No. 1 JANUARY 1926

## THE FINNISH MARKET REVIEW.

## THE MONEY MARKET.

In the course of December the money market underwent no special changes. This circumstance deserves mention and may be described as-a very good result, as owing to various reasons greater demands were made of the market than usual. For imports about 350 million marks were required above the normal requirements, in Oustoms duties approximately 150 million marks were paid in excess of the normal figure and at the same time a large part of the income and property tax was paid to the State. In addition, forest work started, owing to the early winter, some weeks earlier than in ordinary years. In spite of large sums of money being wanted for all these purposes, the money market showed no tightness worth mentioning.
The changes in the position of the Joint Stock banks were small. Deposits fell off by 5.7 million marks, but it should be noted that the drop would have been larger, had annual interest not been paid during the month. Credits decreased also by 14.3 million marks. The changes are, however, greater than is indicated by this amount, for Oredits to home correspondents were reduced by 15.2 .0 million marks, while other credits increased, the bill portfolio by 109.3 millions.

With regard to the position of the Joint Stock banks towards other countries it will be found that their net indebtedness has again risen slightly. Foreign balances decreased by 39.7 million marks, whereas the foreign indebtedness was not reduced by more than 3.3
million marks. The net indeb.tedness thus amounted to 193.6 million marks at the end of the year, as compared with 322.4 millions a year before and 718.0 millions two years earlier.

The position of the Bank of Finland at the end of December shows several departures from its former balance sheets, which is due to the fact that it was drawn up in accordance with the new regulations for the Bank. The alterations which have arisen in this way are dealt with in an article in the present issue of the Bulletin. Of the practical changes which occurred in December the following may be mentioned. The Bank of Finland's reserve of foreign currency was increased considerably, viz., by 99.4 million marks, and therefore attained a fresh maximum of $1 ; 408.0$ million marks, as compared with 79.3 .9 million marks a year before. At the same time the home credits, too, showed a , considerable increase af 11.5 .0 million marks. The larger part of this referred to bills directly discounted, while rediscounts were not increased by more than 14.3 millions to 25.9 million marks. Advances on cash credit and especially loans on mortgage increased appreciably. On the other hand, deposits, too, rose considerably. Deposits on current account increased by 126.1 million marks, seeing that the Government added to its deposits by no less than 184.1 millions, making a total of 505.7 millions. while current accounts with others (particularly the Joint Stock banks) showed a falling off of 59.0 million marks. The notes in circulation, as usual in December, rose by 56.2 million marks
and the note reserve dropped a little. The reduction was 100.6 million marks, of which a small part is due to the altered regulations for the note cover.

## TRADE AND INDUISTRY.

December usually shows a considerable sunplus of imports. This was the case again in the present instance, but the surplus was unexpectedly large, in fact, larger than ever before. While the value of exports amounted to 326.6 million marks as against 490.1 millions in November of the same year, and 410.9 millions in December, 1924, the value of imports totalled more than double as much or 696.7 million marks. Imports were thus considerably larger than during any of the former months and a surplus of imports therefore resulted amounting to 370.1 million marks. This result is mainly a consequence of the Diet having decided to raise the Customs duties on certain goods from the beginning of 1926, as was mentioned in our previous market report. Thus, 43.6 million kg of sugar were imported as against 5 to 6 million kg under normal circumstances; 24.5 million kg of wheaten flour as against about 8 million kg ; and 4.5 million kg of coffee as against about 1.3 million kg during other months. At the same time exports of most articles were considerably smaller than in previous months and in a great measure smaller than during December, 1924. The unusually early winter with heary ice conditions contributed to this state of affairs, navigation having been hampered very much already in December.

Under such conditions the balance of trade for the whole year was not as favourable as had been expected. The result, in comparison with previous years, is given in the following figures:

| Year. | $\begin{gathered} \text { Imports. } \\ \begin{array}{c} \text { Mill. } \\ \text { Fmk } \end{array} \end{gathered}$ | $\begin{gathered} \text { Exports. } \\ \text { Mill. } \\ \text { Fmk } \end{gathered}$ | Surplas of imports (+) or exports ( $(-)$. Mill. Fmk |
| :---: | :---: | :---: | :---: |
| 1924 | 3,585.7 | 3,389.4 | $-196.3$ |
| 1922 | 3,969.9 | 4,467.6 | $+497.7$ |
| 1923 | 4,600.3 | 4,392.5 | -207.8 |
| 1924 | 4,715.5 | 4,970.6 | +255.1 |
| 1925 | 5,513.0 | -5,069.6 | + 506.6 |

The figures for 1925 are preliminary ones and are liable to slight alteration, but nevertheless give a correct idea of the result for the year. Foreign trade in 1925 was much livelier than in the preceding years and also larger than at any time before the world war. The net result is, indeed, not as good as there was reason to expect, but at the same time the imported stocks of some goods are considerably greater than is usual at the end of the year. If the value of imports and exports is calculated in accordance with prices for 1913, the result is reached that the volume of imports amounted to 105.8 as against 99.3 in the preceding year. The volume of exports showed an even greater increase, or from 1112.7 in 1924 to 123.8. On the other hand it will be found that the import price index had risen from 958 in 1924 to 1,052 , while the corresponding figures for the export price index were 1,090 and 1,111 , or in other words that the movement of prices during 1925 was unfavourable for our foreign trade. If this had not been the case, the balance of trade would have closed with a considerably larger surplus of exports.
In regard to the turnover of trade in individual classes of goods, it is to be noted that several of these show record figures. This is the case with several of our mosit important articles of export, such as sawn timber, plywood, celliulose, paper, fresh meat and cheese. Butter exports, too, were larger than in any year since 1906.

Of the timber market there is nothing new to report. For delivery in 1926 about 275,000 standards thad been sold lby the end of January. Prices were firm. The demand for products of the paper industry, was, as before, satisfactory.

