

## THE FINNISH MARKET REVIEW.

THE MONEY MARKET.
Saving is always weak in autumn as compared with winter and summer. The recent reduction can thus chiefly be ascribed to the season and not to any falling off in the wish and ability to save. Compared with last autumn saving has improved. In October the money market was influenced by such irregular factors as the third instal ment of the sales tax and the second instalment of this year's capitail levy. This meant less increase in deposits, and increased cheque accounts and credits.

Deposit and cheque accounts of the public in all credit institutions increased in October by 3,825 million marks, no data being yet available for November. Most of the increase, 3,308 million, was on cheque accounts and only 517 million on deposit accounts. In October of last year the increase was much smaller, total deposits rising by 2,554 million and deposit accounts by 270 million marks. From the beginning of the year to the end of October the total capital deposited increased by $20,663 \mathrm{mil}$ lion marks, or 60 per cent more than one year earlier. Deposit accounts increased by 15,184 million, or 76 per cent more than in the same months of 1948 , when the increase was 8,635 million. They amounted to 93,102 milition martzs at the end of October as against 72,804 one year earlier, the difference thus being well over 20,000 million. In the year beginning October

1947 the corresponding increase was half this amount.

Deposit accounts in the Commercial Banks increased each month from the beginning of the year, but were reduced by 13 million marks in October, for reasons mentioned above. In October 1948 there was an increase of 40 million marks. On the other hand cheque accounts increased very much, by 2,726 million marks. Since the beginning of the year cheque accounts have increased relatively to deposit accounts; the increase has been about the same in the: two groups, 4,529 million mariks in the former and 4,569 in the latter. According to preliminary information deposits increased more quickly in November than in October, in consequence of the manketing of crops and of timber sales, although the income from these has been less.

Credit has been granted only reluctantly and mostly to former customers: The de:mand of trade and industry for credits is still great and has even increased during. the autumin, so that the banks increased their advances. The Commercial Banks' advances to the public rose by 1,947 million marks: in October as against 1,688 million in October 1948. In the first ten months of the current year the increase was 11,821 million or nearly twice last year's corresponding amount, 6,871 million. As the Commercial Banks used part of the increasein deposits to strengthen their position:,
their cash reserves increased by 2,263 million marks in October, being 6,115 million at the end of the month.

Credits granted by the Bank of Finland varied very much in October and November. Thotal advances rose considerably in October; the Government's need of cash caused a great increase in Treasury bills which in the second week of the month reached 23,730 million marks. This maximum was reduced at the end of the month and in the beginning of November, thanks to the taxes collected. At the end of November the State again increased its debt. The advances to trade and industry were reduced in the autumn, from $18,785 \mathrm{million}$ marks at the end of September to 17,207 million at the end of November, or by nearly 1,600 million marks ; the main reason being the export industry's seasonal repayment of their credits with the proceeds of exports. The advances of the Bank of Fintand to other banks increased very much in November, rediscounts being 2,073 million marks at the end of the month, though low in the summer and early autumn. Notes in circulation dropped to about the 1948 level in September and remained there or decreased further in November until the last week. when they suddenly increased by more than 1,000 million marks to 28,613 million. The circulation was then about 1,200 million above that of the same date in 1948. The chief reason for the increase was the repayment, beginning November 17, of the compulsory loan raised in connection with the exchange of notes in the beginning of 1946 .

PRICES.
The rise in prices that started in July has continued and increased in consequence of the rise in import prices following the devaluation of the mark. The price index of import goods ( $1935=100$ ) rose from 989 in June to 1,121 in September, or by 13 per cent. The wholesale price index $(1985=100)$ also rose monthly in the same period although only by a few points, and similarly the cost of living. Both indices are now slightly above those of a year ago. Prices are expected to rise still more, possibly forcing up wages which are still tied to the cost of living index. Steps are being taken to prevent a further rise in prices.

TRADE AND INDUSTRY.
Industry slightly declined in the third quarter as indicated by the volume index $(1935=100)$ dropping to 126 from 144 in the second quarter, but it was still 2 points above that of the same period in 1948. The recent reduction may be ascribed to seasonal circumstances such as summer holidays, but also to the strikes in August and September, and somewhat to the weakening export markets. Yet exports improved in the summer and still more in the autumn, partly owing to the devaluation, partly to firmer prices and increasing demand on the world markets. The reduction in the exports of some of the chief articles in the beginning of the year has reduced employment in forestry. The unemployment recorded in the East and North is expected to spread during the winter and exceed that of last year.

## CONTENTS OF THE TABLES.

I. MONEY MARKET.

Bank of Finland:

1. Statement.
2. Note issue.
3. Notes in circulation, foreign correspondents and cover for the issue of notes.
4. Note reserve, home loans and rediscounted bills.
5. Treasury bills and balances of current accounts.
6. Rates of exchange.

Commercial Banks:
7. Home deposits and the credits from the Bank of Finland.
8. Home loans.
9. Position towards foreign countries.
10. Foreign Payment Position of all Banks.
11. Deposits in Post Office Savings Bank.
12. Deposits in the Savings Banks.
13. Deposits in Co-operative Credit Societies and Consumers' Co-operative Societies.
14. Deposits in all Credit Institutions.
15. Insurances in life assurance companies.
16. Changes in number and capital of limited companies.
17. Bankruptcies.
18. Stock Exchange.
19. Stock Exchange index.
II. STATE FINANCES.
20. Public Debt.
21. State Revenue and Expenditure.
22. Collection of Customs.
23. Collection of Excise dues.

## III. TRADE AND INDUSTRY.

24. Value of imports and exports.
25. Value of imports and exports in different classes of goods.
26. Imports of the most important articles.
27. Exports of the most important articles.
28. Foreign trade with various countries.
29. Unit value index of imports and exports.
30. Total sales of wholesale firms.
31. Volume index of industrial production.
32. Building activity.
IV. TRAFFIC.
33. Foreign shipping.
34. State Railways.
V. LEVEL OF PRICES.
35. Wholesale price index.
36. Cost of living index.
37. Bank of Finland building cost index.

## VI. LABOUR MARKET.

38. Index of working hours in industry.
39. Number of unemployed.
40. Cessation of work.

Tables 24-29 according to Finnish Official Statistics I, A, Foreign Trade of Finland, Monthly Reports.
The term imports covers all imported goods which are placed on the market eilther immediately after importation or after strage. Exports covers all goods exported from the open market, including re-exports. Goods are declared to the Customs by their owner, who must at the same time state the value of the goods as calculated at the frontiers of the country.

