## THE FINNISH MARKET REVIEW.

## THE MONEY MARKEIT.

The unusually easy state of the Finnish money market continued in January and the beginning of February. In February, however, there were indications that the increased demand for credit that is common in the latter part of the winter, would not be entirely absent this year, although for the present they are only feeble.

The credits granted by the Joint Stock banks increased in January by 43.7 million marks against a reduction of 16.8 millions last year. Deposits grew by 83.6 million marks, whereas in January, 1933, they increased by 177.1 and during the same month in 1932 by 302.3 millions. It should be noted, however, that this great increase was chiefly due to a rise in the accounts of home correspondents and by no means to deposits by the public. The latter increased in January last year by 19.0 million marks and were reduced in January, 1932, by 28.2 millions, but rose this year by 46.2 millions. The tension between the credits and deposits of the Joint Stock banks, that had amounted to $1,063.9$ million marks at the beginning of 1933, and totalled 141.7 millions at the end of that year, fell off again to a fresh minimum of only 101.8 millions by the end of January.
The position of the Joint Stock banks towards foreign countries also improved appreciably. Their foreign balances increased in January by 65.3 million marks and thus reached an amount of 392.7 millions, a level that has
' not occurred since 1930. The foreign indebtedness of the banks, on the other hand, decreased by 8.7 million marks to 175.4 millions. In this way the Joint Stock banks had a net foreign balance at the end of January amounting to 217.3 million marks in comparison with 25.5 and 71.6 millions in 1933 and 1932 respectively and a considerable net indebtedness in previous years.

In regard to the position of the Bank of Finland the most striking fact is that the reserve of foreign currency continued to grow. The increase for January amounted to 46.8 million marks, so that the reserve of foreign currency exceeded the 1,000 millions level, totalling $1,000.8$ million marks against 496.6 millions one year and 324.4 millions two years before. The credits of the Bank of Finland were reduced in January by 7.7 millions to 707.9 million marks and the note reserve amounted to 831.5 million marks in comparison with 521.0 millions a year ago.

During the first fortnight in February the Bank's reserve of foreign currency increased by 34.9 million marks to $1,035.7$ millions. The credits, that had decreased month by month, 'were characterised by the seasonal development and graw by 24.1 millions. The note circulation, which regularly begins to grow at this time of the year, increased from its lowest point on January 23rd to February 15th by 94.0 million marks. As the increase last year during the corresponding weeks was no larger than 54.5 millions, this is good proof of the livelier
economic activity, principally of increased lumber work.

The level of prices displayed a slightly rising tendency in January, the wholesale price index advancing from 89 to 90 . The index for industrial products in the home market remained unchanged, for imported goods the index rose 1 point, while the index for agricultural produce dropped to a corresponding extent. The cost of living index had a falling tendency chiefly owing to a fall in the price of foodstuffs.

## TRADE AND INDUSTRY.

Foreign trade fell off very much in January as usual. The value of imports amounted to 289.2 million marks compared with 346.9 millions in December, while the value of exports dropped from 443.4 million marks in December to 284.1 millions in January. Imports were comparatively heavy - this being mainly due to the apprehension of higher duties as a consequence of the commercial agreement with Germany being denounced. Owing to this circumstance considerable quantities of goods, that had been imported from or via that country, were taken out of the Customs warehouses in Finnish ports. For the first time during many months there was therefore a smail surplus of imports amounting to 5.1 million marks, there having been a surplus of exports during January in previous years.

Imports of rye, wheat and wheaten flour, coffee and sugar, as well as raw cotton, wool and petrol were fairly heavy for the time of year. Exports of plywood, sulphate cellulose, cardboard and paper were larger than in

January, 1933. The same was the case in regard to exports of butter and raw hides.

The timber market was fairly lively. According to supplementary calculations about 300,000 standards had been sold by the end of last year for delivery in the course of the current year. By the middle of February sales were estimated to amount to about 440,000 standards against 250,000 standards a year ago. Prices are also appreciably higher than last year.

## THE LABOUR MARKET.

A slight increase in unemployment has to be recorded for January. The number of unemployed registered by the Unemployment Boards was about 43,200 at the end of January compared 'with 41,000 at the end of last year, but about 76,900 in January, 1933. Of these unemployed about 19,200 had been given employment in Government and Municipal relief work.

