# BANK OF FINLAND Monthly Bulletin 

## THE FINNISH MARKET REVIEW.

## THE MONEY MARKET.

The month of January brought about a considerable easing of the money market, as is usually the case at this time of year. This year, when foreign trade is slacker than usual owing to the heavy imports during the latter part of 1930, the demand for credit for this purpose is smaller than in normal years. On the other hand work in the forests was started this year at the customary time, whereas last year it was delayed on account of the late and mild winter. The credit requirements for this purpose will, however, be less than at normal times, seeing that lumber work has lbeen restricted and prices have fallen. The general depression in all spheres is, of course, also likely to reduce the demand for credit.

Regarding the Joint Stock banks the most remarkable feature is that deposits increased in January by 164.1 million marks. The increase consisted, however, almost exclusively of shortterm money, while actual deposits only rose slightly. The credits granted iby the Joint Stock banks also grew slightly or lby 13.3 million marks. Last year there was a falling off in the credits of the banks at the same date amounting to 26.0 million marks, but in 1929 there was an increase of 35.4 millions. Thus the difference between credits and deposits was reduced in January by 150.8 million marks compared with 58.7 millions in the same month in 1930 and 147.3 millions in 1929.

In the position of the Joint Stock banks to other countries the same easier tendency may be observed. The banks' foreign balances were reduced to some extent, it is true, but their indebtedness decreased still more, so that their net indebtedness fell off by 30.8 million marks to 103.4 millions at the end of January. A year before the net indebtedness was 262.3 million marks.

The Bank of Finland's total credits fell off in January by 79.2 million marks to 855.7 millions compared with $1,307.9$ millions a year earlier. The reduction was due partly to a falling off in re-discounted bills by 31.3 million marks to 118.3 millions compared with 466.5 millions a year ago and 533.3 millions two years ago. The direct credits of the Bank, however, also developed in the same falling direction and the reduction for January was 47.9 millions. Simultaneously the balances of the Bank of Finland with its foreign correspondents were reduced from 812.9 to 732.4 million marks. This is counterbalanced, however, to some extent by the amount of foreign bills in the portfolio of the Bank having increased during January from 127.8 to 188.2 million marks. The note reserve remained almost unchanged during January and amounted to 788.6 million marks at the end of the month as against 608.7 millions at the end of January, 1930.

The changes in the position of the Bank of Finland during the first fortnight in February were in the same direction as in January, but
were not of any great extent. The ordinary cover amounted to $73.9 \%$ of all liabilities payable on demand on February 14th compared with 66.3 \% a year and $54.3 \%$ two years before.

The level of prices still displays a falling tendency. The cost of living index dropped 12 points to 1,071 as against 1,181 in January, 1930. The reduction was caused chiefly by falling prices for foodstuffs. The general wholesale price index remained unchanged at 86 ; but the group index for imported goods dropped 1 point to 82 against 91 a year ago. The index for agricultural produce rose, on the contrary, 1 point to 74 against 89 in January, 1930. The rise is connected with the higher duties.

## TRADE AND INDUSTRY.

Foreign trade was uncommonly small. The value of imports only amounted to 223.3 million marks in January, while the corresponding value in 1930 was 309.0 and in 1929504.5 million marks. The falling off is partly due to the fall in prices, but also to an appreciable extent to the smaller volume of imports, for the latter was considerably less than in any year since 1926. The volume of exports was also slightly smaller than in 1930 and 1929, though substantially larger than in the years before that. Their value, however, did not represent more than 248.5 million marks compared with 319.4 and 309.7 millions in the two previous years. The balance of trade for January was, under such circumstances, uncommonly favourable for the time of year, seeing that there was a surplus of exports of 25.2 millions as against 10.4 millions in January,

1930, and a surplus of imports of $200-300 \mathrm{mil}-$ lions in the preceding years.

Concerning trade in individual commodities attention is attracted by the insignificant imports of sugar, coffee, wheaten flour, rye, tobacco etc., which is, of course, a result of the exceptionally heavy imports of such goods in October-December, 1930, caused by the higher duties referred to. Exports of all products of the paper trade bore traces of the depressed times: the reduction was general, though it varied in extent. On the other hand the exports of ibutter, cheese and fresh meat were very satisfactory.

The state of the timber market is still very unclear in all countries. Naturally, the British buyers will turn their attention to Northern sawn timber only when they have convinced themselves, what they will receive from the Russian assortments and what must be purchased elsewhere. As this circumstance is clear to the Northern exporters, they are agreed not to try and force their goods on the market, but rather to bide their time. Sales for delivery in the spring have not started, except for a few small contracts. Prices for Northern sawn timber have consequently not yet been able to find their level.

## THE LABOUR MARKET.

The state of the labour market is unchanged. The number of unemployed registered at the labour exchanges is slightly smaller than at the same time last year, viz., 11,706 at the end of January against 12,751 . The actual total number of unemployed is, however, estimated at a considerably higher figure or close on 60,000 .

## CONTENTS OF THE TABLES.

## 1. MONEY MARKET.

Bank of Finland:
Bulance sheet.
Note issue.
Note circulation and foreign correspondents.
Ordinary cover. note reserve and home loans.
Rediscounted bills and balances of current acciunts.
6. Rates of exchange.

Joint Stock banks:
7. Home dpposits.
8. Home loans.
9. Position with regard to foreign countries.
10. Position of the banks towards foreign countries.
11. Clearing.
12. Deponits in the savings banks.
13. Deposits in Post Oftice Savings Bank and on Consumers' Co-operative Sucieties' Savings Account.
14. Deposits in Conperative Credit Societies.
15. New risks insured by Life Assurance Companies.
16. Changes in Number and Capital of Limited Companies.
17. Helsingfors Stuck Exchange. Bankruptcies. Protested Bills.
18. Strock Exchange index.

## II. STATE FINANCES.

19. National Debt.
20. State revenue and expenditure.
21. Miscellaneous State receipts collected by Customs.
III. TRADE.
22. Value of imports and exports.
23. Value of imports and exports in different groups of goods.
24. Imports of the most important articles.
25. Exports
26. Foreign Trade with various countries.
27. Import-price index.
28. Export-price index.
29. Index numbers for quantities of imports and exports.
30. Total sales of some wholesale firms.
IV. TRAFFIC.
31. Foreign shipping.
32. Shipping with various countries and passenger traffic.
33. Railways, goods traffic and rolling stock.
34. Railways revenue, expenditure and traffic surplus.

