

## THE FINNISH MARKET REVIEW

## MONETARY SURVEY

In Finland, as is the case in other countries where the pace of economic activity is largely determined by the volume of exportation, the increase in exchange reserves during a boom such as the present one is a considerable inflationary factor in that it tends to increase the supply of money. During the current year the Government has further raised the amount of central-bank money in private hands by drawing on its balances with the Bank of Finland in order to cover' a deficit due to large subsidies. To counterbalance this increase and neutralise its inflationary effects, the Bank has frozen part of it on cash reserve account and on the account for deposits against licences. In addition, the issue of special import licences necessitating payment within a short period has made it possible to restrict the supply of money at times when the need for such restriction has been most urgent. The same effect is produced by exporters voluntarily depositing part of their income from exports on account with the Bank of Finland. The following tables show, for the nine first months of the year, the changes in the principal factors influencing the amount of central-bank money and their effect on the outstanding amount.

The small increase in net foreign balances is evidence that the Bank of Finland has checked the growth of exchange reserves in spite of favourable export conditions. The deficit in State finances was to be anticipated, but the increase in advances to enterprises was unexpectedly great. Of the

latter increase, however, the major proportion relates to foreign credits and export prepayments received by firms with the Bank of Finland acting as intermediary. The Bank's advances proper increased by 2,200 mill. marks; during the last three months of the period they were decreasing.

Taken together, these three items indicate a rise of 14,600 mill. marks in central-bank money, but their effect was mainly neutralised by measures of monetary policy. The cash reserve accounts, the deposits against licences, and exporters' deposits between them disposed of 9,400 mill. marks, while the other counterbalancing items totalled 2,600 million. As, in addition, the commercial banks reduced their rediscounts by 1,700 mill. marks,
there remains a mere 900 million to represent the increase in central-bank money in the hands of the public and the banks. The lower table shows the influence of these changes on the various categories of centralbank money: notes in circulation increased by 2,700 mill. marks, while the cheque accounts of the banks and the public decreased by 1,800 million in all.

Despite the fact that the increase in central-bank money was restricted to a reasonably small amount, and that the credit institutions have been instructed to exercise great restraint in their lending, the banks' advances to the public have during the current year grown as much as they did in 1954. From the beginning of the year to the end of August, the credits granted to the public by credit institutions (excl. the Bank of Finland) increased by 30,300 mill. marks, as against 30,000 million during the corresponding period of 1954. This considerable growth was occasioned by the strong demand for credit, which was, in turn, caused by heavy investment, but also partly by the fact that, owing to shipment delays, exporters were late in repaying their seasonal credits.

Deposits in the credit institutions increased slightly less than did their lending. Up to the end of August total deposits by the public grew by 26,400 mill. marks, of which 3,100 million related to cheque accounts.

At the end of September the cash of the commercial banks amounted to 6,000 mill. marks and their rediscounts to 6,600 million, so that the balance was negative, minus 600 million. Thus, their lending ability was weaker than it was at the beginning of the year, the balance then being plus 1,100 million. The only means they possess further to increase advances is thus to increase rediscounts, but on the other hand the Bank of Finland, by charging penalty rates of interest on rediscounts, is trying to compel the banks to restrict their lending as much as is possible.

## CASH RESERVE REQUIREMENTS

In February, eight-month agreements were made between the Bank of Finland and the private credit institutions, the latter undertaking to deposit on cash reserve account with the Bank of Finland a certain proportion of the increase in deposits above the
level of January 31. This proportion was 40 per cent for the big commercial banks, 30 per cent for the small commercial banks, and 25 per cent for savings banks and co-operative credit societies. (See Market Review, No. 3, 1955.)

As the experience gained from this procedure was fairly satisfactory, and as the economic situation still calls for a contractive monetary policy, in September new cash reserve agreements were concluded, to be in force until the end of January 1956. The principal change was the inclusion of consumers' co-operative societies among the credit institutions concerned. Their deposit quota will be 25 per cent, as in the case of savings banks and co-operative credit societies.

## STOCK EXCHANGE

According to the Unitas index, share prices have mostly followed the changes in general business conditions. At the time of the Korean boom, there was a steep rise in quotations, for industrial shares in particular. When money grew tight and the export industries encountered difficulties, a period of decrease began, which lasted into the early part of 1953. Since then, share prices have been on the rise, except for a slight decrease in the first half of 1954. The rise in prices of industrial shares has been particularly strong during the current year, amounting to 68 per cent up to the end of September. Prices of bank shares have risen by 11 per cent. Too much importance should not be attributed to these figures, however, as dealing in stocks is of minor importance in Finland, the annual turnover of the Stock Exchange varying between 1,500 and 3,000 mill. marks.

The causes for the steep rise in quotations for industrial shares are difficult to ascertain. For one thing, it is a natural result of the booming trade conditions, but also it may be brought about by fears of inflation and by expectations of a growing yield of these shares, of bonus issues, etc. The net yield of industrial shares (after deduction of taxes) averages about one half of the yield of tax-free bank deposits. Index-tied bank deposits are also considerably more remunerative, and even index-tied Government bonds yield more than do industrial shares.