## THE LABGUR MARKET.

Thanks to the early forest work and lively building operations the offers of employment were rather better than usual during December. Some relief work may, however, prove necessary, as unemployment usually increases in January and February.

## CONTENTS OF THE TABLES.

I. MONEY MARKET.

Bank of Finland:
Balance sheet.

1. $\quad$ Balance she
2. Note circulation and foreign correspondents.
3. Note reserve and home loans.
4. Rediscounted bills and balances of current accounts.
5. Rates of exchange.
6. Movement of the dollar rate.
. Clearing.
Joint Stock banks:
Home deposits.
7. Home loans.

Position with regard to foreign countries.
12. Deposits in the savings banks.
13. Deposits in Post Office Savings Bank and on Consumers' Co-operative Societies' Savings Account.
14. Changes in Number and Capital of Limited Companies.
15. New risks insured by Life Assurance Companies.
16. Helsingfors Stock Exchange. Bankruptcies. Protested Bills.
17. Stock Exchange index.
II. STATE FINANCES.
18. National Debt.
19. Total state revenue and principal groups.
20. Miscellaneous State receipts collected by Customs.
III. FOREIGN TRADE.
21. Value of imports and exports.
22. Valne of imports and exports in different groups of goods.
23. Imports of the most important articles.
24. Exports
25. Foreign Trade with various countries.
26. Import-Price index.
27. Export-Price index.
28. Index numbers for quantities of imports and exports.
39. Value of imports and exports divided according to the purpose of the goods.
IV. TRAFFIC.
30. Foreign shipping.
31. Shipping with various countries and passenger traffic.
32. Railways, goods traffic and rolling stock:
33. Railways ${ }^{\prime}$ revenue, expenditure and traffic surplus.
V. LEVEL OF PRICES.
34. Index number of cost of living.
35. Wholesale Price Index.
VI. LABOUR MARKET.
36. Number of unemployed.
37. Cessation of Work.

Tables 9-11 acconding to Finland's Official Statistics VII. D. Bank Statistics. The figures in brackets [] fndicate the position at the end of the previous year.
${ }^{1}$ ) Actual current accounts and home correspondents. - ${ }^{2}$ ) Deposit accounts and savings accounts. - ${ }^{8}$ ) The large decrease in deposits and loans commencing in November, 1924, is due to the fact that the new Industrial Mortgage Bank withdrew its deposits from the Joint Stock banks in order to pay out the loans granted by it, the recaivers of such loans redeeming in turn their own Nabilities to the Joint Stock banks. (Cy. Market Review in the Dec. No of the Bulletin).

- In the tables 9-11 Mortgage banks are not included.

The above table is based on the monthly report on the National Debt published by the Treasury in the Official Gazette．In－ ternal loans are given at their nominal value．Forelgn loans are given in Finnish currency according to the rate ruling on the date of the raising of the loan．As a result of this，loans of an earier date than 1914 are set down at par．
${ }^{2}$ ）Calculated as follows：The loans raised in the country have been caleulated in dollars，according to the average rate of exchange of each month．The loans，negotiated abroad，which are all lssued in different currencies，are groaped according to the pro－ portion of currencies．shown by the coupons paid，and reduced to dollars at the rate of exchange just mentioned．
19. - total state revenue and principal groups.
 of gures of gross amounts. This table gives figures for the oxcise on tobacco excluding stamp duty on imported tobacoo, whloh is included in the respective flgures in table 17.

## 20. - MISCELLANEOUS STATE RECEIPTS COLLECTED BY CUSTOMS.

The import- and export-indices have been calculated by the Statistical Dept. of the Board of Customs in the following manner: the quantities of imports and, respectively, exports for the current year have been multiplied by the average price for the class of goods in question in 1918, after which the import (or export) value for the current year has been calculated in percentage of the sum thut obtained for purposes of comparison.

The goods ohosen for the setting-up of a total-index have been divided, according to their use, into the groups: foodstuffs, clothing, agricultural requirements and other goods. The three last-named have been further divided, according to their purpose, into raw materials, machinery and industrial products. duties.
27. - EXPORT-PRICE INDEX.

${ }^{2}$ ）From the beginning of 1921 onwards a new official index has been drawn up differing from that published in the Bulletin for n that the whole first half of 1914 forms the basis $(=100)$ for the same，and that the rise in taxation is also included．
The Index is calculated by the Social－Statistical Department of the Central Statistical Office and is based on monthly reports trom 21 different centres；it shows the rise in the cost of living for a workingman＇s family of normal size，the income of which amonnted during the years $1908-1909$ to $1600-2000 \mathrm{Fmk}$ ，assuming that the average monthly consumption within the same remained unaltered．The index for total cost of living is the average based on weight of the different indices．

The index．s worked out at the Central Statistiral Office＇s Department for Fconomic Statistics．－In determining the bases of calculation for the index the combined value of the country＇s production and imports for 1913 are taken into account without deducting the value of exports．The total number of commodities included is 185，and the figures in brackets at the head of the columns indicate the number of commodities in the corresponding groups．－In working out the index figures the method known as pproportionate pricesi is employed，$i$ ．e．the price of each commodity is taken in a percentage ratio to a corresponding figure for the basic pericd and the aver－ age is then calculated on the basis of the resultant proportionate figures．The corresponding months in 1913 are taken as a basis．In the calculations geometrical averager are employed．No actual weighting of figures is andertaken：this is carried out，however，indirectly with the ald of the list of commodities．Cf．the article in the January number 1924.

This table, prepared from the weekly reports of the Labour Exchange Department of the Ministry of Social Affairs, shows the number of unemployed registered in the books of the communal labour exchanges in the majority of towns and a very small part of the rural centres of population at the close of the week nearest to the month's end. As agricultural labourers and skilled artisans proper register, up to the present, only in a minority of cases at the communal labour exchanges, the table does not give a complete review of the number of unemployed, but is to be regarded more as symptomatic.
${ }^{1}$ ) Owing to the new-year holidays a number of unemployed did not register at the communal labor exchanges.