* Preliminary figures subject to minor alterations.

25.     - VALUE OF IMPORTS AND EXPORTS IN DIFFERENT CLASSES OF GOODS.

The above particulars which are of a preliminary nature, are compiled by the Research Office of the Ministry for Social Affairs.

## CERTAIN PARTICULARS ABOUT FINLAND.

## 1. FORM OF GOVERNMENT.

Finland formed a part of the kingdom of Sweden from 1154 to 1809; from 1809 it was an autonomous Grand Duchy connected with Russia up to December 6, 1917, when Finland declared. its independence, which was acknowledged by all the Powers including Soviet Russia. It became a republic in 1919. The legislative power of the country is vested in the Diet and the President. The highest executive power is held by the President chosen for a period of 6 years. The present President Juho Kusti Passikivi is elected for the term March 11, 1946, to March 1, 1950.

The Diet, composed of 200 members, is elected by universal suffrage. The proportions of the different parties in the Diet elected in 1948 are at present as follows:

Number
Agrarian party
56
Social-Democratic party . . . . . . . . . . . . . . . . . . . . . . . . 54
Democratic League ........................................ 38
Unionist party ......................................... . . . 33
Swedish party .. . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 14
Progressive party .......................................... 5

## 2. LAND.

THE AREA is 337113 square kilometres (Great Britain's area is $245000 \mathrm{sq} . \mathrm{km}$ and Italy's area $310000 \mathrm{sq} . \mathrm{km}$ ). Of the total area $9.4 \%$ are inland waters. On an average $13.5 \%$ of the Iand in the South of Finland is cultivated, $1.6 \%$ in the North, $7.5 \%$ of the whole land. Of the land area 21.7 mill. ha ( 53.5 mill. acres) or $70.9 \%$ are covered by forests.

## 3. POPULATION.

NUMBER OF INHABITANTS (1948): 3.9 millions (present popalation). Sweden (1947) 6.8, Switzerland (1947) 4.5, Denmark (1947) 4.1 and Norway (1947) 3.1 millions.

DENSITY OF POPULATION (1948): In South Finland 22.0 , in North Finland 3.3 and in the whole country an average of 12.8 inhabitants to the square kilometre.

DISTRIBUTION (1948): $75.0 \%$ of the population inhabit the country, $25.0 \%$ the towns and urban districts. The largest towns are (1948): Helsinki (Helsingfors), the capital, 357865 inhabitants, Turku (Åbo) 95446 , Tampere (Tammerfors) 94402.

OCCUPATION (1940): agriculture $51.5 \%$, industry and manual labour $21.0 \%$, commerce $5.1 \%$, transport $4.6 \%$, other occupations $17.8 \%$.

LANGUAGE (1940): Finnish speaking 90.0 \%, Swedish speaking $9.6 \%$, others $0.4 \%$.

RELIGION (1046): Lutheran 96.0 \%, Greek-Orthodox $1.7 \%$, others $2.3 \%$

EDUCATION (1947): Practically all persons over 15 zears of age are literate. There are three universities (the oldest founded in 1640) and 7 colleges of university standard.

INCREASE OF POPULATION (1947): Births $27.7 \%$ \% deaths $11.9 \%$ (deaths in France in $194713.0 \%$ and in the United Kingdom In $194712.1 \%$ ), natural increase $16.0 \%$.

## 4. TRADE AND COMMUNICATIONS.

FOREST RESOURCES (1949): The growing stock comprises 1370 million of solid cub. m. incl. bark ( 48379 million cub. feet), of which pline is 45.5 per cent, spruce 32.2 per cent, the rest 22.3 per cent being leaf-trees, chiefly birch. Of the growing stock 1031 million trees, 63.6 per cent of them pines, are up to the standard required for loge (minimum for sawmill logs $18^{\prime} \times 6^{\prime \prime}$ and for plywood logs $14^{\prime} \times 7^{\prime \prime}$ ). The annual increment is about 41 million of solid cub. m. green wood excl. bark ( 1441 cub. it). The total removal in 1946 calculated according to the use of wood was 40 million cub. m. ( 1425 million cub. ft). In
the years 1923 to 1938 , in the then area of the country, it averaged 41 million cub. m. ( 1463 million cub. ft ) per year. the corresponding yearly increment being 45 million cub. $m$. ( 1591 million cub. ft ).

AGRICULTURE (1941): Cultivated land 2.3 million hectares, divided as follows: area under cultivation under 10 hectares $33.1 \%, 10-50 \mathrm{ha} 54.4 \%, 50-100$ ha $7.2 \%$, over 100 ha $5.3 \%$. Cultivated land (1948) is divided between the different kinds of crops as follows: 40.1 \% hay, 11.3 \% temporary grassland for grazing, $16.8 \%$ oats, $6.9 \%$ wheat, $6.0 \%$ rye, $5.5 \%$ barley, $4.3 \%$ potatoes, $9.1 \%$ other. The number of dairies in 1947 amounted to 517.

OWNERSHIP OF LAND (1941): The land area is distributed among different classes of owners approximately as follows: private 49.2 \%, State $41.6 \%$, Joint Stock Companies etc. $7.1 \%$, communities $2.1 \%$.

INDUSTRRY (1946): Number of industrial concerns 5 691, workpeople 236 723, gross value of products of industry 112081 million marks.

LENGTH OF RAILWAYS (1949): 4966 km , of which 4713 km State railways and 253 km private. The gauge is in general 1.524 m .

MERCHANT FLEET (1949): Steamships 385 (422 723 gross reg. tons), motor vessels 102 ( 67406 gross reg. tons), sailingships with auxiliary englne 154 ( 15151 gross reg. tons), other sailing-ships 12 (14 718 gross reg. tons). Total 653 (519 998 gross reg. tons).

## 5. FINANCE AND BANKING.

CURRENCY. Since 1860 Finland has its own monetary system. From 1877 up to 1914 the currency maintained its stable gold value, and after the disturbances caused by the war a gold standard was again introduced from January 1, 1926. The unit currency is the mark (Finnish smarkkas $=$ 100 penniai). According to the monetary law of December 21 1925, a gold coin of 100 marks' value shall contain $3^{15} / 1$ g grams of fine gold. Since October 12, 1931, the redemption of bank notes in gold is, however, suspended.

STATE FLNANCES. According to the finance accounts for 1948 the State revenue was 113692 million marks, of which 99434 million marks were current revenue, and State expenditure 104587 million marks, of which 75175 million marks were current expenditure. The principal sources of revenue were as follows: direct taxes 33 788, indirect taxes 16880 , sales tax 27676 , interest and dividends, etc. 7903 , State property and undertakings (net) 3 686, and capital revenue 14 258. For Public Debt see table 20 in this issue.