October 10, 1955.

## CERTAIN PARTICULARSABOUT FINLAND

## 1. FORM OF GOVERNMENT

Finland formed a part of the kingdom of Sweden from 1154 to 1809; from 1909 it was an autonomous Grand Dachy connected with Russia up to December 6, 1917, when Finland declared Its independence, which was acknowledged by all the Powers including Soviet Russia. It became a republic in 1919. The legislative power of the country is vested in the Diet and the President. The highest executive power is held by the President chosen for a period of 6 years. The President for the current period. March 1, 1950, to March 1, 1956, is Juho Kusti Paasikivi who has been in office since March 11, 1946.

The Diet, composed of 200 members, is elected by universal suffrage. The number of seats of the different parties in the Diet elected in 1954 are as follows: Social Democrats 54, Agrarians 53, People's Democrats 43, Conservatives 24, Swedish Party 13, Finnish People's Party (former Liberal Party) 13.

## 2. LAND

THE AREA is 337,009 square kilometres (Great Britain's area is $245,000 \mathrm{sq} . \mathrm{km}$ and Italy's area $301,000 \mathrm{sq} . \mathrm{km}$ ). Of the total area $9.4 \%$ are inland waters. On an average $13.9 \%$ of the land in the South of Finland is cultivated (1950), $1.9 \%$ in the North, $8.0 \%$ of the whole land. Of the land area 21.8 mill. ha ( 53.9 mill. acres) or $71.6 \%$ are covered by forests.

## 3. POPULATION

NUMBER OF INHABITANTS (1954): 4.2 millions. Sweden (1954) 7.2, Switzerland (1954) 4.8, Denmark (1953) 4.4 and Norway (1953) 3.4 millions.

DENSITY OF POPULATION (1954): In South Finland 23.5, in North Finland 3.7 and in the whole country an average of 13.8 inhabitants to the square kilometre.

DISTRIBOTION (1954): $66.2 \%$ of the population inhabit the country, 33.8 \% the towns and market towns. The largest towns are (1954): Helsinki (Helsingfors), the capital, 396,300 inhabitants, Turku (Åbo) 107,500, Tampere (Tammerfors) 107,600.

OCCUPATION (1950): Agriculture and forestry $42 \%$, industry $29 \%$, commerce $7 \%$, transport and communication $0 \%$, services $9 \%$, other economically actlve persons $1 \%$, economically inactive persons $6 \%$.

LANGUAGE (1950): Finnish speaking $91.1 \%$, Swedish speaking $8.6 \%$, others $0.3 \%$.
edUCATION (1953): Practically all persons over 15 years of age are literate. There are three universities (the oldest founded in 1640) and 12 colleges of unlversity standard.

INCREASE OF POPULATION (1953): Births $21.9 \%$, deaths $9.6 \%$ increase $11.6 \%$. Deaths in France (1953) $13.0 \%$ and in Great Britain (1953) $11.4 \%$.

## 4. TRADE AND COMMUNICATIONS

NATIONAL INCOME (1953, in thousand million marks): Gross national income at market price 805. Net national product at factor cost, by origin: agriculture 81 ( $13 \%$ ), forestry and fishing 81 ( $10 \%$ ), manofacturing 105 ( $32 \%$ ), construction $60(10 \%)$, transport and communications 41 ( $7 \%$ ), commerce, banking and insurance 77 ( $13 \%$ ), public activities 59 ( $10 \%$ ), other services 34 (5 \%), total 608. Volume index 122 (1948 $=100$ ).

FOREST RESOURCES (1951-1953): The growing stock comprised 1,491 million of solid cu. m incl. bark ( 52,660 million cu. ft), of which pine $43.7 \%$ and spruce $35.7 \%$, the rest $20.6 \%$ being leaf-trees, chiefly birch. Of the growing stock, 10,900 million cu. ft, $58.0 \%$ of them pines, was up to the standard required for logs (minimum for sawmill logs $18^{\prime} \times 6^{\prime \prime}$ and for veneer logs $18^{\prime} \times 7^{\prime \prime}$ ). The annual growth is 46 million of solid cu. m green wood excl. bark ( $1,620 \mathrm{mill}$. $\mathrm{cu} . \mathrm{ft}$ ). The
total removal in 1954 calculated according to the use of wood was 45 million cu. $m$ ( 1,589 million cu. ft). In the years 1923 to 1938 in the then area of the country, it averaged 41 million cu. m ( 1,448 million cu. ft ) per year, the corresponding yearly growth being 46 million cu. m ( 1,620 million cu. ft ).

AGRICULTURE (1950): Cultivated land 2.5 million hectares, divided as follows: area under cultivation under 10 hectares $41.2 \%, 10-50$ ha $53.6 \%, 50-100$ ha $3.6 \%$, over 100 ha $1.6 \%$. Cultivated land (1053) was divided between the different kinds of crops as follows: $43.4 \%$ hay, $7.7 \%$ temporary grassland for grazing, $19.0 \%$ oats, $5.0 \%$ wheat, $3.7 \%$ rye, $6.7 \%$ barley, $3.7 \%$ potatoes, $10.8 \%$ others. Dairy units in operation in 1953 amounted to 459.

