## THE FINNISH MARKET REVIEW.

## THE MONEY MA:RKET.

Economic life in Finland was marked in September by the same activity as earlier in the year. There was a slight tightening of the money market during the month which should be ascribed to seasonal causes; the financing of harvest work, heavy imports and the collection of taxes.

Deposits from the public in the Joint Stock banks fell off in September by 24.6 million marks to $8,419.9$ millions. As the corresponding deposits amounted to $7,501.1$ millions a year ago, the increase in deposits has been considerable. The total deposits of the Joint Stock banks grew again in September owing to the deposits from other credit institutions increasing by 49.5 million marks. By this means their total deposits advanced by 24.9 million marks to $9,804.2$ millions. In consequence of the growing demand for credit the credits granted by the Joint Stock banks increased in September by 140.3 million marks and reached a total of $8,407.0$ million marks as against $7,410.9$ millions a year before. In spite of this considerable growth of credits the cash of the Joint Stock banks is still at a record height and their position is very easy. This is contributed to by the funds that came in during. September for the issues of new shares by the big banks. At the end of September their cash amounted to $1,164.4$ million marks in comparison with

1,143.1 millions at the end of August and only 635.1 millions at the end of September, 1936.

The position of the Joint Stock banks towards foreign countries improved again in September, for their net balances increased by 33.1 to 225.4 million marks, but were appreciably lower than at the same date last year, 501.1 millions, though slightly higher than at the end of September, 1935. If we include the foreign balances of the Bank of Finland, we find that at the end of September all the banks had net balances abroad amounting to $2,189.5$ million marks as against $2,277.3$ millions a month earlier, but $1,671.3$ and $1,526.0$ millions respectively one year and two years ago.

The position of the Banle of Finland, too, bears clear traces of the great economic activity with consequent increased purchasing power. These conditions are reflected above all in the increased note circulation which - after an increase of 106.6 millions in September amounted to $2,004.8$ million marks at the end of that month as compared with $1,551.4$ millions a year ago. During the first half of October the notes in circulation fell off slightly to $1,996.5$ millions on October 15th. The credits granted by the Bank, which had decreased appreciably during the summer, increased in September by 28.1 million marks to $1,013.7$ millions as against 963.3 millions at the end of September, 1936. At the beginning of October
credits fell off again by 34.6 million marks. The Bank of Finland's reserve of foreign currency that had reached its highest point at the end of August at $2,159.1$ million marks, has since fallen off slightly and amounted in the middle of October to $2,031.8$ millions as against only $1,178.4$ millions a year ago. The note reserve increased in September by 14.2 million marks and during the first fortnight in October by a further $\mathbf{9 0 . 2}$ millions, so that it amounted to 550.7 millions or approximately the same total as a year ago.

The level of prices experienced very slight changes in September. As a result of the former sharp rise in prices for imported and exported goods which has now ceased the domestic price level continued to rise slightly. The wholesale price index rose 1 point to 104 in comparison with 92 last year and the consumption price index rose 0.6 point to 106.8 as against 99.3 a year ago. The latter tendency continued in October, partly owing to the customary seasonal conditions.

## TRADE AND INDUSTRY.

Foreign trade was very lively in September, being higher in value than ever before during this month. The value of imports amounted to 844.5 million marks as against 840.6 millions in August and 601.0 millions in September, 1936. The value of exports totalled 1,058.3 million marks as compared with $1,053.4$ millions in August and 712.4 millions in September, 1936. The considerable increase in value as compared with last year is largely due to the rise in prices on the world market, but the volume of commodities was also larger than a year ago. Among other things the considerable imports of hot rolled and sheet iron, coal and coke, petrol and raw hides are worth noting. Among exports the increased shipments of, e.g., cheese, bobbins, cardboard and paper are striking. The balance of trade for September resulted in a surplus of exports of 213.8 million marks as against 111.4 and 133.3 millions in the preceding years.

During the three completed quarters of this year foreign trade has amounted to record figures. The value of imports reached 6,686.2 million marks as against $4,515.5$ millions last year and $5,806.2$ millions in 1928, which established the previous record. The volume was on the present occasion about 35 per cent higher than in the latter year and 26 per cent higher than last year. The value of exports amounted to $6,670.4$ million marks as against $5,164.7$ millions last year and only $4,649.0$ millions during the last boom in 1929. The volume of exports was only 7 per cent larger than last year, but 56 per cent higher than in 1929. The balance of trade which had been negative this year, attained a state of equilibrium in September: the surplus of imports has dropped to a mere 15.8 million marks. If we deduct the gold imported during the year, there is a slight surplus of exports.

