

## THE FINNISH MARKET REVIEW.

## GENERAL SURVEY.

During the autumn the economic situation was dominated by widespread and stubborn wages disputes which chiefly affected the metal industry, but spread to other spheres, too, such as some branches of the woodworking industry. As negotiations did not lead to an agreement, strikes occurred in many spheres, the number of workers affected being close on one hundred thousand at its height. When the Government mediators failed in their task, the Confederation of Finnish Trade Unions (SAK) decided to support the strike and force the employers to an agreement by proclaiming a general strike from October 23. However, the joint committee appointed by the Government, on which both employers and workers were represented, reached a settlement satisfactory to both parties before that date, so that the general strike was avoided.

It is not yet quite clear, what effect the settlement will have on wages, but evidently it will raise them to some extent and increase inflation. On the other hand, it may be expected that the pacifying of the labour market will further economic stability. The detrimental effects of the strikes were very widespread. In addition to the losses which the workers have suffered in the form of lost earnings and some industries in the stoppage of production, exports have suffered directly and building activity indirectly by the interruption of work. The adverse effects can also be observed in the money market in the falling off in deposit business and
in the reduction in demand in many branches of the home market. In order to encourage savings and limit investments the financial institutions raised their rates of interest on October 1, and the Bank of Finland its discount rate on November 3, both by 2 per cent:

## THE MONEY MARIKET.

Total deposits by the public in the credit institutions, which had increased considerably in August, fell off in September by 222 million marks as against 2 million a year ago. Deposit accoumts alone fell off by 937 million marks, whereas in September last year they grew by 348 million. From the beginning of the year to the end of September they had increased by 7,812 million marks as against 14,667 million last year. At the end of September the total deposits amounted to 107,951 million marks.

September is generally a bad month for deposits, so that the poor result obtained in that month may partly be considered a normal phenomenon. Besides, the strike movement reduced the possibility of many people of making deposits, caused the withdrawal of deposits and in general created uneasiness among depositors. The ending of the labour disputes and the increase in rates of interest should have an enlivening influence on the desire and ability to make deposits.

This tendency was noticeable in the September statements of the Commercial Banks. Their deposit accounts decreased by 436 million marks, but owing
to a large rise on cheque accounts; total deposits increased by 371 million and from the beginning of the year by 6,283 million as against 6,385 million in the same period a year ago. The weakness of deposit business and the strict credit policy of the central bank forced the Commercial Banks to exercise restraint in granting credit, which is indicated by the circumstance that in September their advances decreased by 36 million marks, whereas a year ago there had been an increase of close on 900 million.
In the position of the Bank of Fin land no great changes occurred during the autumn. Its advances fluctuated to some extent, mainly owing to the fluctuations in the Government's credit requirements, but, broadly speaking, it remained on the same level throughout the year. Treasury bills tended to rise, being at their peakk, 26,230 million, in the last week of October, but the advances to the business world remained unaltered or were slightly reduced. On account of the stringency of the money market the central bank was obliged to grant further credit to other credit institutions, though such credits did not increase to the same extent as in the spring and early summer.

## PRICES.

The upward tendency of prices, which has obtained for a long time, continued. In the cost of living index this tendency was not equally visible, for the Government endeavoured, by means of some measures of economic policy, to prevent too rapid a rise of this index, as otherwise a general rise in wages would have been necessary, owing to wages being dependent on the index. Owing to these measures the official cost of living index (August

1938-July $1939=100$ ), which had risen abruptly in June to 936 points, dropped both in July and August, standing at 926 points in the latter period. In September, in spite of everything, the index rose again to 939 points, though not so much as to render a rise in wages necessary. The wholesale price index ( $1935=100$ ), on the other hand, advanced from 1,290 points in August to 1,325 points in September. The rise of prices in the world market caused a similar tendency in Finland's foreign trade prices. The former unfavourable terms of trade have improved in the last few months.

## TRADE AND INDUSTRY.

Imports continued to be of record proportions. In September they were nearly 2,000 million marks higher in value than in the corresponding month last year and over 1,000 million higher than in August this year, thus exceeding any previous month during the current year. Exports, on the contrary, fell off about 1,500 million marks as compared with August, though they were slightly above the value of exports in September last year. The value of imports during January-September this year amounted to 62,784 million marks and last year to 44,584 million, while the value of exports was correspondingly 58,462 and 42,478 million. The surplus of imports was 4,322 million marks as against 2,106 million marks last year.

Industrial output in the third quarter is not yet known, but the index of working hours shows that it was appreciably greater than a year ago. Export industry, especially, expanded. The strike movement in the autumn had not affected these data.

## CONTENTS OF THE TABLES.

## I. MONEI MARKET.

Bank of Finland:

1. Statement.
2. Note issue.
3. Notes in circulation, foreign currency and cover for the issue of notes.
4. Note reserve, home loans and rediscounted bills.
5. Treasury bills and balances of current accounts.
6. Rates of exchange.

Commercial Banks:
7. Home deposits and the credits from the Bank of Finland.
8. Home loans.
9. Position towards foreign countries.
10. Foreign payment position of all banks.
11. Deposits in Post Office Savings Bank.
12. Deposits in the savings banks.
13. Deposits in co-operative credit societies and consumers' co-operative societies.
14. Deposits in all credit institutions.
15. Insurances in life assurance companies.
16. Changes in number and capital of limited companies.
17. Bankruptcies.
18. Stock Exchange.
19. Stock Exchange index.
III. TRADE AND INDUSTRY.

Foreign trade:
24. Value of imports and exports.
25. Value of imports and exports in different. classes of goods.
26. Imports of the most important articles.
27. Exports of the most important articles.
28. Foreign trade with various countries.
29. Unit value index of imports and exports.

