

## THE FINNISH MARKET REVIEW.

## THE MONEY MARKET.

During 1936 the development of the money market in Finland was characterised by a general easiness and a marked increase in bank deposits. This phenomenon is dealt with in greater detail in the survey of the economic position of the country on page 30 .

In the Joint Stock banks for instance, total deposits due to the public grew last December, when the half-yearly interest was added to the capital, by 98.2 million marks as against 96.2 millions in 1935. During the whole year, however, they increased as much as from $7,148.6$ to $7,673.7$ million marks or by 525.1 million marks, the corresponding increase in 1935 being 240.1 millions. The deposits due to other credit institutions have also increased during 1936, bringing the grand total of deposits in the Joint Stock banks up to 8,598.1 million marks at the end of the year. Credits granted by the banks on the other hand displayed a different tendency. Against a slight increase in 1935 of 17.8 millions, a decrease of 57.2 million marks in credits granted to the public could be observed in 1936. All credits together decreased still more or from 7,448.6 at the beginning to $7,372.9$ million marks at the end of the year under review. Thus, at the end of 1936 the excess of deposits over credits reached $1,225.2$ million marks, the largest sum ever recorded in this respect. It should, however, not be forgotten that in 1936 the Finnish

Joint Stock banks increased their bond portfolio by over 400 million marks as compared to a corresponding figure of only about 100 millions during 1935.

The net foreign credit balances due to the Joint Stock banks decreased in December, 1936, by 66.9 million marks, as the banks continued to draw on their balances abroad and their foreign indebtedness also rose to some extent. The net credit balances of the Joint Stock banks at the end of 1936, nevertheless, amounted to 309.4 million marks as against 181.9 millions at the same date in the preceding year.

The Bank of Finland's credit balances with its foreign correspondents rose very considerably in December and at the end of the year, when they amounted to $1,491.6$ million marks, far exceeded the corresponding figures for the two previous years, viz., $1,266.9$ and $1,328.0$ million marks in 1935 and 1934 respectively. At the same time the Bank's gold holdings increased still more. The actual gold reserve reached 603.2 million marks at the end of December, 1936, whereas gold not included in the note cover amounted to 211.4 million marks. The foreign payment position of the Bank of Finland is consequently quite istrong at present. The amount of the ordinary note cover at the end of December was 138.2 million marks higher than a month and 355.9 million marks higher than a year earlier. As, however, liabilities payable on demand rose considerably, too, chiefly owing to the increase of the
note circulation, the cover percentage shows the following development: 83.7 per cent at the end of 1935, 77.3 per cent at the end of last November and 75.1 per cent at the end of 1936. The note reserve which pursued a similar course, amounted to 506.3 million marks at the end of dast year. In the third week of January, however, the notes outstanding are as a rule seasonally reduced. This year they went down from the peak of $1,630.1$ million marks at the beginning of the year to $1,516.3$ millions on January 23 rd and as the increase in the reserve of foreign currency more than outweighed the rise in other liabilities payable on demand during the first three weeks of January, the note reserve rose again to 530.4 million marks. - Following the customary seasonal development, the demand for credits at the Bank of Finland has become livelier of late. In December the credits granted grew by 54.6 million marks in 1936 as against a falling off of 26.6 millions during the same month in 1935. During the first three weeks in January, 1937, total home loans further increased from 949.5 to 963.3 million marks.

The tendency of prices is clearly rising. For last December the Finnish wholesale price index stood at 95 , a level at which it has not been since December, 1999. The rising tendency has now begun to make itself felt not only in wholesale but also in retail trade. The cost of living index was 86.1 in December, 1936, against 85.6 in November and 85.5 in December, 1935, if 1926 $=100$, and the sensitive consumption price index of the Bank of Finland which is based on July, 1931, rose to 108.5 on January 23 rd as compared to 107.5 and 107.4 respectively on an average in December and November last year.

## TRADE AND INDUSTRY.

As usual in December the turnover in foreign trade fell off to some extent in the last month of 1936. In anticipation of lower rates of duty some imports, especially the imports of coffee, were postponed until the following year. Total imports amounted to 573.6 million marks
as against 637.7 millions in the preceding month but only 445.4 million marks in December, 1935. Exports also shrank last December; at a total of 590.8 million marks, they fell short of the previous monthly amount by 71.4 millions, whereas in December, 1935, they amounted to 630.3 million marks. This year the surplus of exports in December was thus only 17.2 million marks as compared to 184.9 and 155.9 million marks in the two previous years. For the whole of 1936 there was, however, a surplus of exports of 871.7 million marks, the corresponding figures for 1935 and 1934 being 896.1 and $1,449.6$ million marks respectively. When comparing these figures it should, however, be borne in mind that according to the Finnish trade statistics imports do not only include merchandise but also bullion and specie. Consequently in 1936 the import value embraced gold imported to an amount of 158 million marks, whereas in 1935 such imports amounted to only 12 million marks and in 1934 they were quite insignificant.

Timber shipments during 1936 totalled $1,100,100$ standards as against $1,041,500$ standards in 1935. This quantity includes parcels sold for delivery during the preceding year, but not lifted 'by' the buyers, and the actual sales during last year amounted to about 992,000 standards. The ETEC-agreement has thus been fulfilled, as Finnish exporters of sawn timber undertook to ship no more than $1,005,000$ standards, excluding box boards, in 1936. During January, 1937, about 50,000 standards of sawn timber were disposed of and the total quantity sold by the end of that month corresponds to about two thirds of the total Finnish quota for shipment during the present year.

## THE LABOUR MARKET.

Since snow began to fall more generally towards the end of January, it bas been possible to start lumber work in most parts of the country. There is consequently an ample supply of employment at present.