The timber market was rather livelier in September than during the summer, but is marked at the same time by uncertainty as to its future course. In view of the uncertain position the international timber exporters' organisation ETEC (European Timber Exporters' Convention) decided unanimously at its annual meeting on September 29th that the total quantity to be exported should be reduced to 3.6 million standards in comparison with 4.0 millions this year. Each country was granted the right to reduce its quota already during the current season. As about 900,000 standards had been sold from Finland by the end of September, there is no particularly large quantity left unsold. The situation is characterised, however, by a supersensitiveness that expresses itself among importers in pessimism and nervousness, which might easily lead to a crash, if exporters do not keep cool heads.

## THE LABOUR MARKET.

The state of the labour market has not experienced any change, but continues to be marked by a good demand for labour.

## CONTENTS OF THE TABLES.

## I. MONEY MARKET.

Bank of Finland:
Weekly Statement.
Note issue.
Note circulation and foreign correspondents.
Ordinary cover, note reserve and home loans.
Re-discounted bills and balances of current accounts.
6. Rates of exchange.

Joint Stock banks:
7. Home deposits.
8. Home loans.
9. Position towards foreign countries.
10. Position of the banks to foreign countries.

Tables 22-29 according to Finnish Official Statistics $I_{2}$ A, Foreign Trade of Finland, Monthly Reports.
The term imports covers all imported goods which are placed on the market either immediately after importation or after storage. EHeports covers all goods exported from the open market inciuding re-exports. Goods are deciared to the Customs by their owner, who must at the same time state the value of the goods as calculated at the frontiers of the country.

- Prellminary figures subject to minor alterations.

Calculated by the Central Statistical Office. The first group of indices refers to prices of goods appearing in local wholesale trade in Finland, whereas the indices for imported and exported goods refer to foreign trade prices. An indirect weighting has been applied, each class of goods being represented by the number of commodities corresponding to the caiculated importance of this class in wholesale trade. The averages are arithmetical ones.

## CERTAIN PARTICULARS ABOUT FLNLAND.

## 1. FORM OF GOVERNMENT.

Finland formed a part of the kingdom of Sweden from 1154 to 1809; from 1809 it was an autonomous Grand Duchy connected with Russia up to December 6th, 1917, when Finland declared Its independence, which was acknowledged by all the Powers including Soviet Russia. It became a republic in 1919. The legislative power of the country is vested in the Diet and the President. The highest executive power is held by the President chosen for a perlod of 6 years. The present President Kyosti Kallio is elected for the term March 1st, 1937, to March 1st, 1943.

The Dlet, composed of 200 members, is elected by unlversai suffrage. The proportions of the different parties in the Dlet elected in 1936 are as follows:

Number
Social-Democratic party ....................................... 83
Agrarian party ................................................... 53
8wedlsh party .................................................. 21
Unionist party .................................................. 20
Patriotic National Movement's party ......................... 14
Progresslve party
Small farmers' party
1

## People's party

## 2. IAND.

THE AREA (excluding lake Laatokka) is 382,801 square kilometres $=147,761$ square miles (Great Britain's area is $89,047 \mathrm{sq} . \mathrm{m}$. and Italy's area 117,982 sq.m.). Of the total area $9.0 \%$ are inland waters. On an average $11.8 \%$ of the land in the South of Finland ts cultivated, $1.1 \%$ in the North, $6.6 \%$ of the whole land. Of the land area 25.3 mill. ha ( 62.5 mill. acres) or $73.6 \%$ are covered by forests.

THE AVERAGE TEMPERATURE in the coldest month is in S. Finland $-3^{\circ}$ to $-8^{\circ} \mathrm{C}$., in Lapland $-12^{\circ}$ to $-14^{\circ} \mathrm{C}$. and during the warmest month $+16^{\circ}$ to $+17^{\circ}$ and $+12^{\circ}$ to $+14^{\circ} \mathrm{C}$. resp. The average temperature in Helsinki (Helsingfors) is $+4.6^{\circ}$ (in Oslo $+5.4^{\circ}, \ln$ Montreal $+5.4^{\circ}$, in Moscow $+3.6^{\circ}$ ). The ground is covered by snow in the South for about 110 days, in Central Finland for about 150 days, in Lapland about 200 days.

