

## THE FINNISH MARKET REVIEW

## LIBERALTZATION OF FOREIGN TRADE

In its memorandum on the liberalization of foreign trade presented to the Cabinet on May 13, and approved by it as such, the Economic Council suggested that the quantitative restrictions on imports should be relaxed by introducing a system of automatic issue of licences and that a deposit requirement should be adopted to prevent an excessive increase im applications for licences. The licensing authorities recently published a list of goods, licences for which are granted automatically as from July 1. This means that applications are dealt with immediately and licences for the desired quantities issued at once. The principal articles concerned: are raw materials, some consumer goods, industrial appliances, and finished goods such as, for example, surgical instruments. With the exception of imports payment for which is to be made in dollars, the system relates to the importation of the listed goods from the country of origin. Settlement is made in the currency fixed in the payments agreement between Finland and the country concerned. Including those imports licensing of which was earlier made automatic, i.e., for the needs of the forest industry, the total value of the imports concerned is estimated at some 70 mill. marks annually, or nearly half the value of imports last year.
Taking into consideration the recent great increase in the stook of licences, the prerequisite for this extension of automatic licensing was that the above mentioned system of deposit obligations be adopted. On the authority of a Government decision of June 18, the Banik of Finland issued instructions
according to which from July 1, the condition upon which the licensing authorities grant an import licence is that the importer has deposited with the Bank of Finland an amount corresponding to 10 per cent of the c.i.f. value of the goods. The deposit is refunded to the depositor when the licence has been fuilly used or has expired, though not earlier than three months from the date of deposit. The principal exemptions from the obligation to deposit are granted for import licences for less than 50,000 marks, for licences that are granted for gifts or for licences in a currency the use of which for import payments was not restricted by the Bank when the licence was issued. At present, the last mentioned exemption relates to imports from Iceland, Norway, Turkey, Spain, Jugoslavia, USSR, Poland, Rumania, Hungary, Eastern Germany, Argentina, Bulgaria and Columbia.

While the licensing authorities, on the recommendation of the Economic Council, are examining the possibilities of further abolition of import nestrictions, e.g. by extending aatomatic licensing and adopting global quotas, a further reduction of the quota-bound imports and in the number of bilateral payments agreements has been effected. In addition to trade with Western Germany, Norway and the Netherlands, the trade with Denmark was put on a more liberal basis on July 2, so that fixed quotas, which formerly tied all imports, now affect only 20 per cent of the estimated value of tatal imports. Another 55 per cent will be covered by four large group quotas and the remainder will fall under the automatic
system. At the same time, the previous payments agreement providing for a swing credit was replaced by a multilateral agreement.

## PRICES

The present upwand trend, which began in 1953, has caused some rising tendencies in the level of prices. Nevertheless, prices have been reasonably stable for a long time, both wholesale prices and the cost of living remaining below the average level for 1953. This has, however, not been entirely occasioned by the evenness of the present boom, but also by Government measures introduced with the express purpose of lowering prices - in particular those prices which affect the cost of living index. A considerable reduction in prices was effected last November by means of subsidies.

During the period December to May, wholesale prices rose by 2 per cent. One reason for this was the seasonal increase in the prices of some agricultural products, such as potatoes and meat; the prices of forest and lhome industry products also rose to some extent. The rise in the wholesale prices of imported goods is due solely to increases in import duties and price equlization payments.

The cost of living indiex (Oct. 1951=100) stood at 98 from November to March, but was 99 in April and May owing to the seasonal increase in some food prices.

The f.o.b. prices of export goods, which last December were 10 per cent higher than the average level of 1953, rose by nearly 3 per cent from December to May in consequence of increases in the export prices of wood and paper products. At the same time, import prices, c.i.f., which in December were 4.5 per cent below the 1953 level, dropped a further one per cent by May. This contrary development of export and import prices has further improved the terms of trade, so that in May the proportion of export prices to import prices was 12 per cent higher than in May 1954.

