## THE FINNISH MARKET REVIEW.

THE MONEY MARKET.
The state of the money market that had really been marked by great easiness throughout the whole year and especially during the autumn, experienced a further relaxation in November. As the money market is, as a rule, characterised by a comparatively small demand for credit and lively deposit business in December and the next few months, this uncommonly great relaxation will obviously continue during the coming months, too. The consequent fall in rates of interest that has proceeded throughout the year and expresses itself in a rise of the index for bonds from 115 to 126 and is also discernible in falling rates for new issues and conversions of loans, took another great stride downward in the beginning of December. On the 1st of December the Bank Supervisors decided to lawer the official bank rate from $4 \frac{1}{2}$ to 4 per cent, the reduction coming into force on December 3rd. The bank rate thus reached a level that has not occurred since the 1890 's. In accordance with the decision of the joint delegation of the financial institutions the deposit rate has been reduced by $1 / 4$ per cent and the rate on sight accounts by $1 / 2$ per cent from January 1st, 1935, which implies that rates on credits will also fall all along the line.

Deposits in the Joint Stock banks increased in November by 83.8 million marks in comparison with a reduction of 86.7 millions during the same month in 1933. This increase was
entirely due to short-term deposits, while actual deposits decreased by 3.8 millions compared with 38.9 millions last year. At the same time the credits granted by the banks fell off by 96.4 million marks or considerably less than in November, 1933, when the decrease amounted to 188.1 millions. At the end of November, therefore, the deposits of the Joint Stock banks exceeded their credits by 343.8 million marks which shows clearly, how easy the position of the Finnish money market is at present.

November again brought about a considerable improvement in the position of the Joint Stock banks towards foreign countries. By means of their foreign indebtedness being reduced and their foreign balances increasing simultaneously their net foreign credit balances increased by 118.0 million marks and thus reached a higher figure than has occurred during recent years. The net credit balances amounted to 225.7 million marks at the end of November against 95.7 millions a year ago and a net indebtedness of 55.7 millions two years ago.

The position of the Bank of Finland also developed in the same direction and is now quite unusually strong. The foreign credit balances of the Bank increased in November by 99.7 million marks and thus amounted to $1,283.0$ millions. For the sake of comparison we may mention that a year ago the corresponding amount, excluding the Bank's credit abroad, was 826.7 millions and two years ago no more than
267.8 millions. The increase during a year thus amounted to over 450 million marks and during two years to more than 1,000 millions. On the other hand the credits granted by the Bank of Finland displayed a falling tendency as had been the case since the spring. In November the reduction amounted to 54.2 million marks and at the end of November the credits represented 743.1 millions against 817.7 millions a year ago and $1,259.0$ millions two years ago. The note reserve, which hàd risen very much since August, increased in November by 54.6 million marks and thereby reached $1,072.5$ millions, i.e., the highest figure that has ever occurred.

During the first fortnight in December the tendency was in the same direction: the foreign credit balances of the Bank of Finland increased by 57.0 million marks, credits fell off by 59.2 millions and the note reserve rose to a fresh record of $1,198.5$ millions.

The level of prices did not experience any great changes in November. The wholesale price index remained unchanged at 90 , but the index for agricultural produce included in it rose from 74 to 76 and was consequently slightly higher than it had been since the winter of 1932. The cost of living index rose 24 points to 1,022 compared with 1,004 a year ago, this being a consequence of the same tendency of prices for agricultural produce to rise.

## TRADE AND INDUSTRY.

Foreign trade fell off sligtly in November, but was still livelier than at the same time in the last few years. The value of imports amounted to 448.1 million marks against 490.8 millions in October and 404.7 millions in November,
1933. The value of exports was 549.6 million marks against 625.8 millions in the previous month and 504.0 millions in November last year. Thus there was a surplus of exports for November amounting to 101.5 million marks compared with 99.3 and 88.3 millions respectively in 1933 and 1932. For the whole expired period of 1934 there is a surplus of exports of $1,293.0$ million marks, which represents an inconsiderable rise above the corresponding figure. for 1933, $1,270.9$ millions, and is slightly higher than the figure for $1932,1,097.0$ millions.

There has been no change in the timber market. The sale of small parcels left over has continued and the total sales by the middle of December are estimated to amount to about $1,050,000$ standards, the greater part of which has been shipped, up to the end of November about $1,005,000$ standards. The market for delivery next year is quiet. Small contracts have been made chiefly with Denmark and Germany, but the principal buyer, Great Britain, still maintains a waiting attitude, as no agreement has yet been concluded with regard to imports of sawn timber from Russia. It does not seem clear either, to what extent imports from Canada are likely to be affected by the reduced prices for Northern timber.