MUNICIPAL FINANCES. According to the finance accounts for 1946 expenditure amounted to 13509 million marks. Income from taxation was 6734 million marks, taxed income 79283 million marks. The municipal income tax (nonprogressive) averaged $8.5 \%$ of the ratepayers' income.

THE BANK OF ISSUE. The Bank of Finland (founded in 1811) is a State Bank. Its head office is in Helsinki (Helsingfors) with branches in Turku (Åbo), Pori (Björneborg), Vaasa (Vasa), Oulu (Uleâborg), Kuopio, Joensuu, Mikkeli (S:t Michel), Tampere (Tammerfors), Hämeenlinna (Tavastehus), Jyväskylä, Kotka and Lahti (Lahtis).

THE COMMERCIAL BANKS (1949): Number 6, possess 452 offices, where all kinds of banking business in transacted. There is one banking establishment per 8687 inhabitants.

The largest banks are Kansallis-Osake-Pankki, Oy Pohjoismaiden Yhdyspankki-Ab Nordiska Föreningsbanken and Helsingin Osakepankki - Helsingfors Aktiebank, all with head offices in the capital.

OTHER BANKS (1949): Mortgage banks. 5, Savings banks 447, Co-operative Credit Societes 767 and a Central Bank for the latter.

# PUBLIC FINANCES IN 1948. 

BY
HEIKKI VALVANNE, MAG. PHIL.
FHLLOW OF THE BANK OF FINLAAND INSTITUTE FOR EGONOMIC RESEARCH.

GENHRAL REVIEW FOR 1948.
During 1948 the economic situation as a whole was fairly stable. The volume of production, both in the home market industry and in the exporting industry, exceeded the level of the previous year, and thanks to favourable conditions for exports and to foreign credits it proved possible to increase the volume of imports appreciably. As the rise in prices and wages was at the same time successfully arrested in broad lines, a companatively good ballance was agaim achieved between the existing purchasing power and the quantity of goods in supply.

This favourable change from the prevailing inflationary tendency was partly due to the economic position of the State. Government expenditure indeed increased very much, but this was largely due to the many rises in price that had occurred in 1947 and now exercised their full force. Altogether expenditure, omitting the amortization of loans, amounted in 1948 to 107,271 million marks ${ }^{1}$ ), or 42 per cent

[^1]more than in the previous year. For the sake of comparison it should be mentioned that in 1948 the average cost of living index was 35 per cent higher than the average for 1947 and the wholesale price index correspondingly 32 per cent higher. Howeven, revenue increased in the same proportion in spite of some relief in taxation; omitting the loans, the revenue amounted in 1948. to a total of 101,962 million marks, or 43 per cent more than in 1947. With this revenue 95 per cent of the expenditure could be covered or slightly more than in the previous year.

## EXPENDITURE IN $19 \not 48$.

The principal categories of expenditure in 1947 and 1948 are seen from the following table.

EXPENDITURE.
(Excluding redemption, adjusted figures)

|  | 1947 | 1948 |
| :---: | :---: | :---: |
|  | Mill. mk | Mill. mk |
| Current expenditure | 61,034 | 80,879 |
| Capital expenditure | 10,083 | 18,62? |
| Unspecified extra-bu penditure ...... | 4,583 | 7,770 |
|  | 75,700 | 107,271 |

Current expenditure amounted in 1948 to 80,879 million marks or 33 per cent more than in 1947. Its distribution is given in the following table.

## CURRENT EXPENDITURE.

(According to the accounts)

| Maingroups | $\begin{gathered} 1047 \\ \text { Mill. } \mathrm{mk} \end{gathered}$ | $\begin{array}{r} 1948 \\ \text { Mill.mk } \end{array}$ |
| :---: | :---: | :---: |
| 1. President of the Republic | , | 11 |
| $\cdots$ - Diet | 101 | 129 |
| 3. Government | 113 | 40 |
| 4. Chancellery of Government | 31 | 52 |
| 5. Ministry for Foneign Affairs | 183 | 246 |
| 6. Ministry of Justice ... | 485 | 896 |
| 7. Ministry of the Interior | 2,564 | 4,529 |
| 8. Ministry of Finance | 421 | 812 |
| 9. Ministry of Defence | 2,688 | 3,974 |
| 10. Ministry of Education | 3,343 | 5,403 |
| 11. Ministry of Agriculture | 2,956 | 4,953 |
| 12. Ministry of Communicatio | 1,439 | 2,314 |
| 13. Ministry of Trade and Industry | 56,1 | 991 |
| 14. Ministry for Social Affairs.. | 2,636 | 8,001 |
| 14 A. Ministry of Supply | 255 | 422 |
| 15. Sundry general expenditure | 40,927 | 32,372 |
| 16. Pensions and relief payments | 1,042 | 1,394 |
| 17. Interest and expenditure on the Public Debt | 6,567 | 8,627 |
| 18. State industrial undertakings | 260 | 9 |
| Total | 66,578 | 75,175 |

It should be repeated that the figures for the groups ,,Sundry general expenditure" and "Interest and expenditure on the Public Debt", as given in the accounts, do not give a correct idea of the size and nature of this expenditure.
„Sundry general expenditure" represents the overwhelming part of all current expenditure, its largest item consisting of the war indemnity paid to the Soviet Union. The actual indemnity payments and the consequent administrative expenses amounted in 1948 to 15,617 million marks (12,133 million in 1947), and including the advances paid to suppliers of indemnity goods to 16,248 million marks ( 14,837 million'). Although the indemnity payments in goods were almost one-quarter less than the payments in 1947, owing to the relief granted by the Soviet Union half-way through 1948, the cash expenditure of the Government increased on account of the rise in prices. In addition, there ane the ,Sundry costs under the Peace Treaty", 361 million marks in 1948 ( 831 million in 1947), and ,TTransfers of German assets and administrative costs due to them", 1,038 million marks in 1948 ( 1,031 million in 1947). Thus, all the different indeminity payments combined amounted to 17,647 million marks in 1948 or 22 per cent of the total current expenditure of the Government. In 1947
this total represented 16,699 million marks or 27 per cent of the current expenditure.