## 3. POPULATION.

NUMBER OF INHABITANTS (1935): 3.8 millions (of whom 0.2 million emigrants), Sweden (1935) 6.2, Switzerland (1935) 4.2, Denmark (1932) 3.6 and Norway (1938) 2.9 millions.

DENSITY OF POPULATION (1035): In South-Finiand 18.6, in North-Finland 2.6 and in the whole country an average of 10.9 Inhabltants to the square kilometre.

DISTRIBUTION (1935): $79.4 \%$ of the population inhablt the country, $20.6 \%$ the towns and urban districts. The largest towns are (1935): Helsinki (Helsingfors), the capital, 277,771 inhabitants, Vlipuri (Wiborg) .72,755, Turku (Åbo) 69,953, Tampere (Tammerfors) 59,832.

OCCUPATION (1930): agriculture $59.6 \%$, industiry and manual labour $16.8 \%$, commerce $4.8 \%$, transport $3.8 \%$, other occupations $15.5 \%$.

TANGUAGE (1930): Finnish speakding $89.4 \%$ Swedish speaking $10.1 \%$ others $0.5 \%$.

BRLIGION (1935): Lutheran $96.1 \%$, Greek-Orthodox $1.8 \%$ others $2.1 \%$.

IEDUCATION (1930): Amongst persons over 15 years of age only $0.9 \%$ are illiterate. There are three aniversities founded in 1840, 1917 and 1920.

INCREASE OF POPULAATION (1985): Births $18.5 \%$ deaths $12.0 \%$ (in France in $193315.8 \%$ and in Fingland in $193312.8 \%$, ), natuxal increase $6.5 \%$.

## 4. TRADE AND COMMUNICATIONS.

FOREST BESOURCES. The growing stock of the forests is 1,620 million $\mathrm{ma}^{3}$ ( 57,214 million cubic feet). The merchantable timber
(measuring 20 cm at breast height $=6 \mathrm{in}$. at a height of 18 ft .) amounts to 1,557 million trees. Of this number pine is represented by $60.7 \%$, spruce by $28.1 \%$, the conifers thus constituting $88.8 \%$ or 1,383 million trees; leaftrees, mostly birch, $11.2 \%$ or 174 million trees. The annual increment is 44.4 million $\mathrm{m}^{3}(1,568$ million cub.ft.). The annual fellings according to earlier calculations are 40 million $\mathrm{m}^{2}$ ( 1,413 million cab. $\mathrm{ft}_{\mathrm{t}}$ ).

AGRICULTURE (1985): Cultivated land 2.2 million hectars, divided as follows: area under cultivation $0.3-10$ hectars $33.4 \%$, $10-50 \mathrm{hg} 52.1 \%$, $50-100 \mathrm{ha} 8.4 \%$, over $100 \mathrm{ha} .6 .1 \%$. Cultivated land is divided between the different kinds of crops as follows: $50.5 \%$ hay, 18.7 \% oats, 9.6 \% rye, 5.1 \% barley, $3.3 \%$ potatoes 12.8 \% other. The number of dairies in 1985 amounted to 593.

OWNERSHIP OF LAND. The land area is distributed among different classes of owners approximately as follows: private $52.1 \%$, State 39.7 \%, Joint Stock Companies $6.5 \%$, communities $1.7 \%$.

INDUSTRY (1035): Number of industrial concerns 3,917 hands 174,310 , gross value of products of industry 13,929 million marks.

LENGTH OF RAILWAYS (1936): $5,757 \mathrm{~km}$, of which 5,501 km State railways and 256 km private. The gauge ls 1.524 m .

COMMERCIAL FLEET (1987): Steamships 557 (291,104 reg. tons net), motor vessels 172 (19,080 reg. tons net), sailing ships 187 ( 38,702 reg. tons net). Total 866 (348,886 reg. tons net).

## b. FINANCE AND BANKING.

CURRENCY. Since 1860 Einland has its own monetary system, From 1877 up to the Great War the currency maintained lts stable gold value and after the disturbances caused by the war Finland has again from January 1st, 1926, a gold standard. The unit of currency is the mark (Finnish smarkkas $=100$ pennia). According to the monetary law of December 21st, 1925, a gold coin of 100 marks' value shall contain $3^{15} / \mathrm{n}$ grams of fine gold. Since October 12th, 1931, the redemption of bank notes in gold 1s, however suspended.