## CONTENTS OF THE TABLES.

| December $\mid$ | 919 | 963 | 1140 | 1149 | 1382 | 1175 | 1810 | 1018 | $+5$ | December |

The index is calculated by the Research Office of the Ministry for Social Affairs according to monthly reports from 30 different centres. It is based on the cost of living for the first half of $1914=100$ and refers to the normal budget of a workman's family. The index for the total cost of living is the average of the weighted group indices.
36. - WHOLESALE PRICE INDEX.

| Month | Index for goods in the Finnish wholesale trade |  |  |  |  |  |  |  |  |  |  |  | Total indexforimported goods |  |  | $\begin{gathered} \text { Total index } \\ \text { for } \\ \text { exported goods } \end{gathered}$ |  |  | Month |

| $\overline{\text { Whole }}$ year | 90 | 90 | 92 | 73 | 76 | 79 | 93 | 93 | 94 | 93 | 93 | 93 | 86 | 86 | 89 | 80 | 74 | 86 | Whole year |

The index is calculated by the Central Statistical Office, and is based on the average prices for $1926=100$. The first group of indices refers to goods appearing in local wholesale trade in Finland, whereas the indices for imported and exported goods refer to the total quantities of goods imported or exported, including the movement of such goods that are in no way intended for wholesale trade in Finland. An indirect weighting has been applied, by means of which each class of goods is represented by the number of commodities corresponding to the calculated importance of this class in wholesale trade. The averages are arithmetical ones.
37. - INDEX OF WORKING HOURS IN INDUSTRY.

| Quarter | Branch of Industry |  |  |  |  |  |  |  | Total | Of which |  | Quarter |

## CERTALN PARTICULARS ABOUT FINLAND.

## 1. FORM OF GOVERNMENT.

Finland formed a part of the kingdom of Sweden from 1154 to 1809; from 1809 it was an autonomous Grand Duchy comnected with Russia up to December 6th, 1917, when Finland declared its independence, which was acknowledged by all the Powers including Soviet Russia. It became a republic in 1919. The legislative power of the country is vested in the Diet and the President. The highest executive power is held by the President chosen for a period of 6 years. The present President P. E. Svinhufvud is elected for the term March 1st, 1931, to March 1st, 1937.

The Diet, composed of 200 members, is elected by universal suffrage. The proportions of the different parties in the Diet elected in 1936 are as follows:

Number
Social-Democratie party . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 83
Agrarian party ...................... . . . . . . . . . . . . . . . . . . . . . . . . . 53

Unionist party . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 20
Patriotic National Movement's party .............................. 14
Progressive party ....................................................... 7
Small farmers' party
People's party

## 2. LAND.

THE AREA (excluding lake Laatokka) is 382,801 square kilometres $=147,761$ square miles (Great Britain's area is $89,047 \mathrm{sq} . \mathrm{m}$. and Italy's area 117,982 sq. m.). Of the total area $9.0 \%$ are inland waters. On an average $11.8 \%$ of the land in the South of Finland is cultivated, $1.1 \%$ in the North, $6.6 \%$ of the whole land. Of the land area 25.3 mill. ha ( 62.5 mill. acres) or $73.6 \%$ are covered by forests,

THE AVERAGF TEMPERATURE in the coldest month is in S. W. Finland - $5^{\circ}$ to - $6^{\circ} \mathrm{C}$., in Lappland - $15^{\circ} \mathrm{C}$. and during the warmest month $+15^{\circ}$ and $+13^{\circ}$ to $+14^{\circ} \mathrm{C}$. resp. The average temperature in Helsinki (Helsingfors) is $+4.6^{\circ}$ (in Osio $+5.4^{\circ}$, in Montreal $+5.4^{\circ}$, in Moscow $+3.6{ }^{\circ}$ ). The ground is covered by snow in the South for about 100 days, in Central Finland for 150 to 180 days, in Lappland about 210 days.

## 3. POPULATION.

NUMBER OF INHABITANTS (1935): 3.8 millions (of whom 0.2 million emigrants), Sweden (1935) 6.2, Switzerland (1935) 4.2, Denmark (1932) 3.6 and Norway (1933) 2.9 millions.

DENSITY OF POPULATION (1935): In South-Finland 18.6, in North-Finland 2.6 and in the whole country an average of 10.9 inhabitants to the square kilometre.

DISTBIBUTION (1935): 79.4 \% of the population inhabit the country, $20.6 \%$ the towns and urban districts. The largest towns are (1035): Helsinki (Helsingfors), the capital, 277,771 inhabitants, Vlipuri (Wiborg) 72,755, Turku (Ảbo) 09,953, Tampere (Tammerfors) 59,832.

OCCUPATION (1930): agriculture $59.6 \%$, industry and manual labour $16.8 \%$, commerce $4.3 \%$, transport $3.8 \%$, other occupations $15.5 \%$.

LANGUAGE (1930): Finnish speaKing $89.4 \%$, Swedish speaking $10.1 \%$, others $0.5 \%$.

RHLIGION (1935): Lutheran 96.1 \%, Greek-Orthodox $1.8 \%$ others $2.1 \%$.

EDUCATION (1930): Amongst persons over 15 years of age only $0.9 \%$ are illiterate. There are three universities founded in 1640, 1917 and 1920.

INCREASE OF POPULATION (1935): Births $18.5 \%$, deaths $12.0 \%$ (in France in $193315.8 \%$ and in England in $193312.3 \%$ \%o), natural increase $6.5 \%$.

## 4. TRADE AND COMMUNICATIONS.

FOREST RESOURCES. The growing stock of the forest is 1,620 million $\mathrm{m}^{8}$ ( 57,214 million cubic feet). The merchantable timber
(measuring 20 cm at breast height $=6 \mathrm{in}$. at a height of 18 ft .). a mounts to 1,557 million trees. Of this nomber pine is represented by $60.7 \%$, spruce by $28.1 \%$, the conifers thus constituting $88.8 \%$ or 1,383 million trees; leaftrees, mostly birch, $11.2 \%$ or 174 million trees. The annual increment is 44.4 million $\mathrm{m}^{3}(1,568$ million cub.ft.). The annual fellings according to earlier calculations are 40 million $\mathrm{m}^{3}$ ( 1,413 million curb. ft.). In North Finland the increment is much larger than the fellings, but in South Finland excess felling occurs locally.

