## THE FINNISH MARKET REVIEW.

THE MONEY MARKET.
The same easiness characterised the Finnish money market during August and the early part of . September as had already marked it for a long time. At the same time signs of decreasing activity are visible which, show themselves in a reduction of both credits and deposits.
The total deposits of the Joint Stock banks fell off in August by 41.2 million marks to $11,184.5$ millions, while during the corresponding month last year there was an increase of 30.3 millions. The reduction was mainly due to a decrease of 143.9 million marks in deposits from other credit institutions, while cheque accounts due to the public increased by 121.7 millions and deposits due to the public dropped by 19.0 millions. The reduction in credits granted by the Joint Stock banks was, however, considerably larger, as it amounted to 161.5 millions as against 76.8 millions in August, 1937. The total credits granted by the Joint Stock banks, $9,233.5$ million marks, were, nevertheless, close on 1,000 millions more than a year ago. The surplus of deposits in the Joint Stock banks, which has grown from month to month with few exceptions, again increased in August by 120.3 million marks and thus established a new record of 1,951.0 millions in comparison with $1,512.6$ millions a year ago.

The foreign payment position of the Joint Stock banks improved, as is usual at this time
of the year. Their foreign balances increased by 73.2 million marks, whereas the increase in their foreign indebtedness only amounted to 33.1 millions. The Joint Stock banks therefore had a net foreign balance of 363.1 million marks as against 323.0 millions at the end of July and 192.3 millions at the end of August, 1937.

The changes that are visible in the position of the Bank of Finland in August and the first half of September are principally due to customary seasonal conditions. The total credits granted by the Bank fell off in August by 38.1 million marks to $1,507.6$ millions, but increased again at the beginning of September by 12.9 millions. The Bank's reserve of foreign currency increased vely much in August, by 108.3 million marks, and amounted to $2,058.3$ million marks as compared with $2,159.1$ millions a year before, but only $1,147.4$ millions two years ago. During the first fortnight in September the reserve of foreign currency remained practically unchanged. The note reserve was reduced in August by 48.0 million marks, but increased again during the first half of September by 66.8 millions to 271.8 millions. The abundance of money is clearly indicated by the fact that the current accounts due to others than the Treasury increased in August by 26.8 million marks to $1,204.4$ millions.

The growth of deposits in Savings banks and various savings funds, which was larger as a rule during the early months of this year
than in previous years, displayed a more and more pronounced tendency to drop below last year's level.

In the level of prices a slight tendency to rise is visible or at any rate an arrested fall in prices. The index for articles of import, indeed, dropped 3 points to 93 as against 110 a year ago, but the index for articles of export remained unaltered at 92 after the heavy fall of the preceding months, and the index for goods in Finnish wholesale trade that had been falling from month to month rose 1 point to 98 as against 103 a year ago. The cessation of the drop in prices is also visible in the cost of living index and the consumption price index.

## TRADE AND INDUSTRY.

Foreign trade was slightly livelier in August than it had been in July, but on the other hand considerably less than in August, 1937, both in volume and value. The value of imports amounted to 731.5 million marks as against 702.6 millions in July, but 840.6 millions in August, 1937. In the case of exports the corresponding figures were 838.8, 816.4 and $1,053.4$ millions. The volume of imports was about 9 per cent less in August than during the same month last year, though larger than in the previous years. In regard to exports the decrease in volume was almost twice as large or close on 18 per cent; their volume was also less than in 1935 and 1936. The great fall in the value of exports was principally due to the appreciable reduction in exports of timber and the fall in their price, but the smaller sales of paper and pulp products tended in the same direction. The reduction of imports referred mainly to raw materials and machinery and means of transport, while imports of food-
stuffs and luxuries even increased. The balance of trade recorded a surplus of exports for August amounting to 107.3 million marks, which was only half of the surplus for the previous years.

Timber sales which had proceeded very slowly earlier in the season, improved in pace towards the end of the summer. The sales in August were estimated at about 85,000 standards and during the first half of September at about 40,000 . The total sales of sawn timber from Finland by the middle of September were estimated at about 580,000 standards. In order to establish a balance between supply and demand the European Timber Exporters' Convention has agreed to reduce the export quotas for this year still further by 220,000 standards or about $6 \frac{1 / 2}{2}$ per cent. Finland's quota was thereby reduced by 59,000 to 845,000 standards, whereas according to the original agreement it amounted to $1,005,000$ standards. As Exportles undertook at the same time to reduce its timber shipments to Great Britain, it is expected that this decision will give the market greater stability.