## V. LEVEL OF PRICES.

35. Index number of cost of living.
36. Wholesale Price Index.
VI. LABOUR MARKET.
37. Number of unemployed.
38. Cessation of Work.

Turnover of Stock Exchange according to figures supplied by the Stock Exehange Committee.
The figures for bankruptcies are not comparable with those pablished earlier in 192\%. The figures above, compiled by the Central Statistical Office according to the reports sent in by the various Courts, include all bankruptcy petitions, of which only about half will lead in due course to actual bankruptcy, whereas the rest owing to agreement, lack of means etc. will be cancelled.

Protested bills according to figures published in the ${ }^{\text {PReport }}$ of Bills Protested in Finlands.

* Preliminary figures subject to minor alterations.

18.     - STOCK EXCHANGE INDEX.

| Year | Jan. | Febr. | March | April | May | June | July | Aug. | Sept. | Oct. | Nov. | Dec. | Year |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1928 | 181 | 177 | 182 | 179 | 179 | 180 | 178 | 169 | 163 | 157 | 147 | 149 | 1928 |
| 1929 | 150 | 148 | 142 | 138 | 140 | 137 | 136 | 133 | 126 | 121 | 124 | 124 | 1929 |
| 1930 | 126 | 129 | 129 | 138 | 141 | 135 | 132 | 132 | 126 | 122 | 118 | 114 | 1930 |
| 1931 | 113 |  |  |  |  |  |  |  |  |  |  |  | 1931 |

According to figures published in the 9 Unitass.
The index refers to 14 representative concerns, composed of 4 banks, 8 industrial concerns and 2 others. For each concern an index figure is calculated according to the arithmetical average of the eonverted buyers' prices for all days on which the Stock Exchange was open, the average price for 1926 being $=100$. In converting the buyers' prices the value of new issues and of coupons has been eliminated. These index figures are weighted in the general index in proportion to the share capital of each concern in 1926.

The above table is based on the monthly report on the National Debt published by the Treasury in the Official Gazette.

1) Internal loans are given at their nominal value. Foreign loans are given in Finnish currency according to the rate ruling on the date of the raising of the loan.
${ }^{2}$ ) Calculated as follows: The loans raised in the country have been calculated in dollars, according to the average rate of exchange of each month. The loans, negotiated abroad, which are all issued in different currencies, are grouped according to the proportion of currencies, shown by the coupons paid, and reduced to dollars at the rate of exchange just mentioned.

The tarm imports covers all imported goods which have been placed on the market either immediately after importation or after storage. Raports covers all goods exported from the open market, including re-exports. Goods are declared to the Customs by their owner, who must at the same time state the value of the goods as calculated at the frontlers of the country.

- Preliminary figures subject to minor alterations.

23.     - VALUE OF IMPORTS AND EXPORTS IN DIFFERENT GROUPS OF GOODS.*

| Jan.-Nov. |  |  |  |  |  |  |  |  |  | Jan.-Nov. |
| Jan.-Dec. |  |  |  |  |  |  |  |  |  | Jan.-Dec. |

The import- and export-indices have been calculated by the Statistical Dept. of the Board of Customs in the followlng, manner: the quantities of imports and, respectively, exports for the current year have been multiplied by the average price for the class of goods in question in 1913, after which the import (or export) value for the current year has been calculated in percentage of the sum thus obtained for purposes of comparison.

This import-price index is lower than the wholesale price index because the import-price index is not infuenced by the customduties.
28. - EXPORT-PRICE INDEX.

${ }^{2}$ ) From the beginning of 1921 onwards a new official index has been drawn up differing from that published in the Bulletin for 1922 in that the whole first half of 1914 forms the basis ( $=100$ ) for the same, and that the rise in taxation is also included.

The index is calculated by the Statistical Bureau of the Ministry of Social Affairs and is based on monthly reports from 21 different centres; it shows the rise in the cost of living for a workingman's family of normal size, the income of which amounted during the years 1008-1909 to $1600-2000$ Fmk, assuming that the average monthly consumption within the same remained unaltered. The index for total cost of living is the average based on weight of the different Indices.

The wholesale price index is worked out at the Central Statistical Office. - The first group of indices is based on the quantity of goods in local wholesale trade in Finland, whereas the indices for imported and exported goods are based on the total auantities of goods imported or exported, including the movement of such goods as are in no way intended for wholesale trade in Finland. The average prices for 1926 are taken as a basts. There is no direct weighing of the data regarding prices, but indirect weighing has been carrled out by each class of goods belng represented by the number of commodities which corresponds to the calculated importance of the class in wholesale trade. The averages are arithmetical averages.
37. - NUMBER OF UNEMPLOYED.

| December | 7114 | 1403 | 8517 | 8001 | 1335 | 9336 |  |  |  |  | December |

This table, prepared from the weekly reports of the Labour Exchange Department of the Ministry of Social Affairs, shows the number of unemployed registered in the books of the communal laboar exchanges in the majority of towns and a very small part of the rural centres of population at the close of the week nearest to the month's end. As agricultural labourers and skilled artisans proper register, up to the present, only in a minority of cases at the communal labour exchanges, the table does not give a complete review of the number of unemployed, but is to be regarded more as symptomatic.

The above particulars which are of a preliminary nature, have been compiled by the Statistical Bureau of the Ministry of Social Affairs. The majority of cases of cessation of work were described as strikes.

## CERTAIN PARTICULARS ABOUT FINLAND.

## 1. FORM OF GOVERNMENT.

Finland formed a part of the kingdom of Sweden from 1154 to 1809; after 1809 it was an autonomous Grand Duchy connected with Russia up to December 6th, 1917, when Finland declared its independence, which was acknowledged by all the Powers including Soviet Russia. It became a republic in 1919. The legislative power of the country is vested in the Diet and the President. The highest executive power is held by the Presldent chosen for a period of 6 years. The present President $P$. $E$. Svinhufvud is clected for the term 1 March, 1931, to 1 March, 1937.