AGRICULTURE (1935): Cultivated land 2.2 million hectars, divided as follows: area under cultivation $0.5-10$ hectars $33.4 \%$, $10-50$ ha $52.1 \%, 50-100$ ha $8.4 \%$, over $100 \mathrm{ha} 6.1 \%$. Cultivtated land is divided between the different kinds of crops as follows: $50.5 \%$ hay, 18.7 \% oats, $9.6 \%$ rye, $5.1 \%$ barley, $3.3 \%$ potatoes. $12.8 \%$ other. The number of dairies in 1935 amounted to 593.

OWNERSHIP OF LAND. The land area is distributed among different classes of owners approximately as follows: private $52.1 \%$, State $39.7 \%$, Joint Stock Companies $6.5 \%$, communities $1.7 \%$.

INDUSTRY (1935): Number of industrial concerns 3,917, hands 174,310 , gross value of products of industry 13,929 million marks.

LENGHT OF RAILWAYS (1936): $5,757 \mathrm{~km}$, of which 5,501 km State railways and 256 km private. The gauge is 1.524 m .

COMMERCIAT FLEET (1936): Steamships 533 (244, 933 reg. tons net), motor vessels 158 ( 16,788 reg. tons net), sailing ships 163 ( 46,887 reg. tons net). Total 854 ( 308,608 reg. tons net).

## 5. FINANCE AND BANKING.

CURRENCY. Since 1860 Flnland has its own monetary system. From 1877 up to the Great War the currency maintained its stable gold value and after the disturbances caused by the war Finland has again from January 1st, 1926, a gold standard. The unit of currency is the mark (Finnish smarkka) $=100$ pennia). According to the monetary law of December 21st, 1925, a gold coin of 100 marks' value shall contain $3^{15} / \mathrm{s}$ grams of fine gold. Since October 12th, 1931, the redemption of bank notes in gold is, however, suspended.

STATE FINANCES. According to the balance sheet for 1935 the State revenue was $4,559.3$ million marks of which $3,482.2$ million marks were current revenue, and State expenditure 4,533.4 million marks, of which $2,872.7$ million marks were current expenditure. The principal sources of revenue were as follows: State property and undertakings (net) 302.3, direct taxes 575.8, indirect taxes $1,880.0$, stamp duty 173.9 , charges 96.1 , interest and dividends 235.4 and capital revenue 1,077.1. The value of State property in 1922 is estimated at $11,150.6$ million marks. For Public Debt see table 19 in this issue.

MUNICIPAL FINANCES. According to the Bugdet for 1936 expenditure amounted to $1,444.2$ million marks. Income from taxation was calculated at 501.5 million marks, taxed income at 5,805.e million marks. The municipal income tax (non progressive) averaged 8.6 \% of the ratepayers' income.

THE BANK OF ISSUE. The Bank of Finland, (founded in 1811) is a State Bank. Its head-office is in Helsinki (Helsingfors); with branches in Turku (Abo), Pori (Bjorrneborg), Vaasa (Vasa), Oulu (Uleaborg), Kuopio, Joensun, Sortavala, Viipuri (Wiborg), Mikkeli (S:t Michel), Tampere (Tammerfors), Hameenlinna (Tavastehus), Jyväskylă and Kotka.

THE JOINT STOCK BANKS (1936): Number 9, possess 471 offices, where all kinds of banking business is transacted. Including, all banks, there is one banking establishment per 7,200 inhabitants.

The largest banks are: Kansallis-Osake-Pankki, Ab. Nordiska Forreningsbanken and Helsingfors Aktiebank, all with head offices in the capital.

OTHER BANKS (1935): Mortgage banks 6, Savings banks 482, Co-operative Credit Societies 1,299 and a Central Bank for the latter.

${ }^{1}$ ) Hrom the beginning of 1935 new series of fizures (see tables 7 and 8 in this Bulletin).

# A SURVEY OF THE ECONOMIC POSITION IN FINLAND IN 1936. 

BY<br>A. E. TUDEER, PR. D.<br>STATISTICIAN TO THE THE BANK OF FINLAND.

## INTRODUCTION.

The same rising tendency that marked the course of the world market last year, despite considerable inequalities and divergences between the different countries, was evident in the economic life of Finland. The features that characterised economic conditions in this country in 1936 were increased production, growing activity in foreign trade, a favourable balance of payments and a very easy money market, i. e., on the whole the same phenomena that had dominated the position in the previous years. During the course of last year some new characteristics were added, viz., a pronounced improvement in the timber market and a distinct tendency for prices to rise, a reflection of the same tendency in the world market.

In the following pages we deal with the most important aspects of economic life during the past year in so far as particulars are available. As usual, we have to content ourselves to some extent with preliminary figures, as final figures are not yet at our disposal in all spheres.

## PRICES.

During the earlier part of the year the level of prices in Finland remained practically unchanged, only a slight rise occurring in the index for exported goods. During the latter part of the year there was a more and more general rise as regards wholesale prices, while retail prices were in general not affected by the rise. The wholesale price index rose to 95 (1926 = 100) in December, 1936, as against 91 a year before, and the average index for the
whole of 1936 was 92 as compared with 90 in the last few years. The cost of living index, however, was practically at the same level as in 1935.

The differences in the course of prices in different spheres is illustrated according to thewholesale price indices in the diagram on page 28. It will be noted that the greatest rise in price occurred in the case of exported goods, the index for which was 23 points higher in December, 1936, than in December, 1935. The rise was common to most classes of such goods and particularly marked in the important case of timber. The general index for imported goods also rose considerably, viz., 10 points from December, 1935, to December, 1936. By this means the unfavourable situation, from the point of view of Finland's balance of trade, that has existed since 1931, has been altered by the prices for exported goods having attained the same level as the prices for imported goods. As the rise 'was appreciably smaller in the case of goods produced and consumed within the country than in the case of the two classes referred to, it is quite obvious that the tendency of prices, as already mentioned, is dependent on the rising price level in the world market.

## AGRICULTURE.

The harvest proved favourable in almost all parts of the country. Particularly good results are recorded for spring sowings, potatoes and meadow hay, while rye gave a slightly poorer yield than in the previous year. It should be noted especially that wheat growing continued to extend last year at a rapid pace. As the

tendency of prices for all kinds of grain was also favourable to producers, the value of the harvest, according to preliminary calculations, established a record of about 5,800 million marks. The increase over 1935 represents very nearly 700 million marks. The previous record was attained in 1932, when the value of the harvest was estimated at fully 5,300 million marks.