The above particulars which are of a preliminary nature, have been compiled by the Social-Statistical Department of the Centrak Statistical Otfice. The majority of cases of cessation of work were described as strikes.
${ }^{\text {1) }}$ ) The figures for 1924 have been adjusted.

## CERTAIN PARTICULARS ABOUT FINLAND.

## 1. FORM OF GOVERNMENT.

finland formed a part of the kingdom of Sweden from 1154 to 1809; since 1809 it was an autonomous Grand Duchy connected with Russia up to December 6th, 1917, when Finland declared its independence, which was acknowledged by all the Powers including Soviet Russia. It became a republic in 1919. The Diet together with the President possess the legisilative power of the country. The highest executive power is held by the President chosen for a period of 6 years. The present President L. Kr. Relander is elected for the term 1 March, 1925 to 1 March. 1931.

The Dlet, composed of 200 members, is elected by universal suffrage. The proportions of the different parties in the Diet elected in 1924 are as follows:

|  |  |  | mber | Per cent |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Right | i Swedish party | 23 |  | 11.4 |  |
|  | 1 Unionist party | 38 | 61 | 19.0 | 30.4 |
| Centre | f Agrarian party | 44 |  | 22.0 |  |
|  | ( Progressive party | 17 | 61 | 8.4 | 30.4 |
| Left | ( Social-Democrats. | 60 |  | 30.0 |  |
|  | 1 Commonists | 18 | 78 | 9.0 | 39.0 |

## 2. LAND.

THE AREA is 388,483 square kilometres $=150,222$ square miles, (Great Britain's area is 89,047 sq. m. and Italy's area 117,982 sq. m ). Of the total area $11.4 \%$ are lakes. On an average $10.8 \%$ of the land in the sonth of Finland is cultivated, $0.9 \%$ in the North, $6.3 \%$ of the whole land. Of the land area 25.3 mill. ha ( 62.5 mill. acres) or $73.4 \%$ are covered by forests.

THE AVERAGE TEMPERATURE in the coldest month is in S. W. Finland - $5^{\circ}$ to - $6^{\circ}$ C., in Lappland - $15^{\circ} \mathrm{C}$. and during the warmest month $+15^{\circ}$ and $+13^{\circ}$ to $+14^{\circ} \mathrm{C}$. resp. The average temperature in Helsinki is $+4.5^{\circ}$ (in Oslo $+5.4^{\circ}$, in Montreal $+5.4^{\circ}$, in Moscow $+3.6^{\circ}$ ). The ground is covered by snow in the South during about 100 days, in Central Finland luring 150 to 189 days, in Lappland about 210 days.

## 3. POPULATION.

NUMBER OF INHABITANTS (1924): 3.5 millions, of which 0.2 million emigrants, (in Sweden (1924) 6.0, in Switzerland (1923) 3.9 , in Denmark (1924) 3.4 and in Norway (1924) 2.8 millions).

DENSITY OF POPULATION (1924): In South-Finland 17.8, in North-Finland 2.8 and in the whole country an average of 10.2 unhabitants to the square kilometre.

LANGUAGE (1920): Finnish speaking $88.7 \%$, Swedish speaking 11. 0 \% others $0.3 \%$.

RELIGION (1924): Lutheran $97.3 \%$, Greek-Orthodox $1.7 \%$ others $1.0 \%$.

DISTRIBUTION (1924): $82.7 \%$ of the population inhabit the country, $17.8 \%$ the towns and urban districts. The largest towns are (1924): Helsinki (Helsingfors), the capital, 207,954 in(habitants, Turku (Åbo) 60,412, Tampere (Tammerfors) 51,035, Vijpuri (Viborg) 46,961.

EDUCATION (1920): Amongst persons over 15 years of age only $1.0 \%$ are illiterate. Three universities founded 1640, 1917 and 1920.

INCREASE OF POPULATION (1924): Births $22.4 \%$, deaths $15.8 \%$ (in France in 1924 17.2 $\% 00$, and in England in $192412.2 \%$ \% natural increase $7.1 \%$.

## 4. INDUSTRY.

PROPORTIONS OF OCCUPATIONS OF THE POPULATION (1920): agriculture $65.1 \%$, industry and manuel labour $14.8 \%$, commerce $3.5 \%$, other occupations $17.7 \%$.

TOWNERSHIP OF LAND. The land area is distributed among different classes of owners approximately as follows: private $52.1 \%$, State $39.7 \%$, Joint Stock companies $6.5 \%$, communities $1.8 \%$.

FOREST RESOURCES. The growing stock of the forest is 1,620 million $m^{8}$ (57, 213 million cubic feet). The marketable timber (measuring 20 om at breast height $=6 \mathrm{in}$. at a height of 18 ft .) amounts to 1,557 million trees. Of this number pine is represented by $61 \%$, spruce by $28 \%$, the conders thus constituting $89 \%$ or 1,384 million trees, leaftrees, mostly birch, $11 \%$ or 173 million trees. The annual increment is 44.5 million $\mathrm{m}^{8}(1,568$ million cub. ft.). The annual working up according to earlier calculations is 40 million $\mathrm{m}^{3}$ ( 1,413 million cub. ft.). In North Finland the increment is much larger than the working up, but in South Finland excess working up occurs locally.

AGRICULTURE. Cultivated land 2.1 million hectars, divided as follows: area under cultivation $0.4-10$ hectars $33.7 \%, 10-15$ ha $48.9 \%, 50-100$ ha $9.8 \%$, over 100 ha $8.1 \%$. Cultivated land was divided between the different kinds of crops as follows: $46.8 \%$ hay, 20.4 \% oats, $11.1 \%$ rye, 5.3 \% barley, $3.2 \%$ potatoes, $13.1 \%$ other. The number of dairies in 1923 amounted to 510.

INDUSTRY (1924): Number of industrial concerns 3,213, hands 189,387, gross value of products of industry 9,831 million marks.