In the accounts the group ,Sundry general expeniditure" also includes the compensation paid to the population of the ceded territionies for loss of property. As, however, this is mainly paid by issuing "indemnity bonds" to those entitled to compensation, the expenditure - in addition to compensation in cash - consists of amortization and interest on these bonds. Their nominal amortization is recorded in the group „Productive capital expenditure", and the interest and index-bound increase in amortization in the groop „Interest and expeniditure on the Public Debt". Calculated in this manner, the actual total expenditure on compensation in 1948 was 9,850 million marks or 12 per cent of current expenditure ( 9,192 million marks or 15 per cent in 1947).

Subsidies and stabilization grants of various kinds form a separate category of the "Sundry general expenditure". They totalled 9,016 million manks in 1948, which was 11 per cent of the current expenditure ( 7,316 million or 12 per cent in 1947).

Of the other main groups of current expenditure considerably the largest is ,Interest and expenditure on the Public Deb.t". Omitting the interest and indexbound increase in the amortization of indemnity bonds, which were recorded above as compensation to refugees, the actual interest on the Public Debt is only 2,749 million marks ( 2,833 million in the previous year).

The expenditure of the Ministry for Social Affairs was three times as great in 1948 as in 1947, chiefly owing to the fact that ,"Compensation for physical disability or illmess contracted in the war or military service" was raised from 1,350 million marks to 3,909 million. A new item was also included in 1948, "Child allowances", amounting to 2,104 million marks.

Finally, the growth of the expenditure of the Ministry of the Interior from 1947 to 1948 was principally due to the increase in wages paid to the staffs of Government and Communal hospitals and to a rise in building grants to Communal hospitals. The rise in the expenditure of the Ministry of Education was also due to teachers' higher salaries and to comparatively large
grants to Communes for building elementary schools. The expenditure of the Ministry of Agriculture was swollen principally by an increase in the costs of settlement in accordance with the law for the expropriation of land and by the growth of subsidies for various agricultural production. In 1948 these subsidies amounted to about 1,200 million marks (about 500 million in 1947). As regards the expenditure of the Ministry of Communications and Public Works, its increase was caused chiefly by the upkeep of roads and bridges. These costs, which represented the major part of the expenditure of this Ministry, amounted in 1948 to approximately 1,900 nillion marks, whereas in the previous year they totalled about 1,200 million.

The reduction in the expenditure of ,"State industrial undertakings" is due to a technical circumstance in the budget, only the met expenditure of the business undertakings run at a loss being entered in this main group; the net profits of all incomeyielding business undertakings are entered in the current revenue. The total results of the State industrial undertakings will be referred to later.

The „Revenue-producing capital expenditure" increased appreciably from 1947, as the following table shows.

## REVENUE-PRODUCING CAPITAL EXPENDITURE. <br> (Partly adjusted figures, excluding redemption)

The increase in investments in State business undertalaings, forests and landed property was mainly due to numerous reinvestments, but was also affected by the rise in prices and wages. For new railway construction and the supply of rolling stock and machinery fully 2,000 million marks were employed in 1948 (nearly 1,500 million in the previous year). Large investments were also made in productive State enterprises, such as the raising of the capital of the power station Imatran Voima

Oy, 1,950 million marks, and of the mine Outokumpu Oy, 306 million marks, and the grants, amounting to 674 million marks, for factory building to the State Metal Works which at present mainly produce goods to pay the war indemnity.

The auxiliary grants referred in 1948 mainly to building loans, the largest item, 800 million marks, being employed in relieving the acute housing shortage particularly in centres of population.

Non-productive capital expenditure amounted in 1948 to 2,374 million manks ( 1,465 million in 1947). Of this total 1,036 million marks were employed for new buildings, 832 million for acquiring various apparatus and machinery, 398 million for constructing roads, bridges and hydraulic undertakings, and 108 million for unemployment relief works. Of the extra-budgetary expenditure, which amounted to 7,770 million marks in 1948 ( 4,583 million in 1947), 4,427 million were invested in the stocks of the State industrial undertakings and factories and 3,009 million in various extrabudgetary funds.

## REVENUE IN 1948.

The main categories of Government revenae in 1947 and 1948 are shown in the following table.

| REVENUE. <br> (Excluding loans, adjusted figures) |  |  |
| :---: | :---: | :---: |
|  | 1947 | 1948 |
|  | Mill. mk | Mill. mr |
| Current revenue | . . 69,709 | 101,138 |
| Capital revenue | ... 1,754 | 824 |
|  | Total 71,463 | 101,962 |

In spite of the partial relief of taxation. the taxation revenue increased from 1947 to 1948 by fully 44 per. cent and covered a greater part of the expenditure than in 1947, although the expenditure had also grown appreciably. In 1948 the revenue from taxation tatalled 7,929 million marks more than the current expenditure '(516 million more in 1947) and covered 83 per cent (81 per cent in 1947) of all expenditure, excepting amortization.

The main categories of taxation revenue are given in the following table.

REVENUE FROM TAXATION.

|  | UE FROM Adjusted | TAXA gures) |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | 1947 |  |  |  |
|  | Mill. mk | $\begin{gathered} \% \text { of } \\ \text { all } \\ \text { taxes } \end{gathered}$ | Mill. mk | $\begin{gathered} \text { \% of } \\ \text { all } \\ \text { taxes } \end{gathered}$ |
| Direct taxes | 22,093 | 35.9 | 28,738 | 32.4 |
| Indirect taxes | 37,682 | 61.2 | 57,122 | 64.3 |
| Stamp duty | 1,775 | 2.9 | 2,949 | 3.3 |
|  | 161,550 | 100.0 | 88,809 | 100.0 |

The centre of gravity moved more than before towards indirect taxes, the yield of which was automatically increased by the rise in prices, and in production, imports and sales. Whereas their share in the total revenue from taxation was 55.1 per cent in 1946 and 61.2 per cent in 1947, it rose to 64.3 per cent in 1948. The indirect taxes were almost double the amount of direct taxes in this year.

The following table shows the direct taxes in 1947 and 1948.

DIREOT TAXES.

| (Adjusted figures) |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | 1947 |  | 1948 |  |
|  | Mill. mk | $\begin{gathered} \% \text { of } \\ \text { all } \\ \text { taxes } \end{gathered}$ | Mill. mk | $\begin{gathered} \% \text { of } \\ \text { all } \\ \text { taxes } \end{gathered}$ |
| Income and property tax ...... | $17,13: 1$ | 27.8 | 22,624 | 25.5 |
| II Capital Lavy .. | 4,057 | 6.6 | 4,475 | 5.1 |
| Extraordinary income and property taxes .... | 635 | 1.1 | 1,272 | 1.4 |
| Other direct taxes | 270 | 0.4 | 367 | 0.4 |
| Total | 22,093 | 35.9 | 28,738 | 32.4 |

Although the scale of the income and property tax was lowered in 1948, its yield increased by one third from the previous year. This was chiefly due to the inflationary growth of the nominal value of income and property, seeing that the scales of both the income and property taxes apart from the scales applied to companies - are steeply progressive. Part of the increase in this tax is also due to the basis of taxation having been modified and to the general growth of earnings.