OWNERSHIP OF LAND (1950): The land area was distributed among different classes of owners approximately as follows: private $56.9 \%$, State $35.0 \%$, joint stock companies etc. $6.4 \%$, communities $1.7 \%$.

INDUSTRY (1952): Number of industrial concerns 5,994, workpeople 270,453 , gross value of products of industry 508,355 million marks.

LENGTH OF RAILWAYS (1954): $5,046 \mathrm{~km}$, of which $4,859 \mathrm{~km}$ State rallways and 187 km private. The gauge is in general 1.524 m .

MERCHANT FLEET (1. 4. 1955): Steamers 319 (422,700 gross reg. tons), motor vessels 149 ( 294,238 gross reg. tons), sailing vessels with auxiliary engines 120 ( 11,777 gross reg. tons). Total 688 ( 728,805 gross reg. tons).

## 5. FINANCE AND BANKING

CURRENCY. Since 1860 Finland has its own monetary system. From 1877 up to 1914 the currency maintained its stable gold value, and after the disturbances caused by the war a gold standard was again introduced from January 1, 1926. The unit currency is the mark (Finnish markkas = $\mathbf{1 0 0}$ penniä). Since October 12, 1931, the redemption of bank notes in gold is, however, suspended. In 1948 Finland joined the International Monetary Fund and on June 27, 1951, the official par value of the mark was established at 230 marks per one $U$. $S$. dollar, the selling rate of the Bank of Finland being 231 marks and its buying rate 229 marks.

STATE FINANCES. According to the finance accounts for 1954 the State revenue was 215,580 million marks, of which 194,302 million marks were current revenue, and State expenditure 213,663 million marks, of which 143,897 million marks were current expenditure.

MUNICIPAL FINANCES. According to the finance accounts for 1052 expenditure amounted to 98,483 million marks. Total revenue was 100,367 million marks, of which income from taxation 57,395 million marks. The municipal income tax (non-progressive) averaged $10.9 \%$ of the ratepayers income.

THE BANK OF ISSUE. The Bank of Finland (founded in 1811) is a State Bank. Its head office is in Helsinki (Helsingfors) with branches in Turku (Abo), Pori (Björneborg), Vasaa (Vasa), Oulu (Uleåborg), Kuopio, Joensuu, Mikkeli (S:t Michel), Tampere (Tammerfors), Hämeenlinna (Tavastehus), Jyväskylä, Kotka and Lahti.

THE COMMERCIAL BANKS (1955): Number 6, possess 520 offices, where all kinds of banking business is transacted. There is one banking establishment per 8,200 inhabitants.

The largest banks are Kansallis-Osake-Pankki, Oy Pohjoismaiden Yhdyspankki - Ab Nordiska Föreningsbanken and Helsingin Osakepankki - Helsingfors Aktieoank, all with head offices in the capital.

OTHER BANKS (1955): Mortgage Banks 5, Savings banks 421, Co-operative Credit Societies 584 and a Central Bank for the latter.

# PUBLIC FINANCES IN 1954 

BY<br>HEIKKI VALVANNE, MAG. PHIL.<br>FELLOW OF THE BANK OF FINLAND INSTITUTE FOR ECONOMIC RESEARCH

## BUDGET PLANS AND FISCAL POLICY

At the beginning of 1954 the outlook for State finances was uncertain. The fourth Kekkonen ministry had drawn up budget estimates in September of the previous year with a radically reduced total of only 151,922 mill. marks. But the Government fell in November, and the discussion of the changes proposed by its successor, the Tuomioja ministry, was so protracted that the regular budget for 1954 was not passed until the middle of March 1954. The total of this budget was 183,144 mill. marks, which was also considerably below the level of expenditure in both 1952 and 1953. As a matter of fact, owing to the change of Government, various items of expenditure had to be omitted from the budget for technical reasons and deferred for inclusion in a supplementary budget. As the budget balanced and its estimates of revenue did not appear to be very ,"cautious", much anxiety was naturally felt as to how these expected increases in grants could be financed. This anxiety was all the greater in that the course of the State finances did not seem to be at all promising in the opening months of 1954 , due, among at other things, to the large expenditure on unemployment. As will be seen in the first diagram, which shows the difference between revenue (excluding loans) and expenditure (excluding redemptions) from the beginning of the year, the relation of revenue to expenditure was appreciably more unfavour-
able at the beginning of the year than it had been in the first months of 1953.

In the middle of June, two supplementary budgets were introduced, in which additional grants were made to a total of 21,084 mill. marks. The majority of them, amounting to 11,000 million, were devoted to unemployment relief, while the increase in subsidies amounted to 5,127 million. The former grants did not, however, represent fresh expenditure at this stage, but merely the formal approval of spending already done in the winter and spring.