## THE LABOUR MARKET.

The number of unemployed has risen slightly as usual at this time of the year. The increase in November amounted to about 2,900 . The total number of unemployed thus amounted to 18,600 at the end of November. The improvement in the position is obvious from the fact that the corresponding number a year ago was 45,400 and two years ago 81,000 .

| July | 855 | 957 | 1083 | 903 | 1333 | 1175 | 2010 | 967 | +1 | July |
| August | 884 | 958 | 1083 | 901 | 1333 | 1175 | 2010 | 986 | $+19$ | August |
| September | 886 | 958 | 1083 | 900 | 1333 | 1175 | 2010 | 987 | +11 | September |
| October | 903 | 958 | 1083 | 906 | 1333 | 1175 | 2010 | 998 | $+11$ | October |
| 1 November | 942 | 958 | 1083 | 905 | 1333 | 1175 | 2010 | 1022 | $+24$ | November |

The index is calculated by the Research Office of the Ministry for Social Affairs according to monthly reports from 30 different centres. It is based on the cost of living for the first half of $1914=100$ and refers to the normal budget of a workman's farnily. The ladex for the total cost of hiving is the average of the weighted group indices.
36. - WHOLESALE PRICE INDEX.

| $\begin{aligned} & \text { Whole } \\ & \text { year } \end{aligned}$ | 90 | 89 |  | 74 | 74 |  | 94 | 92 |  | 94 | 93 |  | 88 | 85 |  | 72 | 77 |  | $\begin{aligned} & \text { Whole } \\ & \text { year } \end{aligned}$ |

The index is calculated by the Central Statistical Office, and is based on the average prices for $1926 \Rightarrow 100$. The first group of indices refers to goods appearing in local wholesale trade in Finland, whereas the indices for imported and exported goods refer to the total quantities of goods imported or exported, including the movement of such goods that are in no way intended for wholesale trade in Finland. An indirect weighting has been applied, by means of which each class of goods is represented by the number of commodities corresponding to the calculated importance of this class in wholesale trade. The averages are arithmetical ones.
37. - INDEX OF WORKING HOURS IN INDUSTRY.

| Quarter | Branch of Industry |  |  |  |  |  |  |  | Total | Of which |  | Quarter |

## certian particulars about finland.

## 1. FORM OF GOVERNMENT.

Finland formed a part of the kingdom of Sweden from 1154 to 1809; from 1809 it was an autonomous Grand Duchy connected with Russia up to December 0tı, 1917, when Finland declared its independence, which was acknowledged by all the Powers including Soviet Russia. It became a republic in 1919. The legislative power of the country is vested in the Diet and the President. The thighest executive power is held by the President chosen for a period of 6 years. The present President P. E. Svinhufvud is elected for the term March 1st, 1931, to March 1st, 1937.

The Diet, composed of 200 members, is elected by universal *uffrage. The proportions of the different parties in the Diet elected in 1933 are as follows:

Number
Social-Democratic party ........................................... 78
Agrarian party ................................................... 53
Gwedish party .................................................. 21
Unionist party ..................................................... . . . . . 18
Patriotic National Movement's party .......................... 14
Progressive party .................................................... 11
Small farmers' party
People's party
2. LAND.

THE AREA is 388,217 square kilometres $=149,900$ square miles (Great Britain's area is 89,047 sq. m. and Italy's area 117,982 eq. m.). Of the total area $11.6 \%$ are lakes. On an average $11.8 \%$ of the land in the south of Finland is cultivated, $1.1 \%$ in the North, $6.6 \%$ of the whole land. Of the land area 25.3 mill. ha ( 62.5 mill. acres) or $73.6 \%$ are covered by forests.
tHE AVERAGE TEMPERATURE in the coldest month is in S. W. Finland - $5^{\circ}$ to - $6^{\circ} \mathrm{C}$., in Lappland- $15^{\circ} \mathrm{C}$. and during the warmest month $+15^{\circ}$ and $+13^{\circ}$ to $+14^{\circ} \mathrm{C}$. resp. The average temperature in Helsink (Helsingfors) is $+4.6^{\circ}$ (in Oslo $+5.4^{\circ}$, in Montreal $+5.4^{\circ}$, in Moscow $+3.6^{\circ}$ ). The ground is covered by snow in the South for about 100 days, in Central Finland for 150 to 180 days, in Lappland about 210 days.

## 3. POPULATION.

NUMBER OF INHABITANTS (1933): 3.7 millions (of whom 0.2 million émigrants), Sweden (1933) 6.2, Switzerland (1932) 4.1, Denmark (1982) 3.6 and Norway (1933) 2.9 millions.

DENSITY OF POPULATION (1933): In South-Finland 18.9, in North-Finland 2.6 and in the whole country an average of 10.9 tnhabitants to the square kilometre.

DISTRIBUTION (1933): $79.8 \%$ of the population inhabit the country, $20.2 \%$ the towns and urban districts. The largest towns are (1933): Helsink (Helsingfors), the capital, 288,592 inhabitants, Vilpuri (Wiborg) 71,817, Turku (Åbo) 69,041, Tampere (Tammerfors) 58,220.