The price of milk, which is as a rule the Finnish farmers' principal source of pecuniary income, was on an average a few points lower last year than in 1935. It is also the case that the price for the produce of animal husbandry rose very slightly. The total index for agricultural produce averaged 77 last year as against 75 in 1935 and 70 in 1934. On the other hand, the price index for agricultural requisites rose from 90 to 92 and the index for wages from 85 to 91 , displaying a pronounced rising tendency towards the end of the year.

By this means the profits of actual agriculture were slightly reduced. However, it can be stated that the other source of farmers' income, the sale of timber and lumber work, did not flow as abundantly as last year. It is estimated that during the floating season of 19351936 the rural population obtained an income of 1,880 million marks from this source in comparison with 2,050 millions during the year before. As both timber prices and wages rose
very much last autumn and it is expected that lumber work will be carried out on a larger scale than in any previous year, the current season should establish a fresh record.

## INDUSTRY.

The great development of industrial production that had proceeded since the trough of the depression in 1931, continued in 1936. The volume index for January-September rose 13 points to $159(1926=100)$ and was thus close on 66 per cent higher than during the depression. Thanks to the rise in prices the increase in the value of production was even greater last year, the value index rising 16 points to 136 and exceeding the figure in 1931 by 72 per cent. Both the volume and value of industrial production were appreciably larger than during the previous boom, viz., the volume about 30 per cent and the value over 11 per cent higher than in the record year of 1928.

The increase in production during last year was largest in those branches of production that work for export to a preponderating extent. The volume of production in the timber industry was 25 per cent larger during the third quarter of the year than during the same period in 1935 and the increase in value amounted to 53 per cent thanks to the good state of the timber market. In the case of the paper industries the corresponding increase in

volume was 16 per cent and the increase in value 31 per cent. In the timber industry the increase in production was achieved without raising the capacity, but in the paper industries the productive capacity was also increased, chiefly in regard to the manufacture of cellulose. All the principal branches of industry, the products of which are sold mostly in Finland, also recorded higher production, although the increase was comparatively moderate. According to preliminary figures, the volume of production during the third quarter of last year, compared with the same quarter of 1935, recorded a rise of 15 per cent in the textile industry, 14 per cent in the leather and footwear industry, 11 per cent in the building materials industry, 9 per cent in the manufacture of foodstuffs and luxuries and 7 per cent in the metal and machinery industry.

## BUILLDING OPERATIONS.

Building was fairly lively, especially in the capital. In the course of the year 121 buildings were completed, their cubic contents amounting to $881,000 \mathrm{~m}^{3}$ and the number of new living rooms to 4,943 . As the corresponding figures for 1935 were 124 buildings, $940,000 \mathrm{~m}^{3}$ and 4,205 new living rooms, building operations do not seem to have increased since the previous year. If, however, we consider the number of buildings under construction at the end of the year, we find that it amounted to 129 at the
end of 1936 as against only 79 a year earlier. Besides, a considerably larger number of plans were approved during the concluding months of the year than in the previous year which indicates that activity is growing in this sphere.

## THE LABOUR MARKET.

During the year under review the labour market experienced a constant improvement. At the beginning of the year the number of unemployed was estimated at 17,800 as compared with 19,200 a year before and 41,000 two years previously. In January and February unemployment increased somewhat owing to the usual seasonal conditions and at the end of February the number of unemployed was about 20,600 . But then there was a great drop, so that the statistics for the end of August recorded scarcely 1,000 unemployed. This was hardly a case of unemployed, but of more or less unemployable people. At the same time there was a shortage of labour in many fields. During the autumn some thousands were again registered by the Unemployment Boards, but there is no longer any question of cyclical unemployment. For this reason the Unemployment Boards have been abolished and the care of temporarily unemployed persons has been entrusted to the social committees of the municipalities.

The peace of the labour market has not been disturbed by any serious labour disputes, though
there have been some minor ones. The level of wages has been rising by voluntary agreement.

## FOREIGN TRADE.

The continual increase in both the volume and value of foreign trade that had proved such an important factor in Finland's recovery in recent years, continued to a more marked degree last year. The total value of foreign trade last year amounted to $13,558.5$ million marks in comparison with $11,584.9$ millions for the previous year. The increase thus represented no less than 17 per cent. In this way the value of foreign trade was 71 per cent higher than in 1931, but still slightly below the record established in 1928. In regard to volume foreign trade was appreciably livelier than in any previous year.

Last year's great increase was fairly evenly divided between imports and exports. The volume of imports grew by about 12 per cent and their value by 999.0 million marks to $6,343.4$ millions. The volume of exports increased by 9 per cent and their value by 974.6 million marks to $7,215.1$ millions. Exports were appreciably larger both in value and volume than during any previous year and the volume of imports attained the same high level as in the record year of 1928, but their value was still appreciably below the value they attained at that time.

As a more detailed survey of foreign trade will appear in a later issue of this Bulletin, as usual, it is unnecessary to examine on this occasion, what classes of goods secured the
largest share in the increase of imports and exports and so forth. We need only mention that, according to the preliminary figures, the balance of trade produced a surplus of exports amounting to 871.7 million marks. The positive balance of trade that has characterised the conditions since 1930, was therefore still large. Altogether the surplus of exports during the seven years, 1930-1936, amounts to no less than 6,865 million marks.

The liveliness of economic activity is also apparent in the increase in the internal turnover of trade. According to the figures that refer to some of the largest wholesale businesses the turnover exceeded the corresponding figure for 1935 by about 11 per cent and for 1932 by 53 per cent.