Little revenue was included in the supplementary budgets, but by that time the prospects of State finances had improved considerably. During the spring, the country's economic activity had grown very considerably and as taxation revenue is in the main highly sensitive to fluctuations in activity, such income had begun to grow to an increasingly great extent. On the other hand, the Government had made great efforts to restrict the spending by State departments, and this had the primary effect of decreasing considerably the stocks of State enterprises and extra-budgetary funds. As the diagram shows, the excess of revenue over expenditure in the first half of the year amounted to fully 3,900 mill. marks, whereas in the corresponding period of the previous year there had been an excess of expenditure of 6,700 million.

In May, the Tuomioja ministry had been replaced by the Törngren ministry; the

State finances then appeared to be progressing, continuously and without increases in tax rates, towards a growing surplus. Such a development in State finances could, in view of the situation at that time, be considered proper, for economic activity continued to grow during the summer; the large increase in foreign exchange reserves, in particular, began to evidence the need for counter-measures in order to prevent too great an abundance of money.

In the autumn of 1954, however, there occurred a crisis, the consequences of which greatly affected the subsequent course of State finances. The cost of living index (October $1951=100$ ), which had stood at almost exactly 104 points, threatened to rise above the 105 limit, and this would have meant a general rise in index-tied wages. After difficult negotiations, which also led to a change of Government in October, the fifth Kekkonen ministry decided to lower the index by means of financial policy, that is to say by "buying points". This was effected at the beginning of November by raising subsidies and releasing textiles from the sales tax, to mention the two principal measures. The additional grants for 1954, necessitated by the ,,points purchases", were included in a supplementary budget which was finally passed at the end of December. The total of this supplementary budget
amounted to 10,543 mill. marks, of which 4,594 million represented the increase in subsidies.

These very radical „points purchases" did not affect with full force the pattern of State revenue and expenditure until 1955, but during November and December 1954 they did occasion Government increases in expenditure and decreases in revenue amounting in total to several thousand million marks. Thus, State finances did not develop during the latter half of the year in the manner promised by their development in the early part of the year. As the diagram shows, the excess of revenue for July-December was, broadly speaking, the same as for the corresponding period of 1953.

The combined total of expenditure in the regular and supplementary budgets for 1954 amounted to 214,788 mill. marks and the corresponding total of revenue to 207,159 million. According to the finance accounts for 1954, expenditure did in fact amount to 213,663 mill. marks and revenue to 215,569 million.

Nevertheless it is difficult to perceive the actual level of revenue and expenditure or its course of development from these totals, as the figures are greatly influenced on the one hand by budget tactics, and on the other by the special methods of Government accountancy that have been referred to in previous articles on State finances published in this Bulletin. In dealing below with revenue and expenditure for 1954, ,,adjusted" figures are employed, calculated on a payment basis and taking account both of payments included in the budget and extrabudgetary payments.

Before proceeding to a detailed study of State revenue and expenditure, their annual rate on the basis of the ,,adjusted" figures needs brief examination. This is illustrated by the second diagram, which shows revenue (excluding loans) and expenditure (excluding redemptions) and the difference between them. The curves represent 12 -month totals, each total being plotted to the last month of the period. For the sake of comparison, the diagram has been extended to begin with December 1951 and end with July 1955, figures for the latter month being available at the time of writing.

The diagram shows that at the beginning of 1954 the course of State revenue did indeed appear to be very disturbing. The annual rate of revenue had been decreasing for a very long time and had touched bottom in February 1954 at 192,800 million marks. But in March-September there was a very steep rise due to the growth of taxation revenue and to the reduction of stocks already mentioned. In September a peak of 215,000 million marks was reached. At the turn of the year, however, revenue was again diminishing. As far as expenditure was concerned there were no such great fluctuations, as their level had risen fairly evenly.

In this connection, some remarks may be appropriate on the course of development in 1955. The level of revenue sank considerably during the second quarter of this year, but has since risen very much - and seems likely to rise still further. The course of expenditure, however, merits greater attention. Since the beginning of the second quarter, it has risen very steeply - mainly owing to the increased subsidies - and was at a record level of 214,500 mill. marks in July 1955. A continued rise is to be anticipated.

A study of the diagram shows that a de-
tailed description of the volume of revenue and expenditure for the calendar year 1954 cannot provide a very accurate picture of the recent course of State finances. Actually, the year 1954 embraces three separate periods of development: the first two months were a continuation of the deficit policy that had lasted throughout the previous year, the next seven months were a period of a large surplus, and the concluding months of the year the start of a period of excess in expenditure, this excess growing at an increasing rate in 1955. This should be borne in mind, when examining the calculations of State finances for 1954 given below.

## A REVIEW OF THE YEAR

In the accompanying table the total State revenue and expenditure for 1954 and 1953 are given. With some exceptions ${ }^{1}$ ) the calculations are made in the same way as the monthly calculations in table 22 of the statistical section of this Bulletin.