STATE FINANCES. According to the finance accounts for 1986 the State revenue was $4,870.8$ million marks of which $\mathbf{3 , 7 2 5 . 2}$ million marks were current revenue, and State expenditure 4,861.6 million marks, of which $2,983.6$ million marks were current expenditure. The principal sources of revenue were as follows: State property and undertalangs (net) 358.3, direct taxes 019.s, indirect taxes 2,020.1, stamp duty 199.1 , charges 102.6 , interest and dividends 284.8 and capital revenue $1 ; 145.1$. The value of State property in 1922 was estimated at $11,150.6$ million marks. For Public Debt see table 19 in this issue.

MUNICIPAL FINANCES. According to the Budget for 1986 expenditure amounted to $1,444.2$ million marks. Income from taxation was calculated at 501.5 million marks, taxed income at 5,805.0 million marks. The municipal income tax (non-progressive) averaged $8.6 \%$ of the ratepayers' income.

THE BANK OF ISSUE. The Bank of Finland, (founded in 1811) is a State Bank. Its head-office is in Helsinki (Helsingfors) with branches in Turku (Abo), Pori (Björneborg), Vaasa (Vasa), Ouiu (Uleaborg), Kuopio, Joensun, Sortavala, Vipuri (Wiborg), Mikkeli (S:t Michel), Tampere (Tammerfors), Hameenlinns (Tavastehus), Jyvāskylă and Kotka.

THE JOINT STOCK BANKS (1937): Number 9, possess 467 offices, where all kinds of banking business is transacted. Including all banks, there is one banking establishment per 7,200 inhabitants.

The Iargest banks are: Kansallis-Osake-Pankki, Ab. Nordiska Föreningsbanken and Helsingiors Aktiebank, all with head offices in the capital.

OTHER BANKS (1937): Mortgage banks 5, Savings banks 482, Co-operative Credit Societies 1,191 and a Central Bank for the latter.

${ }^{\text {1 }}$ ) From the beginning of 1935 new series of figures (according to totals in tables 7 and 8 in this Bulietin).

# THE FINNISH STOCK EXCHANGE 1912-1937. 

BY<br>F. TIIDERBMAAN,<br>DEPUTY-CHATRMAN OF THE STOCK EXCHANGE.

## IPREEPARATIORY WORK.

Dealings in stocks and shares are still comparatively insignificant in Finland. This is due partly to the relatively small accumulation of capital in the country and partly to the fact that the general public, either from habit or, perhaps, for the sake of convenience, prefers to place its savings on deposit in the banks rather than invest them in shares and bonds. It is only during times of a plentiful supply of money and low deposit rates that the small investor becomes alive to the fact that the investment of capital in stocks can also yield a good return and possibilities of profit.

Nevertheless, the Finnish Stock Exchange (Helsingin Arvopaperipörssi - Helsingfors Fondbörs) is able to look back upon 25 years of business. Its first meeting was held on October 7th, 1912.

Prior to this business in stocks and shares was organised in a very primitive manner by means of "exchange auctions" held once a month by a chartered broker. Long before, in the 1860 's, an attempt had been made to organise a stock and goods exchange on the lines adopted abroad, but economic conditions in Finland were still so poorly developed that its business had to be closed down in a few years.

The exchange auctions, introduced in the 1880's, proved in the long run to be so unsatisfactory that a new form had to be found for stock exchange business. The question came
up for discussion in 1911 in the Helsinki Trade Council which at once appointed a committee, consisting of representatives of industry, commerce, bankers and the Municipality of Helsinki, to draw up a scheme for an up-to-date Exchange. On the basis of the principles adopted by this committee our Stock Exchange. was organised in its present form.

## ORGANLISATTION.

According to its rules the object of the Finnish Stock Exchange is to provide regular opportunities for dealings in and determining quotations for boads, shares and similar securities (Stock Exchange), foreign currency (Foreign Exchange) and commodities in wholesale trade according to. samples or other definitions of quality (Goods Exchange). An official Foreign Exchange was organised and transacted business in 1924-1926 during a time, when there was much confusion and uncertainty both in the Finnish and foreign markets for foreign currency. However, when most countries re-introduced the gold standard and foreign currency in other countries was stabilised, the Foreign Exchange lost its significance and its business was discontinued. A Goods Exchange was opened in 1912, but was closed owing to the outbreak of the war. Subsequently it was not considered necessary to organise a goods exchange afresh.