OCCOPATION (1930): agriculture $59.6 \%$, industry and manual labour $16.8 \%$, commerce $4.3 \%$, transport $3.8 \%$, other occupations $15.5 \%$.

LANGUAGE (1930): Finnish speaking $89.4 \%$, Swedish speaking $10.1 \%$, others $0.5 \%$.

RELIGION (1933): Lutheran $96.2 \%$, Greek-Orthodox $1.8 \%$, others $2.0 \%$.

EDUCATION (1930): Amongst persons over 15 years of age only $0.9 \%$ are illiterate. There are three universities founded in 1640, 1917 and 1920.

INCREASE OF POPULATION (1033): Births $17.4 \%$, deaths $12.9 \%$ (in France in 1931 16.2 \%or, and in England in $103112.3 \%$ ), natural increase $45 \%$.

## 4. TRADE AND COMMUNICATIONS.

FOREST RESOURCES. The growing stock of the forest is 1,620 million $\mathrm{m}^{2}(57,214$ million cubic feet). The merchantable timber
(measuring 20 cm at breast height $=6 \mathrm{in}$. at a helght of 18 ft .) amounts to 1,557 million trees. Of this number pine is represented by $60.7 \%$, sprace by $28.1 \%$, the conifers thus constituting $88.8 \%$ or 1,383 million trees; leaftrees, mostly birch, $11.2 \%$ or 174 million trees. The annual increment is 44.4 million $\mathrm{m}^{3}(1,568$ million cub.ft.). The annual fellings according to earlier calculations are 40 million $\mathrm{m}^{\mathbf{8}}$ (1,413 million cub. ft.). In North Finland the increment is much larger than the fellings, but in South Finland excess felling occurs locally.

AGRICULTURE (1932): Cuitivated land 2.2 milion hectars, divided as follows: area under cultivation $0 . \mathrm{d}-10$ hectars $\mathbf{3 3 . 4} \%$, $10-50$ ha $52.1 \%, 50-100$ ha $8.4 \%$, over 100 ha $6.1 \%$. Cultivated land is divided between the different kinds of crops as follows: $51.3 \%$ hay, $19.2 \%$ oats, $9.2 \%$ rye, $5 . s \%$ barley, $3.2 \%$ potatoes, $11.8 \%$ other. The number of dairies in 1932 amounted to 636.

OWNERSHIP OF LAND. The land area is distributed among different classes of owners approximately as follows: private $52.1 \%$. State $39.7 \%$, Joint Stock Companies $6.5 \%$, communities $1.7 \%$,

INDUSTRY (1933): Number of industrial concerns 3,527, hands 140,736 , gross value of products of industry 10,837 million marks.

LENGTH OF RAILWAYS (1933): $5,574 \mathbf{k m}$, of which 5,319 km State railways and 255 km private. The gauge is 1.524 m .

COMMERCIAL FLEET (1934): Steamships 548 (251,890 reg. tons net), motor vessels 157 (17 323 r. t.), sailing ships 218 ( 61,168 r. t.). Total 923 ( 330,381 r.t.).

## 5. FINANCE AND BANKING.

CURRENCY. Since 1860 Finland has its own monetary system. From 1877 up to the Great War the currency maintained its stable gold value and after the disturbances caused by the war Finland has again from January 1st, 1926, a gold standard. The unit of carrency is the mark (Finnish markkas) $=100$ pennia. According to the monetary law of December 21st, 1925, a gold coin of 100 marks' value shall contain $3^{16} / 1$, grammes of fine gold. Since October 12th, 1931, the redemption of bank notes in gold is, however, suspended.

STATE FINANCES. According to the balance sheet for 1933 the State revenue was $3,300.5$ million marks of which $2,872.6$ million marks were current revenue, and State expenditure 3,247.2 million marks, of which $2,543.6$ million marks were current expenditure. The principal sources of revenue were as follows: State property and undertakings (net) 186.3, direct taxes 458.8, indirect taxes $1,521.3$, stamp duty 171.3 , charges 85.7 , interest and dividends 145.1 and capital revenue 427.9. The value of State property in 1922 is estimated at $11,150.6$ million marks. For Public Debt see table 19 in this issue.

MUNICIPAL FINANCES. According to the Budget for 1984 expenditure amounted to $1,429.1$ million marks. Income from taxation was calculated at 466.4 million marks, taxed income at 4,878.4 million marks. The communal income tax (non-progressive) averaged $9.4 \%$ of the ratepayers' income.