Considerable restrictions of output have been made in the cellulose industry, in consequence of which the mills have been obliged to stop work for about two months on an average.

## THE LABOUR MARKET.

The state of the labour market continues satisfactory. However, an increase in the number of workmen registered at the labour exchanges from 2,200 at the end of July to 2,750 at the end of August may be noted. The number of unemployed was at that date about the same as a year ago.

## CONTENTS OF THE TABLIS.

## I. MONEY MARKET.

Bank of Finland:

1. Weekly Statement.
2. Note issue.
3. Notes in circulation and foreign correspondents.
4. Ordinary cover, note reserve and home loans.

Tables 22-29 according to Finnish Official Statistics $I_{\text {, }}$ A, Foreign Trade of Finland, Monthly Reports.
The term imports covers all imported goods which are placed on the market either immediately after importation or after storage. Exports covers all goods exported from the open market, including re-exports. Goods are declared to the Customs by their owner, who must at the same time state the value of the goods as calculated at the rrontiers of the country.

- Preliminary figures subject to minor alterations.

Calculated by the Central Statistical Office. The first group of indices refers to prices of goods appearing in Iocal wholeEale trade in Finland, whereas the indices for imported and exported goods refer to foreign trade prices. An indirect weighting has been applied, each class of goods being represented by the number of commodities corresponding to the calculated importance of this class in wholesale trade. The averages are arithmetical ones.

## CERTALN PARTICULARS ABOUT FINLAND.

## 1. FORM OF GOVERNMENT.

Finland formed a part of the kingdom of Sweden from 1154 to 1809; from 1809 it was an autonomous Grand Duchy connected with Russia up to December 6th, 1917, when Finland declared its independence, which was acknowledged by all the Powers including Soviet Russia. It became a republic in 1919. The legislative power of the country is vested in the Diet and the President. The highest executive power is held by the President chosen for a period of 6 years. The present President Ku/ssti Kallio is elected for the term March 1st, 1937, to March 1st, 1943.

The Diet, composed of 200 members. is elected by universal suffrage. The proportions of the different parties in the Diet elected In 1936 are as follows:

Number
Soclal-Democratic party . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 83
Agrarian party ......................................................... 53
Swedish party
21
Unionist party . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 20
Patriotic National Movement's party ........................... 14
Progressive party
7
Small farmers' party
1
People's party

## 2. LAND.

THE ARTA (excluding lake Laatokka) is 382,801 square kilometres $=147,761$ square miles (Great Britain's area is $89,047 \mathrm{sq}$. m. and Italy's area 117,982 sq. m.). Of the total area $9.0 \%$ are inland waters. On an average $11.8 \%$ of the land in the South of Finland is cultivated, $1.1 \%$ in the North, $6.6 \%$ of the whole land. Of the land area 25.8 mill. ha ( 62.5 mill. acres) or $73.6 \%$ are covered by forests.

THE AVERAGE TEMPERATURE in the coldest month is in s. Finland $-3^{\circ}$ to $-8^{\circ} \mathrm{C}$., in Lapland $-12^{\circ}$ to $-14^{\circ} \mathrm{C}$. and in the warmest month $+16^{\circ}$ to $+17^{\circ}$ and $+12^{\circ}$ to $+14^{\circ} \mathrm{C}$. resp. The average temperature in Helsinkd (Helsingfors) is $+4.6^{\circ}$ (in Oslo $+5.4^{\circ}$, in Montreal $+5.4^{\circ}$, in Moscow $+3.6^{\circ}$ ). The ground is covered by snow in the South for about 110 days, in Central Einland for about 150 days, In Lapland about 200 days.

## 3. POPULATION.

NUMBER OF' INHABITANTS (1936): 3.8 millions (of whom D. 2 million emigrants), Sweden (1936) 6.3, Swltzerland (1935) 4.2. Denmark (1936) 3.7 and Norway (1936) 2.9 millions.

DENSITY OF POPULATION (1036): In South-Finland 18.7, In North-Finland 2.7 and in the whole country an average of 10.9 inhabitants to the square kilometre.