The Diet, composed of 200 members, is elected by universal suffrage. The proportions of the different parties in the Diet elected in 1930 are as follows:

## Number

Unionist party . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 42
Agrarian party . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 59

Swedish party ..... . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 20
Swedish left . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 1
Small farmers' party . . . . . . . . . . . . . . . . . . . . . . . . . . . 1
Social-Democratic party . . . . . . . . . . . . . . . . . . . . . . . . . 66

## 2. LAND.

THE AREA is 388,279 square kllometres - 150,005 square miles, (Great Britain's area is 89,047 sq. m. and Italy's area 117,082 sq. m.). Of the total area $11,5 \%$ are lakes. On an average $10.8 \%$ of the land in the south of Finland is cultivated, $0.9 \%$ in the North, $6.3 \%$ of the whole land. Of the land area 25.2 mill. ha ( 62.6 mill. acres) or $73.4 \%$ are covered by forests.

THE AVERAGE TEMPERATURE in the coldest month is In S. W. Finland $-5^{\circ}$ to $-6^{\circ}$ C., in Lappland - $15^{\circ} \mathrm{C}$. and during the warmest month $+15^{\circ}$ and $+18^{\circ}$ to $+14^{\circ} \mathrm{C}$. resp. The average temperature in Helsinki is $+4.6^{\circ}$ (in Oslo $+5.4^{\circ}$, in Montreal $+5.4^{\circ}$, in Moscow $+3.6^{\circ}$ ). The ground is covered by snow in the South for about 100 days, in Central Finland for 150 to 180 days, in Lappland about 210 days.

## 3. POPULATION.

NUMBER OF INHABITANTS (1929): 3.6 millions (of which 0.3 million emigrants), Sweden (1929) 6.1, Switzerland (1928) 4.0, Denmark (1920) 8.6 and Norway (1929) 2.8 millions.

DENSITY OF POPULATION (1929): In South-Finland 18.4, in North-Finland 2.5 and in the whole country an average of $\mathbf{1 0 . 6}$ inhabitants to the square kilometre.

LANGUAGE (1920): Flnnish spealing $88.7 \%$, Swedish speaking $11.0 \%$, others $0.8 \%$.

RELIGION (1928): Latheran $96.8 \%$, Greek-Orthodox $1.7 \%$, others $1.5 \%$.

DISTRIBUTION (1928): $79.6 \%$ of the population inhabit the country, $20.4 \%$ the towns and urban districts. The largest towns are (1928): Helsink (Helsingfors), the capital, 227,375 inhabitants, Turku (Àbo) 68,918, Tampere (Tammerfors) 54,015, Vilipuri (Viborg) 54,120.

EDUCATION (1920): Amongst persons over 15 years of age only $1.0 \%$ are illiterate. There are three universities founded 1640, 1917 and 1920.

INCREASE OF POPULATION (1929): Births $21.0 \%$, deaths $15.0 \%$ (in France in $192816.5 \%$ and in Fngland in $192811.7 \%$, natural increase $6.0 \%$

## 4. INDUSTRY.

PROPORTIONS OF OCCUPATIONS OF THE POPULATION (1920): agriculture $65.1 \%$, industry and manual labour $14.8 \%$, commerce $3.4 \%$, other occupations $16.7 \%$.

OWNTRSHIP OF LAND. The land area is distributed among different classes of owners approximately as follows: private $52.1 \%$, State $39.7 \%$, Joint Stook Companies $6.5 \%$, communities $1.7 \%$.

FOREST RESOURCES. The growing stock of the forest is 1,620 million $\mathrm{m}^{2}$ ( 57,213 million cubic feet). The merchantable timber (measuring 20 cm at breast height -6 in . at a height of 18 ft .) amounts to 1,557 million trees. Of this number pine is represented by $61 \%$, spruce by $28 \%$, the conifers thus constituting $89 \%$ or 1,384 million trees, leaftrees, mostly birch, $11 \%$ or 173 million trees. The annual increment is 44.5 million $\mathrm{m}^{9}(1,568$ million cub.ft.). The annual fellings according to earlier calculations are 40 million $\mathrm{m}^{\text { }}$ ( 1,413 million cub. ft .). In North Finland the increment is much larger than the fellings, but in South Finland excess felling occurs locally.

AGRICULTURE. Cultivated land 2.1 million hectars, divided as follows: area under cultivation $0.4-10$ hectars $33.7 \%, 10-50 \mathrm{ha}$ $48.9 \%$, $50-100 \mathrm{ha} 9.3 \%$, over $100 \mathrm{ha} 8.1 \%$. Cultivated land is divided between the different kinds of crops as follows: $46.8 \%$ hay, 20.4 \% oats, 11.1 \% rye, 5.3 \% barley, $3.2 \%$ potatoes, 13.1 \% other. The number of dairies in 1928 amounted to 630.

INDUSTRY (1929): Number of industrial concerns 4,109, hands $\mathbf{1 6 5 , 0 7 8}$, gross value of products of industry 13,179 million marks.

LENGTH OF BAILWAYS (1930): $5,331 \mathrm{~km}$, of which 5,065 km State railways and 266 km private. The gauge is 1.524 m .

COMMERCIAL FLEET (1929): Steamships 529 (140,537 reg. tons net), motor vessels 132 ( 14,714 r. t.), sailing ships 377 ( 67,916 r. t.), lighters 3,992 (282,628 r. t.). Total 5,030 (505,795 r. t.).

## 5. FINANCE AND BANKING.

CURRENCY. Since 1860 Finland has its own monetary bystem. From 1877 up to the Great War the currency maintained its stable gold value and after the disturbances caused by the war Finland has again from January 1st, 1926, a gold standard. The unit of currency is the mark (Finnish markkar) $=100$ pennia. The gold value of 100 marks is equal to $\$ 2.5185=£-10 \mathrm{~s} .4^{1 / 5} \mathrm{~d}$.

STATE FINANCES. According to the balance sheet for 1929 the State revenue was $4,342.1$ million marks of which $4,302.4$ million marks were ordinary revenue, and State expenditure $4,508.1$ million marks, of which 3.642 .8 million marks were ordinary expenditure. The principal sonrces of revenue were as follows: State property and undertakings $1,583,4$, direct taxes 544.2 , indirect taxes 1,557.8, miscellaneous taxes 246.6, charges 215.8 , miscellaneous revenue 183.8. The value of State property in 1922 is estimated at 11,150.6 million marks. Fror National Debt see table 18 in this issue.