## THE MONEY MARKET.

As already stated, the money market was unsually easy throughout the entire year. The accumulation of oapital was lively and part of it, as was apparent in the accumulation of savings in the Joint Stock banks and other savings institutions, attained higher figures than for a long time past. But the accumulation of capital that goes on in the business concerns themselves and the extent of which cannot be indicated by figures, was obviously also considerable. This is evidenced by the ability of industrial concerns, for instance, to extend output and erect new buildings and of trading companies to increase their turnover without having to resort to fresh credits for the purpose to any great extent.
The accumulation of capital will be seen in the following table:-

## THE MONEY MARKET

Total direct credits
of Bank of Finland \＆Joint Stock banks．
Creaits of Joint Stock banks．
Total deposits in Joint Stock banks．
Long－term deposits in Joint Stock banks．

0000000000 Official Bank rate．
—＿Notes in circulation．
．．．．．．．．．．．．．．．．．．．．Note reserve of Bank of Finland．
ールールールーロ Re－discounting at Bank of Finlaud．

The increase in deposits was thus appreciably larger than in the previous years. The growth is still more striking, if the comparison is extended to the period of depression, when sapital did not increase, but was reduced. The increase, however, was relatively not as large as in 1927-1928 and the absolute increase, too, was below the figures for 1927 as will be seen from the following figures:-

|  | Total"deposits 31 Dec. Mill. mks. | Increase ( + ) or decrease ( - ) |  |
| :---: | :---: | :---: | :---: |
|  |  | Mill. mks. | \% |
| 1927 | 10,848 | + 1,677 | +18.3 |
| 1928 | 12,071 | +1,223 | + 11.3 |
| 1929 | 12,497 | + 426 | + 3.5 |
| 1930 | 13,032 | + 535 | + 4.3 |
| 1931 | 12,759 | - 273 | - 2.1 |
| 1932 | 12,552 | - 207 | - 1.6 |
| 1933 | 13,151 | + 599 | + 4.8 |
| 1934 | 14,103 | + 952 | + 7.2 |
|  | 13,738 ${ }^{1}$ ) |  |  |
| 1935 | 14,654 | + 916 | $+6.7$ |
| 1936 | 16,225 | +1,570 | +10.7 |

The increase in the accumulation of capital is still clearer, if we bear in mind that rates of interest on deposits and cheque accounts are appreciably lower at present than during the depression. At the beginning of this year all credit institutions again lowered their deposit rates, so that the rate on 6 months' deposits dropped to $3 \frac{1}{2}-4$ per cent and for deposits on cheque accounts to $1-11 / 2$ per cent. These low rates of interest tended to arouse more interest among the public in bonds and shares, so that some of the capital that formerly appeared in the deposits of the credit institutions is now invested directly. In 1936 a number of new bond loans were again issued, part of which was employed in converting older and less favourable loans. According to the information available the issues of bond loans last year amounted to about 1,600 million marks or appreciably more than during the previous year. The nominal interest fluctuated between $41 / 2-5$ per cent, in some cases $5 \frac{1}{2}$ per cent, and thus displayed a continued falling tendency.

The drop in the rates of interest, on the other hand, encouraged business on the Stock Exchange
which was also influenced by the improved position of several companies and the expectation of higher dividends on some securities. Owing to this twofold influence the price of most of the securities listed on the Stock Exchange was raised and the turnover increased. The index for shares rose from 144 ( $1926=$ 100) in December, 1935, to 191 in December, 1936, while the rise in the index for bonds was confined to 3 points, this index standing at 128 in December. The business done on the Stock Exchange amounted to 436.3 million marks in comparison with 234.6 and 307.0 millions during the two preceding years.

Notwithstanding lively economic enterprise there was no large demand for credit. The credits granted by the Joint Stock banks fell off during the year by 75.7 million marks as compared with a rise of 35.0 millions in 1935, but it must be borne in mind that the banks' holdings of bonds which are not included among the credits increased by 415.0 million marks. The credits granted by the Bank of Finland increased by 167.6 millions. The position of the Bank of Finland is dealt with in the next article, so that we need only mention that it improved still further in the course of the year. Owing to the abundance of deposits and decrease in credits the Joint Stock banks experienced some difficulty in finding investments. In spite of increasing the bond portfolios and other investments their cash grew considerably. At the end of 1936 it attained the record figure of 851.3 million marks as against 633.3 millions one year before and 399.2 millions two years earlier. In consequence of the positive balance of trade and the abundance of money the foreign balances of the Joint Stock banks increased, amounting at the end of the year to 560.1 million marks as against 372.3 millions a year ago. The foreign indebtedness of the banks increased at the same time, indeed, from 190.4 to 250.7 million marks, but the increase in their net balances abroad amounted in any case to 128 millions compared to a reduction of 190 millions for the previous

[^7]year. The foreign balances of the Bank of Finland also grew, as will be seen in the next article.

THE BALLANCE OF PAYMENTS AND THE MOVEMENT OF CAPITAL.
On the basis of the knowledge acquired in previous years regarding the composition of Finland's balance of payments and its dependence on the balance of trade it is already possible to obtain a general idea of the balance of payments for the past year. As the balance of trade resulted in a surplus of exports amounting to approximately 870 million marks and as it can also be expected that expenditure in interest to foreign countries decreased and income from shipping probably increased, it is possible to calculate that the income in the balance of payments, ignoring the movement of capital, in all probability exceeds its expenditure by an amount exceeding the 1,000 millions mark
by a few tens of millions. Last year was therefore the seventh in succession with a decidedly positive balance of payments.

The principal item in the movement of capital in 1936 consisted of the redemption of the State's $6 \frac{1}{2}$ per cent dollar loan of 1926 of which 8.2 million dollars were held abroad. As only a small new loan of 2 million Swedish crowns was negotiated abroad and regular redemption of outstanding loans proceeded and some quantities of bonds were repatriated in addition, the funded foreign debt was reduced very appreciably last year. The short-term foreign credits remained more or less unchanged, while foreign balances increased. If we add the increase in the gold reserve of the Bank of Finland, we obtain an idea of the extent to which the improvement in the foreign payment position of Finland, already considerably stabilised after the difficulties of the depression, was maintained during the past year.

# RESULTS OF THE BANK OF FINLAND FOR 1936. 

BY<br>A. E. TUDEER, PH. D.<br>STATISTIOIAN TO THE BANK OF FINLAND.

BALANCE SHEET.
It will be seen from the preceding article that economic life in Finland was marked by the improving cyclical conditions and especially by lively economic activity, a favourable balance of trade and an easy money market. These circumstances are reflected in the balance sheet and annual results of the Bank of Finland.