DISTRIBUTION (1936): 79.1 \% of the population inhabit the country, $20.9 \%$ the towns and urban districts. The largest towns are (1036): Helsinki (Helsingfors), the capital, 283,598 inhabitants, Fiipuri (Viborg) 73,227, Turku (Abo) 70,688, Tampere (Tammerfors) 61.208.

OCCUPATION (1930): agriculture $59.6 \%$, industry and manual labour $16.8 \%$, commerce $4.5 \%$, transport $3.8 \%$, other occupations $15.5 \%$.

LANGUAGE (1930): Finnish speaking $89.4 \%$, Swedish speaking 10.1 \%, others $0.5 \%$.

RELIGION (1936): Latheran 96.0 \%, Greek-Orthodox $1.8 \%$, others $2.2 \%$.

EDUCATION (1930): Amongst persons over 15 years of age only $0.9 \%$ are illiterate. There are three universitles founded in 1640, 1917 and 1920.

INCREASE OF POPULATION (1936): Births $18.1 \%$ deaths $13.1 \%$ (in France in $193515.7 \%$ and in Fngland in $103511.7 \%$ \%o , natura] increase $5.0 \%$.

## 4. TRADE AND COMMUNICATIONS.

FOREST RESOURCES. The growing stock of the forests is 1,620 million $\mathrm{m}^{3}$ ( 57,214 million cubic feet). The merchantable tim ber
(measuring 20 cm at breast height $=6 \mathrm{in}$. at a height of 18 ft .) a mounts to 1,557 million trees. Of this number pine is represented by $60.7 \%$, spruce by $281 \%$, the conifers thus constituting $88.8 \%$ or 1,383 million trees; leaftrees, mostly birch, $11.2 \%$ or 174 million trees. The annual increment is 44.4 million $m^{3}(1,568$ million cub.ft.). The annual fellings according to earlier calculations are 40 million $\mathrm{m}^{8}$ ( 1,413 million cub. ft.).

AGRICULTURE (1936): Cultivated land 2.2 million hectars, divided as follows: area under cultivation $0.3-10$ hectars $33.4 \%$, $10-5 u$ ha $52.1 \%, 50-100$ ha $8.4 \%$, over 100 ha $6.1 \%$. Cultivated land is divided between the different kinds of crops as follows: $51.4 \%$ hay $17.6 \%$ oats, $9.1 \%$ rye, $5.1 \%$ barley, $3.4 \%$ potatoes 13.4 \% other. The number of dairies in 1936 amounted to 598.

OWNERSHIP OF LAND (1923): The land area is distributed among different classes of owners approximately as follows: private $62.1 \%$ State $39.7 \%$, Joint Stock Companies $6.5 \%$, communities $1.7 \%$.

INDUSTRY (1936): Number of industrial concerns 4,078, workpeople 184,441, gross value of products of industry 16,122 million marks.

LENGTH OF RAILWAYS (1937): $5,907 \mathrm{~km}$, of which 5,651 km State rallways and 256 km private. The gauge is in general 1.524 m .

MERCHANT FLEET (1938): Steamships 558 (304,738 reg. tons net), motor vessels 182 ( 21,577 reg. tons net), sailing ships 110 (34,288 reg. tons net). Total 850 ( $360,603 \mathrm{reg}$. tons net).

## 5. FINANCE AND BANKING.

CURRENCY. Since 1860 Finiand has its own monetary system. From 1877 up to the Great War the currency maintained its stable gold value and after the disturbances caused by the war Finland has again from January 1st, 1926, a gold standard. The unit of currency is the mark (Finnish mmarkkas $=100$ pennia). According to the monetary law of December 21st, 1925, a gold coin of 100 marks' value shall contain $3^{15} / 19$ grams of fine gold. Since October 12th, 1931, the redemption of bank notes in gold is, however, suspended.

STATE FINANCDS. According to the finance accounts for 1937 the State revenue was $5,984.5$ million marks of which $4,315.6$ million marks were current revenue, and State expenditure 5,898.1 million marks, of which $3,557.2$ million marks were current expenditure. The principal sources of revenue were as follows; State property and undertakings (net) 525.8, direct taxes 743.0, Indirect taxes 2,199.4, stamp duty 268.3, charges 109.5 , interest and dividends 296.3 and capital revenue 1,668.9. The value of State property in 1922 was estimated at $11,150.6$ million marks. For Public Debt see table 19 in this issue.