According to the table, revenue (excluding loans) amounted to 213,063 mill. marks in 1954, or 16,051 million more than in the previous year. Expenditure (excluding redemptions) amounted to 204,730 mill. marks, the rise being 5,995 million. The excess of revenue was thus 8,333 mill. marks as against an excess of expenditure of 1,721 million in 1953. The relation between annual revenue and expenditure had thus improved by 10,054 mill. marks during 1954. If loans and redemptions are included, the overall surplus amounted to 10,170 million marks, as compared with a deficit of 3,378 million a year earlier. The relation between the total revenue and the total expenditure for 1954 thus represented an improvement of 13,548 mill. marks on 1953.

## Revenue

The vigorous growth of State revenue was caused to a large extent by the increase in taxation revenue. All the taxes given in the table increased with the exception of income and property tax and the excise duty on coffee. The decrease in the former was due

[^4]STATE REVENUE AND EXPENDITURE
(Adjusted figures)

| Revenue | 1954 | 1953 | Expenditure | 1954 | 1953 |

|  |  |  |  | +10170 | -3378 |
|  | 224306 | 200650 |  | 224306 | 200650 |

in the main to purely technical causes, as for example the fact that there was speeding up of advance remittances to the communes of communal taxes previously withheld. To a small extent, the falling off was also due to tax rates having been lowered for individuals. The lower yield of the coffee tax was simply due to the fact that the whole tax had been abolished in March 1954.

Expressed in terms of marks, the largest increase occurred in the yield of the sales tax. Half of the increase was due to the development of home trade and half to the increase in imports. The latter fact also explains the increase in the yield of import duties. The increased revenue from the Alcohol Monopoly was a direct consequence of the larger sales of liquor.

| SHORT-TERM FINANCI <br> (Adjusted figures) | $\begin{array}{ll}\text { NG } \\ \\ 1954 & 1953\end{array}$ |
| :---: | :---: |
| Short-term credit from private | Mill. mk |
| credit institutions (iner. + ) | $2,855+3,355$ |
| Private funds (incr. + ) | $350+272$ |
| Net debt to the Bank of Finland (incr. .+) | $8,143-439$ |
| Short-term debt to the Post Of- |  |
| fice Savings Bank (incr. +) | 1,669 - 3,138 |
| Cash holdings (incr. -) | $491+3,328$ |
| Surpius (-) or Deficit (+) - | 10,170 $+3,378$ |

Total taxes amounted to 185,749 mill. marks or 21.7 per cent of the gross national income, at market prices. As in 1953 the corresponding ratio was 22.2 per cent, the burden of taxation cannot be held to have changed to any particular extent.

The growth of State revenue was also due, in addition to the increase in taxation revenue, just as much to the exceptionally heavy reduction of stocks, which figures in the table as capital revenue. The reduction of the stocks of extra-budgetary funds and State enterprises amounted in all to 8,059 million marks, whereas one year previously it was only 1,640 million. This large decrease was mainly due to sales from the State Granary and to the deliberate reduction of fuel stocks of the railways.

## Expenditure

As regards current expenditure some exceptional items are noticeable which explain the greater part of its considerable growth. The greatest increase is the rise in subsidies, which was, of course, caused by the increases introduced at the beginning of November 1954, as already mentioned. Of the individual subsidies, 4,401 mill. marks were employed in 1954 ( 4,663 million in 1953) for lowering the cost of artificial fertilizers and distributing them free of charge; 2,193 (-) million to provide compensation for the price reduction of dairy produce; 2,152 (814) million for export premiums on butter and cheese, and, in November and December, for compensating price differences on butter stocks; 1,133 (-) million for subsidising the production of beet sugar; and 1,036 (795) million for allowances for the transport and distribution of milk. The partial reimbursement of the export tax imposed in 1951, the peak year for exports, was an exceptional item of
expenditure, 4,054 million marks. It should be mentioned that the growth of national pensions payments transferred to the National Pensions Fund was entirely due to an alteration of the dates of payment.

Efforts were made in 1954 considerably to reduce Government real investments but owing to the heavy expenditure on unemployment the eventual reduction proved to be a minor one. Of the investments in State enterprises, forests and landed property, the most substantial share fell to railway construction, $8,074(8,802)$ mill. marks, of which $3,084(2,204)$ million were financed out of unemployment funds. The major proportion of the expenditure on roads and waterways was occasioned by the extensive unemployment relief work.

A truly remarkable reduction occurred in the granting of Government loans, which had grown so much in recent years. The reduction was effected principally in loans granted by the Settlement Fund. On the contrary, the amount of housing loans at low rates of interest, the Arava loans, increased slightly to $7,889(7,409)$ mill. marks. Employment loans to the amount of 3,171 $(3,234)$ million marks were granted.