Building costs were stable during the months of winter and spring. The relative
index - which is indeed constructed on a rather narrow basis - remained on the same level as the figure for 1953, except for a temporary drop in March. In June, however, a rise of 2 per cent occurred. The prices of industriail shares were the ones to react to the most marked extent to the growing economic activity and to the economic policy. Their index was 35 per cent higher in May than it was in December, but as the size of the stock market is rather modest in Finiland, this is of no particular consequence.

The fact that prices have remained stable on the whole, despite the boom and the considerably increased demand is largely explained by the expansion of domestic production and the increase of imports at lower prices. In the first four months of the current year, the volume of industrial production, which was 12 per cent greater in 1954 than it was in 1953, exceeded the corresponding volume in 1954 by 9 per cent. Productive capacity is now being fully employed in many fields, so that a further increase in production may in some cases tend to raise costs and prices. In some spheres, such as the forest industry, capacity has been considerably increased during the last few years.

During the past spring, economic measures were introduced or decided on which may influence prices in the near future. The sallaries of some civil servants and private employees have been raised, but the final extent of the increase is not yet known. The Government decision concerning agricultural income may cause an increase in some agricultural prices. The expansive effect of the public finances will be felt most in the late summer, when economic activity is seasonally at its most active in consequence of brisk foreign trade. At the moment, however, only one circumstance is known that is sure to raise the price index in the autumn, viz. the fact that the rents of houses built last year will be taken into account in the cost of living index and those rents are higher than are those for older houses.

July 10, 1955

## CERTAIN PARTICULARS ABOUT FINLAND

## 1. FORM OF GOVERNMENT

Finland formed a part of the kingdom of Sweden from 1154 to 1809; from 1909 it was an autonomous Grand Duchy connected with Russia up to December 6, 1917, when Finland declared its independence, which was acknowledged by all the Powers including Soviet Russia. It became a republic in 1919. The legislative power of the country is vested in the Diet and the President. The highest executive power is held by the President chosen for a period of 6 years. The President for the current period, March 1, 1950, to March 1, 1956, is Juho Kusti Paasikivi who has been in office since March 11, 1946.

The Diet, composed of 200 members, is elected by universal suffrage. The number of seats of the different parties in the Diet elected in 1954 are as follows: Social Democrats 54, Agrarians 53, People's Democrats 43, Conservatives 24, Swedish Party 13, Finnish People's Party (former Liberal Party) 13.

## 2. LAND

THE AREA is 337,009 square kilometres (Great Britain's area is $245,000 \mathrm{sq} . \mathrm{km}$ and Italy's area $301,000 \mathrm{sq} . \mathrm{km}$ ). Of the total area $9.4 \%$ are inland waters. On an average $13.9 \%$ of the land in the South of Finland is cultivated (1950), $1.9 \%$ in the North, $8.0 \%$ of the whole land. Of the land area 21.7 mill. ha ( 53.5 mill. acres) or $70.9 \%$ are covered by forests.

## 3. POPULATTION

NUMBER OF INHABITANTS (1954): 4.2 millions. Sweden (1954) 7.2, Switzerland (1954) 4.9, Denmark (1953) 4.4 and Norway (1953) 3.4 millions.

DENSITY OF POPULATION (1954): In South Finiand 23.5 , in North Finland 3.7 and in the whole country an average of 13.8 inhabitants to the square kilometre.

DISTRIBUTION (1954): $66.2 \%$ of the population inhabit the country, $83.8 \%$ the towns and market towns. The largest towns are (1954): Helsinki (Helsingfors), the capital, 396,300 inhabitants, Turku (Abo) 107,500, Tampere (Tammerfors) 107,600.

OCCUPATION (1950): Agriculture and forestry $42 \%$, industry $29 \%$, commerce $7 \%$, transport and communication $6 \%$, services $9 \%$, other economically active persons $1 \%$, economically inactive persons $6 \%$.

LANGUAGE (1950): Finnish speaking $91.1 \%$, Swedish speaking $8.6 \%$, others $0.3 \%$.

EDUCATION (1953): Practically all persons over 15 years of age are literate. There are three universities (the oldest founded in 1640) and 12 colleges of university standard.