The management of the Stock Exchange is entrusted to a Stock Exchange Committee of

12 members, the Helsinki Chamber of Commerce appointing 6, the Bankers' Association of Finland 3 and the members of the Stock Exchange, who do not belong to the Bankers' Association, also 3.

The Finnish Stock Exchange is a private organisation, in which only members elected by the Exchange Committee have the right of buying or selling either as agents or as principals. Prospective members have to be proposed and seconded by two members of the Stock Exchange. The entrance fee is 15,000 marks and members have to provide a bank guarantee as security for the fulfilment of their obligations and pay the Stock Exchange a charge of $1 / 2$ per mille of their turnover on the Exchange. The extent of the commission that a member is entitled to charge his principals in his capacity as agent is fixed by the Stock Exchange Committee and is at present $1 / 2$ per cent of the value of the stocks bought or sold. The present membership is 18 , of whom 7 are bankers. At the time of the inflation boom in 1918-1919 the number of members was 66.

The stocks and shares to be bought and sold on the Stock Exchange are subject to registration by the Committee. The principal conditions for registration are that the share capital of the company should not be less than $1,000,000$ marks and that there should be a probability of the company's shares actually being bought and sold. Consequently purely family companies and companies, the greater part of whose capital is in strong hands, cannot be registered on the Stock Exchange. Contrary to the custom in Sweden, for instance, the registered companies are not charged any fee in Finland.

At the opening of the Stock Exchange the shares of 33 companies were already listed and in the course of the next few years the number increased to about 100. For various reasons, however, e.g., the amalgamation of banks and mergers of large industrial concerns, the number of listed shares has now dropped to 35 , of which 7 are banking companies and 22 in-
dustrial companies. The combined share capital of the registered companies is slightly in excess of 3,000 million marks, of which 2,161 million marks represent the share of industrial companies and 774 millions the share of banking companies.

In conformity with the usage on the Stockholm Exchange, the Stock Exchange in Helsinki has introduced a system similar toauctions as the form of business in stocks and shares with bidding and overbidding or bidding and underbidding between buyers and sellers. Bids are made, when the chairman reads out. the stocks and shares in succession according to the list of quotations. If there are buyers at. the seller's price or sellers at the buyer's price, a transaction is considered to have been concluded. But, if the prices do not coincide, the last notified buying price and the last notified selling price are considered to be the official quotations of the day. Formerly buying and selling bids were made verbally, but in 1935 an electrical signalling system was installed, also in accordance with Stockholm's example. Rows of buttons are affixed in front of the members' seats, by means of which they indicate their prices which are recorded by a relay system on two quotation boards, one on the chairman's table, the other visible to all the members. These boards not only indicate the buying and selling prices and their changes, but also the name of the member quoting the price and, if several members quote the same price, the order of their names.

## BUSINESS TRANSACTED.

During the first four years of the Stock Exchange, 1912-1915, the business done was very small. It seemed to many people that the initiative had been taken too soon. From 1916, however, dealings in stocks and shares became much livelier. While foreign trade with other countries was entirely paralysed owing to the war, the paper and timber industries worked up a large export business to Russia.

Other industries, particularly those supplying armaments, also found a good market there. On the outbreak of war the Bank of Finland had been obliged to suspend the redemption of its notes in gold owing to the demands made by the Russian Government. This led to inflation and the value of the Finnish currency fell lower and lower, the longer the war lasted. Under such circumstances the supply of money was abundant, free capital found no employment and earned low rates of interest, when it was deposited in the banks. People then began to realise the importance of the Stock Exchange for the investment of capital. Shares listed on the Stock Exchange were bought by more and more people and, as prices rose, there was a great deal of speculation. The turnover which had been only 4 million marks in 1915, increased to 190 millions in 1916, 294 millions in 1917 and 923 millions in 1918.

After the termination of the war the turnover fell off again. The overflow in the supply of money began to decrease more and more and'was soon succeeded by a money market that grew tighter from year to year. Foreign trade was able to develop more freely and its demand for credit increased. It was essential to import large quantities of food and raw materials for industry as well as other articles, of which the population had been deprived
during the war. 'The exporting industries lost their best market through the Russian revolution and it was a long time before fresh markets were developed.