THE BANK OF ISSUE. The Bank of Finland, (founded in 1811) is a State Bank. Its head-office is in Helsinki (Helsingfors) with branches in Turkn (Abo), Pori (Björneborg), Vaasa (Vasa), Oulu (Uleâborg), Kuopio, Joensun, Sortavald, Viipuri (Wiborg), Nikkeli (S:t Michel), Tampere (Tammerfors), Hämeenlinna (Tavastehus), Jyvăskylă and Kotka.

THE JOINT STOCK BANKS (1934): Number 9, possess 474 offices, where all kinds of banking business is transacted. Including all banks, there is one banking cstablishment per 7,200 inhabitants.

The largest banks are: Kansallis-Osake-Pankki, Ab. Nordiska Föreningsbanken and Helsingfors Aktiebank, all with head offiees in the capital.

OTHER BANKS (1934): Mortgage banks 6, Savings banks 481 Co-operative Credit Societies 1,388 and a Central Bank for the latter.

# THE FINNISH SAVINGS BANKS DURING THE DEPRESSION. 

BY

K. J. KALLIALA, м. A.<br>member of the board of management of the oentral bank of the savings banks.

## INTRODUCTION.

Before giving an account of the business of the Finnish Savings banks during recent years it may, perhaps, be worth while referring briefly to the various circumstances described on a previous occasion in this Bulletin (No. 5, 1931) with regard to the type and forms of business of the Finnish Savings banks.

The Finnish Savings banks are independent institutions subject to the stipulations of a special Savings Bank Act. When the first Savings bank was established in Finland in 1822, the English Trustee Savings Banks and the first Savings bank in Sweden were taken as models.

At present there are 481 Savings banks in Finland. Of these 418 operate in the rural districts and 63 in the towns. The proportion of the deposits in the Savings banks to the total deposits in the country is 33.5 per cent. Since 1918 Savings banks are also entitled to accept money on current account, but the greater part, 97.4 per cent, consists of traditional savings accounts from which money can be withdrawn subject to $1-6$ months' notice or, if the Savings bank agrees, even without notice. The investment of the funds accruing in the Savings banks is prescribed by law. The greater part, 96.4 per cent, of the total assets of the Savings banks represents loans granted on real estate or on personal security. These loans are
formally repayable subject to 3 months' notice, but in practice their total repayment is rarely demanded, if the terms of the loans have been observed.

The Savings banks in the rural districts mostly grant credits to farmers, while in the towns credits on dwelling house property are more usual.

## THE NUMBER OF SAVINGS BANKS.

During 1929-1934 nine new Savings banks started business in Finland and two were liquidated. Both the latter were very small Savings banks and their closing down was due more to the want of local support than to losses caused by the depression. At the end of 1934 the number of Savings banks was 481 as already stated.

During the years referred to 16 branches of Savings banks were opened and $\boldsymbol{Q}$ were closed. Their present number is 48 .

The figures quoted show that the depression did not give the Finnish Savings banks, taken as a whole, any very grave trouble. But as the depression caused a great reduction of income in all classes of the population and a pronounced fall in real values, it is natural that this should also have influenced the business of the Savings banks and that both the liquidity and the solvency of the Savings banks should have been jeopardised.

DEPOSITS IN THE SAVINGS BANKS.
If we only examine the amounts paid into savings accounts in the Savings banks and withdrawn from them during 1929-1933, i.e., excluding the accrued interest, we notice that withdrawals exceeded payments into these accounts in every one of these years in the rural districts and in the towns in 1931 and 1932. The changes in the savings accounts were as follows, in millions of marks:-

|  | Rural $1,834.6$ | $\begin{array}{r} \text { Towns. } \\ 1,736.8 \end{array}$ | Total. 3,571.4 |
| :---: | :---: | :---: | :---: |
| Withdrawn | 2,807.7 | 3,352.1 | 6,159.8 |
| Paid in | 2,343.9 | 3,246.5 | 5,590.4 |
| Excess of withdrawals | 463.8 | 105.6 | 569.4 |
| Accrued interest | 648.4 | 650.8 | 1,299.2 |
| Amount on Dec. 31st, 1933 | 2,019.2 | 2,282.0 | 4,301.2 |

We see from the above figures that, if the total amount paid in during these years is expressed by the figure 100, the withdrawals in the rural districts were 120, in the towns 103 and in the whole country 110. Without reckoning interest, therefore, deposits on savings account fell off by 25.2 per cent in the rural districts from the amount at the beginning of 1929, in the towns by 6.1 per cent, and in the whole country by 15.9 per cent, but if the accrued interest is taken into account, depositors' balances on savings account grew in the rural districts by 9.7 per cent, in the towns by 31.8 per cent and in the whole country by 20.4 per cent.