## Home trade and industry:

30. Wholesale trade.
31. Sales of petrol.
32. Volume index of industrial production.
33. Building activity.

## IV. TRAFFIC.

34. Foreign shipping.
35. State Railways.

## V. LEVEL OF PRICES.

36. Wholesale price index.
37. Cost of living index.
38. Bank of Finland building cost index.

## VI. LABOUR MARKET.

39. Index of working hours in industry.
40. Number of unemployed.
41. Cessation of work.

## CERTAIN PARTICULARS ABOUT FINLAND.

## 1. FORM OF GOVERNMENT.

Finland formed a part of the kingdom of Sweden from 1154 to 1809; from 1809 it was an autonomous Grand Duchy connected with Russia up to December 6, 1917, when Finland declared its independence, which was acknowledged by all the Powers including Soviet Russia. It became a republic in 1919. The legislative power of the country is vested in the Diet and the President. The highest executive power is held by the President chosen for a period of 6 years. The President for the current period, March 1,1950 , to March 1,1956 , is Juho Kusti Paaslklvi who has been in office since March 11, 1946 ,

The Diet, composed of 200 members, is elected by universal suffrage. The proportions of the different parties in the Dlet elected in 1948 are at present as follows:

Number
Agrarians
56
Social Democrats . . . . ................................... 54
People's Democrats . . . . . . . . . . . . . . . . . . . . . . . . . . . . 38
Conservatives ............................................ . . . 33
Swedish Party ........................................... 14
Liberals . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 5
2. LAND.

THE AREA is 337009 square kilometres (Great Britain's area is $245000 \mathrm{sq} . \mathrm{km}$. and Italy's area 310000 sq . km.). Of the total area $9.4 \%$ are inland waters. On an average $13.5 \%$ of the land in the South of Finland is cultivated, $1.6 \%$ in the North, $7.5 \%$ of the whole land. Of the land area 21.7 mill. ha ( 58.6 mill. acres) or $70.9 \%$ are covered by forests.

## 3. POPULATION.

NUMBER OF INHABITANTS (1949): 4.0 millions (present-in-area). Sweden (1948) 6.9, Switzerland (1948) 4.6, Denmark (1948) 4.2 and Norway (1948) 3.2 millions.

DENSITY OF POPULATION (1949): In South Finland 22.2 , in North Finland 3.4 and in the whole country an average of 18.0 inhabitants to the square kilometre.

DISTRIBUTION (1949): 74.9 \% of the population Inhabit the country, $25.1 \%$ the towns and urban districts. The largest towns are (1949): Helsinki (Helsingfors), the capital, 359813 inhabitants, Turku (Åbo) 99 274, Tampere (Tammerfors) 95753.

OCCUPATION (1940): agriculture and forestry $51.5 \%$, industry and manual labour $21.0 \%$, commerce $5.1 \%$, transport $4.6 \%$, other occupations $17.8 \%$.

LANGUAGT (1940): Finnish speaking $90.0 \%$, Swedish speaking $9.6 \%$, others $0.4 \%$.

RELIGION (1947): Lutheran $95.8 \%$, Greek-Orthodox $1.7 \%$, others $2.5 \%$

EDUCATION (1048): Practically all persons over 15 years of age are literate. There are three universities (the oldest founded in 1640) and 7 colleges of university standard.

INOREASE OF POPULATION (1948): Births $27.3 \%$ deaths $11.8 \%$ (deaths in France in $194713.0 \%$ and in the United Kingdom in $194712.1 \%$ ), increase $15.8 \%$ oo.

## 4. TRADE AND COMMUNICATIONS.

FOREST RESO URCES (1950): The growing stock comprises 1370 million of solid cub. m. Incl. bark ( 48384 million cub. ft), of which pine is $45.6 \%$, spruce $32.2 \%$, the rest $22.8 \%$ being leaf-trees, chlefly birch. Of the growing stock 7471 milion cub. it, $65.0 \%$ of them pines, are up to the standard required for logs (minimum for sawmill logs $18^{\circ} \times 6^{\prime}$ and for veneer logs $18^{\prime} \times 7^{\prime \prime}$ ). The annual growth is about 41 million of solid cub. m. green wood excl. bark ( 1448 cub . ft). The total removal in 1946 calculated according to the use of wood was 40 million cub. m. ( 1413 million oub. ft). In the yrars 1823 to 1938 , in the then area of the country, it
averaged 41 milllon cub. $m$. ( 1448 million cub. ft) per year the corresponding yearly growth being 46 million cub. $\mathrm{m}_{\mathbf{1}}$ ( 1624 million cub. ft ).

AGRICULTURif (1041): Cultivated land 2.3 million hectares, divided as follows: area under cultivation under 10 hectares $33.1 \%, 10-50$ ha $54.4 \%, 50-100 \mathrm{ha} 7.2 \%$, over 100 ha 5.3 \%. Cultivated land (1949) is divlded between the different kinds of crops as follows: 39.1 \% hay, $11.2 \%$ temporary grass land for grazing, $16.9 \%$ oats, $6.9 \%$ wheat, $5.8 \%$ rye, $5.0 \%$ barley, $4.0 \%$ potatoes, $11.1 \%$ other. The number of dairies in 1948 amounted to 470.

OWNæRSHIP OF LAND (1941): The land area is distributed among different classes of owners approximately as follows: private 49.2 \%, State $41.6 \%$; Joint Stock Companies etc. $7.1 \%$, communities $2.1 \%$

INDUSTRY (1947): Number of industrial concerns 5999 workpeople 249 936, gross value of products of industry 156852 million marks.

LENGTK OF RAILWAYS (1950): 4969 km ., of which 4715 km . State railways and 254 km . private. The gauge is in general 1.624 m

MERCHANT FLEET (1950): Steamships 387 (428 584 gross reg. tons), motor vessels 108 ( 78975 gross reg. tons), sailing ships with auxiliary engine 153 ( 14965 gross reg. tons), other sailing-ships 9 (11 949 gross reg. tons). Total 657 (534 473 gross reg. tons).

## 5. FINANCE AND BANKING.

CURRENCY. Since 1860 Finland has its own monetary system. From 1877 up to 1914 the currency maintained its stable gold value, and after the disturbances caused by the war a gold standard was again introduced from January 1 1926. The unit currency is the mark (Findish markkay = 100 pennil). According to the monetary law of December 21, 1925, a gold coin of 100 marks' value shall contain $3^{25} / 10$ grams of fine gold. Since October 12, 1931, the redemption of bank notes in gold is, however, suspended.