MUNICIPAL FINANCHS. According to the Budget for 1929 expenditure amounted to $1,245.1$ million marks. Income from taxation was 428.4 million marks, taxed income $6,380.2$ million marks. The communal income tax (not progressive) averaged $6.7 \%$ of the ratepayers' income.

THE BANK OF ISSUE. The Bank of Finland, (founded in 1811) is a State Bank. Its head-office is in Helsinki (Helsingfors) with branches in Turku (Ảbo), Pori (Bjorneborg): Vaasa (Vass), Oulu (Uleäborg), Kuopio, Joensuu, Sortavala, Viipuri (Viborg), Mikkell (S:t Michel), Tampere (Tammerfors), Hämeenlinna (Tavastehus), Jyväskyla and Kotka.

THE JOINT STOCK BANKS (1930): Number 17, possess 589 branch offices, where all kinds of banking business is transacted. Including all banks, there is one banking establishmerit per 5,700 inhabitants.

The largest banks are: Kansallis-Osake-Pankki, Ab. Nordiska Föreningabanken, Maskuntain Pankki Oy., Ab. Unionbanken and Helsingfors Aktiebank, all with head offices in the capital.

OTHER BANKS (1930): Mortgage banks 7, Savings banks 477 Co-operative Credit Societies 1,419 and a Central Bank for the latter.

# FOREIGN TRADE IN 1930. 

BY
VERNER LINDGREN, M. A.
HEAD OF THE STATISTICAL DEPARTMENT OF THE BOARD OF CUSTOMS.

## GENERAL SURVEY.

The general depression which marked the trade of the world during 1930, was felt very much in Finland's foreign trade. The heavy fall in prices in foreign markets naturally reduced the value of the turnover of trade everywhere to a certain extent, and in this respect the foreign trade of Finland followed the general tendency during the past year. But, whereas there is scarcely any reduction worth mentioning to be recorded in the volume of world trade from 1929 to 1930, both Finnish imports and exports fell off to no inconsiderable extent during the year. With regard to the cause of the reduction of imports the fact can be pointed to that the purchasing power of Finland was reduced further, because the general poor state of trade since the autumn of 1929 was preceded by the depression that set in already in the summer of 1928 in this country. Exports, on the other hand, suffered to a marked degree from Russian competition. As Finland's exports of sawn timber represented no less than about $40 \%$ of the total value of exports during the last few years, it is obvious that Russia's increased competition in foreign markets affected Finland's exports in a high degree.

From the point of view of Finland's balance of payments to other countries, however, foreign trade in 1930 proved very favourable, seeing that it resulted in a surplus of exports amounting to 150 million marks. This is worth noting, for the foreign trade of Finland was only able formerly to record an excess of exports for the year on a few rare occasions, a circumstance that is, however, partly due to the official trade statistics including exports at their f.o.b. value,
but imports at their c.i.f. value, i.e. including freight, insurance and other charges. For the year before the value of imports exceeded the value of exports by about 570 million marks and in 1928 the surplus of imports was no less than about 1,770 million marks. To find a surplus of exports in Finland's foreign trade it is necessary to go back as far as 1925.

## IMPORTS.

The general development of imports will be seen in the following table.

| Year. | Value of Mill. Fmk. | imports, Mill. $£$ | $\begin{gathered} \text { c. i. i. f. } \\ \text { мijil. } \end{gathered}$ | Volume of imports. $1913=100$ |
| :---: | :---: | :---: | :---: | :---: |
| 1926 | 5,668 | 29.3 | 142.8 | 116 |
| 1927 | 6,386 | 33.1 | 160.9 | 136 |
| 1928 | 8,013 | 41.4 | 201.8 | 169 |
| 1929 | 7,001 | 36.3 | 176.4 | 155 |
| 1930 | 5,248 | 27.2 | 132.2 | 141 |

The volume of imports has been calculated to be about $9 \%$ less during 1930 than in the previous year. The reduction of foreign trade caused by the fall in prices was, however, still greater. In general the fall in prices affected foodstuffs and some raw materials for industry most, but had much less influence on finished industrial products in general. With regard to imports into Finland it has been calculated that the difference between the level of prices in 1920 and 1930 amounted to about $25 \%$ for foodstuffs, about $16 \%$ for industrial raw materials, lbut only about one or tiwo per cent for finished industrial products. But as it is just such raw materials for its industry and some important kinds of foodstuffs that Finland imports on a large scale - in recent years such goods represented in all close on $60 \%$ of all Finnish imports - it is clear that the fall in prices during 1930 was very much felt in Finland's

import trade. It is calculated that for all imports the level of prices in 1930 was about $18 \%$ below the level for the previous year. Had there been no drop in prices from 1929, the value of imports made up in the same way as those for 1930, swould have amounted not to 5,248 million marks, but to about 6,350 millions or abont 1,100 million marks more.

The imports in 1930 would apparently have been even smaller, if some considerable increases in duty decided on towards the end of the year, had not forced up the importation of certain kinds of goods considerably beyond normal requirements with a speculative object. It is reckoned that these speculative imports piled up such large stocks by the end of the year that they contained, in excess of normal requirements, four months' supply of petrol, three of sugar and raw tobacco and two of coffee. These ,excess" imports during 1930 tied up a little over 300 million marks, rather more than half this sum in the c.i.f. value of the goods and the rest in customs duty.

If the composition of imports is examined more closely and goods are classified according to their use in national economy in four classes, one consisting of raw materials and semi-products for manufacture, i.e. productive materials, another of machinery, means of transport and other means of production, a third of foodstuffs and luxuries and a fourth of other articles of
consumption, chiefly industrial semi-products, it will be seen that - as for many years past it is the first class that predominates in Finland's imports. The imports of such productive materials represented a value in 1930 of 1,973 million marks compared with 2,280 millions in 1929, which, expressed in proportion to the total value of imports is $38 \%$ and $33 \%$ as against an average of $33 \%$ for the five years' period 1924-1928. There was therefore a remarkably large relative increase in 1930 of imports of materials for local manufacture. Even though the total value of imports of raw materials dropped from 1929, the reduction does not equal the fall in prices by any means and the volume of imports was actually larger in 1930 than in 1929. In the case of some goods of this class the value of imports has even risen, as, for instance, for oils from 291 to 319 million marks and for chemicals from 136 to 154 million marks, but in the case of the majority the value has decreased: of metals from 370 to 310 million marks, of cattlefood from 330 to 205 millions, of spinning and weaving materials from 273 to 204 millions, of minerals from 267 to 222 millions and of hides and skins from 178 to 165 million marks.