INCREASE OF POPULATION (1953): Births $21.9 \%$, deaths $9.6 \%$ increase $11.6 \%$. Deaths in France (1053) $13.0 \%$ and in Great Britain (1953) 11.4\%

## 4. TRADE AND COMMUNICATIONS

NATIONAL INCOME (1953, in thousand million marks): Gross national income at market price 805. Net national product at factor cost, by origin: agriculture 81 ( $13 \%$ ), forestry and fishing 61 ( $10 \%$ ), manufacturing 195 ( $32 \%$ ), construction $60(10 \%)$, transport and communications 41 ( $7 \%$ ), commerce, banking and insurance 77 ( $13 \%$ ), public activities 59 ( $10 \%$ ), other services 34 ( $5 \%$ ), total 608. Volume index 122 (1948 $=100$ ).

FOREST RESOURCES (1950): The growing stock comprises 1,370 million of solid cub. m. incl. bark ( 48,384 million cub. ft ), of which pine is $45.5 \%$, spruce $32,2 \%$, the rest $22,3 \%$ being leaf-trees, chiefly birch. Of the growing stock, 7,471 million cub. $\mathrm{ft}, 65.0 \%$ of them pines, are up to the standard required for logs (minimum for sawmill logs $18^{\prime} \times 6^{\prime \prime}$ and for veneer logs $18^{\prime} \times 7^{\prime \prime}$. The annual growth is about 41 million of solid cub. $m$. green wood excl. bark ( 1,448 mill. cub. ft). The
total removal in 1949 calculated according to the use of wood was 40 million cub. m. ( 1,413 million cub. ft ). In the years 1923 to 1938 in the then area of the country, it averaged 41 million cub. m. ( 1,448 million cub. ft ) per year, the corresponding yearly growth being 46 million cub. $m$. ( 1,624 million cub. ft ).

AGRICULTURE (1950): Cultivated land 2.5 million hectares, divided as follows: area under cultivation under 10 hectares $41.2 \%, 10-50 \mathrm{ha} 53.6 \%, 50-100 \mathrm{ha} 3.6 \%$, over 100 ha $1.6 \%$. Cultivated land (1953) is divided between the different kinds of crops as follows: 43.4 \% hay, $7.7 \%$ temporary grassland for grazing, $19.0 \%$ oats, $5.0 \%$ wheat, $3.7 \%$ rye, $6.7 \%$ barley, 3.7 \% potatoes, 10.8 \% others. Dairy units in operation in 1953 amount to 459.

OWNERSHIP OF LAND (1950): The land area is distributed among different classes of owners approximately as follows: private $56.9 \%$, State $35.0 \%$, joint stock companies etc. $6.4 \%$, communities $1.7 \%$.

INDUSTRY (1952): Number of industrial concerns 5,094 , workpeople 270,453 , gross value of products of industry 508,355 million marks.

LENGTH OF RAILWAYS (1954): $5,046 \mathrm{~km}$, of which $4,859 \mathrm{~km}$ State railways and 187 km private. The gauge is in general 1.524 m .

MERCHANT FLEET (1. 4. 1955): Steamers 319 (422,790 gross reg. tons), motor vessels 149 (294,238 gross reg. tons), sailing vessols with auxiliary engines 120 (11,777 gross reg. tons). Total 588 ( 728,805 gross reg. tons).

## 5. FINANCE AND BANKING

CURRENCY. Since 1860 Finland has its own monetary system. From 1877 up to 1914 the currency maintained its stable gold value, and after the disturbances caused by the war a gold standard was again introduced from January 1, 1926. The unit currency is the mark (Finnish markka $=\mathbf{1 0 0}$ penniä). Since October 12, 1931, the redemption of bank notes in gold is, however, suspended. In 1948 Finland joined the International Monetary Fund and on June 27, 1951, the official par value of the mark was established at 230 marks ner one U.S. dollar, the selling rate of the Bank of Finland being 231 marks and its buying rate 229 marks.