STATE FINANOES. According to the finance accounts for 1949 the State revenue was 125981 million marks, of which 111402 million marks were current revenue, and State expenditure 132827 million marks, of which 92926 million marks were current expenditure. The principal sources of revenue were as tollows: direct taxes 29810 , indirect taxes 21 738, sales tax 29743 , interest and dividends, eto. 0208 State property and undertakings (net) 1402 , and capital re venue 14 579. Fror Public Debt see table 20 in this issue.

MUNICIPAL FINANCES. According to the finance accounts for 1947 expenditure amounted to 19581 million marks. Total revenue was 20426 million marks, of which income from taxation was 11575 million marks. The munici pal income tax (non-progressive) averaged $8.5 \%$ of the ratepayers' income.

THE BANK OF ISSUE.' The Bank of Finland (founded In 1811) is a State Bank. Its head office is in Helsinki (Helsingfors) with branches in Turku (Abo), Pori (Björneborg), Vaasa (Vasa), Oulu (Uleâborg), Kuopio, Joensuu, Mikkeli (S:t Mlchel), Tampere (Tammerfors), Himeenlinna (Tavastehus), Jyväskylib, Kotka and Lahti.

THE COMMERCIAL BANKS (1950): Number 6, possess 460 offices, where all kinds of banking business is transacted There is one banking establishment per 8671 inhabitants.

The largest banks are Kansallis-Osake-Pankki, Oy Pohjolsmaiden Yhdyspankki - Ab Nordiska Föreningsbanken and Helsingin Osakepankki - Helsingfors Aktiebank, all with head offlces in the capital.

OTHER BANKS (1950): Mortgage banks 5, Savings banks 444, Co-operative Credit Societies 726 and a Central Bank for the latter.

# FINLAND'S BALANCE OF PAYMENTS FOR 1949. 

BY

RAGNI BÄRLUND, MAG. PHIL.
FELLOW OF THE BANK OF FINLAND INGTITUTE FOR ECONOMIC RESEARCH.

Foreign intercourse grew more active in many respects in 1949. The volume of exports increased, more travellers crossed the frontiers in both directions, and more units had been added to the merchant fleet, increasing its cearnings. The volume of imports was, however, reduced as less foreign credit was employed than in recent years, while more of the currency arvailable was needed for the repayments on loans. As a matter of fact the demand for foreign goods still far exceeded the quantity for which import licences could be granted. This time it is impossible to get a real picture of the change in the foreign intercourse in terms of payments or receipts, because the two depreciations of the mark carried out in the course of the year brought about a nominal increase in all fomeign values. In consequence of the situation on the Finnish export markets the foreign exchange rates were raised by 17.7 per cent on July 4, and on September 19 the mark followed the pound sterling, the dollar rate being again raised by 44.4 per cent and oother rates to the extent in which they followed the dollar.

The year ended in a small sumplus of current income which allowed a corresponding increase in net assets. Long-term borrowing still somewhat exceeded the refunding of debt, but some of this capital was evidently employed for the prepayment of 1950 imports. The relatively favourable result was possible because, statistically, the war reparations do not affect the net balance of payments and receip.ts, although actually they make a great additional demand on the resources of the country.

## PRINCIPLES OF CALCULATION.

As before, the data for current transactions have been collected by the Central Statistical Office and those for capital movement by the Banik of Finland Institute for Economic Research. The following figures slightly differ from those recently published by the Central Statistical Office, because, in the interval, it has been possible to specify most of the factors not known at an earlier stage but constituting a large item of ,errors and omissions". The recent acquisition of more detailed information than that available when the original report for 1948 was made, has necessitated a thorough revision of the movement of official short-term capital as previously reported.

The balance has been drawn up according to the principles adopted by the International Monetary Fund. It is divided inito current transactions and capital movement, which are counterparts of each other. War reparations are included in exports and counterbalanced by debit item in donations. Thus they do not show in the net balance, which agrees with the fact that the deliveries do not involve any actual foreign payments.

CURRENT TRANSACTIONS.
The current receipts and payments and their net amount in the balance of payments for 1948 and 1949 are shown in the table below.

The real change in the balance of payments situation in 1949 as compared with the year before is obscured by the rise in the exchange rates of the foreign currencies referred to above. This rise has increased all the foreign values; apart from any real change in the quantity of goods and services interchanged with foreign countries, and the statistics do not suffice for an analysis of the material in this respect.

Current receipts amounted to 94,040 midlion marks and current payments to 92,500 million marks, leaving a total credit surplus of 1,540 midlion in 1949. As usual foreign trade formed the most important item of the balance. For exports the conditions were rather unfavourable; the volume of goods exported increased by 19 per cent, lbut the unit prices, in spite of the increase in the exchange rates, were reduced by more than 3 per cent on an average. In the table above the greater part of the merchandise receipts refer to free exports (f.o.b.), 55,360 million in 1948 and 64,480 million in 1949, with some minor adjustments of the official values. These figures exclude the exports to the Soviet Union on account of former German assets, 1,030 million marks' worth in 1948 and 530 million. in 1949, as recorded in the special clearing account. The rest of the merchandise receipts consist of 11,550 million marks of reparations deliveries in 1948 and 12,230 mitlion in 1949. The counter-entries of the reparations are entered as payments under donations. The increase in imports was apparent only; actually there was a drop in the volume of imports, of about 7 per cent. This was, however, more than offset by
a rise in the unit prices of the imported goods as expressed in marks. A total of 67,440 million marks was paid abroad for merchandise in 1948 and 69,480 million marks in 1949. The payments for merchandise in the table above include the slightly adjusted official import figures, and for 1949 in addition an amount of 2,350 million marks, estimated to cover an undervaluation in these figures in connection with the depreciation of the mark. They also include smuggling, estimated at 230 million marks and the value of gifts in kind, 630 million in the same year.