In 1919 and 1920 Stock Exchange business was still fairly lively, but during the next four years the Stock Exchange lost more and more in importance. The crisis in Europe was reflected in Finland by a depression in trade with unemployment, reduced output and a scarcity of money with consequent high rates of interest. In 1925 an improvement set in again, business on the Stock Exchange increased and during 1927 and 1928, which were favourable to the economic development of the country, transactions on the Stock Exchange amounted to 784 and 511 million marks respectively.

During the following years the curves for prices and turnover moved either upwards or downwards from time to time according to the economic conditions in this country. In Finland, too, the Stock Exchange is a sensitive barometer. From its quotations you can recognise periods of prosperity or depression, times of an abundant supply of cash and other times, when a money shortage sends rates of interest soaring upwards.

The turnover on the Stock Exchange has been as follows in each year:-
$\left.\begin{array}{llr}\text { Year } & & \begin{array}{c}\text { Shares } \\ \text { Mill. mks. }\end{array}\end{array} \begin{array}{c}\text { Total turnover } \\ \text { Mill. mks. }\end{array}\right\}$

Up to the end of September this year about 466 million marks' worth of stocks and shares had been dealt in on the Stock Exchange. Business was influenced to a large extent by the abundant supply of cash, the growth of the exporting industries and a favourable balance of trade.

Besides shares and options on new issues of shares, most of the large internal bond loans are listed on the Stock Exchange. The greater part of the business done in bonds is, however, transacted in the open market outside the Stock Exchange. Business in bonds is not liable to the tax on turnover, but for business in shares a stamp tax is imposed which was raised in May this year from $1 / 2$ per cent to 1 per cent of the Stock Exchange value, the buyer and seller each paying half the amount. For business in shares outside the Stock Exchange the stamp tax amounts to 1.2 per cent.

## THE PRINCIPAL SHARES LISTED.

The quotation list of the Stock Exchange does not contain any internationally listed shares, but on the other hand foreign capital
has often been invested in the shares of industrial and banking companies that are listed on our Stock Exchange. This refers chiefly to the exporting companies, well known abroad, Kymin Osakeyhtiö - Kymmene Aktiebolag, Enso-Gutzeit Osakeyhtiö and Aktiebolaget Kemi Osakeyhtiö, Suomen Sokeri Osakeyhtiö
Finska Socker Aktiebolag, the only company in Finland representing the sugar industry, and the shipping company Finska Ångfartygs Aktiebolaget - Suomen Höyrylaiva Osakeyhtiö. Finnish bank shares have also found their way abroad, particularly the shares of the three big banks, Kansallis-Osake-Pankki, O.Y. Pohjoismaiden Yhdyspankki - A. B. Nordiska Föreningsbanken and Helsingin Osakepankki Helsingfors Aktiebank.

The turnover on the Stock Exchange has always been largest in these shares and in the shares of a few other companies.

During last year and up to the beginning of October this year the business done in these shares amounted to the following sums:-

|  | $\begin{gathered} 1936 \\ \text { Mill. mks. } \end{gathered}$ | $\begin{aligned} & 1937 \\ & \text { Mill. mks. } \end{aligned}$ |
| :---: | :---: | :---: |
| Kymmene A. B. | 29.1 | 32.6 |
| Enso-Gutzeit O.Y. | 6.7 | 9.5 |
| A. B. Kemi | 30.1 | 31.6 |
| Suomen Sokeri O.Y. | 29.8 | 19.9 |
| Finska Angfartygs A.B. | 14.5 | 35.1 |
| Kansallis-Osake-Pankki | 33.9 | 39.5 |
| Nordiska Föreningsbanken | 37.6 | 41.8 |
| Helsingfors Aktiebank | 26.9 | 51.1 |

The prices in 1936 and 1937 are indicated by the following figures which give the highest and lowest prices for the same shares, at which business was done:-

|  | $\begin{gathered} 1936 \\ \text { Marks } \end{gathered}$ | $\begin{aligned} & 1937 \\ & \text { Marlks } \end{aligned}$ |
| :---: | :---: | :---: |
| Kymmene A. B. | 2,620-1,870 | 3,270-2,400 |
| Enso-Gutzeit O. Y. | 1,600-980 | 1,800-1,120 |
| A. B. Kemi | 2,770-1,750 | 3,770-2,550 |
| Suomen Sokeri O. Y | 1,200-815 | 1,300-1,010 |
| Finska Ångfartygs A. B. | 1,580-1,160 | 2,130-1,420 |
| Kansallis-Osake-Pankki | 605-449 | 672-553 |
| Nordiska Föreningsbanken | 335- 290 | 398-330 |
| Helsingfors Aktiebank | 148-112 | $178-143$ |