STATE FINANCES. According to the finance accounts for 1054 the State revenue was 215,569 million marks, of which 194,302 million marks were current revenue, and State expenditure 213,663 million marks, of which 143,897 million marks were current expenditure.

MUNICIPAL FINANCES. According to the finance accounts for 1052 expenditure amounted to 98,483 million marks. Total revenue was 100,367 million marks, of which income from taxation was 57,305 million marks. The municipal income tax (non-progressive) averaged $10.9 \%$ of the ratepayers income.

THE BANK OF ISSUE. The Bank of Finland (founded in 1811) is a State Bank. Its head office is in Helsinki (Helsingfors) with branches in Turku (Àbo), Pori (Björneborg), Vaasa (Vasa), Oulu (Uleåborg), Kuopio, Joensuu, Mikkeli (S:t Michel), Tampere (Tammerfors), Hämeenlinna (Tavastehus), Jyväskylä, Kotka and Lahti.

THE COMMERCIAL BANKS (1955): Number 6, possess 520 offices, where all kinds of banking business is transacted. There is one banking establishment per 8,200 inhabitants.

The largest banks are Kansallis-Osake-Pankki, Oy Pohjoismaiden Yhdyspankki - Ab Nordiska Föreningsbanken and Helsingin Osakepankki - Helsingfors Aktieounk, all with head offlees in the capital.

OTHER BANKS (1955): Mortgage Banks 5, Savings banks 421, Co-operative Credit Soeleties 594 and a Central Bank for the latter.

# FINLAND'S BALANCE OF PAYMENTS IN 1954 

BY<br>RAGNI BÄRLUND, mag. phil.<br>FELLLOW OF THE BANK OF FINLAND INSIIIUTE FOR ECONOMIC RESEARCH.

In a number of reports for 1954 the accumulation of foreign exchange on banking accounts has been recorded with satisfaction. Gold and dollar reserves grew as did the balances in EPU currencies. On the other hand, the unnecessarily heavy surplus of Eastern-Bloc currencies was reduced, by transfers of gold and Western currencies or by other means. The bettering of the foreign payments position was made possible by a substantial improvement in the current balance of payments. The proceeds from exports and foreign services permitted a more liberal licensing of imports than had previously been the case and yet sufficed for increasing reserves. The control of imports has still to be maintained, but the import policy has been managed with a view to step:by-step achievement of greater freedom. Efforts are being made to conclude the clearing agreements and replace them by less restrictive arrangements for foreign trade and payments.

The following is a survey of the various items making up the bollance for last year as compared with those for 1953 and some
earlier years. The surplus of current transactions was supplemented by only an insignificant net amount of long-term borrowing. Instead there was a considerable net inflow of private capital on short-term liabilitites account. As has already been stated, official and banking assets finally increased much more than did the corresponding liabilities.

## CURRENT TRANSACTIONS

The receipts and payments originating in the exchange of goods and services with foreign countries in 1953 and 1954 are given below.

After the downward tendency of the previous years in which export markets had been unfavourable and total merchandise receipts had dropped, necessitating stringent import licensing, the foreign payments position began: to improve in 1953. In 1954 the current balance of payments receipts amounted to 185,410 million marks which implied a further rise by 18 per cent over 1953. The corresponding payments rose in

| Errors and omissions |  |  | - 771 |  |  | - 2,453 |

the same proportion, that is to 171,950 million marks. In consequence, the net credit balance rose from 12,230 to 13,460 million marks.

As is normal, the balance was dominated by merchandise trade. The volume of Finnish goods placed on foreign markets increased considerably, and as this increase in quantity was accompanied by a slight increase in prices, the value of exports rose during the year from 131,670 to 156,690 million marks. This allowed a more liberal licensing policy tham before. As import prices dropped slightly the increase in the quantity imported was proportionately even larger than the increase in value. Trade statistics record an import value of 152,140 million marks for 1954. From this amount, 1,000 million has been deducted as belonging rather to 1953 in the sense of the present report. The monetary gold imported to a value of 1,160 million marks has similarly been deducted from the official import value, whereas the estimated total of smuggling, a round sum of 300 million, and the gifts received in kind, 250 million, have been added to it. The gross value of imports has therefore been entered as 150,530 million marks, which is 22 per cent greater than. the figure for 1953.