MUNICIPAL FINANCES. According to the Budget for 1938 expenditure amounted to $1,808.4$ million marks. Income from taxation was calculated at 608.1 million marks, taxed income at 7,963.9 million marks. The municipal income tax (non -progressive) averaged 7.7 \% of the ratepayers' income

THE BANK OF ISSUE. The Bank of Finland (founded in 1811) is a State Bank. Its head-office is in Helsinki (Helsingfors) with branches in Turku (Åbo), Pori (Björneborg), Vaasa (Vasa), Oulu (Uleâborg), Kuopio, Joensuu, Sortavala, Vilpuri (Viborg), Mikkeli (S:t Michel), Tampere (Tammerfors), Hameenlinna (Tavastehus), Jyvēskyla and Kotka.

THE JOINT STOCK BANKS (1938): Number 9, possess 464 offices, where all kinds of banking business is transacted. Inoluding all banks, there is one banking estabishment per 7,200 inhabitants.

The largest banks are: Kansallis-Osake-Pankki, Oy. Pohjoismaiden Yhdyspankki and Helsingfors Aktiebank, all with head offices in the capital.

OTHER BANKS (1938): Mortgage banks 5 , Savings brnks 482, Co-operative Credit Societies 1,158 and a Central Bank for the latter.

# THE FINNISH WOODWORKING INDUSTRIES IN 1937. 

BY<br>M. STRÖMMER, M. A.<br>OHIEF AOTUARY OF THE CENTRAL STATISTICAL OFFICE.

## INTRODUCTION

In our industrial activity the year 1937 proved a period of very considerable expansion. The international improvement in cyclical conditions that had set in during the previous year and made itself felt in an exceptionally large demand for goods and a sudden rise in prices, spread directly to this country. The boom first affected our exporting industry, particularly our woodworking industry and before long, too, as the purchasing power of the country increased, those branches of industry that supply the home market. In spite of the setback experienced by a part of our industry in the latter half of 1937 by a fall in prices, it can be said that most branches recorded higher figures than ever before. The rise in the value of production is particularly striking. It is estimated that the gross value of industrial production increased by over 4,000 million marks last year, of which about half referred to our exporting industry.

We give some particulars below, based on the Finnish industrial statistics, concerning the development of our woodworking industry in 1937. It should be noted, however, that not the whole woodworking industry is dealt with in this connection, but only the principal branches of it, which are engaged in exports.

## SAWMILL INDUSTRY.

The sawmill industry worked under very favourable circumstances, especially during the first half of the year. Later the demand showed signs of falling off and prices tended downwards. It should be mentioned as a characteristic feature of the structure of our sawmill industry that the number of small sawmills clearly reflects the cyclical fluctuations. As soon as trade conditions improve, more owners appear who either establish new sawmills or restart old ones that have been standing still. The number of mills, amounting to 571 in 1936, rose to 602 in 1937. Among them, however, there are only a few dozen really large sawmills, in whose hands the main portion of our exports of sawn timber is concentrated. The number of workpeople in the sawmills increased correspondingly from 34,373 to 36,801 . The output of sawn timber in 1936 and 1937 is shown in the following table:-

|  | Unplaned <br> timber | Planed <br> timber | Small <br> timber | Total |
| :---: | :---: | :---: | :---: | :---: |
| Stdds | Stds | Stds | Stds |  |
| 1936 | $1,036,126$ | 84,068 | 106,538 | $1,226,732$ |
| 1937 | $1,180,512$ | 84,903 | 103,116 | $1,368,531$ |

The increase in the output thus amounted to 141,799 stds or 11.6 per cent in 1937. For the sake of comparison it may be mentioned that the total quantity produced in 1937
slightly exceeded the output in 1934, when trade conditions in the sawmill industry were exceptionally favourable. The fact that the output increased to such a marked extent on the present occasion despite export restrictions is partly due to active building operations in the country. It should also be noted that stocks of sawn timber were exceptionally heavy at the end of the year. The total value of production in the sawmill industry - i.e. including the value of other goods besides actual sawn goods - which amounted to $2,209.2$ million marks in 1936, advanced to $3,223.9$ millions in 1937. The increase was thus very considerable, altogether $1,014.7$ million marks or 45.8 per cent.