For the sake of comparison it may be mentioned that during the previous five years, 1924-1928, the amounts paid into savings accounts exceeded the withdrawals by $1,157.2$ million marks and that the total increase in. depositors' balances on savings account was 2,030.0 million marks. Depositors' balances on savings. account grew during that time, without interest, by 75.1 per cent and with interest by 131.7 per cent of the total balances at the beginning of the five years period, i.e., much more than during the period of depression just ended.
Withdrawals of deposits were in general even, excepting in the autumn of 1931, when the suspension of the gold standard caused some anxiety among depositors in the towns. The Savings bank from which most money was withdrawn lost about 10 per cent of its deposits within four months at that time.

In current accounts there was also some decrease in 1929-1933.

The decrease in deposits was comparatively less in the Savings banks than in some of the other classes of financial institutions. As a result the proportion of deposits in the Savings banks to all deposits in the country increased during the time referred to from 30.7 to 38.5 per cent.

The above remarks regarding deposits in the Savings banks only refer to the average development. In individual Savings banks the course of events was rery different. If we group the

Savings banks according to the extent to which their deposits, including interest, increased or decreased, we obtain the following table:-

|  |  | Rural <br> districts. |  |  | Towns. |
| :---: | :---: | :---: | :---: | :---: | :---: | Total.

As these figures indicate, deposits grew more or less in 73.1 per cent of all the Savings banks and decreased in 26.9 per cent. The number of Savings banks in which there was an outward flow of more than $1 / 5$ of the deposits was 33 and among these there was one in which over half of the deposits was lost.

## THE MAINTENANCE OF LIQUIDITY.

Seeing that, as described above, the falling off in deposits was considerable in many Savings banks and almost ruinous in some, the question arises, how the Savings banks maintained their liquidity under such circumstances. Of the special measures adopted in this respect we mention the most important.

In general the Savings banks endeavoured to follow their former custom of allowing small sums to be withdrawn without notice. This procedure was maintained by all the larger Savings banks throughout the whole period of depression, even in the autumn of 1931, when the withdrawals of deposits were above normal. A number of small rural Savings banks, on the contrary, endeavoured during the depression to arrest the withdrawal of deposits by applying their rules regarding notice of withdrawal.

The Savings banks, whose deposits decreased, naturally ceased to grant fresh credits with the exception of small and short-term credits, which the Savings banks endeavoured to grant in all circumstances, partly to help their clients and partly with a view to retaining the confidence of the public.

It proved of great importance for maintaining liquidity that the Savings Bank Act prescribes that a cover should be maintained equal to 10 per cent of the savings accounts and 20 per cent of the current accounts, this being usually in the form of bank deposits. In most of the Savings banks these reserves were sufficient to meet the increased withdrawals, but in those cases in which the decrease in deposits was particularly pronounced other means were employed too.

There might have been a theoretical possibility of recovering the credits already granted, seeing that even the least liquid part of the loans granted by the Savings banks is repayable upon due notice or on demand. In practice, however, this is very difficult, as the public has grown accustomed to looking upon these kinds of loans by the Savings banks as being in effect permanent credits that are not called in as long as the conditions of the loans are fulfilled. When some Savings banks gave notice of recalling such loans, especially from clients domiciled in other places, this provoked embitterment against them. On the other hand a considerable number of loans were repaid voluntarily to the Savings banks, such loans being transferred to ordinary mortgage institutions or to the special mortgage institutions that undertook, with Government support, to organise cheap credits for farmers, who were in hard straits. The money recovered in this way was of great assistance to many of the Savings banks in maintaining their liquidity.

When other means failed, the Savings banks made use of overdrafts in the banks to increase their cash or else negotiated temporary credits mostly from their own Central Bank. The following figures indicate the extent of the
special indebtedness of the Savings banks during the last faw years and the extent of it incurred to the Central Bank of the Savings Banks.

| End of | Total special indebtedness. | Amount thereof borrowed from the Central Bank of the Savings Banks. |  |
| :---: | :---: | :---: | :---: |
|  | Mill. mks. | Mill. mks. | \% |
| 1926 | 22.3 | 16.1 | 72.2 |
| 1927 | 36.5 | 21.8 | 59.8 |
| 1928 | 63.0 | 47.9 | 76.0 |
| 1929 | ${ }^{\text {(i7.6 }}$ | 63.8 | 94.4 |
| 1930 | 57.9 | 50.8 | 87.8 |
| 1931 | 92.3 | 61.9 | 67.1 |
| 1932 | 70.2 | 53.0 | 75.5 |
| 1933 | 37.0 | 32.7 | 88.4 |
| Sept. 1934 |  | 16.3 |  |

These figures show that the special indebtedness of the Savings banks was comparatively small even during the depression. At its highest point, in 1931, it amounted to 2.2 per cent of the total deposits in the Savings banks. In individual cases, however, the proportion was much higher.

It will be seen from the figures quoted above that the greater part of the credits required by the Savings banks was granted by their own Central Bank. When withdrawals of deposits became particularly heavy in the large Savings banks in the towns owing to the suspension of the gold standard, the Bank of Finland granted them credits on security in the form of bonds. The Bank of Finland had no other direct dealings with the Savings banks, but instead granted credits to the Central Bank of the Savings Banks which required them in the first years of depression to meet the seasonal stringency that occurred in its business in the latter half of the year.