LENGTH OF RAILWAYS (1925): $4,753 \mathrm{~km}$, of which 4,458 km State railways and 300 km private. The gauge is 1.425 m . COMMERCLAL FLEET (1924): Sailing ships 615 ( 92,374 reg. tons net.), steamships 600 ( 93,883 r. t.), motor vessels 117 ( 15,659 r.t.), lighters 3,493 (276,372 r.t ). Total 4,825 (478, 288 r.t.).

## 5. FINANCE AND BANKING.

CURRENCY. Since 1860 Finland has its own monetary system. From 1877 up to the Great War the currency maintained its stable gold value and after the disturbances caused by the war Finland has again from January 1st, 1926 a gold standard. The unit of currency is the mark (Finnish markkas) $=100$ pennies. The gold value of 100 marks is equal to $\$ 2.6185=£-10 / 4^{1 / 5} \mathrm{~d}$.

STATE FINANCES. According to the balance sheet for 1924 the State revenue was $\mathbf{3 , 2 1 7 . 0}$ million marks of wihch $\mathbf{3 , 1 5 8 . 2}$ million marks were ordinary revenue, and State expenditure $\mathbf{3 , 1 4 9 . 5}$ million marks, of which $2,530.3$ million marks were ordinary expenditure. The principal sources of rvenue were as follows: State property and undertakings $1,071.9$, direct taxes 486.8 , indirect taxes 1,212. 2, miscellaneous taxes 161.4, charges 135.9, miscellaneous revenue 148.7. The value of State property in 1922 as estimated at $11,150.6$ million marks. For National Debt see table 15 in this issue.

MUNICIPAL FINANCES. According to the Budget for 1925 expenditure amounted to $\mathbf{8 6 8 . 4}$ million marks. Income from taxation was 304.0 million marks, taxed income $4,097.3$ million marks. The communal income tax (not progressive) averaged $7.7 \%$ of the ratepayers' income.

THE BANK OF ISSUE. The Bank fof Finland, (founded in 1811) is a State Bank. Its head-office is in Helsinki (Helsingfors) with branches in Turku (Åbo), Pori (Björneborg), Vaasa (Vasa), Oulu (Uleáborg), Kuopio, Joensuu, Sortavala, Viipuri (Viborg), Mikkeli (S:t Michel), Tampere (Tammerfors), Hämeenlinna (Tavastehus), Jyväskylä and Kotka.

THE JOINT STOCK BANKS (1924): Number 19, possess 433 branch offices, where all kinds of banking business is transacted. Including all banks, there is one banking establishment per 7,500 inhabitants.

The largest banks are: Ab. Nordiska Föreningsbanken, Kansallis-Osake-Pankki, Helsingiors Aktiebank and Ab. Unionbanken, all with head offices in the capital.

OTHER BANKS (1924): Mortage banks 6, Savings banks 464. Co-operative Credit Societies 1,060 and a Central Bank for the latter.

${ }^{2}$ ) From February 1924 including the Gifedit abroad, whichi amounted to 244.8 mill. mak. from. February 7th to January 31 st . 1925, and has since amounted to 256.4 mill. mk.
4) Loans granted to Joinl Stock banks and the publio.

# ECONOMIC QUESTIONS BEFORE THE DIET IN 1925. 

BY<br>EINO J. AHILA, в. c. 亡.<br>secretary to the dirt.

In reviewing the most important economic questions dealt with lby the Diet during 1925 three events, which stand out above all others in significance and effect, call for remark primarily. These three events are the passing of the law relating to the re-introduction of the gold standard and the consequent alterations in the regulations for the Bank of Finland; the State Budget proposals for 1926 with the accompanying new taxation laws; and the law relating to railway construction during 1926-30.

## RESTORIATION OF THE GOLD STANDARD.

Legislation connected with this question has already been referred to in an earlier issue of this Bulletin (see No. 12, 1925). In order to realise this important reform it has been necessary, among other measures, to take certain steps to strengthen the position of the Bank. Thus, the Diet passed the law for the redemption of the bonds held by the Bank of Finland laid before it by the Government. According to this law, the Government $6 \%$ bonds in the possession of the Bank to the value of $338,654,000$ marks which had, in accordance with a decision passed by the Diet, been made over to the Bank of Finland in 1919 for the purpose of strengthening its position, are to be redeemed in foreign currency before the end of 1928 in amounts and at dates to be fixed by the Government. As it was not considered feasible to raise the means for the redemption of the bonds by taxation, the Diet granted authority to the Government at the same time to raise before the end of 1928 one or more bond loans in foreign currency for
the purpose to a nominal amount not exceeding the sum mentioned. This measure will not increase Government indebtedness; it will merely result in the transfer of an amount of internal indelbtedness corresponding to the redemption value of the bonds to indebtedness in foreign currency.

SOME TAXATION LAWIS.
An account of the Budget for 1926 as passed by the Diet, will be found in the issue No. 12, 1925, of this Bulletin. Certain proposals for taxation laws connected with the Budget may, however, be referred to here. As regards Customs taxation there is as yet no permanent law in Finland, although preparatory work in this respect has been carried on for several years. For this reason Customs tariffs have hitherto been passed by the Diet for a year at a time. In the present instance, too, the Diet passed a law for the collection of Customs duties during 1926 (see No. 12, 1925). At the same time the Diet requested the Government to have proposals for a permanent Customs tariff prepared and submitted to the Diet in 1926. The bill for excise on matches has likewise been passed for a year at a time. According to the bill for an excise on matches during 1926 passed by the Diet, the basis of taxation is defined in such a manner that a duty of $11 / 2$ penni is to be imposed on each successive unit of 10 matches in a packet, whereas hitherto the duty has been 10 penni on a packet containing a maximum of 70 matches.