According to the market statistics of the Ministry for Social Affairs the index for the number of working hours in industry during the first quarter of this year was 88.9 against 78.1 during the fourth quarter of 1933 and 80.7 a year ago. For industry supplying the home market the corresponding index was 95.3 in comparison with 81.8 a year ago. The exporting industries recorded a much smaller rise from 80.2 to 82.7 . All branches of industry were working at higher pressure than during the first quarter of 1933 ; but the increase was very uneven. The glass and stone industries and the chemical industry attained the highest level, the number of working hours in these branches having already exceeded the corresponding figures for the basic year 1926.

The term imports covers all imported goods which are placed on the market either immediately after importation or after storage. Exports covers all goods exported from the open mariet, including re-exports. Goods are declared to the Customs by their owner, who must at the same time state the value of the goods as calculated at the frontiers of the country.

* Preliminary figures subject to minor alterations.

The index is calculated by the Research Office of the Ministry for Social Affairs according to monthly reports from 30 different centres. It is based on the cost of living for the first half of $1914=100$ and refers to the normal budget of a workman's family. The index for the total cost of living is the average of the weighted group indices.

The index is calculated by the Central Statistical Office, and is based on the average prices for $1926=100$. The first group of indices refers to goods appearing in local wholesale trade in Finland, whereas the indices for imported and exported goods refer to the total quantities of goods imported or exported, including the movement of such goods that are in no way intended for wholesale trade in Finland. An indirect weighting has been applied, by means of which each class of goods is represented by the number of commodities corresponding to the calculated importance of this class in wholesale trade. The averages are arithmetical ones.

## CERTAIN PARTICULARS ABOUT FINLAND.

## 1. FORM OF GOVERNMENT.

Finland forned a part of the kingdom of Sweden from $115 \pm$ to 1809; after 1809 it was an autonomous Grand Duchy connected with Russia up to December 6th, 1917, when Finland declared its independence, which was acknowledged by all the Powers including Soviet Russia. It became a republic in 1919. The legislative power of the country is vested in the Diet and the President. The highest executive power is held by the President chosen for a period of 6 years. The present President P. E. Svinhutvud is elected for the term 1 March, 1931, to 1 March, 1937.

The Diet, composed of 200 members, is elected by universal suffrage. The proportions of the different partics in the Diet elected in 1933 are as follows:

Number
Social-Democratic party . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 78
Agrarian party . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 53

People's party

## 2. LAND.

THE AREA is 388,217 square kilometres $=149,081$ square miles, (Great Britain's area is $\mathbf{8 9 , 0 4 7} \mathbf{~ s q}$. m. and Italy's area 117,982 sq. m.). Of the total area $11.5 \%$ are lakes. On an average $10.8 \%$ of the land in the south of Finland is cultivated, $0.0 \%$ in the North, $6.3 \%$ of the whole land. Of the land area 25.3 mill. ha ( 62.5 mill. acres) or $73.4 \%$ are covered by forests.

THE AVERAGE TEMPERATURE in the coldest month is in S. W. Finland - $5^{\circ}$ to - $6^{\circ}$ C., in Lappland - $15^{\circ} \mathrm{C}$. and during the warmest month $+15^{\circ}$ and $+13^{\circ}$ to $+14^{\circ} \mathrm{C}$. resp. The average temperature in Helsinki (Helsingfors) is $+4.6^{\circ}$ (in Oslo $+5.4^{\circ}$, in Montreal $+5.4^{\circ}$, in Moscow $+3.6^{\circ}$ ). The ground is covered by snow in the South for about 100 days, in Central Finland for 150 to 180 days, in Lappland abont 210 days.

## 3. POPULATION.

NUMBER OF INHABITANTS (1931): 3.7 millions (of whom 0.2 million emigrants), Sweden (1931) 6.2, Switzerland (1930) 4.1, Denmark (1930) 3.6 and Norway (1930) 2.8 millions.

DENSITY OF POPULATION (1931): In South-Finiand 18.7, in North-Finland 2.5 and in the whole country an average of 10.8 inhabitants to the square kilometre.

DISTRIBUTION (1931): $80.9 \%$ of the population inhabit the country, 19.1 \% the towns and urban districts. The largest towns are (1931): Helsinki (Helsingfors), the capital 260,838 inhabitants, Turku (Abo) 67,722, Viipuri (Wiborg) 59,321, Tampere (Tammerfors) 57,349.