The quantities of raw materials consumed by the sawmills and their prices will be seen from the table below. The value refers to the cost at the mill, including the cost of lifting the logs on land and other storage costs.

|  | Quantity of raw materials |  | Value of raw materials |  |
| :---: | :---: | :---: | :---: | :---: |
|  | $\begin{gathered} 1936 \\ 1000 \text { cub.ft } \end{gathered}$ | $\begin{gathered} 1937 \\ 1000 \text { cub.it } \end{gathered}$ | $\begin{gathered} 1936 \\ \text { Mill. mk } \end{gathered}$ | $\stackrel{1937}{\text { Mill. mk }}$ |
| Pine | 220,059.0 | 236,066.2 | 1,075.3 | 1,559.1 |
| Spruce | 65,652.2 | 80,426.7 | 322.7 | 540.3 |
| Birch | 4,512.0 | 4,256.0 | 20.0 | 24.2 |
| Other species. | 118.5 | 268.6 | 2.3 | 3.5 |
| Tota | 290,341.7 | 321,017.5 | 1,420.3 | 2,127.1 |

The quantity of timber consumed as raw material in 1937 increased by 30.7 million cub. ft or 10.6 per cent since the previous year. The corresponding increase in its value was 706.8 million marks or 49.8 per cent, so that the prices for raw materials at the sawmills rose comparatively more than the value of production. It is worth while noting in addition that the prices of raw materials referred to do not correspond fully to the high level of prices in 1937, seeing that the main part of the raw materials was purchased earlier. In examining the consumption of raw materials by the sawmills according to different species of wood it is noticeable that the proportion of spruce to the total quantity of raw materials has increased considerably. This is partly due to the
favourable prices of spruce sawn goods. It also follows that sawing has increased more particularly in those parts of the country, in which there are comparatively more abundant supplies of spruce than elsewhere.

## PLYWOOD INDUSTRY.

In the plywood industry trade conditions were favourable in 1937. Exports to the small purchasing countries increased and the quantity disposed of in the home market grew appreciably. Prices, too, were satisfactory. The number of mills was increased to 19 by a new mill being started and the number of workpeople increased from 7,825 to 9,101 . The quantity of output was divided as follows in 1936 and 1937:-

|  | ${ }_{\text {Tons }}^{1936}$ | ${ }_{\text {Tons }}^{1987}$ |
| :---: | :---: | :---: |
| Birch plywood | 154,765 | 188,178 |
| Bloc boards | 3,639 | 5,212 |
| Oak plywood | 305 | 218 |
| Special " | 35 | 50 |

The total value of production, including plywood products and waste, was 381.4 million marks in 1936 and 522.3 millions in 1937, the increase amounting to 36.9 per cent. The increase in the quantity of output - excluding plywood products and waste - was 22.0 per cent.

With regard to raw materials it should be stated that the plywood mills consumed 691,119 solid cub. $m$ of birch to the value of 162.7 million marks in 1936 and 759,980 solid cub. m to the value of 205.4 millions in 1937. In the former year the total value of raw materials was 210.1 million marks and in the latter 276.6 millions, so that the increase amounted to 31.7 per cent.

## PAPER AND PULP INDUSTRIES.

The development of the group of paper and pulp industries in 1937 displays features common to all the branches of industry belonging to this group. During the first half of the

year there was a very brisk demand and prices were high, but in the latter half a change occurred in an unfavourable direction. The price of raw materials, however, continued to rise without interruption. It is also worth noting that these branches of industry were generally engaged in fulfilling long-term contracts, so that the shortlived rise in prices was only able partly to benefit these industries. It should be mentioned that the branches of industry belonging to this group modernised their plant to an appreciable extent, in addition to which some large new mills were established.

In this group the mechanical woodpulp and cardboard mills are dealt with first. The number of these mills was 46 in 1937 and they employed 4,703 workpeople. For 1936 the corresponding figures were 45 and 4,183 . The output for these two years is given in the following table:-

|  | $\begin{aligned} & 1936 \\ & \text { Tons } \end{aligned}$ | $\begin{aligned} & 1937 \\ & \text { Tons } \end{aligned}$ |
| :---: | :---: | :---: |
| Woodpulp: |  |  |
| dry | 62,786 | 64,336 |
| wet | 584,430 | 651,746 |
| Cardboard, | 120,864 | 150,912 |

According to these figures the total output increased by 98,914 tons or 12.9 per cent in 1937. The value of production increased from 610.5 million marks to 807.9 millions or by 32.3 per cent.