To make the Budget balance the Government had proposed various new taxes, of which a

- number received the approval of the Diet, while others were defeated. Of the new taxes the first deserving mention is the tax on sweetstuffs. According to the law passed by the Diet the articles liable to taxation are sweets, confectionery, lozenges, candies of hard consistency, marchpane and preparations thereof, chocolate, excepting chocolate manufactured for culinary purposes, and other confectionery in which sugar, chocolate, cocoa, fruit, almonds, nuts or fruit kernels form a chief ingredient. The tax, which amounts to $20 \%$ of the taxation value, is collected from the manufacturer in the case of sweetstuffs produced in Finland, and from the importer in the case of foreign goods.

On the other hand the Diet rejected the proposal of the Government to raise the excise on tobacco from the existing $30 \%$ to $38 \%$. Similary. the Diet threw out a Government proposal for what was termed ,,a tax on bachelors" according to which the income and property tax payable by a childless man would have been subject to an increase of $10 \%$ in the case of married men and $20 \%$ in the case of bachelors, widowers or divorced men.

To attain greater efficiency in collecting the income and property tax the Governiment laid before the Diet a proposal for deducting a certain precentage of interest and dividends at the source, the amounts thus withheld being deducted from the income and property tax liabilities of the taxpayers concerned. The Diet was of the opinion that this method was possible only in the case of dividends and therefore approved a law for the deduction of income and property tax on payments of dividends. Acoording to this law $8 \%$ of the amount of dividend paid or credited by joint stock companies is to be retained by the payer towards the payment of the income and property tax of the stockholder, which amount the latter is entitled to deduct from his income and property tax for the year in which the deduction has been made. This law supercedes the law of December 30th, 1921, relating to interest and dividend tax for foreigners in respect of income from dividends.

Reference should also be made to the law relating to the principles of assessment for
municipal Customs dues during 1926 and 1927. These payments do not fall to the State, but to certain towns. The system, which dates from the seventeenth century, provides for supplementary Customs dues for the benefit of municipalities and has been looked upon as providing a return for certain administrative duties, the cost of which should logically be borne by the State and is actually so borne in rural districts, such duties comprising the upkeep of the judiciary, distraint work, tax colleoting and the maintenance of Oustom Houses and bonded warehouses. The abolition of these dues has been discussed for years. But as the question of transferring to the State such institutions for which the right to levy dues was granted, or of providing corresponding remuneration to the towns in some other form, has not yet been settled, the law passed by the Diet decrees that the principle of assessment during 1926 and 1927 shall be, as hitherto determined by statute, at a fixed percentage of the Customs duties on goods liable to such dues. The law provides that detailed particulars of the amount of these dues shall be issued in additional statutes (according to statute No. 375 of December 29.th, 1925, the maximum amount was $2 \%$ of the corresponding Customs duty).

As the statutes governing the lapsing of taxes and fees have partly proved unsatisfactory, partly unsuited to the pupose they were intended to serve, the Diet passed a law relating to the lapsing of taxes and fees. According to this law, which applies to taxes and other public fees imposed on behalf of the State and municipal or ecclesiastical authorities, the statutory period during which such payments may be collected is five years from the beginning of the year following that in which the tax or fee fell due for payment.

## OONSTRUOTION OF NEW RAILLWAYS.

Up to the present decisions relating to the contstruction of new railways have been made annually in connection with the Budget, without any relation whatever to a really consistent plan for future development. The first plan to cover a period of five years was successfully carried
through the present Diet, as it was embodied in the law passed by the Diet relating to certain railway construction during the years 1926-30. The law not only defines what railways are to be built during the ensuing period of five years, but also the times at which construction work on the various railways is to be begun. On the other hand the law contains no stipulation as to the amount to be granted annually for railway construction; the Diet is to fix the amount each year in the Budget, after which. it will be apportioned, within the stipulations of the law, among the different railways by the Government. For 1926 the Diet granted an amount of 100 million marks. According to the law the following railways at present under construction are to be completed within the period of five years: in 1924 - the Iisalmi-Ylivieska railway (already open to traffic) of a length of 154 kilometres; the Uuras (Trangsund) railway, 13.5 km ; the Suojärvi railway extension, 19 km ; and the Kontiomäki-Sotkamo ( 31 km ) and the Kontiomäki-KKiehimä ( 15 km ) sections of the Oulu-Vaala-Nurmes railway; in 1927 - the Karunki-Tengeliönjoki railway, 43 km . From 1926 onward work on the Oulu-Nurmes railway is to the continued simultaneously on the section Oulu-Vaala-Kiehimä ( 147 km ) and the section Sotkamo-Nurmes ( 88 km ). The following new railways are provided for by the law: the Vij.-puri-Paakkola-Pölläkkälä ( 49 km ) and the Joensuu-Outokumpu railway ( 50 km ), work on both of which is to be begun in 192.6 and completed in 1928; the Rovaniemi-Kemijärvi railway ( 85 km ), work on which is to be begun in 1927; the Lahti-Heinola railway ( 35.6 km ) to be begun in 1928 and the Läskelä-Pitkäranta ( 40 km ) and the Pori-Haapamäki ( 193 km ) railways, the two latter to be begun in 1929. The completion of the last four railways falls within the next construction period.

ADDITIONS TO THE BUDGET FOR 1925.
In addition to the 1926 Budget the Diet was called upon to deal with Government proposals for additions to the 1925 Budget. It has become customary to combine at the end of the year all small additions to the Budget which have
proved necessary in the course of the year, into one bill for a socalled supplementary Budget. This supplementary Budget for 1925 contained increases on railway expenditure amounting to $27,051,950$ marks and on extraordinary expenditure to the amount of $143,491,135$ marks 81 penni. The most considerable items among these increases were: redemption of the 1918 Railway Loan 99,413,600 marks; extensions of the State sulphuric acid and superphosphate works 14 million marks; and a transport to the Export Credits fund of 10 million marks, to which we shall refer later.

Earlier in the year already the Diet had approved of certain supplementary grants, including funds for the etablishment of an ether and nitrogen works in connection with the Government gunpowder factory and for the purchase of the Free Harbour at Hanko (Hangö).