OCCUPATION (1930): agriculture $59.6 \%$, industry and manual labour $16.8 \%$, commerce $4.3 \%$, transport $3.8 \%$, other occupations $15.5 \%$.

LANGUAGE (1930): Finnish speaking $89.4 \%$, Swedish speaking $10.1 \%$, others $0.5 \%$.

RELIGION (1931): Jutheran $96.3 \%$, Greek-Orthodox $1.8 \%$, others $1.9 \%$.

EDUCATION (1930): Amongst persons over 15 years of age only $0.9 \%$ are illiterate. There are three universities founded in 1640, 1917 and 1920.

INCREASE OF POPULATION (1931): Births $19.5 \%$, deaths $13.3 \%$ (in France in $193015.7 \%$, and in England in $193011.4 \%$, natural increase $6.2 \%$.

## 4. TRADE AND COMMUNICATIONS.

FOREST RESOURCES. The growing stock of the forest is 1,620 million $\mathrm{m}^{8}$ ( 57,213 million cubic feet). The merchantable timber (measuring 20 cm at breast height $=6 \mathrm{in}$. at a height of 18 ft .) amounts to 1,557 million trees. Of this number pine is represented by $61 \%$, spruce by $28 \%$, the conifers thus constituting $89 \%$ or 1,384 million trees, leaftrces, mostly birch, $11 \%$ or 173 million trees. The annual increment is 44.5 million $\mathrm{m}^{3}(1,568$ million cub.ft.). The annual fellings according to earlier calculations are 40 million $\mathrm{m}^{3}$ ( 1,413 million cub. ft.). In North Finland the increment is mueh larger than the fellings, but in South Finland excess felling occurs locally.

AGRICULTURE (1930): Cultivated land 2.2 million hectars, divided as follows: area under cultivation $0 .:-10$ hectars $33.4 \%$, $10-50$ ha $52.1 \%, 50-100$ ha $8.4 \%$, over 100 ha $6.1 \%$. Cultivated land is divided between the different kinds of crops as follows: $51.4 \%$ hay, $19.4 \%$ oats, $91 \%$ rye, $5.1 \%$ barley, $3.1 \%$ potatoes, $11.9 \%$ other. The number of dairies in 1931 amounted to 646.

OWNERSHIP OF LAND. The land area is distributed among different classes of owners approximately as follows: private $52.1 \%$. State $39.7 \%$, Joint Stock Companies $6.5 \%$, communities $1.7 \%$.

INDUSTRY (1931): Number of industrial concerns 3.497, hands 120,579 , gross value of products of industry 9,264 million marks.

LENGTH OF RAILWAYS (1931): $5,435 \mathrm{~km}$, of which 5,180 km State railways and 255 km private. The gauge is 1.524 m .

COMMERCIAL FIEET (1931): Steamships 527 ( 151,266 reg. tons net), motor vessels 150 ( 15,145 r. t.), sailing ships 311 ( 64,621 r.t.), lighters 3,729 ( 266,179 r.t.). Total 4,717 ( 497,211 r.t.).

## 5. FINANCE AND BANKING.

CURRENCY. Since 1860 Finland has its own monetary system. From 1877 up to the Great War the currency maintained its stable gold value and after the disturbances caused by the war Finland has again from January 1st, 1926, a gold standard. The unit of currency is the mark (Finnish smarkkan) $=100$ penniä. The gold value of 100 marks is equal to $\$ 2.5185=£-10 \mathrm{~s} .4^{1 / 5} \mathrm{~d}$.

STATE FINANCES. According to the balance sheet for 1932 the State revenue was $2,925.1$ million marks of which $2,438.2$ million marks were ordinary revenue, and State expenditure 3,001.7 million marks, of which $2,484.6$ million marks were ordinary expenditure. The principal sources of revenue were as follows: State property and undertakings (net) 104.2, direct taxes 440.1, indirect taxes 1,238.2, miscellaneous taxes 225.8, charges 79.9, miscellaneous revenue 350.0 and capital revenue 486.9. The value of State property in 1922 is estimated at $11,150.6$ million marks. For Public Debt see table 19 in this issue.