The position of the Bank of Finland at the end of 1936 and of the two previous years is shown in the table on the next page.

The increase of 760.4 million marks or 22.5 per cent in the balance sheet total is of itself a sign of greater economic activity. At a total of $\mathbf{4 , 1 3 8 . 1}$ million marks the highest figure was reached that had ever occurred in the balance sheets of the Bank of Finland. This increase is distributed among various items.

The gold reserve that had grown in 1935 by 149.5 million marks after remaining stationary for a long time, was increased last year by 131.2 millions, so that it attained a record size

|  | $\begin{gathered} 1934 \\ 31 \text { Dec. } \\ \text { Mil. mks. } \end{gathered}$ | $\begin{gathered} 1935 \\ 31 \stackrel{\text { Dec. }}{ } \\ \text { Mill. mks. } \end{gathered}$ | $\begin{aligned} & 1936 \\ & 31 \text { Dec. } \\ & \text { Mill. mks } \end{aligned}$ |

of 603.2 million marks. This gold is valued in the books at the rate prescribed in the monetary law of December 21st, 1925. Besides, the Bank of Finland bought considerable quantities of gold that were not brought into the country and are valued at the market price of gold. This gold is therefore not included in the gold reserve and does not form part of the cover for the notes, but appears as a separate item in the balance sheet. This item, not included in the balance sheet of the Bank in previous years, amounted to 211.4 million marks at the end of 1936.

The other item in the ordinary cover, foreign correspondents, recorded an increase of 224.7 million marks or 17.7 per cent last year in
spite of the purchases of gold. This asset established a record at $1,491.6$ million marks.

At the end of 1936 the ordinary caver amounted to $2,094.8$ million marks as against $1,738.9$ millions one year and 1,650.5 millions two years earlier. However, in relation to the total liabilities payable on demand the ordinary cover fell off proportionately from 96.3 per cent at the end of 1934 to 83.7 per cent at the end of 1935 and Th.1 per cent at the end of 1936. The proportion of the cover is, nevertheless, quite ample, especially if we consider the low value at which the gold reserve and foreign currency are booked, and the gold that is not included in the cover.

In regard to the items included in the supplementary cover it is only the discounting of inland bills that underwent any particular change, viz., an increase of 108.5 million marks or $\mathbf{1 6 . 2}$ per cent. The total home credits of the Bank of Finland, part of which is not included in the supplementary cover, but figures among the "other assets", amounted to 949.5 million marks compared with 781.9 millions a year ago and 672.4 millions two years ago. The increase of 167.6 millions last year, equal to 21.4 per cent, is an indication of the greater demand for credit caused by the increased turnover and rising prices.

In the course of last year the Bank of Finland's holding of bonds experienced considerable alterations. The bonds in foreign currency decreased very much, while the Bank increased its holding of bonds in Finnish currency. The total booked value of the bonds increased from 413.9 to 440.5 million marks.

Passing on to the liabilities, we notice particularly the considerable growth of the note circulation. The increase amounted to no less than 249.4 million marks or 18.1 per cent, affording a clear idea of the greater economic activity and increased purchasing power of the country. By the end of the year the notes in circulation had reached a figure of $1,630.1$ million marks which is appreciably higher than

[^8]ever before at this time of the year. For the sake of comparison we may mention that the previous record was reached at the end of 1927, when the note circulation amounted to $1,514.4$ millions. Since that year some small notes have been replaced by aluminium-bronze coin. If the amount of the latter in circulation is added to the notes in circulation on the last day of December, 1936, we obtain a total of 1,707.6 million marks or an increase of 193.2 millions since 1927. The increase represents 12.8 per cent, but as it refers to a period of nine years during which the population increased by over 6 per cent and the productive mechanism expanded considerably, it cannot in itself be considered very large.

Among the other liabilities it is worth noting that the balance of current accounts due to the Treasury rose from 161.7 to 376.5 million marks, which gives an idea of the improved financial position of the state. The current accounts due to others also record a considerable rise from 401.7 to 571.3 millions. This increase is a natural consequence of the abundant cash of the Joint Stock banks. It should also be mentioned that the considerable increase in sundry accounts is a result of the inclusion of an item appearing for the first time in the balance sheet of the Bank on December 31st, foreign clearing accounts, on which an indebtedness of 68.4 million marks is entered.

The Bank of Finland's own funds increased last year, 50.2 million marks being transferred to the Reserve Fund out of the profit for 1935. By this means the Reserve Fund was raised to 312.3 millions, and the total funds of the Bank to $1,324.3$ millions, exoluding the profit for 1936.

## THE RIGHT OF NOTE ISSUE.

The Bank of Finland's right of note issue and the amounts issued at the end of 1936 and of the two previous years is illustrated by the following table:-

193419351936
31 Dec. 31 Dec. 31 Dec. Mill. mks. Mill. mks. Mill. mks.
Right to issue notes
Gold reserve and foreign
correspondents .......... 1,650.5 1,738.9 2,094.8

| Additional right of issue .. $1,200.0$ | $1,200.0$ | $1,200.0$ |
| :--- | :--- | :--- | :--- | :--- |
| Total $2,850.5$ | $2,938.9$ | $3,294.8$ |

Used amount of issue
Notes in circulation ...... 1,277.4 1,380.7 1,630.1
Other liabilities payable on
demand $\ldots \ldots \ldots \ldots . . \begin{array}{llll} & 370.2 & 622.7 & 1,082.4\end{array}$
Undrawn amount of ad-

| vances on cash credit $\ldots$ | 66.8 | 74.5 | 76.0 |
| ---: | ---: | ---: | ---: | ---: |
| Cotal used amount of issue | $1, \tilde{7} 14.4$ | $2,077.9$ | $2,788.5$ |

Total used amoumb of issue 1,71.4 2,07.9-2,788.0

It will thus be seen that the Bank of Finland's right of note issue increased last year by 355.9 million marks or 12.1 per cent. The increase was considerably larger than in the previous year, but relatively less than in 1934, when it amounted to over 15 per cent. The used amount of issue, in which, according to the regulations for the Bank of Finland, not only the notes in circulation, but also all other liabilities payable on demand and the undrawn amounts of advances on cash credit are included, increased considerably more or by 710.6 million marks. The increase, amounting to 34.2 per cent, was thus appreciably larger than in the previous years. Finally, as regards the unused right of issue or the so-called note reserve, there was a great reduction in consequence of the large increase just referred to. The total note reserve decreased from 861.0 to 506.3 million marks or 41.2 per cent and was considerably smaller than during the last few years. If we take into consideration the great increase in such assets as are booked below their present market value, we will find, however, that the actual cover of the Bank of Finland has by no means grown weaker in the course of 1936, but is on the contrary very strong.