The remainder of the current items tend to move in the same direction as does trade. With but some few exceptions, foreign relationships of all kinds consequently grew more active last year, both receipts and payments increasing. One exception, a shrinkage of payments, was in connection with Finns travelling abroad. By reason of the current restrictions on travel allowances, payments were considerably cut, whereas the corresponding receipts increased, thanks to the greater number of foreigners visiting Finland. Net payments for travel were only 1,800 midlion marks, as agaimst 3,000 million
in 1953. - Transportation receipts are mainly comprised of the gross earnings of the domestic merchant fleet in international traffic. Gross freights have been entered as 15,040 million marks. This includes 6,790 million of import freights which in the balance cancel an equal amount of the c.i.f. value reported for imports: Port disbursements by foreign ships were extimated at 820 million marks. The expenditure by ships in foreign ports has been estimated at 5,400 million marks, and ship repairs amounted to 490 million. Total transportation, including air and ail transport, yielded net foreign receipts of 9,970 million marks. - The main item of ,investment income" was the interest paid on the long-term foreign debt, or $2,410 \mathrm{mil}-$ lion marks. The remainder consisted of interest and dividends etc. paid in both directions; the result was a total net payment of 2,440 million marks. - Miscellaneous receipts and payments include a variety of items such as personal services, management and brokerage, rental and royalties, etc. They gave net receipts of 930 million marks.

## MOVEMENT OF CAPITAL AND MONETARY GOLD

In the terms of this report official loans include those guaranteed by the State and the Bank of Finland. The short-term capital consists of loans repayable within a year or less, whereas long-term capital comprises loans redeemable in more than one year, obligations that have no fixed term of redemption, shares and so on. Thus conceived, assets and liabilities and the net assets moved in 1953 and 1954 as indicated below.

Even in 1953, the surplus of the current balance of payments made it possible to increase assets and cut liabilities, as regards both the long-term debt and the short-term obligations. In 1954, there was a further

CAPITAL AND GOLD MOVEMENT

increase in net assets as the accumulation of assets far exceeded the increase in liabilities.

Only small amounts of foreign long-term assets are held and consequently their movement is not significant. Last year the only transaction of importance was the purchase of foreign bonds by the Bank of Finland for 721 million marks. Long-term liabilities consist of actual loans, only a minor proportion of the private transactions being transfers of securities. Of the long-term loans drawn in 1954, a total of 3,084 million marks was intended for ship-building. The greater part of this amount is entered as private loans, while the rest of it is officially guaranteed. Long-term official liabilities increased by the utilization of 1,203 million marks' worth of loans granted in previous years by the Initernational Bank for Reconstruction and Development. These loans are available in many different currencies and they are drawn upon when new purchases are made or ordered within the scope of the loan agreements. In the table above the movement in the long-term liabilities is the net result of increases and decreases. The gross changes in the various sub-items are presented below for 1954.

|  | Increase Mill. mk | Decrease Mill. mk |
| :---: | :---: | :---: |
| Private loans | 2,552 | 786 |
| Other private eapital |  | 602 |
| Total long-term private |  |  |
| liabilities | 2,552 | 1,388 |
| Net change | +1,164 |  |
| Official bond loans | - | 136 |
| Other officiel loans | 2,087 | 3,507 |
| Other tofficial capital | - | 10 |
| Total long-term official |  |  |
| liabilities | 2,087 | 3,653 |
| Net change |  | -1,566 |

Last year official and private long-term credits from the following countries and the IBRD were drawn on in amounts as follows.

|  | Amounts drawn on loans Mill. mk |
| :---: | :---: |
| Denmark | 64 |
| IBRD | 1,203 |
| Netherlands | 1,826 |
| Norway | 684 |
| Sweden | 770 |
| United States | 92 |
| Total amount drawn | 4,639 |
| Some repayments are still in respect of |  |
|  |  |

connection with loans granted after the war. In 1954 amortization sums on some of the Swedish loans were paid for the first time since the standstill in force since the war, but they will not reach their full compass until 1958. The following repayments were made last year to different countries and the IBRD.