## Borrowing, Cash Transactions and the Public Debt

Owing to the large redemptions falling due in 1954 the Government considerably increased its borrowing and succeeded in the selling of bonds to the extent of 11,242 mill. marks. Of these, 3,874 million consisted of a loan at a varying rate of interest, intended mainly for financial institutions; 3,500 million of a loan floated for converting the Second Indemnity Loan that fell due in August; 2,005 million of a new Post Office Savings Bank loan; and 1,202 million of premium bond loans sold to the public. Borrowing from abroad was negligible. As regards the redemption of debt, two large internal loans matured in 1954, that is to say the 5 per cent loan of 1944 for 3,000 mill. marks and the Post Office Savings Bank loan of 1949 for 2,000 million. It will be seen from the table above that the Government employed 2,855 million marks of its surplus during the year for redeeming short-term credits obtained in the previous year from private financial institutions.

A table illustrating the Public Debt is given below, which is slightly more exact than and different in analysis from, table 21 in

| PUBLIC DEBT ${ }^{1}$ ) (Adjusted figures) |  | ${ }_{\mathrm{mk}} 195$ |
| :---: | :---: | :---: |
| Ordinary loans | 36,124 | 31,300 |
| Short-term credit from private credit institutions .............. | 500 | 3,355 |
| Cash debt (net) | 4,329 | 11,294 |
| Debt to the Bank of Finland (net) | 6,290 | 14,433 |
| Short-term debt to the Post Office Savings Bank <br> less: Cash holdings | 18,612 $\mathbf{2 0 , 5 7 3}$ | $\begin{array}{r} 16,943 \\ -20,082 \end{array}$ |
| Internal Debt | 0,953 | 45,949 |
| Foreign Debt | 53,577 | 56,573 |
| Total Debt | 94,530 | 102,522 |
| Indemnity bonds and similar obligations (not included above): nominal value $\qquad$ | 9,487 |  |
| redemption value | 17,774 | 28,060 |
| Total debt including the redemption value of indemnity bonds and similar obligations $\qquad$ | 112,304 | 130,58 |

1) Differs from table 21 in the statistical section, in that the foreign debt shown here does not include the promissory notes given to the IMF, 8,475 mill. marks, and that the indemnity bonds and similar obligations, which are here given distinct from the totals, include Holding certificates.
the statistical section of this Bulletin. The reduction of the short-term credit and of the cash debt (net) was considerably larger than was the increase in ordinary loans, so that the internal debt - excluding indemnity bonds and similar obligations - decreased by almost exactly 5,000 mill. marks. As the foreign debt was also reduced, the total Public Debt, so calculated, decreased from the 1953 figure by 7,992 million.

In a wider sense, the Public Debt should also include the indemnity bonds and similar obligations incurred without recompense. In the table their amount is given at both nominal and redemption values. The latter value is obtained by increasing the nominal value of bonds of the Second Indemnity Loan in the same proportion in which the wholesale price index for Finnish goods (to which the redemption of these bonds is linked) rose from the end of 1944 to the end of 1954 (1953). If these obligations are added at their redemption value to the Public Debt, the amount of the Debt totalled fully 112,000 mill. marks at the end of 1954 or over 18,000 million less than at the end of 1953.

## ITEMS

Changes in the Statement of the Bank of Finland. The statement of the Bank of Finland has been remodelled so that it may be in accordance with current usage. Headings have been altered, the accounts re-grouped, and less important accounts have been combined. The principal changes are described below.

1) Previously, the balance sheet showed the net amounts of foreign currency, liabilities having been deducted from assets. Now, gross figures are presented. The currencies of which there is a net credit balance are totalled under Foreign Exchange, among the assets, while the currencies of which there is a net indebtedness appear under Foreign Exchange accounts, among the short-term liabilities.
2) Previously, foreign exchange did not include the exchange on clearing accounts, nor were net credit balances on clearing accounts included in the note cover. In the course of the years, however, as new payments agreements have been concluded, numerous transfers have been made between the ,freeexchange" accounts and the clearing accounts, and it is often difficult to determine to which group a currency should belong according to its degree of „hardness" and convertibility from the point of view of Finland. Now, therefore, all currency accounts of the Bank are combined.
3) Previously, the foreign clearing accounts were credited with the exchange - originating in prepayments for exports - which the Bank bought from Finnish exporters although
that exchange was not immediately available to the Bank. Now, these assets are included in Sundry assets.
4) The majority of the bills previously reported as Foreign bills consist of bills which Finnish firms have given to cover long-term foreign loans received with the Bank acting as intermediary. They should therefore be regarded as domestic advances and as such cannot be included in the ordinary note cover as was done earlier. Now, they are included in the supplementary cover and appear under Inland bills discounted, in foreign currency.
5) Previously, Advances on current account and Other current accounts were shown separately and net. Now, gross figures are given, and the items are combined under Cheque accounts (assets) and Other cheque accounts (liabilities).
6) The statement of the note issue has been simplified in that the part of the note reserve which is dependent on supplementary cover is no longer reported. As has previously been the case, however, the right of note issue consists of an ordinary cover and a supplementary cover (the maximum of the latter being 50,000 mill. marks according to the Regulations), while the notes in circulation, together with the short-term liabilities and unused cheque credits form the used amount of issue.