Of the total transportation receipts in the table above 6,750 million marks consist of gross shipping freights in 1948 and 7,820 million in 1949. The rest represent harbour charges and repairs, besides which 1,090 million marks were received in 1949 as compensation for war embargo on ships. The corresponding payments include the estimated part of the gross freights used by Finnish ships abroad, 2,360 million marks in 1948 and 2,740 in 1949. The rest is repair costs. It should be remembered that, as usual, shipping freights are partly earned in transporting imported goods, i.e. from the point of view of the balance of payments, both freight incomes and the import value inolude amounts which do not involve any foreign payment. Fet, what is thus eaxned by shipping counterbalances what is paid for imports, raising the totals, but without influencing the balance. On the other hand, the passenger fares paid by Finnish residents to home ships have been estimated and deducted from the shipping receipts.

The payments on investments. consist of interest, mainly on loans. This item has been increasing with the borrowing in recent years, and it will increase still more with the removal of the moratorium on the Swedish loans in 1950 . Donations received consist of gifts in kind valued at 900 million marks in 1948 and 630 million in 1949, and money gifts of 490 and 250 million respectively. Donations paid represent the countervalue of war reparations. Figures have this time been available of miscellaneous receipts and
payments, such as personal services, commissions, copyright and royalties and other items of which the amounts have not previously been known. In 1949 this group totalled 2,840 million marks of receipts and 1,890 million of payments.

## MOVEMENT OF CAPITAL AND MONETARY GOLD.

The net movement of assets and liabilities increasing and decreasing (-) is entered below for 1948 and 1949.

The term official institutions loans is used in a wide sense, including those guaranteed by the State. The short-term capitail movement includes the real temporary operations where the investments mature on demand or within 12 months after the obligation was incurred. All other investments are entered as long-term.

In 1948 the considerable deficit in the current foreign transactions caused a reduction in assets of 2,203 million marks, while liabilities increased by 4,573 million. In 1949 the situation was reversed: current receipts exceeded current payments. The necessary repayments of loans were more than covered by new long-term advances. Total liabilities increased by 3,693 million marks, most of it in the form of shortterm banking capital including liabilities on clearing accounts. On the other hand, assets increased still more. This was the case particularly with the assets on clearing accounts which, like the corresponding liabilities, increased in consequence of the expanding trade on a clearing basis with a number of countries. There was also an increase in the pre-
payments of imports, private as well as official, and in the currency reserve, while the monetary gold reserve remained practically unchanged. The total increase in assats was 4,866 million marks and the net outward capital movement 1,173 million marks. This leaves an amount of 367 million marks of the current transactions surplus, the employment of which cannot be accounted for owing to the inadequacy of the material on which these calculations are based.

The long-term private liabilities were slightly reduced by the repayment of nonguaranteed bond loans. Short-term private liabilities decreased by a net amount of 1,346 million marks because of a reduction in the prepayments received on exports. Private short-term assets increased as means were deposited or paid in advance for 1950 imports, partly in barter trade, goods having been sent abroad in exchange for other goods which did not arrive before the end of the year.

The rigorous currency control still maintained eliminates many categories of capital movement and restricts most of
the financial transactions to the banks or to the Treasury. Important private operations are carried out under State guarantee and therefore are here recorded as official transactions. However, this does not involve any essential change from earlier practice, because in Finland the private currency transactions have mostly been rather unimportant even in normal times. In thie last two years the longterm official and banking liabilities, in the wider sense of these statistics, have changed as follows:

| 1948 |  | 1949 |  |
| :---: | :---: | :---: | :---: |
| Increase | Decrease | Increase | Decreas |
| MIII, mk | Mill. mk | Mill. mk | Mill. mk |
| 7,221 | - | 5,496 |  |
|  | -84 | 1 | $-113$ |
| - | -667 | - | $-507$ |
| - | -984 |  | -3,447 |
| 566 | -2,012 | 26 | -928 |

| Official loans | 7,221 |  | 5,496 |  |
| :---: | :---: | :---: | :---: | :---: |
| Bond loans |  | -84 | 1 | -113 |
| Amortization |  | -667 | - | $-507$ |
| Other contractual repayments . . . | - | -984 | - | -3,447 |
| Other long-term capital movement | 566 | -2,012 | 26 | $-928$ |

Total change in
long-term official
liabilities $\quad \ldots .97,787-3,697 \quad 5,523-4,995$
Net change :... 4,090 . 528

Of the foreign credits granted in earlier yeans large amounts were still undrawn in the beginning of 1949. In addition an official loan of 305 million Belgian franes was raised for the purchase of railway rails in Belgium. The International Bank for Reconstruction and Development granted a loan of 12.5 million dollars to the Bank of Finland, partly for the purchases by the woodworking industry and partly for those by the cement industry and power-stations. Anr other loan of 2.3 million dollars was granted by the same bank, also to the woodworking industry through the intermediary of the Bank of Finland, none of which had been used before the and of the year. The government-guaranteed advances for the purchase of ships were further increased. Total official credits were utilized in 1949 to an amount of 5,496 million marks. The countries extending the loans are shown in the following table, indicating the amownts drawn in 1948 and 1949.

|  | Amounts drawn |  |
| :---: | :---: | :---: |
|  | 1948 | 1949 |
|  | Mill. mk | 'Mill. mk |
| Argentina | 3,341 | 2,485 |
| Belgivm |  | 408 |
| Brazil | ${ }^{8}$ | 49 |
| Colombia | 538 |  |
| Denmark | 34 | 46 |
| IBRD |  | 236 |
| Sweden | 28 |  |
| Great Britain | 300 | 175 |
| United States | 2,977 | 2,097 |
| Total amiounts | 7,221 | 5,496 |

The currency situation has not been favourable of late to the repurchase of bonds or other noncontractual repayments on the foreign debt. Instead, both amortization in serial instalments and other contractual repayments have demanded considerable amounts, the former 667 million manks in 1948 and 507 million in 1949, the latter 934 and 3,447 million respectively in these two years. In 1949 the largest items of amortization consisted of the last instalments of the British and French war loans. The other contractual repayments were chiefly made on the cotton credits, the Argentine loans and the ship purchase credits. Generally the repayment on the new debt incurred in recent years has not started immediately; often it begins only after the termination of the war reparations period. On the debt to Sweden no repayment will begin until 1954. The other long-term capital movement registered a decrease in liabilities caused by payments to the Soviet Union on account of former German assets.