## FOREIGN LOAN.

As it had become essential to oibtain foreign capital for some Government undertakings intended to develop the productive capacity of the country, the Diet grave its assent in March, 1925, to the raising of one or more bond loans in foreign currency to the nominal equivalent of 800 million marks before the end of 1926 , to be used chiefly for construction work on the new power station at Imatra, for colonization credits, working credits for small farmers and the general improvement of agricultural credit conditions. On the strength of this authority a bond loan of 10 million dollars was raised in March for the apportionment of which in its use the reader is referred to the account given in Nos. 4 and 11 of the 19215 issues of this Bulletin.

## EXPORT CREDITS SCHEME.

In 1924 the Diet had already granted a sum of 10 million marks for an export credits scheme. As it proved later that industry and agricultural production both needed further support for developing exports, the Diet passed a law in 1925 for the organisation of State export credits. According to this law the Government or the Ministry concerned are authorised during 1926-

1929 to grant, where sales of Finnish industrial or agricultural products have been made abroad, Government guarantees up to a maximum of $75 \%$ of the selling price, but not for longer periods than six months and in every case against sufficient secunity. The total amount of such guarantees may at no time exceed 50 million marks. With the same object of promoting exports a special export credits fund outside the Budget was established loy a. law, the Diet transferring a sum of 10 million marks to this fund.

## AGREEMENTS WHIT FOREIGN POWERS.

A number of agreements with other powers were submitted to the Diet in 1.925 and were approved in each case. Thus the Diet approved
the following agreements: the Trade Agreemeat between Finland and Spain; the Temporary Trade Agreement between Finland and the United States of Amerioa; the Trade and Shipping Agreement between Finland and Japan; an agreement relating to reindeer in the border districts between Finland and Sweden; and the agreements signed at Berne in $19: 24$ relating to the carriage of goods on railways and the carriage of passengers and luggage on railways.

It has, of course, only been possible in the foregoing to refer to the main points in the most important legislative matters of an economic nature decided by the Diet. In addition to these, a number of secondary questions were dealt with which lack of space compels us to leave without mention.

# RESULTS OF THE BANK OF FINLAND FOR 1925.

## BALANOE SHEET.

The balance sheet of the Bank of Finland at the end of 1905, its 114th year of business, differs in several respects from former years, owing to the changes called forth by the return to a gold standard and the new regulations for the Bank. For the sake of comparison, however, the balance sheet at the end of 1924 is published below side by side with the balance sheet on December 31, 1925.

| Ordinary cover: Assets. | $\begin{gathered} 1924 \\ 31{ }^{1924}{ }_{\mathrm{ec}}^{\mathrm{Mij}} \end{gathered}$ |  |
| :---: | :---: | :---: |
| Gold reserve | 43.3 | 331.6 |
| Foreign correspondents and credit abroad | 793.9 | 1,408.0 |
| Supplementary cover: |  |  |
| Foreign bills | 9.2 | 101.6 |
| Foreign bank notes and coupons | 0.9 | 1.5 |
| Inland bills | 381.5 | 398.2 |
| Rediscounted inland bills | 158.1 | 25.9 |
| Finnish silver coin | 0.5 |  |

| Bonds in foreign currency | 3.8 | - |
| :---: | :---: | :---: |
| Finnish State bonds in Finnish currency | 434.1 |  |
| Other State obligations ....... | 48.0 | - |
| Other assets: |  |  |
| Loans on security | 4.3 | 31.1 |
| Advances on cash credit | 7.2 | 23.7 |
| Finnish State bonds in Finnish currency | - | 325.2 |
| Other State obligations | - | 36.0 |
| Bonds in foreign currency | - | 17.6 |
| Finnish silver coin | - | 0.5 |
| Bank premises and furniture .. | 12.0 | 1.2 .0 |
| Sundry assets ................ | 114.9 | 105.1 |
| Total | 2,011.7 | $\underline{2,818.0}$ |
| Liabilities. |  |  |
| Liabilities payable on demand: |  |  |
| Notes in circulation | 1,249.9 | 1,309.5: |
| Drafts outstanding | 8.1 | 8.1 |
| Balance of current accounts due to Government $\qquad$ | 158.0 | 505.7 |
| Balance of current accounts due to others | 45.8 | 51.4 |
| Credit abroad | 244.8 | 256.2 |
| Foreign correspondents | 6.8 | 10.6 |
| Sundry accounts | 23.5 | 30.6 |

Among such changes as are conditioned by the bookkeeping the increase in the gold reserve deserves mention in the first place. The gold reserve was hitherto booked in old gold marks, while the other items in the balance sheet were given in paper marks. Now, of course, all the amounts are given in gold marks in accordance with the monetary law of December 21, 1925, which are identical in value with paper marks, but of which 7.66 correspond to an old gold mark. The supplementary cover now only includes four items, as silver coin, bonds in foreign currency and Finnish State obligations may no longer be referred to it.

The increase in the capital of the Bank is chiefly a result of the altered book value of the gold reserve. In addition, the reserved profits and last year's profits have been transferred to the capital. By these means the capital has risen from 100 million marks to the amount of 500 million marks laid down in the new regulations, while thie reserve fund, excluding the profits for 1925 , has risen by 0.7 million marks.

Of other changes in the balance sheet of the Bank of Finland, the considerable rise in foreign currency is striking. Setting aside the foreign credit of the Bank, which was booked at the end of 1924 at 244.8 million marks, but a year later at 256.2 million marks, the reserve of foreign currency increased from 549.1 millions to $1,151.8$ million marks, or by no less than 602.7 millions, which is equivalent to $109.7 \%$.

The appreciable strengthening of the position of the Bank of Finland, which occurred during the past year, is also apparent in other ways. A year ago the Bank only held an insignificant amount in foreign bills, but at the end of 1925 the value of these amounted to 101.6 million marks.