In order to show the quantity of timber consumed as raw material by the mechanical
woodpulp and cardboard mills we give the following figures:-

|  | $\begin{gathered} \text { 1936 } \\ \text { Cub. m, loose } \\ \text { measure } \end{gathered}$ | $\begin{gathered} 1937 \\ \text { Cub. m, loose } \\ \text { measure } \end{gathered}$ |
| :---: | :---: | :---: |
| Spruce | 2,356,381 | 2,608,7.33 |
| Pine | 81,437 | 92,825 |
| Aspen | 51,112 | 76,458 |

The figures show that the increase in the quantity of pulpwood was 289,086 cub. m , loose measure, or 11.6 per cent. These mills also consume cellulose, wastepaper, gluing and filling materials etc. as raw material. If their value is added, the value of all raw materials for 1936 amounts to 280.0 and for 1937 to 421.2 million marks. The increase was consequently very large, 141.2 million marks or o 0.4 per cent.

The number of sulphite cellulose mills was 24 in 1937 and the number of workpeople 5,208 . The corresponding figures for the previous year were 24 and 4,918 . The number of sulphate cellulose mills increased to 12 by one new mill having been started. The number of workpeople grew from 2,400 to 2,807 . The output of cellulose will be seen in the following figures:-

|  | $\begin{aligned} & 1936 \\ & \text { Tons } \end{aligned}$ | $\begin{aligned} & 1937 \\ & \text { Tons } \end{aligned}$ |
| :---: | :---: | :---: |
| Sulphite cellulose: |  |  |
| bleached | 234,163 | 325,053 |
| easy bleaching | 77,173 | 82,271 |
| strong | 627,724 | 629,208 |
| Sulphate cellulose: . |  |  |
| bleached | 40,797 | 58,142 |
| easy bleaching | 22,241 | 20,587 |
| strong | 326,618 | 359,228 |

The quantities of both sulphite and sulphate cellulose manufactured increased appreciably; in the former case by 97,472 tons or 10.4 per cent, in the latter by 48,301 tons or 12.4 per cent. The total value of the output of the sulphite cellulose mills, including the value of by-products, increased from $1,369.5$ million marks to $1,749.5$ millions or by 27.7 per cent and that of the sulphate cellulose mills from 499.5 million marks to 673.7 millions or by 34.9 per cent.

In order to show the consumption of raw materials we give tho following figures referring to the quantity of round timber consumed by the sulphite and sulphate mills together:-

|  | $\begin{gathered} 1930 \\ \text { Cub. m, Ioose } \\ \text { meniure } \end{gathered}$ | $\begin{gathered} 1937 \\ \text { Cub. M, loose } \\ \text { measure } \end{gathered}$ |
| :---: | :---: | :---: |
| Spruce | 6,287,131 | 6,924,503 |
| Pine | 1,568,615 | 1,811,495 |
| Aspen | 100,800 | 126,711 |
| Alder | 300 | 1,015 |

The value of this timber amounted to 679.2 million marks in 1936 and to $1,024.1$ millions. in 1937, so that the increase was no less than 50.8 per cent. The great rise in the price of the round timber used as raw material is indicated by the fact that the corresponding quantity of timber only increased by 906,878 cub. m, loose measure, or 11.4 per cent. Besides round timber the cellulose mills used chips and laths and various chemicals as raw material. If these are taken into account, the total value
of the raw materials used by the cellulose mills amounted to 952.7 million marks in 1936 and $1,351.1$ millions in 1937. The increase in the value of all raw materials was therefore 398.4 million marks or 41.8 per cent.

Finally, as regards the paper mills, their number was reduced to 24 , as one mill was closed. On the other hand the number of workpeople increased from 4,642 to 4,710 . The output of paper was as follows in 1936 and 1937:-

|  | $\begin{aligned} & 1936 \\ & \text { Tons } \end{aligned}$ | $\begin{aligned} & 1937 \\ & \text { Tons } \end{aligned}$ |
| :---: | :---: | :---: |
| Newsprint | 369,687 | 419,704 |
| Kraft paper | 47,899 | 51,312 |
| Other qualities | 111,474 | 134,845 |

The total quantity produced increased by 76,801 tons or 14.5 per cent since the previous year. Its value rose from 970.4 million marks to $1,226.2$ millions or by 26.4 per cent. The increase in the value of the raw materials was relatively more appreciable, from 466.9 to 632.0 million marks or 35.4 per cent.