As the next table indicates, the sales tax constituted the most important source of revenue in 1948. Its share in the total revenue from taxation increased to 29.2 per cent, while the share of the income and property tax amounted to 25.5 per cent. The share of the sales tax in the total rev-

INDIRECT TAXES.
(Adjusted figures)

|  | 1947 |  | 1948 |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |
|  | Mill. mk | $\begin{gathered} \text { \% of of } \\ \text { taxes } \end{gathered}$ | Mill. mk | $\begin{gathered} \% \text { of } \\ \text { and } \\ \text { taxes } \end{gathered}$ |
| Salos tax | 16,870 | 27.4 | 25,871 | 29.2 |
| Spirits tax | 11,608 | 18.9 | 13,253 | 14.9 |
| Excise | 4,807 | 7.8 | 9,443 | 10.6 |
| Tobacco | 4,022 | 6.5 | 6,805 | 7.6 |
| Coffee |  | - | 1,499 | 1.7 |
| Matches | 241 | 0.4 | 289 | 0.3 |
| Sweetstuffs | 2 | 0.0 | 246 | 0.3 |
| Beer | 239 | 0.4 | 245 | 0.8 |
| Other | 303 | 0.5 | 359 | 0.4 |
| Customs revenue | 4,397 | 7.1 | 8,555 | 9.6 |
| Import duties | 4,397 | 7.1 | 8,555 | 9.6 |
| Export duties | 0 | 0.0 | 0 | 0.0 |
| Tota | 37,682 | 61.2 | 57,122 | 64.3 |

enue from taxation has grown very much: in 1945 it amounted to 16.6 per cent, in 1946 to 23.2 per cent and in 1947 to 27.4 per cent. Its yield in marks increased more than fourfold from 1945 to 1948. The proportionate importance of the tax on spirits, which here includes the income and propenty tax paid by the State Alcohol Monopoly, has, ion the contrary, fallen off to almost the same extent, its share in the total revenue from taxation, which was 31.7 per cent in 1945, being 14.9 per cent in 1948. The absolute amount of the tax on spirits increased during that period by only one third, partly owing to the price policy of the Monopoly and partly to the elastic demand for alcoholic beverages.

The yield of excise was doubled from 1947 to 1948, approaching 10,000 million marks, mainly as a resulit of the excise on tobacco and coffee. The Customs revenue was doubled from 1947 to 1948, as had ailso been the case from 1946 to 1947 . The other revenue is of no great importance.

## THE PUBLIC DEBT IN 1948.

According to the accounts, the Public Deb.t amounted to 121,323 million marks at the end of 1948, having increased that year by 3,560 million marks or 3 per cent. The principal categories of debt in 1947 and 1948 are shown in the next table.

Owing to some technical considerations of accountancy, the figures in the Government accounts do mot provide an entirely correct picture of the Public Debt and its

movement. In actual fact the Government obtained some new loans during 1948, including the credit from the Bank of Finland, totalling 7,911 million marks ; as 4,082 million marks were employed in redeeming former loans, the net borrowing was 3,829 million. As the total expenditure, according to the tables given above, was 5,309 million marks in excess of the total revenue, 1,480 million marks of the cash reserve were used in defraying expenditure.

The only entirely new foreign loan was a credit of 18.3 million dollars received from Argentina, of which 1,700 million marks were employed in the course of the year. In addition 1,591 million marks were employed of an earlier peso credit from Argentina, 951 million marks of an American surplus goods credit and 917 million marks of a dollar loan from the ExportImport Bank, to mention the principal items of borrowing.

In 1948 the Government undertook practically no bornowing at all in the home market, but redeemed nearly 3,000 million manks of earlier bond loans. The changes that occurred in the indemnity bonds are shown in the table above. The combined amount of indemnity bonds and all other liabilities employed for paying compensation, which had amounted to $2.1,000$ million marks at the end of 1947, decreased to 19,605 million by the end of 1948.

## SURVEY FOR 1949.

In the first half of 1949 the economic situation continued to be comparatively stable. Industrial output increased in most spheres, partly under the influence of an improvement in the supply of electric
power. Yet the export industry suffered from the drop in prices in foreign markets. which led to the devaluation of the Finnish mark by about 18 per cent in the beginning of July. When the supply of consumer goods improved, rationing was abolished early in the summer, with the exception of sugar and coffee. The wages level remained almost unaltered, and so did the level of prices; from December 1948 to July 1949 the cost of living index rose 2 per cent, while the wholesale price index fell slightly. This favourable general development was largely due to the reduction of indemnity deliveries to the Soviet Union, already referred to, thanks to which much more of the national income was available for Finland's own use. - In the datter half of the year unemployment, which had appeared liocally in the winter of $1948 / 49$, has been more general and demanded rather extensive counteracting measures.

State expenditure remained at about the previous year's level at the beginning of 1949 . The reduction of subsidies introduced on the derationing of consumer goods proved a considerable saving, but on the other hand investments in railways, roads. power stations, building in the towns and country etc. have demanded greater funds than before. In the latter half of the year comparatively heavy extra expenditure was caused especially for the relief of unemployment. The cost of servicing the foreign debt has risen owing to the devaluation in July and the recent increase in the dollar rate of exchange.

In the 1949 budget the total expenditure is estimated at 100,243 million marks and the total revenue at 100.206 million. So far only one supplementary budget has been introduced and was passed in June regarding the additional expenditure of $8,536 \mathrm{mil}$ lion marks.

At the present time it is still difficult to estimate, how much the expenditure for 1949 widl finally increase, but it is for instance evident that the devaluation will greatly increase the service on the foreign debt. Also the revenue will exceed the budget estimates, preliminary information indicating that the total yield of taxation for the whole year may be estimated in round figures at 95,000 million marks. The yield of the income and property tax should
increase to approximately 30,000 million marks in spite of the scales of taxation having again been reduced at the beginning of 1949, and the total yield of direct taxes may be estimated at about 35,000
million marks. The sales tax was lowered by about 25 per cent in the middle of the year, but its yield should nevertheless rise in 1949 by about as much as the income and property tax.

# SOCIAL LEGISLATION AND WORK IN FINLAND. 

BY
NIILO SALOMAA, MAG. PHIL.
II.