## THE FTINANCING OF INTERNATIONAL TRANSACTIONS.

The capital movement in the balance of payments is the counterpart of the current transactions, but it also contains transactions which are necessary independently of the simultaneous current transactions. Such are the payments representing obligations under international agreements and contracts which have to be met regardless of the status of the balance of payments. Together they have been called the special official financing; which for 1948 and 1949 include the items listed below. In order to simplify the presenta-
tion such offsetting transactions as only involve shifts from one category of debt to 'another have been eliminated. Consequently the identification of these figures in the tables above may sometimes prove difficult.

|  | $\begin{gathered} 1948 \\ \text { MiII, mk } \end{gathered}$ | $\begin{gathered} 1949 \\ \text { Mill. mk } \end{gathered}$ |
| :---: | :---: | :---: |
| Reparations | 1,550 | -12,230 |
| Repatriation of bonds | -84 | -112 |
| Amortization ..... | -667 | -507 |
| Other contractual repayments | $-934$ | -3,447 |
| Payments to the Soviet Union of former German claims, net ............. | -1,446 | -902 |
| IBRD subscription, net | -104 |  |
| Currency reserve under documentary credits ...... | 3,597 | 1,544 |
| Total special official financing ......................... | -11,188 | -15,054 |

Thus the obligations having first demands on the available supply of currency have been considerable, 11,188 million marks in 1948 and 15,654 million in 1949. In its study on the balance of payments of the countries of the world the International Monetary Fund has introduced a concept of compensatory official financing to indicate the financing undertaken by the monetary authorities, including the commercial banks, to provide the exchange necessary to cover these obligations as well as the surplus or deficit in current transactions, and the net private capital movement. The following specification shows the total amounts to be met by such compensatory official financing.

|  | $\begin{gathered} 1948 \\ \text { Mit1. } \mathrm{mk} \end{gathered}$ | $\begin{gathered} 1949 \\ \text { Mill. } \mathrm{mk} \end{gathered}$ |
| :---: | :---: | :---: |
| Current receipts | 79,220 | 94,040 |
| Current payments (excluding domations equal to repparaltioms) | -74,240 | -80,270 |
| Private capital, net |  |  |
| Long-term | -47 | -41 |
| Short-term | -1,174 | -3,161 |
| Special official financing | -11,188 | -15,654 |
| Errors and omissions .... | -206 | $\checkmark 367$ |
| Total to be coverad by compensatory official financing | -7,635 | $-5,453$ |

The amounts to be met by compensatory transactions totalled 7,635 million marks in 1948 and 5,453 million in 1949. They were met in the following way:

|  | $\begin{gathered} 1948 \\ \text { мill. mk } \end{gathered}$ | $\begin{gathered} 1949 \\ \text { Mill. mk } \end{gathered}$ |
| :---: | :---: | :---: |
| Drawn on long-term credits | 7,221 | 5,496 |
| Short-term capital, net |  |  |
| Clearing accounts | 1,980 | -1,164 |
| Other liabilities | $\bigcirc 885$ | 3,550 |
| Other assets | 133 | -2,427 |
| Monetary gold | -814 | -2 |
| Total compensatory official financing | 7,635 | 5,453 |

Broadly speaking the new long-term credits drawn in 1949 met the demand for compensatory capital referred to above. The changes in the various categories of short-term official capital offset each other: the increase in clearing assets exceeded the increase in clearing liabilities by 1,164 million marks, while the increase in other liabilities exceeded the increase in other (uncommitted) assets and monetary gold by 1,121 million.

## THE BALANCE OF PAYMENTY IN 1947-1950.

The ehanges in the value of the mark prevent an exact comparison of the figures for different years, but the broad lines of movement are discernible. In 1947 current transactions nearly balanced, but considerable new long-term credits were used which covered contractual payments on debts and part of the increase in the assets set aside for certain future imports. In 1948 these reserves and the new credits again received in a large number of countries allowed such quantities of imports that they raised current payments to 6,570 million marks over current receipts in addition to the contractual payments of 3,047 million on the debt, as seen above. In 1949 the worst pressure of the need for imports had already been met and the most urgent arrears made up. In consequence current payments could be kept 1,540 million marks below current receipts, which made an increase in met assets possible, even though new borrowing was still necessary, chiefly in order to cover the contractuail repayments on debts.

Data for 1950 are available for the first half of the year, but owing to seasonal variations they are not quite comparable
with those for a whole year. In the beginning of the year there is regularly a surplus of imports which is later more or less evened out by a surplus of exports when the shipping season opens in summer. In January-June of this year current payments amounted to 51,790 million marks and current receipts to 45,320 million, the surplus of payments thus being 6,470 million marks, figures that in some of their component items are based on rough estimates only. The deficit was financed by short-term funds; some foreign exchange that had been reserved for this purpose at the end of the previous year, and some free private and official assets were used for it. Short-term liabilities, on the other hand, were reduced, and the new long-term loans merely sufficed for the repayment of old loans. By the end of September the surplus of imports had already been substantially reduced.

The extensive system of control which has, by force of circumstance, dominated trade and currencies in the past decade still characterizes Finnish foreign connections. The balance of payments has therefore not been the result of the free demand for the exchange of goods and services with foreign countries, but is rather artificial in structure. The calculations above, although incomplete in many respects, attempt to show the nature of this structure. The totals indicate the great scope of the foreign transactions as compared with the national output, which for instance for 1949 has been estimated at about 325,000 million marks. It is also evident that by foreign borrowing the burden of reconstruction has been spread over a number of years. Without this arrangement the restoration of normal conditions would not have reached nearly its present extent.

# THE FINNISH SAVINGS BANKS. 

BY
LAURI LEVAMÄKI, MAG. PHIf. MANAGING DIREGTOR OF THE LEAGUE OF FINNISH SAVINGS BANKS.

