribed by the Bank Law is only 20 per cent. The actual liquidity is thus at present about $31 / 2$ times as great as the measure fixed by law.

## POSITION TOWARDS FOREIGN COUNTRIES.

The position of the Joint Stock banks towards foreign countries is illustrated by the following table:-

| Claims | $\begin{gathered} 31 \text { Dec. } \\ 1936 \end{gathered}$ | $\begin{aligned} & 31 \text { Dec. } \\ & 1937 \end{aligned}$ | Movement 1937 |
| :---: | :---: | :---: | :---: |
| Foreign correspondents | Mill. mk | Mill. mk | Mill. mk |
| Nostro | 394.5 | 242.5 | - 152.0 |
| Loro | 2.8 | 5.2 | + 2.4 |
| Foreign bills | 162.8 | 116.5 | - 46.3 |
| Total | 560.1 | 364.2 | $-195.9$ |
| Indebtedness |  |  |  |
| Foreign correspondents |  |  |  |
| Nostro | 28.0 | 38.2 | + 10.2 |
| Loto | 222.7 | 233.7 | + 11.0 |
| Total | 250.7 | 271.9 | + 21. |

The figures show that the foreign payment position of the Joint Stock banks deteriorated during last year. Their foreign balances decreased by 195.9 million marks to 364.2 millions, while their foreign indebtedness grew by 21.2 millions to 271.9 millions. The net foreign balances of the banks were unusually large at the beginning of 1937 , viz., 309.4 million marks, fell off in the course of the year by 217.1 millions and only amounted to 92.3 millions at the end of the year. This change was probably
due principally to the reduction of the surplus of exports, but should also be viewed in connection with the circumstance that the balances of the Bank of Finland with its foreign correspondents increased very much.

The foreign balances and indebtedness of the Joint Stock banks have varied considerably in the course of time and have as a rule recorded a net foreign balance in recent years as against a considerable net indebtedness a few years ago. This is illustrated by the following figures:-

| $\begin{aligned} & \text { Find } \\ & \text { of year } \end{aligned}$ | $\begin{aligned} & \text { Claims } \\ & \text { Mill. mk } \end{aligned}$ | Indebtedness Mill. mk | Net claims(+)or indebtedness(-) Mill. mk |

| 1935 | 372.3 | 190.4 | +181.9 |
| 1936 | 560.1 | 250.7 | + 309.4 |
| 1937 | 364.2 | 271.9 | + 92.3 |

## DEPOSIT AND CREDIT RATES.

The rates of interest applied by the Joint Stock banks did not experience any great changes last year, though a continued downward tendency was visible. Towards the end of 1936 the joint delegation of the financial institutions, which fixes deposit rates according to agreement, had decided to lower them by $1 / 4$ per cent, so that from the beginning of 1937 the Joint Stock banks had to pay 1 per cent interest on sight accounts and $3^{1 / 2}$ per cent on six months deposits. Credit rates, which are not directly affected by the decision, followed suit.

The division of the deposits made by the public in the Joint Stock banks at the end of 1.935, 1936 and 1937 according to the rates of interest will be seen in the following table:-

| Below |  | per |  | $\begin{gathered} \text { 1935 } \\ \text { Mill. mk } \end{gathered}$ | $\begin{gathered} 1936 \\ \text { мin. } \mathrm{mk} \end{gathered}$ | ${ }_{\text {мill }}^{1937}$ |

To give a clearer illustration of the rates of interest of the Joint Stock banks we should mention that their deposit rates averaged 3.02 per cent at the end of 1987 as against 3.21 per cent a year before and 3.34 and 3.68 per cent respectively at the end of 1935 and 1934. The corresponding averages for credit rates were 5.98 per cent at the end of 1937 and $6.24,6.35$ and 6.82 per cent respectively for the previous years.

## THE YEAR'S RESIULTS.

The income and expenditure of the Joint Stock banks in 1935, 1936 and 1937 are given in the following table:-

| Income | $\begin{aligned} & 1935 \\ & \text { Mill. mak } \end{aligned}$ | $\begin{gathered} 1936 \\ \text { Mill. } \mathrm{mk} \end{gathered}$ | $\begin{gathered} 1937 \\ \text { Mill. mk } \end{gathered}$ |

| Net profits . . . . . . . . . . | 92.0 | 93.5 | 100.1 |
| Total | 288.7 | 282.9 | 302.9 |

The income of the Joint Stock banks last year was 20.0 million marks larger than in 1936. This increase was principally due to the greater yield of the bond portfolio, a natural consequence of the increase in the holdings of bonds. Some other items of income also grew, but on the other hand the principal item of income, the surplus of interest earned over interest paid, was reduced. This reduction amounted to 5.1 million marks and was due
to the fact that the margin between the rates of interest referred to decreased. On an average the margin of interest represented 2.96 per cent at the end of 1937, whereas in the previous years it varied between 3.01 and 3.14 per cent.