|  | Amounts repaid on loans Mill. mk |
| :---: | :---: |
| Belgium | 683 |
| Brazil | 90 |
| Columbia | 87 |
| Denmark | 34 |
| France | 18 |
| IBRD | 458 |
| Netherlands | 359 |
| Norway | 267 |
| Sweden | 768 |
| United Kingdom | 426 |
| United States | 1,239 |
| Total amount repaid | 4,429 |

For the first time for several years repayments fell somewhat short of the new loans utilized in 1954, but the difference was 210 million marks only.

The Bank of Finland had recourse to the International Monetary Fund in 1952 and 1953 in order to strengthen its monetary reserves by the purchase of dollars for marks. In the balance of payments report the purchase was reganded as a short-term transaction. The foreign currency received was added to the reserve, and the marks paid therefor and depasited by the IMF on account with the Bank of Finland increased the liabilities by a corresponding amount. Of the dollars purchased, 4.5 million were repurchased for 1,035 million marks during 1954.

Exact data are not available on the private short-term capital movement, in particular not for that part of it occasioned by delayed payment for imports and exports. Neither are all prepayments for imports known, especially of some categories of heavy machinery paid for in advance by instalments as their construction advances. Only the prepayments for ships are registered. The known short-term private assets decreased by 1,004 million marks. The corresponding liabilities again increased. In consequence of the increasing activity in trade the outstanding export prepayments increased by 3,212 million marks, and the increase in import credits received has been estimated at 1,090 million.

As a net result of all the foreign transactions in 1954, the Bank of Finland and the commercial banks accumulated short-term assets and reduced their short-term liabilities. There was an increase by 11,753 million marks in their assets and as there was also a structural change, the improvement was greater than is expressed by this net figure as such: clearing accounts and restricted assets were reduced by 2,188 million marks, while the other reserves, chiefly in dollars and EPU currencies, grew by 13,941 million marks. In addition to this the gold reserve was strengthened by 1,115 million marks. Liabilities were reduced by a net amount of 2,387 mililion marks.

Altogether the net amount of official and private short-term assets increased by 9,949 million marks.

THE BALANCE OF PAYMENTS IN 1950-1954
The balance of payments has been compiled since 1945 according to the International Monetary Fund's principles. From the commencement of this period up to 1950 inclusive the balance was adverse or yielded only a slight surplus. As, however, the mark was unstable in value, the actual figures of the balance for this period are not comparable with those for later years. The following survey of the current transactions is therefore in respect only of the period since 1950 .

|  | Receipts <br> Mill. mk | Payments <br> Mill. mk | Net <br> receipts <br> Mill. mk |
| :--- | :--- | :--- | :--- |
| $1950 \ldots \ldots$ | 106,690 | 112,480 | $-5,790$ |
| $1951 \ldots \ldots$ | 225,820 | 192,640 | $+33,180$ |
| $1952 \ldots \ldots$ | 195,760 | 217,050 | $-21,290$ |
| $1953 \ldots \ldots$ | 157,280 | 145,050 | $+12,230$ |
| $1954 \ldots \ldots$ | 185,410 | 171,950 | $+13,460$ |

After the years of deficit receipts very suddenly rose in 1951 only to drop again in the following year. Because imports cannot be manœuvred as quickly as the exports change the result was a great surplus in the balance of 1951 and a considerable deficit in that of 1952. By 1953 and 1954 conditions were again under control and in both years payments were checked enough to give
the desired surplus of receipts. As long as war reparations were paid they were recorded as both providing receipts and necessitating payments. All the other items in the balance of payments combined have regularly yielded net receipts. The fluctuations in these three categories are illustrated by the following figures.