During the whole period of depression about 70 Savings banks required large amounts of credit for short or long periods. In such circumstances the existence of the Savings banks' own Central Bank was of eminent importance. It is probable that but for this institution several banks that possessed plenty of vitality in other respects would have had to be closed on account of the difficulty of maintaining their liquidity. Now, having re-
ceived help at the right time, they are able to continue their business and gradually to repay their special indebtedness.

## THE LOSSES OF THE SAVINGS BANKS.

In Finland, as everywhere else, the Saving: banks have endeavoured to invest their fuuds in credits that are entirely free from risk and in normal circumstances their losses have been rare and usually small in extent. But during the last few hard years of depression these institutions have not been able to avoid losses as the following figures indicate: -

| Year. | Number of Savings banks suffering losses. | Total amount of losser. Mill. mks. | Average losses. Marks. | Proportion of losses to total credits. \% |
| :---: | :---: | :---: | :---: | :---: |
| 1928 | 30 | 0.14 | 4,700 | 0.004 |
| 1929 | 38 | 0.40 | 10,500 | 0.01 |
| 1930 | 53 | 1.63 | 30,800 | 0.04 |
| 1931 | 126 | 5.56 | 44,100 | 0.15 |
| 1932 | 176 | 6.39 | 36,300 | 0.17 |
| 1933 | 200 | 7.05 | 35,300 | 0.19 |

In the majority of cases the losses were small, but among them there were also some comparatively heavy ones. The fact that the losses still increased in 1933, when the business conditions had already improved, is to a large extent due to debtors having in many cases been given time to try to arrange matters before the collection of the debt was legally enforced.

The losses on loans on personal security were the most numerous. Consequently the Savings banks demanded real estate as security for several loans on personal security and, when the new Savings Bank Act came into force in 1931 and the articles of the Savings banks had to be amended, the Savings banks adopted the general rule that, unless the interests of the bank called for other measures in special cases, no new loan on personal security was to exceed 50,000 marks.

Generally the Savings banks were able to cover their losses out of their annual profits or by utilising a small part of their reserve funds. In some cases, however, the losses swallowed up the greater part or even the whole of the bank's own funds. In these cases, the num-

ber of which can be fixed at 25, the Savings banks would probably have got into difficulties, if outside assistance had not been available. Under such circumstances it was of great importance that, on the initiative of the central organisation of the Savings banks, a joint Security Fund had been established in 1924 in accordance with a special law, the capital of this Fund amounting to 7 million marks at present and growing by about 1 million marks a year. As the loans granted from this Fund, in the event of a Savings bank getting into difficulty, are repayable out of the funds left over after all the other debts of the Savings bank have been paid, such loans may be considered as replacing the bank's own funds. In 1927-1934 loans were granted from the Security Fund to 14 Savings banks to a total amount of Fmk. 4,332,500:-. Of these Fmk. 341,288:95 have already been repaid. In addition to the above there were 15 cases in which the Savings Banks Inspectors demanded special guarantees for covering the reduction in the banks' own funds. These guarantees were furnished by persons closely connected with the Savings banks, by municipal bodies and in two cases by the Central Bank of the Savings Banks.

By these measures it was achieved that temporary misfortunes did not compel Savings banks that were sound in other respects to close their doors.

BALANCE SHEETS OF THE SAVINGS BANKS BEFORE AND AFTER THE DEPRESSION.
The balance sheets of the Finnish Savings banks at the end of 1928 and 1933 are shown in the table below.

BALANOE SHEETS OF THE SAVINGS BANKS IN 1928 AND 1933 .