In regard to expenditure it will be noted that in absolute figures the expenses increased, in spite of their amount having decreased from 1.55 to 1.44 per cent in proportion to the balance sheet totals. A slightly higher total amount was employed for depreciation than in 1936, though it should be noted that the amounts written off credits were reduced, but that the improvement in the balance sheets allowed larger sums to be written off the bookvalue of the bonds.

As the banks' income grew more than their expenditure, their net profits recorded an increase from 93.5 to 100.1 million marks. The net results of the individual Joint Stock banks vary appreciably, but last year all the banks were able to show a net profit.

The following figures show the net results of the banks' business in recent years:-

|  | Net profits $(+)$ or net losses ( -- ) <br> net losses ( - ) |
| :---: | :---: |
| 1928 | +206.9 |
| 1929 | + 202.7 |
| 1930 | +153.2 |
| 1931 | - 73.9 |
| 1932 | + 76.0 |

| 1934 | + 91.4 |
| 1935 | + 92.0 |
| 1936 | . +93.5 |
| 1937 | + 100.1 |

In addition to the profits for 1937 the annual meetings of the banks had a sum of 39.8 mil-
lion marks at their disposal, brought forward on profit and loss account from previous years. The employment of these funds, altogether 139.9 million marks, is shown in the following table which also gives the corresponding distribution for the two previous years.

|  | $\begin{gathered} \text { 1935 } \\ \text { Mill. mak } \end{gathered}$ | $\stackrel{1936}{\text { Mili. } m k}$ | $\begin{gathered} 1937 \\ \text { Mill. m]s } \end{gathered}$ |

The majority of the banks paid the same dividend to their shareholders as for 1936. Only two small banks raised their dividend by $1 / 2-1$ per cent. The division of the banks according to the size of the dividend paid was as follows:-

| Dividend | Number of banks |  |  |  |  |  |

## CONCLUISION.

The above survey shows that both the liquidity and the soundness of the position of the Finnish Joint Stock banks improved appreciably in the course of last year. This is especially the case as regards the two biggest banks, for they carry on business with comparatively less costs than the smaller banks which find it more difficult to meet competition.

## ITEMS.

Motor vehicles in use. As the statistics of the motor vehicles in use at the end of 1937 have been published recently, it is interesting to study a few figures that illustrate the growth of the employment of such vehicles in Finland.

| Year | Private <br> cars <br> Number | Motor <br> buses <br> Number | Motor <br> lorries <br> Number | Total |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Number | Thousand |  |  |  |  |
| HP |  |  |  |  |  |

The improvement in economic conditions on the one hand and the development of the network of roads and of traffic on the other are reflected in the annually increasing number of motor vehicles of different kinds. It should be borne in mind, however, that the late depression caused a considerable reduction in the number of motor vehicles, especially private cars. The number of the latter did not exceed the level that had been reached during the previous boom in 1928 until last year. A comparison of the figures for 1928 and 1937 gives a good idea of the change that has occurred in the supply of motor vehicles during the last

These figures indicate that there are two distinct tendencies. On the one hand the centre of gravity has moved towards motor buses and lorries and on the other the tendency has been in the direction of more and more powerful vehicles.

New cement works. The cement works built by Pargas Kalkbergs Aktiebolag in the vicinity of Lappeenranta were started recently. The first deliveries of cement have already been made by the works. The consumption of cement in the whole country amounted to about 472,600 tons last year, of which about 37,000 tons were imported from abroad. The productive capacity of the new works is estimated at about 85,000 100,000 tons.

Building operations. During the first quarter of this year building operations were very lively. In industry, it is true, building has fallen off. but there is no sign of building in the towns decreasing. During January-March work on 38 new houses with cubic contents amounting to 287,400 cub. m . was completed in the capital as compared with 27 and 15 houses of 151,400 and 229,900 cub. m . during the same months in 1937 and 1936. The number of new living rooms amounted to 2,091 as against 922 and 898 in the two previous years. The number of new houses in course of erection was also appreciably larger at the end of March this year than in 1937 and 1936.

With regard to the plans approved, which provide an indication of the tendency for the immediate future, the number has dropped from 67 in the first quarter of last year to 45 this year and the number of living rooms in them from 2,509 to 1,363 . On the other hand the cubic contents of the buildings have increased from 392,500 to 575,000 which shows that the centre of gravity has moved in the direction of buildings for other purposes than dwellings. Apparently, some large new public buildings form the main part of the plans recently approved.