Rediscounts have dropped to an insignificant figure, 25.9 million marks at the end of 1925 ,
from 158.1 millions a year earlier. At the end of 1923 the amount was even larger, viz., 444.1 millions. On the other hand direct credits granted by the Bank have grown slightly in the course of 1925, namely, discounted bills by 16.7 millions, loans on mortgage by 26.8 millions and advances on cash credit by 16.5 million marks.

Attention is further drawn to the fact that .the value of the Bank's State obligations hasgone down appreciably. This is due partly to the Treasury redeeming a large portion of its obligations, and partly to the writing down of the booked value of the obligations.

Under the liabilities it should be noted, in addition to the increase in capital, that the Government now has over 500 million marks on current account, or approximately 350 million marks more than a year ago.

## THE RIGHT OF NOTE ISSUE.

The changes in the right of the Bank of Finland to issue notes will be seen from the following figures. They are drawn up in the new way, which differs to some extent from the method formerly employed.

| Right to Issue Notes. <br> Gold reserve and foreign corres- | $\begin{gathered} 1924 \\ 31 \mathrm{Dec} \\ \text { Mil } \end{gathered}$ | $31^{192 \%}$ |
| :---: | :---: | :---: |
| pondents | 837.2 | 1,739.6 |
| Additional right of issue | 1,500.0 | 1,200.0 |
| Total right to issue notes | 2,337.2 | 2,939.6 |
| Used Amount of Issue. |  |  |
| Notes in circulation | 1,249.9 | 1,309.3 |
| Other liabilities payable on demand | 486.8 | 862.7 |
| Undrawn amount of advances on cash credit | 3.0 | 4.2 |

Note Reserve.

| Note reserve immediately available | 133.6 | 90.6 |
| :---: | :---: | :---: |
| Note reserve dependent on in- |  |  |
| Total | 597.5 | 763.4 |
| Grand total | ,337.2 | ,939.6 |

As has been pointed out in a previous issue of this Bulletin (see $\mathrm{N}: 012,1925$ ) the Bank of Finland's right to issue notes in excess of its gold reserve and undisputed foreign balances has been reduced from 1,500 to 1,200 million marks. Other changes in the right to issue notes and in the exercise of this right are a natural consequence of the changes in the position
of the Bank of Finland explained above. Here we need only mention that the note reserve at the end of 1925, if calculated according to the former regulations for the note cover, would have been 775.1 million marks, or 11.7 million marks more than it is at present. On the other hand, it is 165.9 million marks greater than a year ago and 385.4 millions greater than at the end of 1923.

## PROFIT AND LOSS ACCOUNT.

The results of the year's business of the Bank of Finland for 1924 and 1925 are shown below.

| Credit. | 1924 Mill. Fmk ${ }^{1925}$ |  |
| :---: | :---: | :---: |
| Interest | 81.2 | 73.0 |
| Interest on bonds | 28.0 | 25.2 |
| Agio | 7.5 | 9.2 |
| Various commissions | 2.7 | 5.9 |
| Recovered on debts previously written off ................... | [0.02] | [0.01] |
| Total | 11.9 .4 | 113.3 |
| Debit. |  |  |
| Salaries | 6.5 | 6.6 |
| Pensions | 0.3 | 0.3 |
| Fees to the Supervisors of the |  |  |
| Cost of printing bank notes .. | 5.1 | 2.7 |
| Miscellaneous expenses .... | 2.5 | 2.1 |
| Written off Bank premises | 0.4 | - |
| " , Bank furniture | 0.3 | 0.1 |
| " ", bonds and shares .. | 18.8 | 18.7 |
| Provision for doubtful debts . . | 20.0 | - |
| Total | 54.0 | 30.6 |
| Net profit | 65.4 | 82.7 |
| Total | 119.4 | 113.3 |

The total earnings of the Bank of Finland were slightly less than for the preceding year owing principally to the fact that credits in the country were reduced by the drop in rediscounts and partly owing to the lowering of the bank rate. The earnings of interest on inland business fell off from 68.2 millions in 1924 to 43.0 million marks. The reduction of interest on obligations as a result of the decreased stock of obligations, tended in the same direction. On the other hand a considerable increase in the earnings of the Bank from foreign business may be noted, which is natural, as the reserve of foreign currency rose so much. The agio profits and earnings in commissions, too, exceeded the amounts for the previous year appreciably.

The ordinary expenditure for 1925 amounted to 11.8 million marks. Thanks to the reduction
in the expense of printing notes the expenditure was less than for the year before. Had no writ-ing-off been made, the net profits would therefore have been 1.01 .5 million marks, but the writing-off undertaken altered the final result. In addition to a small amount written off for furniture acquired during the year, the value of the Bank's holding of bonds and shares was written down by about 18.7 million marks. As in previous years considerable amounts were written off the value of obligations. Their booked value was, indeed, higher than their market price which, as a natural result of the high rates of interest, did not constitute more than $70-80 \%$ of the nominal value for State papers bearing 5 to $6 \%$. The amounts written off under this head totalled 16.4 million marks over the amount which was realised on the profit side of the obligation account, while 2.3 million marks were written off the value of the shares purchased by the Bank during the year in the paper mill which manufactures the paper for the Bank's notes. As was pointed out in the report on the business of the Bank for 1924 (see N:o 1, 1925), the Bank has immediately written off the total value of this kind of shares as matter of principle.

The net profits, as already mentioned, amounted to 82.7 million marks. During the last few years the results of the business of the Bank have been as follows:

|  | Mill. Fmk |
| :---: | :---: |
| 1920 | 75.1 |
| 1921 | 98.5 |
| 1922 | 10.5 |
| 1923 | 13.5 |
| 1924 | 65.4 |

The difference in the results for $1920-1923$ is mainly due to the changes in the value of the Finnish mark. Owing to rising rates of exchange for foreign currency the agio profits for 1920 and 1921 were large, whereas a consi.derable agio loss arose in 1922 and 1923 owing to the downward movement of rates of exchange. As regards the last two years, when the value of the Finnish mark was stable, it may be said that the results of the Bank of Finland's business. also indicate a return to normal conditions.