The imports of machinery and other means of production decreased from 1,187 million marks in 1929 to 825 millions in 1930 . The share of this class in the total value of imports amounted

| PERCENTAGE OF FINLAND'S EXPORTS TO IMPORTS | QUANTITIES OF IMPORTS AND EXPORTS IN PERCENTAGE OF IMPORTS AND EXPORTS FOR 1913¹) |
| :---: | :---: |
| IMPORTS DIVIDED ACCORDING TO THE PURPOSE OF THE GOODS | BRANCHES OF PRODUCTION |
|  | FINLAND'S FOREIGN TRADE WITH VARIOUS COUNTRIES IN 1930 |

in 1924-1928 to $16 \%$, in 1929 to $17 \%$, but last year again to $16 \%$. In this case there was also a reduction in the volume of imports.

The imports of foodstuffs and luxuries fell off from 1,879 million marks in 1929 to 1,301 millions last year. In 1924-1928 the imports of foodstuffs represented $29 \%$ of the total value of imports, in $192927 \%$, but in 1930 only $25 \%$. The decrease compared with 1929 was contributed to chiefly by the fall in the price of such goods as grain, coffee and sugar, but the actual volume of imports of this class was also reduced in spite of the „excess" imports at the end of 1930 already referred to. The reduction in the value of imports of cereals was most appreciable from 867 to 428 million marks, - but insignificant in the case of colonial produce - from 682 to 645 million marks.

The imports of other articles of consumption, i.e. principally industrial articles, represented last year $22 \%$ of the total value of imports; the corresponding figure for 1929 was $24 \%$ and for $1924-1 \cap 2822 \%$. The total value of imports of this class decreased from 1,655 million marks in 1929 to 1,148 millions in 1930, a decrease that was due for the greater part to smaller quantities imported. The imports of various textile goods fell off from 798 million marks in 1929 to only 528 millions and the imports of metal goods from 326 millions to 220 millions in 1930.

In former years, too, a very considerable part of Finland's imports was intended to be used for productive purposes either as productive material or as means of production. During 1930 the share of such goods in imports, as already stated, was further increased to a great extent - from $49.6 \%$ in 1929 to $53.3 \%$ in 1930. However, that part of the imports that is intended to supply prolonged requirements and can therefore be described as a kind of investment of capital, was also remarkably large, about $25 \%$ of the total imports, compared with $27 \%$ in 1929 and $25 \%$ in 1924-1928. Owing to the fall in prices, however, the value of these goods was lower in 1930, all along the line, than in the preceding years, as the following table shows:

| Productive materials (raw materials) $\qquad$ | 7 | 1928 | 1929 |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  | Millio | mar |  |
|  | 537 | 691 | 547 | 415 |
| Means of production |  |  |  |  |
|  | 541 | 628 | 559 | 403 |
| Ceans of transport | 442 | 537 | 377 | 197 |
| Other productive good | 65 | 81 | 74 | 58 |
| Goods for consumption | 246 | 349 | 341 | 277 |
| Total |  | 2,286 | 8 |  |

## EXPORTS.

The general development of exports is shown in the following table:

| Year. | Valub of Mill. Fmk. | exports, Mill. $£$ | ${ }_{\text {f. . o. . b. }}^{\text {Mill. }} \underset{\$}{ }$ | Volume of exports. $1913=100$ |
| :---: | :---: | :---: | :---: | :---: |
| 1926 | 5,637 | 29.2 | 142.0 | 127 |
| . 1927 | 6,324 | 32.7 | 159.3 | 143 |
| 1928 | 6,245 | 32.3 | 157.3 | 141 |
| 1929 | 6,430 | 33.3 | 161.9 | 150 |
| 1930 | 5,398 | 27.9 | 136.0 | 134 |

In volume exports for 1930 were reduced approximately to the same extent as imports or iby about $10 \%$. At the same time the fall in price was not felt as much as in the case of imports, this being partly due to the fact that prices abroad for those goods that Finland mainly exports did not fall as much as for Finland's most important imported goods, and partly to the fact that various articles of export had been sold far in advance before the last considerable fall in prices had occurred, e.g. for products of the paper trade. The fall in price that was recorded by the trade statistics was, however, by no means insignificant, for, if the same prices had been obtained in 1930 as in 1929, the value of butter exports would have been about 100 million marks higher than it actually was; the value of sawn timber would also have ibeen about 100 million marks higher and of products of the paper trade about 75 millions higher. The fall in prices is estimated to have amounted for all exports to about 340 million marks or $6 \%$ of the total value of exports.

The most important article of export was still sawn timber. The value of these exports decreased from 2,600 million marks in 1929 to 1,886 millions in 1930 , their share in the total exports from $40 \%$ to $35 \%$ and their quantity from 1,207,000 standards to 907,000 stds. The

—— MONTHLY FIGURES
cause of this great falling off lay partly in the influence of depressed trade on the demand and partly in the Russian competition already referred to. This competition lowered prices, but above all it caused the reduction in sawing in Finland that is apparent in the quantities mentioned above. This year, too, a similar cutting down of production is to be anticipated.

Exports of cellulose increased, indeed, in reIation to the total value of exports from $15 \%$ in 1929 to $17 \%$, lbut their value was reduced from 975 million marks to 916 millions and their quantity from 484 million kgs. to 476 millions. As at the same time the output in Finland is estimated to have increased from 610 to 712 million kgs., this means that at the end of last year there were still fairly large stocks in this country.

Exports of paper amounted both in 1929 and 1930 to 664 million marks in value, but this figure represented only about $10 \%$ of the total exports in 1929, but $12 \%$ of the 1930 exports. The annual output has grown from 314 to 319 million kgs., exports rather more or from 244 to 260 million kgs.