In the course of this year several of the big companies, whose shares are listed on the Stock Exchange, have increased or decided to increase their share capital by issuing new shares. The right of subscribing for these shares, which are issued at prices above the nominal value, but below the Stock Exchange
quotations, is always reserved for existing shareholders, but options can be sold through the Stock Exchange. Business in options has been very lively this year and the turnover in them already exceeds 25 million marks in comparison with only a couple of hundred thousand marks in 1936.

## „THE NORTHERN COUNTRIES IN WORLD ECONOMY."

"'The Northern Countries' - who invented that name?

It is difficult to tell. It is more easy to explain why the term is needed and what meaning it bears.

There are five countries in the North of Europe, five countries which have, though politically quite independent, so much in common, historically, culturally and economically, that they may claim the right to appear before the World under the name of 'The Northern Countries of Europe' or, more shortly, 'The Northern Countries'. Their names are, in alphabetical order, Denmark, Finland, Iceland, Norway and Sweden."

These are the opening paragraphs in a book entitled "The Northern Countries in World

Economy" which has just been placed on the book market. It is published on the initiative and authority of the Delegations for the Promotion of Economic Co-operation between the Northern Countries. These Delegations were established in 1934 by the Northern Governments and representatives of different branches of economic life were selected as their members. Dr. J. K. Paasikivi, the managing director of the bank "Kansallis-Osake-Pankki", now Finnish minister to Stockholm, was appointed as Chairman of the Finnish Delegation. The Finnish members in the Editorial Committee were Mr. Hj. J. Procopé, managing director of the Finnish Paper Mill Association, and Prof. Br. Suviranta, Economist of the Bank of Finland.

On its 250 pages, divided into 14 chapters, the present book gives a brief account of the most important economic facts concerning the relation of the five Northern Countries to world economy. The reader obtains an interesting review of the facts that led to these countries occupying their present position of importance in world economy. After the middle of the nineteenth century, when the process of industrialisation had reached the Northern Countries, many of their products gained markets not only in European countries, but all over the world. Mention need only be made of butter, bacon, eggs and fish, of timber, pulp and paper, of iron ore and machinery. At the same time the Northern Countries became purchasers on a large and ever increasing scale of coal and other raw materials as well as industrial products of the most varied kinds.

These developments have placed the Northern Countries in the foremost rank among the commercial nations of the world. We are informed that these Nations with their $16 \frac{1 / 2}{2}$ million inhabitants, or 0.8 per cent of the population of the world, absorbed no less than 5 per cent of world trade in 1936.

We cannot on the present occasion deal in greater detail with the valuable contents of this book. The interested reader will find instructive particulars in it of agriculture,
fishing and whaling, industrial production, shipping, communications and the tourist trade, international balances as well as the commercial policy of the Northern Countries.
In the final chapter an illuminating review is given of the development and present state of economic co-operation between the Northern Countries. This co-operation which is maintained in nearly every department of economic life, is quite unique in its intensity. We take the liberty of quoting the concluding paragraph of this chapter:
"This rapid review must have shown the breadth and depth of the community of interests and contacts between the Northern Countries. Further it must have revealed certain characteristics of this co-operation taken as a whole. In the first place it has appeared that cooperation has developed spontaneously, not as the result of governmental pressure or conscious inter-Northern propaganda. Secondly it is a striking fact that this co-operation is not only occasional, but is, in general, even' when it has not acquired a permanent organisation, continuous. Last but not least, and this fact may be emphasised, this co-operation affects not only the periphery of economic life, but also many of its central and most vital points.
And along these lines development will continue."

## ITEMS.

New bond loans. The mortgage institution Suomen Asuntohypoteekkipankki (The Residential Mortgage Bank) has been empowered by the Government to take up a new bond loan to a total of 100 million marks. There will, however, not be any actual issue, the bonds being sold as and when the proceeds find investment. The bonds carry a nominal rate of interest of $41 / 2$ per cent and the term of the loan is 33 years.
The bank institution Osuuskassojen Keskuslainarahasto Osakeyhtiö (The Central Bank for Co-operative Agricultural Credit Societies) has also obtained permission from the Government to issue a bond loan of 100 million marks at $41 / 2$ per cent interest for a term of 30 years.