## PROTECTION OF WORKERS.

With regard to Finnish social legislation it has already been stated 1) that special attention has been paid of late to improving working conditions in general. Thus, in 1946, the existing regulations were supplemented by a law concerning the safeguarding of workers in loading and discharging ships, by amendments of the laws concerning hours of work and the conditions of work in shops and offices, and by a new law concerning workers' holidays with pay. In 1947 the law concerning seamen's holidays with pay was amended, and in 1949 a law concerning domestic servants was issued.

The Working Hours Act extended protection to several new spheres of work, but agricultural work and certain forest work, as well as work connected with the transport of timber, are still not affected by it. It shortens the weekly hours by 1 hour to 47 , the daily working hours remaining unchanged, or not more than 8 hours. Overtime and emergency work are to be paid for, according to the law, at 50 per cent higher wages for the first two hours and at 100 per cent higher for the following hours, and double wages are to be paid for work on Sundays. - The Working Hours Act is also applied by decree to certain Government, communal and other public officials and functionaries whose status is comparable to that of manual workers.

[^2]Separate regulations are in force regarding the hours of work in shops and offices; these were amended by the new law which is based on the principle of an 8 hours' working day.
The Domestic Servants Act extends protection as negards working hours to domestic servants, whose hours of work were formerly not subject to any regulations. By this law the maximum hours of work are fixed at 10, including time for meals. Work begins at $6 \mathrm{a} . \mathrm{m}$. at the earliest, unless otherwise agreed, and ends not later than 7 p.m. That part of the day that has not been agreed upon as regular hours of work constitutes the leisure hours of domestic servants. In addition, they must be given one weekday off from $2 \mathrm{p} . \mathrm{m}$. or two weekdays from $5 \mathrm{p} . \mathrm{m}$. and a whole day off every other Sunday or from 3 p . m. every Sunday. For work done during their leisure hours domestic servants must be remunerated either in wages or by giving them a corresponding extension of their leisure hours.

Seamen's working hours were also regulated, in view of their special conditions, by a law passed in 1924. This law regulates the hours of work differently, according to whether the ship is at sea or in port and according to whether the work is divided into waches or not. While at sea, the longest permissible time of work divided into watches during two consecutive days is 24 hours, excepting the working hours of engineers, greasers, coal porters and stokers, whose working hours are shorter in certain
cases. Work that is not divided into watches must not last more than 63 hours a week, while at sea, and 70 hours, when in port or on inland waters. The principle of an 8 hours' working day is generally applied to work in port. The daily hours of the cooking staff must not exceed 12 hours and must not include night-work. Sunday work, at sea and in port, is restricted to the most indispensable duties, emergency work without extra pay is permitted in some cases, and overtime may be worked within certain limits for special wages.

Special regulations are in force regarding the work of women and minors.

According to the new law concerning annual holidays, every worker, who is bound by a labour or apprenticeship agreement with his employer, must be granted the following holidays with pay for every calendar month of the year ending on April 30, during which the worker has been in the employer's service for not less than sixteen working days: 1 working day, if he has been employed uninterruptedly for less than five years; $11 / 2$ working days, if he has been employed for at least five years or if the worker is less than seventeen years of age by the end of the calendar year; and 2 working days, but in no case less than a month, if the worker is employed in a shop or office or similar establishment or in office work in an industrial establishment and his employment has lasted not less than ten years. The conditions of leave for shop and office workers are thus more favourable than for other workers, for the duration of leave does not increase for others. when their employment has lasted for five years, whereas an employee in a shop or office or similar establishment who has been employed for ten years is entitled to at least a month.

Payment in cash instead of the grant of annual holidays is forbidden in general.

Special regulations are in force regarding seamen's annual holidays with pay. They entitle every seaman who has been employed in the same ship or establishment or under the same management continuously not less than 1 year to a holiday of at least 18 working days, and those who have been employed for 5 years to at least 26 working days. In exceptional cases leave may be replaced by payment in cash.

The observance of the regulations for the protection of workers is controlled by the factory inspectors, the law governing them dating from 1927. The inspectors work under the supervision of the Ministry for Social Affairs, in the first instance under that of the Chief Factory Inspector.

For dealing with questions arising out of the workers' protection legislation, a special Labour Council was established in 1946 and subordinated to the Ministry for Social Affairs. Its chairman and vicechairman must be impartial lawyers, and the employers and workers must be equally represented by the other members. The members are under the same responsibility as a judge on the bench, and their decisions are not open to appeal.

## SOCIAL INSURANCE.

In the sphere of social insurance only accident insurance, old-age and disability insurance have been achieved on a large scale in Finland. Sickness insurance is practically non-existent. There are only a few voluntary sickness funds, the membership of which is very small, and the benefits granted are insufficient.

The legislation concerning the oldest form of social insurance, workmen's compensation was reformed by the Accident Insurance Act and the Military Injuries Act of 1948. By the former law not only manual labourers, but also intellectual workers and persons in official employment are entitled to compensation for labour accidents.

Compensation for accidents is granted in the form of medical care, daily allowances, annuities and lump sums paid once for all. Daily allowances are paid for not more than one year from the date of the accident, and their amount in the lowest wages classes for the totally incapacitated is about 75 per cent of their former daily earnings for persons with families and about 55 per cent for persons without families. In the higher wages classes the compensation is proportionately smaller. Annuities are paid to the permanently disabled, and the amount is determined partly according to the general consequences caused by disablement and partly on the basis of the loss of earnings of the person concerned. The annuity is increased, if the
person concerned has dependent relatives. Disabled persons who have become helpless are, in addition, given a so-called helplessness supplement, and recipients of annuities in hospital a so-called hospital supplement. - If the disablement is less, a lump sum is paid instead of an annuity. - Widows and childnen under the age of 17 and in some cases other relatives of a person who dies as a result of an accident are granted welfare pensions, the amount being fixed by law according to classes of wages.
The insurance premiums are borne by the employer. Finnish accident insurance companies undertake such insurance. When an accident occurs in Government employ, the Government Accident Office undertakes the duties that would otherwise devolve on the insurance companies.

Old-age and disability insurance is provided for in Finland by the National Pensions Law of 1937, according to which every ablebodied person is insured from the age of 18 . The insurance is administered by the National Pensions Fund.

The costs of insurance are shared by the insured person, the employer, the commune and the State. Half of the premium is paid by the insured person, generally in accordance with his communal income tax assessment. At present this premium is 2 per cent of the insured person's annual income. The payment of premiums continues up to the end of the calendar year in which the insured person attains the age of 64 . The employer pays the other half of the premium, while the State and the commune refund to the Pensions Fund the amounts paid as so-called supplementary pensions.