## CONCLUSION.

If we examine the development of the Finnish woodworking industry during the period since the peak years preceding the last world depression, we find that there has in general been very considerable expansion. However, it seems - as far as it is possible to judge at present - that the extreme limit of production
has already been reached in some spheres. This refers above all to the sawmill industry, which is bound at present as regards its sales by international export agreements and has to compete to a growing extent in obtaining its raw materials with other branches of the woodworking industry. On the other hand such a comparatively young branch of the woodworking industry as the plywood industry has shown great powers of development. The quantity of output of this industry has more than doubled since 1928. The expansion in the different branches of the paper and pulp industry has also been striking and the increase in out-
put continued even during the severest years of the depression. For the sake of comparison it should be mentioned that in 1937 the output of mechanical woodpulp and cardboard was more than twice and the output of cellulose almost three times as large as in 1928. The output of paper has doubled approximately during the same time. In general the development in these spheres in the last few years has been marked by an advance in technical methods, the renewal of plant and the establishment of new mills, besides which manufacture appears to be tending more than before in the direction of higher forms of refining.

## ITEMS.

State timber auctions. The customary auctions of saw logs and other timber from the State forests were held in Oulu (Uleåborg) on September 12th and 13th, in Tampere (Tammerfors) on September 16th and 17th, and in Viipuiri (Viborg) on September 19th and 20th. Altogether 1.2 million trees of standing timber and 1.7 million trees for delivery were put up to auction; last year the corresponding numbers were 1.0 and 1.5 million trees respectively. The final figures concerning the results of the auctions are not yet available, but the prices were very much lower than last year. Because of the unfavourable conditions on the timber market, large stocks remain of last year's cuttings. Therefore the bids were 50 per cent lower than last year, in certain cases even 60 per cent lower.

Projected copper refinery. Outokumpu Oy., the copper mining company, has since it started mining in 1936 sold its total produce of crude copper abroad, as it could not be refined within the country. The company now intends to build a refinery on the site of its works in the neighbourhood of Imatra. The erection will
start this autumn and be completed by the beginning of 1941.

In order further to work up the copper refined at Imatra, a rolling mill is presently to be erected in the vicinity of the town of Pori (Björneborg). The mill should be ready within the next year and its annual capacity will be 10,000 tons which exceeds the present home consumption by two-thirds. The output will include sheet copper, bars, telephone and telegraph wires and other products. Until the refinery is completed, the rolling mill will use imported raw materials.

Issues of bond loans. The Finnish State will issue an internal bond loan of 300 million marks nominal value, dated October 1st, 1938. The amount will be used for the redemption of older loans. The loan is to bear 4 per cent interest and the term of redemption is 30 years, the right of conversion coming into force in 1943.

The city of Turku (Abo) has negotiated a bond loan of 8.6 million Swedish crowns with the Svenska Handelsbanken. The loan bears interest at the rate of $31 / 2$ per cent and is to
be used for converting a $61 / 2$ per cent bond loan in sterling. The amortization takes place during 1940-59. From 1944 the loan may be converted. It is to be dated January 2nd, 1939, and the greater part of it is already disposed of, the limited amount remaining being obtainable at a rate of 100 per cent.

Nokia Oy. proposes to issue a bond loan of 35 million marks in the beginning of October. It will be used chiefly to cover the company's share in the expenses for erecting the Harjavalta power station, the rest being used for financing certain renovations of the plant of the company.

New rayon mill. In No. 12, 1937, of this Bulletin mention was made of the creation of a new branch of industry for this country by the formation of a company for the production of artificial silk, artificial wool and cellophane. This company, Kuitu Oy., is now about to complete the extensive building operations and installation of machinery at its mills in Enso. The manufacture of cellophane will start within the month of September and of artificial fibres this autumn. Before the end of the current year the manufacture of rayon will also be started.