Butter exports in 1930, as in the previous year, again represented a little over $8 \%$ of the total value of exports. Although the quantity exported increased from 16.6 million kg . in 1929 to 17.1 millions last year, the value nevertheless dropped from 537 to 444 million marks. The heavy fall in price that is evident here, has already been referred to.

The position occupied in 1929 by round timber in our exports - $8 \%$ of the total value of exports - was retained during 1930, but the value of its exports fell from 520 to 430 million marks and its quantity simultaneously from 3.2 million $\mathrm{m}^{3}$ to 2.7 millions.

The plywood industry, which had constantly expanded for many years, had to reduce its output to some extent in 1930. The quantity exported was also reduced from 99 million kgs . to $8 \varepsilon$ millions and its value from 288 to 239 million
marks. However, in value the plywood exports represent unchanged a little over $4 \%$ of the total of Finland's exports.

The production of mechanical pulp and cardboard increased to no inconsiderable extent from 1929. The total quantity exported dropped, however, from 213 million kgs. in 1929 to 204 millions in 1930 and its value at the same time from 258 million marks to 245 millions. These goods raised their share in Finland's total value of exports from $4 \%$ to $41 / 2 \%$ in 1930.

Other articles of exports represented both in 1930 and 1929 altogether only 10 to $11 \%$ of the total value of exports. They do not include any goods of much importance for the balance of trade.- --. ..

## CONOLUSION.

As the foreign trade of Finland in 1930 was no less than $20 \%$ in value and $10 \%$ in volume less than in 1929, it is a clear sign that Finland was seriously affected by the depression in trade. Exports were reduced partly owing to restricted production and partly as a result of the difficulty of disposing of goods. Imports, in consequence of reduced purchasing power, fell off in about the same proportion, but this falling off referred mostly to goods for consumption, whereas imports of productive goods or, more precisely, of raw materials for industrial manufacture increased still further. Besides, a considerable portion of the imports - $25 \%$ - consisted of goods of a lasting character. However, the fact that was favourable above all from the point of view of finance and political economy is that the international development of prices has so far affected Finland's imports far more than its exports. One result of the movement of prices was that the balance of trade for 1930, in comparison to the year before, turned out over 700 million marks more to our favour, notwithstanding the volume of imports as well as exports being reduced approximately to the same extent or by $9 \%$ to $10 \%$.

# FINNISH INDUSTRY IN 1929. 

BY<br>MIKKO STRŌMMER, M. A.<br>ghief adtuary of the central statistical office.

## GEN:ERAL SURVEY.

The past decade has in general been a time of powerful expansion in Finnish industry. This favourable development reached its height in 1928. Thus, during the brief period 1924-1928 the number of industrial workers increased by $21.7 \%$ and the gross value of industrial production by no less than $46.7 \%$. The increase in industrial output was particularly great in the wood-working industries, which are of special importance for Finland. During the years referred to the output of sawn timber increased by $34.7 \%$, of woodpulp by $40.6 \%$, of chemical pulp by $69.1 \%$ and of paper by $40.5 \%$. The industrial statistics for 1929, however, reveal that a change for the worse has occurred in this respect, and that the influence of the depression has begun to be seriously felt in several branches of industry. The development during the past few years is shown by the table below.

It can be seen from the figures of the table that the number of industrial establishments still increased during 1929 by $2.2 \%$, whereas the total number of workmen declined as compared with the preceding year by $2.7 \%$. The relatively high increase of $7.6 \%$ in the power employed was due chiefly to the completion and extension of the Imatra and other power stations.

The decline in the gross value of output, as compared with 1928, is considerable, being no less than $3.9 \%$. As regards wages and value of raw materials, the former declined by $2.6 \%$ and the latter by $4.2 \%$.

## GROUPING OF INDUSTRIES.

The following table gives the distribution of workers and the gross value of output among the different groups of industries in 1928 and 1929.

|  | Number of workmen. |  | Gross value of production. Mill. mks. |  |
| :---: | :---: | :---: | :---: | :---: |
|  | 1928 | 1829 | 1928 | 29 |
| Metal industry | 27,748 | 28,085 | 1,624.0 | 1,704.2 |
| Stone, clay, glass and peat industries .. | 11,690 | 11,307 | 562.3 | 492.4 |
| Chemical industry | 2,467 | 2,513 | 362.8 | 341.7 |
| Leather, rubber and tanning industries | 8,272 | 8,516 | 760.7 | 656.4 |
| Textile and clothing industries | 23,311 | 22,838 | 1,295.5 | 1,202.0 |
| Paper industry | 17,578 | 17,332 | 2,394.8 | 2,513.9 |
| Timber industry | 58,575 | 53,746 | 3,532.8 | 3,156.0 |
| Manufacture of foodstuffs and luxuries | 11,256 | 11,561 | 2,496.3 | 2,335.3 |
| Lighting, power transmission, etc. | 3,435 | 3,589 | 419.5 | 479.1 |
| Graphical industries | 5,303 | 5,520 | 258.8 | 295.4 |
| Other industries ... | 94 | 66 | 2.4 | 2.7 |

The above groups of industries might further be divided into two main groups, viz., industries catering for the home market and exporting industries. No division can be made that would

be absolutely exact, yet on the whole it may be said that in this country the exporting industries are those which use wood as their raw material, and that all other industries cater for the home market. In addition, it might be said that the exporting industries use Finnish raw materials, while the home industries use chiefly foreign raw materials in their manufacturing processes. The proportions of these two main groups in the years 1928 and 1929 appear from the table above.

## THE HOME INDUSTRIES.

The most important groups in the class of industries catering for the home market are the metal industry, the leather industry, the textile industry, and the manufacturers of foodstuffs and luxuries.