The pensions consist of a disability pension, an old-age pension and a supplementary pension to these. The first is granted when an insured person is considered to be permanently incapable of supporting himself by such work as corresponds to his strength and ability. The old-age pension is obtained at the age of 65 .

The amount of the pension varies according to the pensioner's age and the accrued capital and interest on his account in the Fund. It is determined according to the Statutes of the pensions law, irrespective of the earning ability of the pensioner. Pensioners in poor circumstances receive a sup-
plementary pension out of Government and communal funds.

## WELFARE WORK.

As social insurance and the other measunes referred to do not nearly guarantee full social security to members of the community, public welfare work occupies a very important position in Finnish social activity.

The oldest form of welfare work in Finland, as everywhere else, is the poor aid. According to the Poor Aid Act, the commune is obliged to provide the necessary support and care for the indigent, for minors lacking legal providers and for all others who canmot provide for themselves by their own means or labour or through the solicitude of others.
The different forms of poor aid are relief in the home, care in private houses and care in public institutions, mainly in a communal home.
Everyone is obliged to pay the commune for the care he has received, excepting the part received while under age. When the commune helps a person whom it is the duty of someone else to care for, the commune is entitled to claim compensation from the latter. Compensation cannot be claimed, however, if the person liable would thereby be deprived of the possibility of supporting himself and his family, and in other cases too the welfare board may at its discretion abstain from demanding refunding.

In 1936 a special Child Welfare Act was passed, by which the commune is bound to organize the advisory services necessary for the welfare and training of children, to adop, measures for preventing and removing defects in the child welfare and education in the commune, to maintrain services and institutions that support and supplement home training, and to assist private institutions that operate in the commune.

As measures of protection and care the act recommends warnings to children or their parents or both, the control of the use made of children's leisure and general protective supervision. As an extreme measure children and young persons may be taken into the care of the community
to be brought up outside their homes. Such children should be placed by the child welfare authorities in inspected and approved private homes, children's homes or special welfare establishments. Children and adolescents whose education causes difficulties may be placed in reformatories.

Asocial members of the community are also dealt with to a great extent from the point of view of welfare and corrective training. Thus, habitual drunkards, vagrants and juvenile delinquents are looked after chiefly by the welfare authorities in accordance with the appropriate laws.

With the awakening of the social spirit, the public assistance and support have been extended in recent years to new spheres, specially by voluntary social welfare organizations. Their activity has been dictated by the special circumstances prevailing, and although coordinated and careful, it has not been so strictly bound by formalities as the legal public welfare work.

The welfare work seems to be ever extending. Specially important are the vocational training of young people with limited means, rehabilitation of and provision of work for the disabled, war widows and war orphans. In the sphere of population policy, loans for establishing homes, maternity benefits, and child and family allowances signify a remarkable progress.

## ḢOUSING POLICY.

Owing to the loss of housing accomodation by destruction during the war and the cession of territory and owing to insufficient building in consequence of the shortage of materials, housing is at present the gravest social problem in Finland. In the urban centres alone the shortage is estimated to be 74,000 dwellings.

In order to relieve the housing shortage particularly in urban centres, the Government has, as far as possible, extended and intensified its support of house building. On the basis of a law passed in 1948, special relief from taxation is granted in order to encourage building. In 1949 three laws were passed, in accordance with which the Government budget for 1950 will include at least 4,000 million marks and the budgets for 1951-1953 at least 5,000 million each year for granting loans for
cheap and socially suitable new houses in the urban centres.

Housing loans are granted as a rule in the form of secondary mortgage loans, but the law provides that on certain conditions first mortgage loans may also be granted out of public funds. Besides, a Government guarantee may be given for loans obtained from financial institutions subject to official bank inspection, and even for credits during the time of building. The loans granted for one-family houses or to companies of block-of-flats owners must not exceed 40 per cent of the building costs and for blocks of rented flats 65 per cent. Housing loans, the interest on which is 1 per cent, mast be redeemed within 45 years, if the building is of brick or some equally durable material, and within 27 years, if it is of wood. Payment of amortization and interest may be deferred for a maximum of 5 years, and exemptions from interest may be granted for 5 years. - Families with limited means and many children may, in addition, on certain conditions, be granted special allowances varying, according to the number of children, from 20 to 70 per cent of the rent paid or of the housing costs in one-familly houses.

Besides, a special State Housing Board called Arava, subordinated to the Ministry of Communications and Public Works, has been established for the purpose of planning, managing and controlling State-aided housing in urban centres, handling the financial operations involved and taking other steps to promote house building.
The legislation for assisting those suffering from the war also pays special attention to the housing problem. In virtue of a law of 1945 concerning the expropriation of land and of a law for financing the settlement of evacuees and ex-soldiers, persons who lost their homes in consequence of the cession of territory, disabled soldiers, war widows and ex-soldiers with families can obtain land loans, i. a. for house building, through Government action. In order that building should be carried out in the most practical manner, a special field organization has been established under the Resettlement Section of the Ministry of Agriculture which supplies building plans gratis and supervises the work and the employment of the loans.

Owing to the housing shortage, the regulation of rents and the measures for the full atilization of dwellings through public housing exchanges have proved essential.

## LIQUOR TRADE AND TEMPERANCE POLICY.

According to the Alcoholic Beverages Act of 1922, the manufacture, importation and sale of substances containing more than 2.25 per cent weight of ethyl alcohol are confined, with some exceptions, to a State monopoly company.

According to the law, trade in intoxicating beverages must be organized in such a way that, while illegal traffic is prevented, the consumption of liquor is reduced as much as possible and drunikenness and its pernicious consequences are avoided.

The annual profit of the Alcohol Monopoly is to be disposed as follows. After the transfer of a reasonable sum to the reserve fund and the payment of a dividend of not more than 7 per cent on the capital paid up, the company surrenders the remainder to the Government. Out of this amount the communes receive 100 marks per registened inhabitant, but not more than 30 per cent. of the sum surrendered; 35-40 per cent are used for increasing the capital of the Old-Age and Disability Insurance Fund; and the rest is used for purposes of promoting temperance and other similar welfare ends.

To prevent the abuse of intoxicating beverages the retail sales have, when necessary, been prohibited as provided for by the law. This has been done from the time the law came into force, but systematically and energetically only in recent years, when a special system of control by means of purchase licences and special controllers was introduced. Attempts to prevent the immoderate consumption of intoxicants were also made by means of a suitable price policy.