PROFIT AND LOSS ACCOUNT.
The results for 1936 are shown in the following cable which illustrates the Profit and Loss account of the Bank of Finland:-

| Credit | $\underset{\text { Mill.mks. Mill. mks. Mill. mks. }}{1934} \stackrel{1936}{1935}$ |  |  |

| Agio | 22.5 | 15.0 | 16.9 |
| Commission | 4.8 | 5.7 | 3.8 |
| Total | 124.3 | 113.8 | 115.6 |
| Debit |  |  |  |
| Salaries | 8.3 | 8.3 | 8.4 |
| Pensions | 0.7 | 0.8 | 0.8 |
| and their expenses ..... | 0.2 | 0.2 | 0.2 |
| Cost of manufacturing bank notes $\qquad$ | 1.6 | 2.0 | 2.6 |
| Sundry expenses | 2.1 | 2.2 | 2.2 |
| Depreciation of furniture.. | (0.02) | 0.1 | 0.1 |
| Total | 12.9 | 13.6 | 14.3 |
| Net profit | 111.4 | 100.2 | 101.3 |
| Total | 124.3 | 113.8 | 115.6 |

The earnings increased by 1.8 million marks to 115.6 millions but were appreciably smaller than they had been generally prior to 1935. The increase was principally due to a rise in interest on home credits of 6.7 millions, which was a natural consequence of the latter having grown larger. Agio earnings were also slightly higher. Other items of income, however, fell off, though to an insignificant extent. The reduction in the Bank's income on current accounts with its foreign correspondents amounted to 1.4 million marks and was chiefly due to these balances having been slightly smaller on an average than in 1935. The falling off in
interest on bonds was a result of the conversion of loans and of falling rates on new bonds.

The actual expenditure of the Bank of Finland scarcely differs at all from the figures for the previous year, only the net cost of printing notes having risen in consequence of the increased labour. The total expenditure of the Bank amounted to 14.3 million marks in comparison with 13.6 millions in the previous year.

In the final result the Bank of Finland had a net profit of 101.3 million marks. For the sake of comparison we give the following neview of the course of the net profits in recent years:-

| 1926 | 107.1 | million | marks |
| :---: | :---: | :---: | :---: |
| 1927 | 116.7 | " | " |
| 1928 | 144.0 | " | , |
| 1929 | 150.7 | " | , |
| 1930 | 130.6 | " | ," |
| 1931 | 110.7 | " | ," |
| 1932 | 115.2 | " | " |
| 1933 | 112.4 | " | " |
| 1934 | 111.4 | " | , |
| 1935 | 100.2 | " | " |
| 1936 | 101.3 | \% | ", |

In accordance with the regulations for the Bank of Finland half of the annual profit is transferred automatically to the Reserve Fund which consequently amounts to 363.0 million marks and the Bank's total funds to $1,375.0$ millions. Of the other half of the profit the lion's share is employed for covering the expenditure of the State, for the Budget for 1937 includes an income of 50.0 million marks from the profit of the Bank of Finland.

## ITEMS.

The Diet. The Diet will reassemble for its regular session on February 1st. From the former session 9 Government bills, 4 reports, 50 motions for new laws and 98 submitted motions are left over to be dealt with by this year's Diet, besides which a number of fresh bills have been sanctioned by the President.

Presidential election. On January 15th and 16th voting proceeded throughout the country for the choice of electors for the presidential election. The electors, numbering 300 , will meet on February 15th to elect a President of the Republic for the six years' period beginning on March 1st, 1937. Voting for the election of electors was not quite as lively as for the elections to the Diet in July, 1936, but much livelier than for the last election of electors in 1931. The number of votes recorded on the present occasion was in round figures $1,098,300$ as compared to 1,174,000 votes during the July elections, but only 836,100 in January, 1931. At the election of electors this year it was evident, as in 1931, that the limits of the politioal parties were disregarded by a number of voters who wished to support a certain candidate for the presidency. The results of the election in January: 1937, turned out in the following manner:-

|  | Number of <br> votes <br> recorded |  |
| :---: | :---: | :---: |
| electors |  |  |
| chosen |  |  |

The Public Debt. The amount and composition of the Public Debt at the end of 1936 and the course it has pursued during the last few years are shown in the following table:-

|  | 1934 | 1935 | 1936 |
| :---: | :---: | :---: | :---: |
|  | Dec. 31 Mill. mks. | Dec. 31 Mill. mks. | Dec. 31 Mill. mks. |
| Funded debt:- |  |  |  |
| Foreiga | 2,282.6 | 1,852.0 | 1,128.7 |
| Internal | 990.7 | 1,180.8 | 1,852.7 |
| Total funded debt | 3,273.3 | 3,032.8 | 2,981.4 |
| Short-term credit | 108.5 | 133.2 | 137.8 |
| Total Public Debt | 3,981.s | 3,166.0 | 3,119.7 |

In the above calculation the loans issued in foreign currency are booked at the rates of exchange current at the time the various loans were raised, but if, in order to give a clearer picture of the situation, the Public Debt is expressed in millions of dollars converted at current rates of exchange, the following values are obtained:--

|  | $\begin{aligned} & 1935 \\ & \text { Dec. } 31 \\ & \text { Mili. } \$ \end{aligned}$ | $\begin{gathered} 1936 \\ \text { Dec. } 31 \\ \text { Mill. } \$ 8 \end{gathered}$ | $\begin{aligned} & \text { Increase }(+) \text { or } \\ & \text { decrease }(-) \\ & \text { Mill. } \$ \end{aligned}$ |
| :---: | :---: | :---: | :---: |
| Funded debt:- |  |  |  |
| Foreign | 57.8 | 39.1 | $-18.7$ |
| Internal | 25.6 | 39.9 | + 14.3 |
| Total funded debt | 83.4 | 79.0 | - 4.4 |
| Short-term credit | 3.8 | 3.2 | - 0.6 |
| Total Public Debt | 87.2 | 82.? | 5.0 |

The tendency to convert outstanding foreign debt into internal debt that had already been evident in Finland's public economy during the last few years, has now proceeded so far, as the above figures show, that 50 per cent of the total Public Debt is issued within the country.