For the metal industry the past few years have been a time of powerful development. The technical methods used have been modernised to an increasing extent, and at the same time the struggle against foreign dumping has been taken up with increasing accuracy. Between 1927 and 1929 the number of workmen employed increased by $21.6 \%$, and the gross value of production by $36.7 \%$. The stagnation in the building trade and the general depression have quite recently tended to prevent a continuance of this development. In 1929 the chief branches of the metal industry presented the following picture.

|  | Number of workmen. | Gross value of production. Mill. mks. |
| :---: | :---: | :---: |
| Mining and refinement of ores | 249 | 45.4 |
| Smelting, etc. | 5,231 | 370.5 |
| Machine-shops | 22,329 | 1,273.7 |
| Finer machine industries | 276 | 14.5 |

| 1928 |  | 1929 |  |
| :---: | :---: | :---: | :---: |
| $\begin{gathered} \text { Home } \\ \text { industries. } \end{gathered}$ | Exporting industries. | Home industries. | Exporting industries. |
| 2,843 | 1,178 | 2,945 | 1,164 |
| 93,576 | 76,153 | 93,995 | 71,078 |
| 172,289 | 331,706 | 188,878 | 353,445 |
| 1,379.3 | 897.7 | 1,355.5 | 862.5 |
| 1,192.1 | 3,284.6 | 1,179.4 | 3,137.8 |
| 2,765.4 | 210.3 | 2,573.4 | 250.6 |
| 7,782.3 | 5,927.6 | 7,509.2 | 5,669.9 |

In the group of leather, rubber and tanning industries the chief branches are the leather and footwear factories. Especially in the latter branch the high level of technical skill attained has been generally recognised. For the leather industries the period of the war, when enormous contracts were placed by the Russian authorities, was a time of rapid progress. Since then, this branch of industry has experienced both periods of adversity and intervals of prosperity. The decline in prices was especially noticeable in this branch in 1929. Between 1928 and 1929 the number of workmen in the whole group increased by $2.9 \%$, but the gross value of production declined $13.7 \%$. The decline was greatest in the case of the leather factories, viz., $28.2 \%$. The development in the footwear branch during recent years is shown by the following table:

| Year. | Establishments. | Number of workmen. | Gross value of production. Mill. mks. |
| :---: | :---: | :---: | :---: |
| 1927 | 55 | 3,987 | 266.8 |
| 1828 | 67 | 4,272 | 332.1 |
| 1929 | 67 | 4,150 | 279.6 |

In the textile and clothing industries a decline of $2 \%$ occured in the number of workmen and $7.2 \%$ in the gross value of output in 1929 as compared with 1928. The chief branches in this group presented the following picture last year.

|  |  |  |  |  |  |  | Gross value of <br> production. |  |  |  |
| :--- | :---: | :---: | ---: | ---: | ---: | ---: | ---: | :---: | :---: | :---: |
| Minl. mks. |  |  |  |  |  |  |  |  |  |  |

The group of foodstuffs and luxuries is extremely heterogeneous in composition and includes a variety of industries catering for domestic consumption. The most important branches are the flourmills, bakeries, sugar refineries and tobacco factories. The next table gives an idea of the proportions of these leading branches in 1929.

|  | Establishments. | Number of workmen. | Gross value of production. Mill. mks. |
| :---: | :---: | :---: | :---: |
| Flourmills | 41 | 399 | 388.7 |
| Bakeries | 238 | 3,061 | 362.6 |
| Sugar refineries | 4 | 772 | 318.7 |
| Tobacco factories | 8 | 2,111 | 354.0 |

## THE EXPORTING INDUSTRIES.

As already stated, the only actual exporting industries are those using wood as their raw material, i.e., the timber and paper industries. The importance of these industries is evident from the fact that they account for over fourfifths of the total value of Finland's exports. The present period of depression, however, seems to constitute a serious danger to this vital branch of the country's economic life.

More than in the case of any other branch of industry, the effects of the change in the market conditions were felt in 1929 in the timber inlustry, especially tby the sawmills. It would seem as though the influence of those outside factors, over which Finland has no control, was supplemented in this case by the bad effect of the crisis on the position of the numerous small and medium-sized sawmills latterly founded in the country. The development in this respect will be seen from the following table:

| Year. | $\quad$ Sawmills. |  |  |  |  | Number of <br> workmen. | Gross value of <br> production. |
| :--- | :--- | :--- | :--- | :--- | :---: | :---: | :---: |
| Mill mks. |  |  |  |  |  |  |  |

The following table gives the aggregate output of the sawmills during the past few years:

|  | 1927 | 1928 | 1029 |
| :---: | :---: | :---: | :---: |
|  | Stds. | Stds. | Stds. |
| Jeals | 153,784 | 129,418 | 95,037 |
| 3attens | 250,389 | 238,785 | 190,358 |
| Scantlings | 212,622 | 196,565 | 161,435 |
| 3oards | 514,908 | 487,298 | 422,162 |
| Spars | 11,218 | 10,191 | 9,284 |
| Jther kinds | 351,149 | 363,640 | 351,888 |
|  | ,494,070 | ,425,897 | ,230,164 |

In contrast to the sawmills, the plywood industry. still enjoyed extremely favourakle conditions in 1929, as will be seen from the following table showing the development during the past few years:

| Year. |  | Establish- <br> ments. | Number of <br> workmen. | Gross value of <br> pioduction. <br> Mill. mks. |
| :---: | :---: | :---: | :---: | :---: |
| 1927 | $\ldots \ldots \ldots \ldots$ | 14 | 3,674 | 180.4 |
| 1928 | $\ldots \ldots \ldots \ldots$ | 15 | 3,808 | 207.1 |
| 1929 | $\ldots \ldots \ldots$ | 15 | 4,433 | 281.1 |

In the paper industries, which represent a higher degree of industrial finish than the other main branch of the exporting industries, the effects of business conditions growing worse was still very little apparent in 1929. 'The uumber of workmen declined by $1.4 \%$, but the gross value of production increased by $5 \%$. The chief divisions of the paper industries comprise the pulp, board, cellulose and paper mills.

The recent development in the pulp and board mills is shown in the next takle:

|  |  | Production in tons. |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Year. | Establish- <br> ments. | Number of <br> workmen. | Mrch. <br> pulp. | Card- <br> board. | Ragg <br> board. |
| 1927 | 52 | 3,817 | $\mathbf{2 S 5 , 3 6 3}$ | $\mathbf{4 5 , 4 7 3}$ | $\mathbf{1 , 2 7 0}$ |
| 1928 | 52 | 3,781 | $\mathbf{3 1 2 , 4 3 6}$ | $\mathbf{5 0 , 5 4 4}$ | $\mathbf{2 , 1 2 0}$ |
| 1929 | 50 | 3,579 | 347,522 | 61,341 | $\mathbf{2 , 0 5 5}$ |

The aggregate gross value of production in these mills amounted in 1929 to 386.1 million marks, an increase on the preceding year of $10.8 \%$. A feature of these industries are the efforts recently made by a great many oï the mills to renew and improve their rechnical equipment. Thus, in 1929 alone, the effective H. P. units of power employed directly in machinery and technical appliances increased by $12.1 \%$.