Temperance work, particularly in the form of enlightenment, is carried on bath by independent private organizations and by the communal temperance boards. The Government supports the work by means of grants and through the leaders of the temperance boards whom it pays.

## EXPENDITURE ON SOCLAL WORE.

The greater part of the cost of the social work is borne by the Government. The expenditure on social administration proper amounts to about 21,000 million marks according to the Government budget for 1949. If the expenditure on the medical and health services is included in the cost, as is the case in most other countries, the total is close on 24,000 million marks.

The share of the communes in the costs has decreased relatively in recent years, as the Government has generally undertaken to defray the expenditure involved by the new social laws. In 1949 the communes spent, at an estimate, about 3,000 million marks on social work, including the health services.

The employers also spend increasing sums annually in providing various social services, chiefly for the benefit of their workers and ather employees. It has been calculated that in 1947 Finnish industry spent about 7,400 million marks on social services. In 1949, according to estimates, the total expenditure of industry on social activities will amount to appnoximately 15,000 million marks.

The funds collected by the voluntary welfare organizations and distributed in the form of assistance amount to about $250-300$ million marks annually. If they are added to the funds employed for social welfare purposes by the Government, the communes, and the employers, the total amounts to $37,000-38,000$ million marks annually. It can thus be calculated that 10 to 11 per cent of the national income are devoted to social work.

## ITEMS.

War debt to be used for education and research. The United States Congress has made a decision of great importance to Finnish education and training by passing a law on August 24, 1949, reorganizing the loan which the United States granted Finland for the purchase of food in 1919, the so-called Hoover Loan. The reasons for the change and the manner in which it will be effected are introduced in the law in the following wording:
mWereas the Republic of Finland alone among our debitors of the first World War has consistently made payments of principal and interest toward the retirement of its indebtedmess to the United States; and

Whereas it is deemed proper, as an act abiding friendship and good will which the people of the United States hold for the people of Finland, to provide that any further payments on its World War I debit by the Republic of Finland be held in a special deposit account for such use as will advance and strengthen the close ties of friendship which bind together our two peoples".

The use of future repayments is explained as follows. The principal and interest paid on this so-called war debt shaill be used for financing studies, instruction, technical and other educational training in the United States for citizens of Finland as students, professors, other academic persons and technicians, and similarly for citizens of the United States in Finland; and further for the acquisition from America of scientific, technical; literary and scholarly books, and laboratory and technical equipment for higher education and research in Finland, and for the interchange of similar Finnish materials and equipment for higher education and research in the United States.

The original loan received from the United States was about 8.3 million dollars. The agreement in force is for an average
annual instalment of 357,000 dollars whereby the loan will be repaid by 1984 . In addition to this regular payment Finland will pay about 70,000 dollars in 1950 and about 42,000 in 1951-1958 on moratoriums.

The debts due to Sweden. As a result of megotiations carried on in Octaber agreement was reached on the manner of repayment of the loans which the Finnish government has received from the Government and private individuals in Sweden. The agreement noticeably alleviates the conditions of payment temporarily fixed in 1946. According to the agreement the debt totals about 600 million crowns. Of this amount 455 million are due to the Swedish government; the amortization will begin in 1959 and end in 1983. The amontization of the private portion of the lioan begins in 1954 and will be completed within 20 years. The interest rate is 3 per cent on the promissory notes and 2 per cent on the Treasury notes due to the Government. Private bond loans and promissory notes carry the original rate of interest, and for privately held Treasury bills the rate is 2 per cent.

New foreign credits. On October 17, 1949, the International Bank for Reconstruction and Development granted Finland a loan of 2.3 million dollars for the purchase of timber-producing equipment. Amortization payments begin on June 30, 1950, and are calculated to retire the loam by its maturity date, September 30, 1951. The loan carries an interest rate of 2 per cent, plus the usual commission of 1 per cent, which, in accordance with the Bank's Articles of Agreement, is allocated to its special reserve fund.

Compensation received for embargoes. At the end of October 1949 the United States Congress approved a grant of 5.5 million dollars to compensate Finland for the embargoing of 15 vessels during the war. The amount was paid partly for the use of the ressels during the war and partly for eight of the vessels (totalling $39,000 \mathrm{~d}$. w.tons) destroyed. The remaining seven veessels were returned to Finland in 1947.

Trade agreements. Finland has recently made the following trade agreements:

With Eastern Germany for payments and trade, for the year beginning October 1, 1949. The quota agreed on involves a total trade of about 8 million dollars. Finnish exports include timber, cellulose, paper goods, iron pyrites, felspar, pig inon, various machines and appliances, cheese, red whortleberries, and draught-horses. Imports will consist of machines, electric appliances, typewriters, calculating and bookkeeping machines, mechanic and optic appliances, and chemicalls;

With Norway for about 65 million Norwegian crowns' worth of tradie in the year beginning Novemiber 1, 1949. Finland agrees to export products of the wood and paper industries, such as plywood, birch boards and parchment paper, domestic china and pottery, cotton yarn and eloth, copper cable, and machinies and appliances. Finland will import herring, whale's fat, calcium nitrate, sulphur, aluminium products, motor saws, electric derricks and cash-registers;

With Czechoslourakia covering the quota for the year beginning Octaber 1, 1949.

The total trade within the limits of the agreement is estimated at about 3,000 million markss. Finland will export chiefly cellulase, spinning-paper, kraftpaper, wood pulp, iron pyrites, crystal rosin, pine oul, electric pig iron, incandescent lamps, and various machines, implements and appliances. Imports will mainly consist of sugar, hops, rolled metal products, steel pipes, various machines, vehicles, chemicals, cotton, woollen and silk fabrics, nubber footwear, and rubber tires;

With Italy the agreement was signed on November 1. No list of goods to be exchanged accompanies it tbut import and export licences will be granted' at the discretion of the licensing authorities.

New bond loan. The Central Bank for Co-operative Credit Societies has been authorized by a Government decree to raise a bond loan of 1,200 midlion manks for the rationalization of co-operative dairies, slaughter-houses and other establishments, and the replacement of machinery. The loan will be raised with the National Pensions Fund, the Post Office Savings Bank and the Bank of Finiland.

The publications of the Bank of Finland. In the Publications, Series B, of the Banlk of Finland Institute for Economic Research the following new issue has appeared:
11. K. O. Alho, Suomen uudenaikaisen teollisuudien synty ja kehitys 1860-1914 (The Rise and Development of Modern Finnish Indrustry in 1860-1914) ; published only in Finnish.