THE GROWTH OF SAVINGS BANKS BUSINESS.
With the exception of the Bank of Finland, established in 1811, the Savings Baniks are the oldest credit institutions in Finland. Their business was started at the same time as in the other Northern countries. The first Savings Bank was founded in Turku in 1822 and the second in Helsinki in 1825. Subsequently mew Savings Banks were not established until the 1840's, principally in the towns, and in rural districts essentially not until the 1870's, when local communes began to open savings baniks. The number of Savings Banks increased particularly at the beginning of this century. They numbered as follows:

| Year | Number of <br> Savings Banks | Year | Number of <br> Savings Banks |
| :---: | :---: | :---: | :---: |
| 1840 | 2 | 1900 | 193 |
| 1850 | 11 | 1919 | 375 |
| 1860 | 24 | 1920 | 457 |
| 1870 | 35 | 1930 | 479 |
| 1880 | 107 | 1940 | 485 |
| 1890 | 136 | 1950 | 444 |

The reduction in the number of Savings Banks in the 1940's was mainly due to the fact that after the war almost all the Savings Baniks of ceded Carelia and of the Porkkala district, leased to the Sovilet Union, amalgamated with other Savings Banks.

At present 56 of the Savings Banks are situated in towns, 25 in urban districts and 363 in rural districts. Almost every town, urban district and rural commune

has its Savings Banik or a branch office of a Savings Bank.

THE STRUCTURE OF THE SAVINGS BANKS.
The first Savings Banks Act, containing provisions for the organization and activities of these banks, was issued in 1895, a second Act was passed in 1918, and the Act in force at present dates from 1931, although amendments to it were made later on several occasions.

According to the Savings Banks Act, a savings bank is a financial institution of public benefit with the object, without its founders or athers having any right to derive profit from its business, of encouraging habits of thhrift by accepting money on deposit and investing it in a trustworthy manner. A savings bank can be established by one municipal body or by several jointly or by not less than 20 Finnish citizens. The founders must obtain a licence from the Ministry of Finance and have their articles of association confirmed by it. A savings bank must have a capital of not less than 50,000 marks. The business of the savings banik is administered by the Trustees, who act as the representatives of the depositors, the Board, which manages the business of the bank, including grants of credit, and the Manager, under
whom the rest of the staff works. The largest Savings Baniks have a staff of 1050 , the smallest only 1-2.

## DEPOSITS.

Deposits in the Savings Banks consist of Savings Accounts and Capital Accounts (each bearing ait present $71 / 2$ per cent interest or $1 / 2$ per cent more than the commercial banks and the Post Office Savings Bank, though in some large Savings Banks the rate is only $71 / 4$ per cent; not more than 50,000 marks may be withdrawn without notice from such accounts in the course of a calendar month) and Current Accounts ( 2 per cent interest; the right of withdrawal is unlimited).

Deposits were distributed as follows among these accounts at the end of 1949:

|  |  | Mill. mk | Per cent |
| :---: | :---: | :---: | :---: |
| Savings | accounts | 34,516 | 92.1 |
| Capital | accounts | 821 | 2.2 |
| Current | accounts | 2,124 | 5.7 |
|  |  | 37,461 | 100.0 |

The course pursued by deposits in the Savings Banks during and after the second world war, expressed in current marks and converted into 1939 marks on the basis of the cost of living, was as follows:

| Year | In current marks |
| :--- | :---: | :---: |
| Mill. mk |  |$\quad$| In1939 marks <br> Mill. mk |
| :---: |
| 1989 |

Owing to the constant severe fall in the value of the currency (the mark is at present about $1 / 10$ of its pre-war value), the real value of deposits in the Savings Banks decreased appreciably during the 1940's and is now on the same level as at the beginning of the 1930 's.

The number of savings accounts, on the contrary, grew very much during the same period, from 1,230,673 in 1939 to $1,944,184$ in 1949 or by more than half. At present there is a Savings Bank book to almost every other Finnish citizen.

The following table affords a comparison between the recent development of the
deposit business of the Savings Banks and that of other categories of credit institutions.

The share of the Savings Baniks (as of the Commercial Banks) in all deposits, as well as in all actual deposits (omitting current accounts) has thus fallen off. This is particularly due to the Co-operative Credit Societies and the Post Office Savings Bank having greatly developed their deposit business. Of the deposits, however, the Savings Banks still have a larger share in their care than any other credit institution in spite of keen competition, especially with the Co-operative Credit Societies in rural districts.

## LOANS.

The funds of Savings Baniks may be invested in loans repayable on demand or subject to certain term of notice, or in DEPOSITS IN VARIOUS CREDIT INSTITUTIONS.

|  | Total deposits |  |  |  | Savings and capital accounts |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Mill. mk |  | Per cent |  | MIIII. mak |  | Per cent |  |
|  | 1939 | 1949 | 1939 | 1949 | 1939 | 1949 | 1939 | 1949 |
| Commercial banks | 9399 | 54355 | 47.5 | 42.8 | 6940 | 31079 | 40.8 | 31.1 |
| Savings banks | 7722 | 37461 | 39.1 | 29.5 | 7525 | 35337 | 44.2 | 35.3 |
| Co-operative Credit Societies | 1484 | 18156 | 7.5 | 14.3 | 1425 | 16649 | 8.4 | 16.6 |
| Post Office Savings Bank | 453 | 12237 | 2.3 | 9.6 | 453 | 12237 | 2.7 | 12.2 |
| Consumers' Co-operative Societies | 656 | 4649 | 3.3 | 3.7 | 656 | 4649 | 3.8 | 4.6 |
| Central Bank of the Co-operative Credit Societies | 49 | 191 | 0.3 | 0.1 | 28 | 152 | 0.1 | 0.2 |
| Mortgage Bank of Finland | 6 | 19 | 0.0 | 0.0 | 28 | - 5 | 0.1 | 0.0 |
| Total | 19769 | 127058 | 100.0 | 100.0 | 17027 | 100108 | 100.0 | 100.0 |

loans repayable after a certain time not exceeding six months; in overdrafts on current accounts repayable in not more than six months or within a certain period of notrice; in bills maturing within thnee months or less (only 154 Savings Banks transacted business in bills in 1949); in irrevocable mortgage loans transferable to others (not exceeding 10 per cent of the deposits; this form of lending is not in use); further in deposits in public credit institutions carrying on business under State guarantee or subject to public supervision; in bonds; in shares in a bank owned by the Savings Banks; in housing companies established for public benefit; and in real estate owned by the Savings Banks. The security for a loan must consist of a mortgage on real estate, a pledge or personal security, except when the Sitate, a commune or a parish is the borrower.