In addition, the mortgage bank Oy. Maakiinteistöpankki (The Agricultural Mortgage Bank) has been empowered to convert a couple of its 5 per cent bond loans into $4 \frac{1}{2}$ per cent loans.

New mills for the exporting industry. The sulphate cellulose mill of Oulu Oy., situated in North Finland, started work in September. The trial period is gradually giving way to regular work. The annual capacity of the mill is 80,000 tons, but already next spring this will be raised to 100,000 tons. In normal conditions the number of workpeople will amount to $400-500$. The output for this year and next year has already been disposed of.
At New Year the new Anjala Paper Mill, built by Tammerfors Linne- och Jern-Manufaktur Ab., will be started. At first the mill will run one papermaking machine and the output will amount to 35,000 tons of paper annually. Soon, however, the output is to be
doubled, when the second papermaking machine, already ordered, is installed.
The work of building Sunila $O y$.'s new sulphate mill near the town of Kotka is progressing rapidly. Some of the buildings have already been completed and the machinery began to be installed in September. The first cooker was delivered recently and is said to be the largest wholly welded cooker in the world. Its volume in 140 cub. metres and it weighs 54 tons. Six of these machines are to be installed in the mill.

The harvest. The crop report of the Board of Agriculture has now been published and shows that the figures for the various cultivated plants are estimated to be approximately the same as in September. The crop of autumn grain was in general above the average, the crop of spring grain, potatoes and hay medium, and the yield of vegetables grown for cattlefeeding below the average. The grain is in general of high quality and its power of germination is large.

According to the preliminary estimates of the Board of Agriculture the crop prospects were as follows in the middle of October. In the table a scale of figures is employed, 8 signifying a very good crop, 7 a good crop, 6 above medium, 5 medium, 4 below medium, 3 a poor crop, 2 almost a failure of crop and 1 a failure of crop.

|  | Midale of October |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | 1937 | 1936 |  | 1934 |
| Autumn wheat | 6.3 | 5.3 | 5.3 | 5.2 |
| Spring wheat | 5.5 | 5.6 | 4.9 | 5.9 |
| Rye | 6.4 | 4.8 | 5.1 | 5.9 |
| Barley | 4.9 | 5.3 | 4.6 | 6.0 |

## THE BANK OF FINLAND. MONTHLY BULLETIN

is sent free of charge to anyone wishing to receive it. Finnish booksellers are, however, allowed to sell it at a price of 2 marks per copy. Back numbers are also willingly supplied. Should extracts from the Bulletin be printed, the source should be stated." Correspondence with regard to the Bulletin should be addressed to the Bank of Finland, Statistical Department, Eelsinki (Melsingfors), Finland.

[^0]:    ${ }^{2}$ ) Included in home loans, see table 4. Re-discounted Bills according to the monthly statements of the Bank of Finland.

[^1]:    ${ }^{1}$ ) According to data supplied by the Treasury. Internal loans are given at their nominal value and forelgn loans in Finnish currency according to the rates ruling on the dates of the issue of the loans. - ${ }^{2}$ ) Calculated as follows: the outstanding amounts of both internal and foreign loans have been converted into Swiss Francs at the monthly average rates of exchange of the respective currencies. From September, 1936, the amounts have been converted into Swiss Francs of former gold value, in order to ellminate the influence of fluctuating currencles.

    * Preliminary figures subject to minor alterations.

[^2]:    * Preliminary figures aubject to minor alterations.

[^3]:    * Prellminary figures subject to minor alterations.

[^4]:    * Preliminary figures subject to minor alterations.

[^5]:    ${ }^{2}$ ) Dry velght.

    - Preliminary figures subject to minor alterations.

[^6]:    The country of import indicates the land in which goods were purchased, the country of export the land to which goods were sold. * Preliminary figures subject to minor alterations.

[^7]:    The indices are calculated by the Statistical Dept. of the Board of Customs in the following manner: after multiplying the quantities of imports and exports for the current year by the average price for the class of goods in guestion during the corresponding period of the basic year the values of imports and exports are calculated in percentage of the figures thus obtained.