|  | 1928 |  | 1933 |  |
| :---: | :---: | :---: | :---: | :---: |
|  | $\underset{\text { mill. }}{\text { mils. }}$ | \% | $\underset{\text { mill }}{\text { Mill }}$ | \% |
| Liabilities: |  |  |  |  |
| Deposits | 3,571.4 | 89.5 | 4,301.2 | 88.5 |
| Current accounts | 136.4 | 3.4 | 112.6 | 2.3 |
| Own funds | 205.3 | 5.1 | 393.4 | 8.1 |
| Liabilities to banks: |  |  |  |  |
| loans | 27.9 | 0.7 | 17.7 | 0.3 |
| overdrafts | 35.1 | 0.9 | 19.3 | 0.4 |
| Other liabilities | 13.9 | 0.4 | 18.6 | 0.4 |
| Total | 3,990.0] | 100.0 | \|4,862.8 | 100.0 |
| Assets: |  |  |  |  |
| Cash and current accounts in banks | 69.8 | 1.7 | 107.4 | 2.2 |
| Deposits in banks (usually <br> subject to 6 months notice) | 234.0 | 5.9 | 314.8 | 6.5 |
| Loans (usually subject to 3 months' notice): |  |  |  |  |
|  |  |  |  |  |
|  | 1,676.3 | 42.0 | 2,472.4 | 50.8 |
| on personal security | 1,129.4 | 28.3 | 863.4 | 17.8 |
| to municipalities, etc. .... | 136.7 | 3.4 | 191.8 | 3.9 |
| on pledges (shares, etc.). | 177.6 | 4.5 | 143.8 | 3.0 |
| Short-term credits. | 62.6 | 1.6 | 51.3 | 1.1 |
| Overdrafts | 62.4 | 1.6 | 30.5 | 0.6 |
| Bills. | 96.3 | 2.4 | 34.7 | 0.7 |
| Bonds | 146.7 | 3.7 | 303.8 | 6.2 |
| Shares, etc. | 53.9 | 1.3 | 52.7 | 1.1 |
| Premises | 90.7 | 2.3 | 211.8 | 4.4 |
| Other assets | 53.6 | 1.3 | 84.4 | 1.7 |
| Total | 3990.0 | 100.0 | [4,862.8\| | 100.0 |

In examining these figures we are struck by the increase in the banks' own funds among the liabilities. At the end of 1928 the Savings banks' own funds represented 5.7 per cent of deposits, but by the end of 1933 the corresponding proportion had increased to 9.1 per cent. This is, of course, a result of the increase in deposits having been slow, while the annual profits generally remained normal.

The most striking change among the assets consists in the considerable increase in loans on real estate, while at the same time the importance of other forms of investment fell off correspondingly. The change was largest in the rural districts, where the proportion of loans on real estate to all credits granted increased during the years under review from 34.0 to 55.0 per cent. The corresponding increase in the Savings banks in the towns was from 74.0 to 78.6 per cent. Loans on personal security decreased not only relatively, but also in absolute figures.

With regard to the changes that occurred in other investments the increase in bonds and bank premises should be mentioned.

## CONCLUSION.

It is evident from the above that the depression affected the Finnish Savings banks comparatively slightly. In any case no Savings bank went into liquidation on account of the depression, nor were any emergency measures called for on behalf of the Government or the Bank of issue in order to assist the Savings banks system. However, the fact that the result was so favourable was due in a pronounced measure to the Finnish Savings banks having their own Central Bank and their Security Fund, of which the former was able to assist in overcoming the difficulties of maintaining liquidity and the latter could help, when the solvency of the Savings banks was endangered.

## THE FINNISH STATE BUDGET FOR 1935.

The Diet recently completed the work of dealing with the State Budget for 1935. Formally it only differs from earlier Budgets by some items being subdivided in greater detail than before. Practically, however, the figures indicate that it is estimated that the improvement in the general economic situation will again provide a larger yield next year from some of the most important sources of revenue. As the State revenue has been increased in this way, the Diet has been able to increase some of the expenditure.

It is gratifying to note that the Budget for next year no longer bears signs of the depression. It has been found possible, for instance, to do away with the reduction of pay of civil servants and to revert to the system of disposing of only half of the annual profits of the Bank of Finland, as prescribed in the regulations of the Bank.

Below we give the main features of the State Budget for 1935, as we have done for previous years. If the principal categories only are compared, we get the following table, in which the corresponding figures in the Budget for the current year are included for the sake of comparison.

| Current revenue |  | $\begin{gathered} 1935 \\ \text { Mill. miks. } \end{gathered}$ | $\begin{gathered} 1934 \\ \text { Mill. mks. } \end{gathered}$ |
| :---: | :---: | :---: | :---: |
|  |  | 3,173.9 | 2,886.5 |
| Capital revenue |  | 181.9 | 179.1 |
|  | Total | 3,355.8 | 3,065.6 |
| Current expenditure Capital expenditure |  | 2,677.0 | 2,464.6 |
|  | . . . . | 677.9 | 556.4 |
|  | Total | 3,354.9 | 3,021.0 |

Surplus of revenue over

| expenditure | $\ldots . . . .$. | 0.9 | 44.6 |
| ---: | ---: | ---: | ---: |
|  | Total | $3,355.8$ | $3,065.6$ |

These figures show that the yield of current revenue is estimated to rise by 287.4 million marks, while capital revenue is only increased slightly. On the other hand current expenditure
has been increased by 212.4 million marks and capital expenditure by 121.5 millions. As both revenue and expenditure for the current year will exceed the figures included in the Budget, the Budget for next year does not represent anything like such great differences from the actual figures for the current year.

The Budget for 1935 closes with a small surplus of 0.9 million marks in comparison with 44.6 millions according to the Budget for the current year. This larger surplus was mainly intended to cover the deficit in the Finance Accounts for 1932, whereas there is no such need on the present occasion. It should be noted that revenue and expenditure thus balance without any loans being included in the former, while the regular redemption of the Public Debt is included in the expenditure.