New ice-breaker. A new ice-breaker was launched on September 24th at Sandvikens Skeppsdocka och Mekaniska Verkstad in Helsinki (Helsingfors). It was ordered by the State and is built for a double purpose in that it is to be used also as a parent-ship for submarines. The length of the vessel is 64.15 m and its breadth 14.50 m . It is driven by Diesel motors and has two propellers at the stern and one in the bows. It is built according to the same principles as our previous icebreakers, the hull being provided with every conceivable protection against the pressure of ice. There is accomodation for 100 persons, provision also being made for the crews of the submarines.

Jubilee of the Finnish Mail. The Finnish Post Office recently celebrated its tercentenary, as on September 6th, 1638, a Royal warrant containing the first rates of postage was received for this country.

Weather conditions and crop prospects. During the latter half of August the weather has been $2-3^{\circ} \mathrm{C}$ above normal throughout the country, rising even more above the average in the beginning of September. There was drought in large parts of the country at the same time. In regard to harvesting the weather conditions generally were favourable, but the autumn sowings of rye and wheat were in many places delayed because of the drought.
No particular changes have occurred in the crop prospects since a month ago, the prospects for potatoes only being still poorer than in August. Owing to the drought the tops died before fresh rain fell. Besides, potato-rot is rather common this year. An average harvest is, however, expected.

The harvest of autumn sowings was completed during August. Owing chiefly to the cold weather in the early summer, the rye was not everywhere of full weight. The harvest of this year's spring sowings was mostly completed in August. The quantity is estimated to be above the average in the whole country, the quality of wheat being considered as good, while barley is of a varying quality.
According to the preliminary estimates of the Board of Agriculture the crop prospects were as follows in the middle of September. In the table a scale of figures is employed, 8 signifying a very good crop, 7 a good crop, 6 above medium, 5 medium, 4 below medium, 3 a poor crop, 2 almost a failure of crop, and 1 a failure of crop.

|  | Middle of September |  |  |
| :---: | :---: | :---: | :---: |
|  | 1938 | 1937 | 1936 |
| Autumn wheat | 5.7 | 6.2 | 5.2 |
| Spring wheat | 6.1 | 5.5 | 5.6 |
| Rye | 4.9 | 6.5 | 4.9 |
| Barley | 5.9 | 4.9 | 5.4 |
| Oats | 6.1 | 5.3 | 5.6 |
| Potatoes | 4.7 | 5.1 | 6.2 |
| Нау | 6.6 | 5.5 | 5.8 |

## THE BANK OF FINLAND MONTHLY BULLETIN

is sent free of charge to anyone wishing to receive it. Finnish booksellers are, however, allowed to sell it at a price of 2 marks per copy. Back numbers are also willingly supplied. Should extracts from the Bulletin be printed, the source should be stated. Correspondence with regard to the Bulletin should be addressed to the Bank of Finland, Statistical Department,

Helsinki (Helsingfors), Finland.

[^0]:    i) Included in home loans, see table 4. Re-discounted Bills according to the monthly statements of the Bank of. Finland. The figurea in brackets [ ] indicate the position at the end of the previous year.

[^1]:    ${ }^{1}$ ) According to data supplied by the Treasury. Internal loans are given at their nominal value and foreign loans in Finnish currency according to the rates ruling on the dates of the issue of the loans, - ${ }^{2}$ ) Calculated as follows: the outstanding amounts of both internal and foreign loans have been converted into Swiss Francs at the monthly average rates of exchange of the respective currencies. From September, 1936, the amounts have been converted into Swiss Francs of former gold value, in order to eliminate the influence of fluctuating currencies.

    * Preliminary figares subject to minor alterations.

[^2]:    * Preliminary figures aubject to minor alterations.

[^3]:    ${ }^{1}$ ) Dry weight.

    * Preliminary figures subject to minor alterations.

[^4]:    The Indices are calculated by the Statistical Dept. of the Board of Customs in the following manner: after muitiplying the quantities of imports and exports for the current year by the average price for the class of goods in question during the corresponding period of the basic year the values of imports and exports are calculated in percentage of the figures thus obtained.

[^5]:    ${ }^{1}$ ) Comprising the total quantity of cement delivered by the country's 2 cement factories and including the quantity imported
    which is, however, only a part of the total consumption (viz, 0.1 - $7.8 \%$ annually).
    ${ }^{2}$ ) According to data compiled by the Municipal Building Surveyor's Office in Helsinki (Helsingfors).

    * Preliminary figures subject to minor alterations.