In the statistical section of this Bulletin, from now on will table 1-2 show statement of the Bank in full without accounts having been combined as hitherto. For the sake of comparison the statement for the corresponding month of 1954 has been recalculated in accordance with the new principles. Tables 3 to 6 will not be changed before the end of the year.

The headings in the new statement are explained below, and a note in each case indicates the comparability with a heading in the old statement and in the contracted statement previously published in the Bulletin.

## ASSETS

## Ordinary note cover

Gold $=$ coin and bullion. - Unchanged
Foreign exhange $=$ balances in foreign currency, including foreign clearing accounts, ( $=$ nostro accounts) + matured foreign
bonds and coupons in foreign currency + foreign money. - Not comparable with any heading in the old statement or the Bulletin.
Foreign bills $=$ bills in foreign currency payable abroad by foreign firms. - This -heading plus Inland bills discounted, in foreign currency, correspond to Foreign bills in the old statement.
Foreign bonds $=$ bonds in foreign currency issued by a foreign government, city, bank, etc. - Unchanged.

## Supplementary note cover

Inland bills discounted
In foreign currency $=$ bills covering foreign loans received by Finnish firms with the Bank of Finland acting as intermediary. - See note to Foreign bills above.
In Finnish currency $=$ directly discounted internal bills. - Corresponds to Inland Bills in the old statement. In the Bulletin, the heading Inland Bills included rediscounts.
Rediscounted bills $=$ bills of the commercial banks and the Central Bank of the Co-operative Credit Societies rediscounted by the Bank of Finland. - Unchanged. In the Bulletin, these bills were included in Inland bills.
Treasury bond loan $=$ loan issued in 1953 to consolidate Treasury bills, 20,000 million marks having been drawn of the 25,000 million authorised. - Unchanged.
Other assets
Finnish bonds $=$ bonds in Finnish currency + Finnish bonds in foreign currency. These two items were reported separately in the old statement.
Cheque accounts $=$ Advances on current accounts in the old statement.
Finnish coin - Unchanged in comparison with old statement. In the Bulletin, this item was included in Sundry assets.
Other claims $=$ prepayments for exports + loans on security + advances on documentary credits + matured bonds and coupons in Finnish currency + Treasury bill covering certain IMF and IBRD accounts + sundry accounts. - Not comparable with any heading in the old statement or the Bulletin.

## LIABILITIES

Notes in circulation - Unchanged.
Short-term liabilities.
Foreign exchange accounts $=$ debit balances on foreign currency accounts, including foreign clearing accounts, ( $=$ nostro accounts). - Not comparable with any heading in the old statement or the Bulletin.
Mark accounts of holders abroad = loro accounts + mark accounts of the IMF and IBRD. - These items were previously reported separately.
Cheque account of the Treasury $=$ Current account of the Treasury in the old statement.
Cheque accounts of banks $=$ current accounts of the commercial banks and the Central Bank of the Co-operative Credit Societies less banker's cheques + cash reserve accounts of these banks. - These items were previously reported separately, the first mentioned under Current accounts of the commercial banks.
Other cheque accounts $=$ other current accounts + deposits against import licences. - Corresponds to Other current accounts in the old statement.
Other short-term liabilities $=$ bank-postbills + bills collected + sundry accounts. - These items were previously reported separately in the statement but were combined under Sundry accounts in the Bulletin.
Long-term liabilities
Foreign $=$ foreign debt in foreign currency. - Corresponds to Foreign debt in the old statement.
Finnish $=$ internal obligations in foreign or Finnish currency. - Corresponds to Liabilities in foreign currency in the old statement.
Equalization accounts. - Unchanged.
The items under the new group heading Bank's own capital are unchanged, except that Earnings less expenses have been diminished by an amount corresponding to Furniture, which was previously reported separately among assets but is now written off.

Budget Proposal for 1956. On September 9, the Government introduced its budget for the ensuing calendar year. The table below
shows the principal categories of revenue and expenditure compared with the corresponding totals so far authorised for 1955 (the original budget plus two supplementary budgets) and the totals of the finance accounts for 1954.

In the estimate for 1956, expenditure amounts to 205,879 mill. marks only, or almost exactly 25,000 million less than the total amount so far authorised for the current year. The decrease is partly due to the fact that the last instalment of the II Indemnity Loan was paid this year, 10,375 mill. marks having been appropriated for the purpose of this loan. Further, unemployment grants, for which 11,700 million was reserved for 1955, have been reduced to 6,500 million. More substantial still is the reduction of grants for subsidies, viz. from 25,170 mill. marks to 17,149 million. This budget estimate does not take into account the increase in civil service salaries which is to be effected by the forthcoming III Supplementary Budget for 1955.

Among revenue items, the Government has proposed some changes in the income and property tax. The taxation of individuals belonging to the lower income classes will be relieved. Company taxes, on the other hand, will be retroactively raised for 1955 - as they were for 1954 - to 38 per cent of income and 1 per cent of property. On this basis, the income and property tax is estimated to yield 56,000 mill. marks in 1956.