|  |  | Merchandise <br> less war <br> reparations <br> Mill. mk | War <br> reparations <br> Mill. mk | Other <br> current <br> items <br> Mill. mk |
| :---: | :---: | :---: | :---: | :---: |
| 1950 | $\ldots \ldots$ | $-7,550$ | $\pm 7,850$ | $+1,760$ |
| 1951 | $\ldots \ldots$ | $+30,690$ | $\pm 12,400$ | $+2,490$ |
| 1952 | $\ldots \ldots$ | $-25,930$ | $\pm 8,220$ | $+4,640$ |
| 1953 | $\ldots \ldots$ | $+8,110$ | - | $+4,120$ |
| 1954 | $\ldots \ldots$ | $+6,160$ | - | $+7,300$ |

During the first few years after the war in particular, foreign loans provided a valuable aid in speeding up economic recovery. Nevertheless the amounts borrowed have never been very large and redemptions have been paid all the time. Since 1950 they have yearly exceeded or approximately equalled the new amounts drawn on loans. In the period 1945-1954 a total equivalent of 330 million dollars was drawn, and 232 million repaid. The annual distribution since 1950 is shown in the following table.

|  | Millions of marks |  | Equivalent in millions of dollars |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Drawn | Repaid | Drawn | Repaid |
| 1950 | 3,571 | 3,990 | 15 | 17 |
| 1951 | 3,836 | 9,576 | 17 | 41 |
| 1952 | 3,459* | 4,844 | 15* | 21 |
| 1953 | 3,188* | 3,592* | 14* | 16* |
| 1954 | 4,639 | 4,429* | 20 | 19* |

The foreign long-term debt amounted to 64,961 million marks at the end of 1954 . The known short-term liabilities totailed 30,565 million marks and the corresponding assets 55,885 million marks, in addition to which the gold reserve was 7,210 million. These four items make the total net indebtedness 32,429 million marks, or 140 million dollars which was 43 million less than a year previously.
*) In addition, $\$ 4.5$ million was purchased from the IMF at an equivalent of 1,035 million marks in 1952 and $\$ 5$ million for 1,150 million marks in 1953. Before the end of the latter year $\$ 2$ million was resold for 460 million marks and similary in 1954 \$4.5 million for 1,035 million marks.

For 1955, prospects in connection with the balance of payments seem satisfactory. The tendency of export trade is favourable, permitting successive increases in imports. Not only is a greater volume of goods imported, but the foreign payments conditions are also easing at the same time, multilateral payments are replacing the bilateral clearing system, and other obstacles are being removed. The increase in imports may
prevent the foreign exchange reserve from being strengthened in the same proportion as occurred last year, desirable as this would be, but such an increase is demanded by internal conditions. There has been a conssiderable outflow of money of late, and to drain this away, a corresponding increase in the supply of goods has been considered an essential factor of monetary policy.

## ITEMS

Trade agreements. Finland has recently concluded trade agreements with the following countries.

Greece, on June 1, 1955. Period: June 1, 1955, to May 31, 1956. Total trade is estimated at about $\$ 4.6$ mill. Finnish exports will include cheese, sawn timber, vencers and plywood, mechanical and chemical pulp, newsprint, cigarette paper, board, paper and board products and household china. Finland will import tobacco, raisins, cotton, rice, resin; intestines, sheep skins, etc. - Both imports and exports are partly fixed by group quotas.

Jugoslavia, on June 10, 1955. Period: July 1, 1955, to June 30, 1956. Total trade is extimated at about $\$ 2.6$ mill. Finmish exports will include chemical pulp, veneers and plywood, newsprint and other qualities of paper, boand, and machinery and apparatus. Imports will include agricultural produce, hardwood and hardwood veneers, metals, minerals, and chemical and pharmaceutical products. - Both exports and imports are fixed by group quotas.

Italy. On May 31, 1955, the trade agreement between Finiland and Italy was prolonged for four months, i.e. for the period June 1 to September 30, 1955. The original quotas were correspondingly increased.

USSR credits. On June 29 the Government decided to draw the equivalent of $\$ 2.5$ mill. from the stand-by credit of 40 mill. roubles granted Finland by the USSR last January. The currency in which the loan will be drawn is to be decided on by the Bank of Finland and the State bank of the USSR. The funds will be re-loaned to Enso-Gutzeit Oy, principally for purchases of machinery and machine tools for the Kaukopää paper mill.