In the case of the cellulose mills the gross value of production also rose in 1929, the inarease being 7.6 \%. The development in this breuch is shown below:

| Year. | Establish ments. | Number of workmen. | Production in tons. |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  |  | Sulphate. | Sulphite. |
| 1927 | 29 | 6,320 | 116,125 | 378,944 |
| 1928 | 30 | 5,915 | 145,967 | 438,368 |
| 1929 | 30 | 5,688 | 156,517 | 468,614 |

In this branch of industry production has continued to increase, although on the other hand this has brought with it considerable difficulties
as regards placing the output. Conserguently, Finland took the lead last autum in securing an agreement between producing countries for a restriction in the output of sulphite pulp.

The figures for the gross value of output in the paper mills in 1929 reflect the falling prices in the international market. The decrease was not more than $1.6 \%$, yet the downward tendency is clearly apparent. The following table shows the recent development in this branch:

| Year. | Establish- <br> ments. |  |  |  |
| :---: | :---: | :---: | :---: | :---: | | Number of |
| :---: |
| Workmen. |$\quad$| Production of |
| :---: |
| paper in tons. |

THE SITUATION IN 1930.
In the absence of adequate statistical material at present it is, naturally, impossible at this date to give a definite survey of the development of industry during 1930. Nevertheless, a number of general conlusions can already be drawn that are sufficiently accurate. Thus, it can be stated that in very many branches of industry the year 1930 brought with it a further restriction of output and falling prices. An inquiry in respect of the home industries revealed that in some branches output had been curtailed by as much as $25-40 \%$. Similarly, the market prices for
certain industrial products are stated to have fallen iby as much. On the other hand, raw materials and wages have also fallen, though not in the same proportion. In some branches of industry it has ibeen necessary to dismiss workpeople and reduce the number of working hours. Briefly, the period of trade depression has set its stamp ever more clearly on the home industries. As regards the exporting industries, the trade statistics provide sufficient evidence to show the general trend. Thus, we find an appreciable decline in the volume of exports, except in the case of paper, from the figures for the preceding year. The corresponding fall in the value of exports was as much as $17 \%$.

In addition it might be mentioned that according to the official labour statistics the number of industrial workpeople in the last quarter of 1930 showed a decline from the figure for the corresponding period of the preceding year of $14.7 \%$, and the amount of labour a decline of $12.8 \%$.

If, therefore, we were to attempt to estimate the total gross value of production in Finnish industry in 1930 on the basis of the facts stated above, a cautious estimate would probably show it to have declined to about 12,000 million marks, and perhaps even lower.

## ITEMS.

Presidential election. On February 16th the 300 electors who were chosen by the people by general and equal suffrage in January, assembled f.or the election of a President of the Republic. The election was carried out in three ballots, as no one received an absolute majority earlier, and as a result the candidate of the Right, the Prime Minister, Pehr Evind Svinhufvud, was proclaimed President of the Republic for the next six years. The newly elected President has always been known as a protagonist for lawfulness - for that reason he was i.a. in 1915-1916 deported to Siberia - as well as for Finland's independence.

President Svinhufvud was born in 1861, studied law and became a judge in the country districts. Already in 1894 he shared in the work of the Diet of that time, composed of the Estates, and later in the work of the single Chamber, of which he was Speaker in 19071912. After the Russian revolution in 1917 he formed the Government that proclaimed Finland's independence and laboured as the first Head of the State energetically for stabilising the new realm. For the last few years President Svinhufvud retired into private life, but was called upon last summer, when political feeling began to run high, to lead the country once more.

Shipping in 1930. Depressed trade left its traces on shipping also. The extent of shipping is seen in the following figures.

|  |  |  | 1000 |  |
| :--- | ---: | ---: | ---: | ---: |
|  | Number. |  | net reg. tons. |  |
|  | 1930 | 1929 | 1030 | $19 \% 9$ |
| Vessels arrived | 6,774 | 7,228 | 4,422 | 4,623 |
| of wich carso ships | 4,009 | 4,284 | 2,487 | 2,400 |
| Vessels sailed | 6,831 | 7,340 | 4,376 | 4,672 |
| of wich cargo ships | 5,594 | 6,018 | 3,850 | 4,287 |

If the figures concerning shipping are examined month by month, it will be noticed that
during the earlier part of the year, owing to the mild winter, they were higher than in 1929, but that as the depression increased, shipping fell off by degrees.

Ice conditions. During the present winter there has been an unusual amount of snow in most parts of the country. During a prolonged cold period in January and the beginning of February a great deal of ice formed in the surrounding seas. Not only is the Gulf of Finland covered iby ice, but the field of ice extends far out into the Baltic. Besides, pack-ice and driftice bands make it more difficult to keep open channels in the ice, so that shipping could not have been maintained without the help of the State's ice-breakers. In the middle of February it proved necessary to concentrate traffic at the actual winter ports of Hanko (Hangö) and Turku (Åbo). The last vessels in the harbour of Helsinki (Helsingfors) were assisted out and navigation was closed. At the same time navigation proceeds regularly at Hanko and Turku harbours, assisted, in case of need, by the best ice-breakers.

## $*$

Milling industry. Vasa Ångkvarn is building an up-to-date wheat mill with an initial capacity of 12 million kgs. annually, but the mill is so constructed that it can easily be extended to a capacity of 30 million kgs . The mill is to be started next June. - At the same time the Board of Administration of S. O. K. (The Finnish Cooperative Wholesale Society) has decided to build a wheat mill in connection with the rye flourmill at present under construction in Viipuri (Viborg). The mill is to be ready by next autumn.

## THE

## BANK OF FINLAND MONTHLY <br> BULLETIN

is sent free of charge to anyone wishing to receive it. Finnish booksellers are, however, allowed to sell it at a price of 2 marks per copy. Back numbers are also willingly supplied. Should extracts from the Bulletin be printed, the source should be stated. Correspondence with regard to the Bulletin should be addressed to the Bank of Finland, Statistical Department, Helsinki (Helsingfors), Finland.