## ITEMS.

Assembly of the Diet. The Diet reassembled on February 1st, when the spring session was opened.

New Government. After negotiations had been carried on for some time the members of the new Government were appointed on the last day of December, 1920. Like the late Government, the new one is formed of representatives of the Agrarian Party and the Finnish Unionist Party, which have now six members each in the Government. The Prime Minister is Kyösti Kallio (Agrarian party), a member of the Diet, who occupied this post on a previous occasion. Among the other ministers the following may be mentioned: professor E. N. Setälä, late Minister of Education, is Minister for Foreign Affairs; professor L. Ingman, formerly Prime Minister, is Minister of Education; professor Kyösti Järvinen is Minister of Finance.

Navigation Agreement between Finland and U. S. A. Through an exchange of notes an agreement concerning tonnage dues and other charges for vessels, was concluded in Washington on December 21st, 1925, between Finland and U_S. A. The agreement, which came into foree on February 1st, guarantees most favoured nations treatment to vessels and their cargoes of the two contracting Parties in the ports of the other Party. The favours conceded to certain countries in regard to the duty of employing pilots and privileges for fishing and sealing vessels in the Arctic Waters of Finland are excepted from the clause of most favoured nations treatment from the Finnish side.
:

The supply of bonds at the Bank of Finland. As will be seen from the balance sheet of the Bank of Findand on January 15th, the supply
of bonds at the Bank underwent a change which is deserving of attention. The Government bonds in Finnish currency were reduced by 89.0 million marks to 237.5 millions, while bonds in foreign currency were increased by 87.3 million marks to 104.9 millions. This change is due to the fact that the Government has redeemed part of its bonds in Finnish currency which were placed at the disposal of the Bank in 1918, in bonds in dollars and pounds sterling. The Government has, as mentioned earlier, undertaken to redeem the remaining bonds of 1918 completely before the end of 1928. Although these bonds in foreign currency cannot serve as cover for the note issue, they are, nevertheless, much more liquid than the former, which are not: quoted abroad.
:

Climatic conditions. The winter started unusually early, cold weather has continued since the beginming of November, whereas as a rule the first cold snap is followed by rainy weather and the winter only starts about Christmas. Snow fell to an unusually heavy dogree. Owing to this, the work in the forests was begun several weeks earlier than usual. The formation of ice began early, too, and progressed quickly owing to the continued cold, so that the whole of the Gulf of Finland and the Gulf of Bothnia are covered by ice and it continues to form southwards in the Baltic. Such an extensive formation of ice is unusual even later in the winter and for the middle of January the conditions are exceptional. When the sea got covered with ice so unexpectedly, a large number of steamers got frozen in; it was only with difficulty that the icebreakers from adjacent countries succeeded in making a way for them into port or clear water. Navigation is confined to the winter ports and even there the icebreakers have had heavy work in keeping traffic open. The milder weather which set in about January 25 th has improved shipping conditions considerably.

Considerable increases of share capital. Several companies have increased their share capital considerably of late. Besides the increases mentioned in former issues of this Bulletin the following issues of Finnish Joint Stock banks may be referred to:

Tampereen Osake-Pankki has decided to raise its capital from 20 to 40 million marks by the issue of 100,000 shares at the nominal price of 200 marks per share. - Södra Finlands Bank is issuing 30,000 new shares at a price of 130 marks per share. In case the issue is oversubscribed, the share capital may be increased by another 50,000 new shares. The capital will thus be raised by 3 or 8 million marks to 15 or 20 millions. - Suomen Maatalous-Osake-Pankki has also raised its oapital by an issue of 25.000 new shares from 15 to 20 million marks.

New postal rates. On January 15th new inland rates of postage came into force. These include a rise in some basic rates, for instance, for ordinary letters from 1:- to 1: 50 marks, for posteards from -: 60 to 1: - mark, but reductions in some other respects. According to
estimates the Post Office in Finland should realise a profit in 1926 of about 30 million marks as compared with about 5 million marks in 1925.

Statistical Year Book of Finland for 1925. The Central Statistical Office recently published the Statistical Year Book of Finland for 192.5. which it has published annually ever since 1879. In the new issue various aspects of questions of population and cultural, economic and social conditions in Finland are dealt with exhaustively in 255 tables on 2899 pages. A new part is added in the form of 21 tables giving a comparative review of the most important features of the conditions referred to in most European countries and the most important countries in other parts of the world.

The year book is published in two editions. the one Finpish and the other Swedish, and the letterpress of the tables is in most cases also given in French. The book costs only 20 marks ( $=1 / 2$ dollar) and can be ordered from the Central Statistioal Office. Helsinki (Helsingfors).

## THE <br> BANK OF FINLAND MONTHLY BULLETIN

#### Abstract

is sent free of charge to anyone wishing to receive it. Finnish booksellers are, however, allowed to sell it at a price of 2 marks per copy. Back numbers and reprints of some articles are also willingly supplied. Correspondence with regard to the Bulletin should be addressed to the Bank of Finland Statistical Department,Helsinki(Helsingfors),Finland.

[^0]:    Statistics, for 1924 and 1925 according to the monthly balance sheets of the Bank of Finland.

[^1]:    * Preliminary figures subject to minor alterations.

[^2]:    ${ }^{1}$ ) Fresh meat, excluding pork.

[^3]:    - Preliminary figures subject to minor alterations. - ${ }^{1}$ ) Dry weight.

[^4]:    According to tlgures supplied by the Statistical Department of the Board of Customs.
    The country of import indicate (from January 1,1918) the land in which goods were purchased, and country of export the land to which goods were sold.

    * Preliminary figurea subject to minor alterations.

[^5]:    ${ }^{2}$ ) The goods have been divided into four groups; 1) raw materials and semi-manufaotured products, 2) machinery, tools, means of transport and other similar means of production, 3) other manufactured products and 4) foodstuffs (food and luxaries).