New Bond Loan. On August 1, 1955, the Government will issue a second 5 per cent bond loan, amounting to 3,500 mill. marks. The loan will be repaid in 1957-1961, one fifth on February 1 of each year. The interest payments and amortization of the loan are tied to the index of wholesale prices of Finnish goods. Each 5 per cent rise in the index above the basic index figure of September 1955, calculated to the September preceding the payment, will result in a corresponding increase in interest payments and amortization. There is, however, a limit of 100 per cent, that is to say amortization and interest payments may not be more tham doubled.

The bonds will be available to anybody without restriction, although they are mainly
intenided for the holders of the index-tied Second Indemnity Loan, the last instalment of which falls due on August 1.

Interest on Cash Reserve Account. The Bank of Finland has, as regards the cash reserve accounts, which were instituted in accordance with the agreements made in February with the private credit institutions, paid the same rate of interest as they then did on deposits and cheque accounts of the general public. As the interest on deposit accounts was raised by $1 / 2$ per cent from July 1, the Bank of Finland has also correspondingly increased the interest on cash reserve account.

Timber cuts in 1954/55. Lumbering was of record proportions during the felling season of 1954/55, which ended in May. Altogether $38.1 \mathrm{mill} . \mathrm{cu} . \mathrm{m}$ piled measure was cut, or 15 per cent more than in 1953/54 and 1 per cent more than during the previous postwar record season of 1951/52. Fellings of fuel wood decreased by 34 per cent, while those of other qualities increased considerably, of spruce pulpwood: by 30 per cent, of pime pulpwood by 99 per cent and of pitprops by 23 per cent. The combined cuts of these three qualities totalled 19.5 mill. cu. $m$ as against 13.6 mill. $\mathrm{cu} . \mathrm{m}$ during 1953/54 and 17.2 mill. cu. m during 1951/52. The great increase with regand to pulpwood is a sign not only of favourable export conditions for the pulp and paper industries, but also of the fact that those industries have augmented their productive capacity. The greater activity of the plywood industry is reflected in the increase in the fellings of deciduous logs by nearly 30 per cent. Fellings of coniferous logs, which are used by the sawmills, increased by 4 per cent only.

The table below shows the quantities cut in 1953/54 and 1954/55.

|  |  | 1953/54 | 1964/55 |
| :---: | :---: | :---: | :---: |
| Coniferous logs, mill.cu.ft |  | 224.6 | 233.6 |
| Deciduous logs, mili,.cu.ft . |  | 38.9 | 50.4 |
| Spruce pulpwood, mill.ce.m, piled |  |  |  |
| Pine pulpwood, | " | 2.7 | 5.4 |
| Pitprops, | " | 1.1 | 1.4 |
| Fuel wood, | " | 6.2 | 4.1 |
| Other wood, | " | 0.3 | 0.3 |
| Totail fellings, | " | 33.3 | 38.1 |

Building activity. During the first quarter of the current year, in the whole country, new buildings were completed to a total of 3.2 mill. cu. m. This exceeds the corresponding volume of last year by 10 per cent. The increase relates particularly to dwelling houses, andi public and industrial buildings, whereas there was a reduction in the volume of business premises and agricultural buildings completed. There was a considerable difference between urban and rural building. The volume of buildings completed in the towns was 38 per cent greater than it was in the first quarter of last year, while the volume of buildings completed in country districts was 25 per cent smaller.

Buildings under construction at the end of March exceeded last year's corresponding volume by 1 per cent, the increase relating principally to business premises and industrial buildings. Building licences were granted for a volume less by 4 per cent than that for the finst quarter of 1954. Licences for dwolling houses and agricultural buildings decreased most, while those for business premises increased by 135 per cent.

The first quarter of the year is generally the least active building period. Temporary conditions may considerably affect the figures for this quarter, so that no definite inferences can be drawn from the figures quoted. It appears, however, that the feared overexpansion of building activity will not come into being.