It is the intention of the Treasury to continue such a policy of conversion during the current year as will ensure the saving of interest and the removal of possible risks connected with the exchanges. In the last issue of this Bulletin we mentioned the prospective redemption of the two Liberty Loans of 1918. In the course of 1937 notice is also to be given of the redemption of
the Railway Loan of 1909 taken up by the Finnish State in England. Of this loan that carries $4 \frac{1}{2}$ per cent interest and was issued alternatively in sterling, Swiss francs, Dutch florins and Reichsmarks $£ 1,393,680$ were outstanding at the end of 1936. The transactions referred to are to be financed by means of issuing new State bonds in the home market.

Conversion of municipal loans. The City of Helsinki (Helsingfors) $4 \frac{1}{2}$ per cent sterling loan of 1909 regarding which, as we mentioned in Bulletin No. 8 for last year, notice of conversion to a 4 per cent loan was given last summer, has now been arranged. This loan, amounting to a value of $£ 475,300$, has been partly converted into a 4 per cent loan, the balance being redeemed. Last December the City of Helsinki also gave notice of converting its 6 per cent bond loan for 40 million Finnish marks, issued in Finland in 1933, the conversion of which is now proposed to a $4 \frac{1}{2}$ per cent loan at a rate of 98.5 per cent.

Bank dividends: The dividends of the Joint Stock banks in Finland paid out of net profits for 1934 and 1935 and those proposed to be paid out of profits for 1936 are as follows:-

|  | $\begin{gathered} 1934 \\ \% \end{gathered}$ | $\begin{gathered} 1935 \\ \% \end{gathered}$ | $\underset{\%}{1936}$ |
| :---: | :---: | :---: | :---: |
| Kansallis-Osake-Pankki | 14 | 14 | 14 |
| Ab. Nordiska Föreningsbanken | 16 | 16 | 16 |
| Helsingfors Aktiebank | 9 | 9 | 8 |
| Suomen Maatalous-Osake-Pankki | 5 | 5 | 5 |
| Säästöpankkien Keskus-Osake- |  |  |  |
| Pankki | 7 | 7 | 7 |
| Savo-Karjalan Osake-Pankki | - | 3 | 31/2 |
| Pohjolan Osake-Pankki | 7 | 7 | 7 |
| Suomen Käsityöläis-Osakepankki | 5 | 5 | $51 / 2$ |
| Ålands Aktiebank | 7 | 7 | 7 |

The majority of the Joint Stock banks, therefore, propose to pay the same dividends as for the previous year. Two banks have been able to raise their dividends a little, whereas one proposes to lower its dividend from 9 to 8 per cent.

The Stock Exchange in 1936. Last year the business done on the Helsinki Stock Exchange was livelier than in any year since the boom in the late 1920's. Its course in recent years is illustrated by the following figures:-

| 1930 | 180.4 | million | marks |
| :---: | :---: | :---: | :---: |
| 1931 | 306.0 |  |  |
| 1932 | 162.3 | " | ," |
| 1933 | 195.7 | " | " |
| 1934 | 307.0 | " | ," |
| 1935 | 234.7 | " | " |
| 1936 | 436.3 | " | ,, |

The business during the last few years was divided as follows:-

|  | 1934 <br> Mill. mks. | $\begin{gathered} 1035 \\ \text { Mill. mks. } \end{gathered}$ | $\begin{gathered} 1936 \\ \text { Mill. mks. } \end{gathered}$ |
| :---: | :---: | :---: | :---: |
| Bank shares | 92.4 | 62.0 | 101.5 |
| Industrial shares | 157.6 | 132.2 | 272.0 |
| Insurance shares | 0.6 | 0.6 | 0.9 |
| Traffic shares | 11.3 | 6.5 | 14.6 |
| Sundry shares | 3.1 | 2.1 | 0.4 |
| Total shares | 265.0 | 203.4 | 38.9 .4 |
| Bonds | 42.0 | 31.3 | 46.9 |

The increase that refers to all different classes of securities, was most striking in the case of industrial shares, the turnover in which was raised by over 100 per cent in comparison with the previous year. This was due to a considerable extent to the rise in the price of industrial shares. The price index for such shares was 258 for the whole of 1936 as against 204 for 1935, the corresponding index for bank shares being 211 for 1936 and 205 for 1935.

Weather and ice conditions. The early part of the winter was generally mild and snow was very scarce in the southern parts of the country. As colder weather with snow set in towards the end of January, lumber work has, nevertheless, got under way fairly well in most parts of the country. Thanks to the mild weather a large number of ports were still open to navigation even after Christmas, but since the last week of January the ports east of Kotka and north of Mäntyluoto have been closed for the winter. In the harbour of Helsinki shipping is assisted by icebreakers.

# THE BANK OF FINLAND MONTHLY BULLETIN 

is sent free of charge to anyone wishing to receive it. Finnish booksellers are, however, allowed to sell it at a price of 2 marks per copy. Back numbers are also willingly supplied. Should extracts from the Bulletin be printed, the source should be stated. Correspondence with regard to the Bulletin should be addressed to the Bank of Finland, Statistical Department,

Helsinki (Helsingfors), Finland:

[^0]:    ${ }^{1}$ ) Included in home Ioans, see table 4. Re-discounted Bills according to the monthly statements of the Bank of Finland.

[^1]:    ${ }^{\text {1 }}$ ) Increased by 198.9 mill. Fmk interest for 1934. - $^{2}$ ) Increased by 203.8 m
    223.7 mill. Frok caleulated interest for 1936 .