In 1949 the loans granted by the Savings Banks were distributed as follows:

|  |  | Mill. mk | Per cent |
| :---: | :---: | :---: | :---: |
| Long-term | loans | 26,583 | 91.5 |
| Short-term | loans | 965 | 3.3 |
| Bills |  | 754 | 2.6 |
| Overdrafts | n curre | 763 | 2.6 |
|  |  | 29,065. | 100.0 |

The long-term loans were divided as follows in 1949, according to their form of security:

|  | MIII, mk | Per cent |
| :---: | :---: | :---: |
| Mortgages |  |  |
| on dwelling houses | 11,048 | 41.6 |
| on farm buildings and land | 4,049 | 15.2 |
| on other real estate | 2,942 | 11.1 |
| Guaranteed by a commune, parish or the State ...... | 3,344 | 12.6 |
| Personal guarantees . ....... | 4,345 | 16.3 |
| Pledges .................... | 855 | 3.2 |
| Total | 26,583 | 100.0 |

Thus, 67.9 per cent of the long-term loans, which ane the principal form of credit granted by the Savings Banks, were granted on security in the form of real estate.

A committee on credits set up on the initiative of the Bank of Finland has carried out an investigation into the distribution of the tatal volume of credit according to categories of activity in 1948 and 1949. This showed that the proportion of
the different categories in the credits granted by the Savings Banks (loans and bonds) was as follows (the slight differences from the official Savings Baniks statistics are of no importance; settlement loans negotiated out of State funds are not included):

|  | Mill. mk |  | Per cent |  |
| :---: | :---: | :---: | :---: | :---: |
|  | 1948 | 1949 | 1948 | 19 |
| Industry | 1,328 | 1,833 | 5.5 | 6 |
| Waterpower and electric stations | 382 | 531 | 1.6 |  |
| Building operations | 10,566 | 13,185 | 43.8 | 43. |
| Trade and transport | 1,451 | 2,292 | 6.0 | 7. |
| Agriculture | 3,497 | 5,072 | 14.5 | 16. |
| Communes | 2,147 | 2,544 | 8.9 | 8. |
| Personal and sundry credits . ......... | 1,805 | 2,253 | 7.5 |  |
| Credit and insurance institutions ..... | 116 | 195 | 0.5 | 0. |
| The State | 2,822 | 2,585 | 11.7 | 8. |
| Total | 24,114 | 30,490 | 0.0 |  |

The proportionate share of the Savings Banks in the total credits in the different categories was as follows:

|  | Per cent |  |
| :---: | :---: | :---: |
|  | 1948 | 1949 |
| Industry | 3.6 | 3.9 |
| Waterpower and electric stations . ................ | 5.4 | 5.0 |
| Building operations | 49.0 | 48.6 |
| Trade and transport | 7.1 | 8.5 |
| Agriculture | 33.3 | 37.5 |
| Communes | 34.2 | 30:1 |
| Personal and sundry credits | 30.0 | 30.4 |

During the whole of their existence the Savings Banks have made it their first object to satisfy the demand for mortgage loans. The largest part of their loans has in recent years, too, fallen to the share of building operations, both in the towns and rural districts. The Savings Banks are still the largest creditors for building activity, lapproximately half of the building loans having been obtained from the Savings Banks. In granting agricultural loans the Co-operative Credit Societies have gained appreciable importance of late, but in this sphere, too, the Savings Banks continue to play a considerable part: of the volume of agricultural credit in 1949 close on half came from the Cooperative Credit Societies and more than one third from the Savings Banks. In meeting the credit requirements of the communes the Savings Banks occupy the first place.

## SAVINGS BANK CREDITS

The tatal volume of credit of the country was distributed among the different credit institutions as follows in 1948 and 1949 according to the investigations referred to:

At present the Savings Banks generally charge $91 / 2$ per cent interest on first-class mortgage loans. The rates on other loans fluctuate between $93 / 4$ and $101 / 2$ per cent.

## OTHER BUSINESS.

In addition to accepting depasits and granting credits the Savings Banks perform many other duties. They collect Government, communal and church taxes, sell bonds and redeem them and coupons on
them, receive insurance premiums, take part in bank giro business, sell ban:k-pastbills and take charge of the funds of communes and parishes.

Through the Central Bank of the Savings Banks a transfer of savings has been organized: on a pass-book issued by any Savings Bank money can be withdrawn or deposited in any other Savings Bank.

Most of the Savings Banks also perform tasks in inculcating thrift in the home, in schools and at places of employment.

## LIQUIDITY AND PROTECTION OF DEPOSI-

 TORS' BATLANCES.In order to preserve their liquidity the Savings Banks must, in accordance with the Savings Banks Act, maintain a cash reserve equal to at least 10 per cent of their deposits. This reserve must be invested in bonds issued or graaranteed by the State or deposited with the Bank of Finland or with a credit institution subject to the Banik Act. The proportion of the cash reserves to the deposits was 21.0 per cent in 1949 or double the proportion prescribed by law. In addition to the cash reserve the Savings Banks must maintain a cover for honouring cheques,
which amounted on the same date to 83.1 per cent of the overdrafts granted on current accounts or four times as much as the law stipulates.

The greater part of the met profit made by the Savings Banks is employed in forming and increasing reserve funds. As the profits of the Savings Banks have fallen off very much of late, owing to the rise in costs, the increase of reserves has been affected. Expenses were 0.67 per cent of the balance sheet total in 1939 and 1.34 per cent in 1949, net profits 0.57 per cent in 1939 and 0.37 per cent in 1949. The proportion of the capital and reserve funds to the deposits was 9.2 per cent in 1939 and 2.6 per cent in 1949.

Tho ensure their solvency and to protect depositors' balances the Savings Baniks, on their own initiative, established a Savings Banks Security Fund in 1924, to which they make contributions in accordance with the Savings Banks Act. The capital of this fund amounted to 83 million marks in 1949.