## ITEMS.

Redemption of notes in gold. By an ordinance confirmed by the President of the Republic on December 8th the Bank of Finland has been empowered to continue to set aside the stipulations contained in clause 1 of paragraph 8 of its regulations until the end of 1935, or in other words the Bank is released from redeeming its notes in gold.

Bank rates. On December 1.st the Supervisors of the Bank of Finland decided to lower the bank rate by $1 / 2$ per cent from December 3rd. From that date the Bank charges the following rates:

## Per cent.

For discounting purely commercial bills at not more than three months' date ...... 4
For discounting other bills ................. $4^{\frac{1}{1} / 2-5}$ For granting mortgage loans and advances on cash credit on security according to the nature of the security

4-5
The former bank rates had been in force since December 20 th, 1933 , i.e., for almost a year. The bank rate in Finland has not been as low as 4 per cent during the whole of this century and even earlier it was uncommon. The bank rate was 4 per cent on the last occasion from October, 1895, to October, 1896, and before that in 18861890 and 1871-1875.

The consequences of lowering the bank rate are already apparent in the fact that other rates have also fallen or that it has been decided to lower them from January 1st, 1935. Thus, the joint delegation of the financial institutions has decided to lower the rate on deposit accounts by $1 / 4$ per cent and on sight accounts by $1 / 2$ per cent. This implies at the same time that the credit rates of the financial institutions will also be reduced to a corresponding and in some cases even to greater extent. From the beginning of 1935, therefore, the deposit rate in the Joint Stock banks will be $3^{3 / 4}$ per cent, the lowest rate that has occurred since the end of the 1880 's. The rate on cheque accounts will be $11 / 2$ per cent.

New bond loans. In the middle of December the Treasury issued premium bonds for $100 \mathrm{mil}-$ lion marks. The bonds are for 200 marks each and participate in ten prize drawings during 1935-1939; the prizes correspond to an average rate of interest of $4 \frac{1}{2}$ per cent. The bonds 'were in great demand and were rapidly sold out. The proceeds are to be employed for increasing the Budget Equalisation Fund (see Bulletin No. 11).

Oy. Rouhiala $A b$. has decided to issue a bond loan for 70 million marks at $5 \frac{1 / 2}{}$ per cent interest. The bonds are to be issued at a rate of $991 / 4$ per cent and the loan is to be redeemed by means of annual amortisation up to 1956. The proceeds are to be employed for building a power station on the Rouhiala rapids in the river Vuoksi.

Outokumpu $O y$. also recently issued a bond loan for 30 million marks at $5 \frac{1 / 2}{2}$ per cent interest and will probably shortly issue a further 20 million marks. The proceeds are to be utilised for building a copper works.

Increase of capital. Yhtyneet Paperitehtaat $O / Y$, which recently raised its capital from 50 to 65 million marks in amalgamating with Walkiakoski O.Y., has decided to increase it to 90 million marks. The new issue will be in the form of bonus shares.
A.B. Kemi O.Y. has decided to raise its capital, amounting at present to 60 million marks, of which 58.7 millions are ordinary shares and 1.3 millions preference shares, to 89.35 million marks by issuing bonus shares to be allocated at the rate of one new share for two old ordinary shares.

Finnish industry in 1933. The Central Statistical Office has completed its compilation of industrial activity in Finland during 1933. On the next page we give the most important figures.

These figures indicate that industrial production in 1933 proceeded in a favourable direction. The number of workmen increased by about 13,500 or 10.6 per cent and the gross value of production by 1,281 million marks or 13.4 per cent. All branches of industry recorded a larger value of production, but in general the increase was only slight. The timber industry is in a class by itself, the value of production shooting
up by 548 million marks, which is equal to no less than 34.4 per cent.

If we compare the figures with the results in the ,good years", however, 'we find that both the number of establishments and the number of workmen and value of production are still appreciably lower than at that time. It is only the effective HP of generating motors that represents an evenly rising series.

## THE BANK OF FINLAND MONTHLY BULLETIN

is sent free of charge to anyone wishing to receive it. Finnish booksellers are, however, allowed to sell it at a price of 2 marks per copy. Back numbers are also willingly supplied. Should extracts from the Bulletin be printed, the source should be stated. Correspondence with regard to the Bulletin should be addressed to the Bank of Finland, Statistical Department, Helsinki (Helsingfors), Finland.

[^0]:    ${ }^{1}$ ) According to data supplied by the Treasury. Internal loans are given at their nominal value and foreign loans in Finnish currency according to the rates ruling on the dates of the raising of the loans. - ${ }^{2}$ ) Calculated as follows: The outstanding amounts of both internal and foreign loans have been converted into Swiss Francs at the monthly average rates of exchange of the respective currencies.