Government borrowing. On August 15, the Government issued a second Post Office Savings Bank loan of 250 mill. marks, which was immediately sold to that bank. The loan will run for 10 years and its other conditions are the same as those for the first Post

| Loans issued in 1955 | Date of issue |  | Sold by Sept. 30 Mill. mk |
| :---: | :---: | :---: | :---: |
| 1. Bond loan with a varying rate of interest | March | 3,000 | 1,617 |
| 2. Post Office Savings Bank loan | March 1 | 1,800 | 1,800 |
| 3. National Pensions Fund loan | March 1 | 600 | 600 |
| 4. $61 / 2 \%$ bond loan | April 1 | 1,500 | 966 |
| 5. $5 \%$ bond loan | May 2 | 1,000 | 592 |
| 6. II $5 \%$ bond loan | August 1 | 3,500 | 1,180 |
| 7. II Post Office Savings Bank loan | August 15 | 250 | 250 |
|  |  | 11,650 | 7,005 |

Office Savings Bank loan, which was issued on March 1.

On September 22, the Government raised the nominal amount of the 1955 loan, with a varying rate of interest, to 3,000 mill. marks. The original nominal amount was 1,000 million, but on May 18 it was raised to 1,500 million. - On the same day, September 22, the nominal amount of the $61 / 2$ per cent loan of 1955 was raised from 1,000 to 1,500 mill. marks.

The list above shows the Government loans issued this year and also the amount placed up till the end of September. All loans are provided with an index clause.

Of the 1954 loans, the Road Improvement Loan is the only one, bonds of which have been sold this year; its period of issue terminates at the end of 1956. During the first nine months of the current year such bonds have been sold for 245 mill. marks. Thus, in all, Government bonds to a total value of 7,250 million have been disposed of this year.

The issue before the end of the year of a third Post Office Savings Bank loan of 250 mill. marks has been discussed. Its conditions are proposed to be the same as for the first two loans.

Cash reserve agreement renewed. The Bank of Finland and the other credit institutions have agreed to continue the application of the cash reserve system introduced in February 1955 to the end of January 1956. For details, see Market Review in this issue of the Bulletin.

State timber auctions. Prices at the timber auctions held towards the end of September were about 14 per cent lower than was the case at last year's auctions. A total of 12.09 m . cu ft was sold at an average price of 193.4 mk per cu ft . These State auctions
are of considerable importance in the development of timber prices.

The publications of the Bank of Finland. The thirty-fifth issue of the Year Book has been published in Finnish, Swedish and English. It contains, as usual, a comprehensive statistical section (with headings and other letterpress in French), a review of the economic conditions in the country and also a review of the activity of the Bank of Finland in 1954. The Year Book is edited by the Bank of Finland Institute for Economic Research.

In series B of the „Suomen Pankin taloustieteellisen tutkimuslaitoksen julkaisuja" (Publications issued by the Bank of Finland Institute for Economic Research) the following new publications have appeared:
15. Nils Meinander, Ränteeffekten (The Effect of the Rate of Interest). Helsingfors 1955, 310 p. Summary in English.
16. Veikko Halme, Vienti Suomen suhdannetekijänä vuosina 1870-1939 (Exports as a Factor in the Trade Cycles of Finland in 1870-1939). Helsinki 1955, 364 p. Texts of diagrams and a summary in English.

Economic Survey. The customary economic review, attached as a supplement to the Budget Proposal for 1956, scrutinises the course of national income up to 1954, the economic conditions in 1955 and the State economy. It also contains a rough national budget estimate for 1955 and an outline of the factors expected to influence the economy in 1956. The Survey has been compiled by the Economic Department of the Ministry of Finance. It has also been published separately as the „Economic Survey of Finland". The English edition is available at the Press Bureau of the Ministry for Foreign Affairs and at Finnish Embassies and Legations abroad and at Finnish book sellers.

## THE BANK OF FINLAND MONTHLY BULLETIN

is sent free of charge to anyone wishing to receive it. Finnish booksellers are, however, allowed to sell it at a price of 20 marks per copy. Should extracts from the Bulletin be printed, the source should be stated. Correspondence with regard to the Bulletin should be addressed to the Bank of Finland Institute for Economic Research, Melsinki, Finland.

[^0]:    ${ }^{1}$ ) The changes in the statement are explained on page 25.

[^1]:    * Preliminary figures subject to minor alterations.

[^2]:    ${ }^{1}$ ) Commercial exports. $-{ }^{2}$ ) 1 standard sawn timber $=4.672 \mathrm{~m}^{2}$.

    * Prellminary figures aubject to minor alterations

[^3]:    Calculated by the susi Suomis. The figures represent about $50 \%$ of the turnover of all wholesslers in Finland.

[^4]:    1) Expenditure in indemnity bonds and Holding certificates (excl. interest) is calculated here as current expenditure and redemption of Emergency Settlement notes and Land Expropriation notes as capital expenditure. In table 22, both these categories are classed as redemption.