Since 1896 the business of the Savings Banks has been supervised by the Savings Banks Inspectorate in Helsiniki, subordinated to the Ministry of Finance (the present organization dates from 1939), which carries out inspections in the Savings Banks in addition to the audits performed by the annual auditors appointed by the Trustees. The costs of the inspection are borne by the Savings Banks themselves.

During the whole period, in which savings bankss business thas breen transacted in Finland, depositors of the Savings Banks have not suffered the smallest loss through neglect in the management of the banks.

## COLLLABORATION AMONG THE SAVINGS BANES.

All the Savings Banks in the country are members of the League of Finnish Savings Bankss (established in 1906) which has its office in Helsinki and to which 20 local Savings Baniks Associations are affiliated. The object of the League is to encourage the development and collabora-
tion of the Savings Banks, protect their interests and promote thrift. It engages in publicity in the interests of thrift and of Savings Banks, encourages the professional training of Savings Baniks staffs by means of education, advice and publications, and acts as agent for various supplies.
The Central Bank of the Savings Banks (Helsinki; established in 1908, the first in the Northern countries) acts as the central financial institution of the Savings Baniks. It accepts the cash reserves and other funds of the Savings Banks on deposit and pays the highest possible rates of interest on them, supports the liquidity of the Savings Banlks by granting them temporary credit and acts as an intermediary between the Savings Banks and the outside world. The shares of the bank can be held only by Savings Banks.
In 1920 the Savings Banks Pensions Fund was started with the object of affording the safeguard of insurance for the staff of Savings Banks, and in 1928 the Mutual Cash Insurance Company of the Savings Baniks which refunds to its shareholders lasses caused by robbers and burglars.

The Leagrue of Finnish Savings Baniks is represented on the Delegation of the Savings Banks Associations of the Northern Countries (in Stockholm), founded in 1931, and is a member of the International Thrift Institute (in Amsterdam), founded in 1924.

The Savings Banks are old-established in Finland. They have done memorable work in improving the economic and cultural conditions of the country. Side by side with the other credit institutions they retain their important position. By developing old methods of business and introducing new ones they perform valuable services to the community. Even the hard period of inflation failed to cripple their activities, and it seems probable that, as economic conditions in the country recover, they wilh become an increasingly powerful factor in promoting the welfare of the people.

## ITEMS.

Ministerial change. At a session on September 30, 1950, the Prasident of the Republic released Mr Sakari Tuomioja, Governor of the Bank of Finland, from his duties as Minister of Trade and Industry and appointed Mr Teuvo Aura, Director General of the Post Office Savings Bank, as his successor. Mr Tuomioja will retain a seat in the Government and will deal with questions concerning foreign trade.

The rates of interest. The Bank Supervisors of the Diet have raised the interest rates of the Bank of Finland by 2 per cent as from November 3, 1950. Thus, the present minimum discount rate of the Bank is $73 / 4 \mathrm{per}$ cent.
The Commercial Banks, the Savings Banks and other credit institutions, on the suggestion of the joint delegation of the financial institutions, raised their deposit rates by 2 per cent to $7-71 / 2$ per cent and their rate on cheque accounts by 1 per cent to 2 per cent as from October 1. Lending rates were correspondingly increased.

Trade agreements. Finland has recently concluded trade agreements with the following countries.
Switzerland. The agreement refers to the exchange of goods during one year from September 1, 1950, and stipulates that during the period covered by the agreement Finnish exports should amount to 11 million Swiss francs and imports to 9.6 million francs. The difference between exports and imports is to be employed in reducing Finland's present indebtedness in the balance of payments between the two countries. Finland's exports will include skins, hides and furs, butter, salmon, seeds, lichen, rubber goods, sawn timber, birch sheets, matches, bobbins, plywood, walliboard, doors, mechanical pulp, chemical pulp, various paper and cardboard products, household china and earthenware, sanitary and glass ware, and iron and steel goods. The principal articles of import consist of textiles, machin-
ery, apparatus and implements, watches, parts of watches and watchmakers' instruments, chemical and pharmaceutical products, typewriters and calculating machines, dentists' requisites, and fruit.
Norway. During the year covered by the agreement, beginning on November 1, 1950, the value of trade in either direction is estimated at about 39 million Norwegian crowns. Among the exports from Finland pulpwood, plywood, cotton yarn and other textiles, china and earthenware, and electric and other machinery should be mentioned. Imports will include raw materials for the margarine and soap works, aluminium, potassium nitrate, sulphur, titanium, pig-iron and raw materials for the plastic industry.
In connection with the signing of the treaty on October 25, 1950, it was further agreed that the repayment of the credit of 4 million Norwegiam crowns received by Finland in 1946 should be made by the delivery of goods from Finland to Norway in the course of two years, beginning on November 18, 1950.

Czechoslovakia. The agreement refers to the exchange of goods during one year from October 1, 1950; and provides for trade in either direction valued at about 1,150 million marks. Finnish exports include seeds, wooden spools and bobbins, mechanical pulp, chemical pulp, birch and aspen logs, plywood, resin, oil of taurpentine, various kinds of paper and cardboard, machinery for the chemical pulp and paper industry, excavating machines and steam rollers and other machinery, apparatus and implements, copper, gypsonite sheets, and sports articles. Imports from Czechoslovakia will consist of chemicals, rolling mill products, fireclay and a variety of machinery, apparatus and iron and metal goods, such as automatic weaving machines, textile machines, machinery for the boot and shoe, leather and weaving industries, and metal work machinery.

Finnish Fair. In connection with the celebrations of the 400th anniversary of Helsinki the fourth Great Fair was held
on September 30-October 15, 1950. Almost all Finnish industries were represented at the Fair which numbered over 600 exhibitons and covered an area of 34,000 sq. m. Altogether 372,000 people visited the Fair. This is the largest number of visitors to any exhibition in Finland and is probably,
too, the largest in the Northern countries in this sphere. There were many foreigners among the visitors, and the organizers of the Fair, Suomen Messut, supported by the Government and industry, had invited over 30 foreign buyers from $20^{-}$different countries.