MUNICIPAL FINANCES. According to the Budget for 1933 expenditure amounted to $1,383.8$ million marks. Income from taxation was calculated at 489.9 million marks, taxed fncome at 4,970.2 million marks. The communal income tax (non-progressive) averaged $9.9 \%$ of the ratepayers' income.

THE BANK OF ISSUE. The Bank of Finland, (founded in 1811) is a State Bank. Its head-office is in Helsinki (Helsingfors) with branches in Turku (Ảbo), Pori (Björneborg), Vaasa (Vasa), Oulu (Uleãborg), Kuopio, Joensuu, Sortavala, Vípuri (Wiborg), Mikkeli (S:t Michel), Tampere (Tammerfors), Hameenlinna (Tavastehus), Jyvăskylä and Kotka.

THE JOINT STOCK BANKS (1933): Number 10, possess 489 branch offices, where all kinds of banking business is transacted. Including all banks, there is one banking establishment per 6,600 inhabitants.

The largest banks are: Kansallis-Osake-Pankki, Ab. Nordiska Föreningsbanken and Helsingfors Aktiebank, all with head offices in the capital.

OTHER BANKS (1932): Mortgage banks 6, Savings banks 481, Co-operative Credit Societies 1,410 and a Central Bank for the latter.

# FOREIGN TRADE IN 1933. 

BY<br>VERNER LINDGREN, м. a.<br>HEAD OF THE STATISTICAL DEPARTMENT OF THE BOARD OF OUSTOMS.

GENERAL REVIEW.
It can scarcely be said that the state of world trade improved during 1933. On the contrary, higher duties, import contingents and prohibition of imports, control of foreign currency and similar restrictions interfered to a growing extent with the free course of trade. As regards Finland, however, the restrictive tendencies were not particularly marked. Some higher import duties were, indeed, introduced in 1933, and the Government undertook some measures for supporting exports of dairy produce, but foreign trade wwas not hampered in other respects on the part of Finland either by prohibiting imports, fixing contingents or controlling foreign exchange.

Although trade with other countries during 1933 thus had to surmount many obstacles, its course was on the whole favourable. Its total volume, that had diminished uninterruptedly during the years of trade depression and even up to 1932, increased last year by no less than 17 per cent. Both imports and exports grew in approximately the same proportion. Imports were still considerably below the level of the period of good trade conditions, but exports attained higher figures as regards volume than ever before.

The tendency of prices for imported goods during 1933 was a falling one throughout and the average level for the year was about 5 per cent lower than a year before. Export prices were also on the down grade generally, though there was an exception of importance for Finland: sawn timber. In this case there twas a considerable rise in price, and its weight is so great in the Finnish export trade that the average level of prices for 1933 remained approximately as high as in 1932. This divergence in the course of prices caused the balance of trade to be financially still more favourable in 1933 than it had been in 1932. The final figures in this respect are given below.

Value of foreign trade.

| Year. |  | Imports. <br> Mill. mks. | Exports. <br> Mill. mks. | $\left.\begin{array}{c}\text { Surplus of imports } \\ (-) \\ \text { or exports. } \\ \text { Mill. mks. }\end{array}+\right)$. |
| :--- | :--- | :---: | :---: | :---: |

The balance of trade for 1933 was, in figures, better than it had ever been before. Finland's balance of trade was formerly generally adverse and during the years of good trade in 1928 and 1929, in particular, imports were heavy. At that time the short-term foreign indebtedness also advanced rapidly. When the crisis set in subsequently, this indebtedness at first created a certain amount of uneasiness, but by the end of 1932 it had practically been paid off and the
large surplus of exports for 1933 is therefore likely to strengthen Finland's position in regard to foreign payments very much.

## EXPORTS.

As already mentioned, exports attained a larger volume in 1933 than ever before, while their value was appreciably below the level of the years of good trade conditions, though higher than in the two previous years. This favourable development of Finnish export trade in 1933 is principally due to the comparatively good state of the market for sawn timber. The quantity exported increased from 736,000 stds in 1932 to 983,000 stds and owing to higher prices the value of exports rose even more or from 1,212 to 1,713 million marks, which represents an increase from 26.2 to 32.4 per cent of the total value of exports.

The other branches of the woodworking industries also recorded larger exported quantities than in 1932, cellulose from 757 to 798 million kgs , paper from 287 to 319 million kgs , mechanical pulp from 180 to 208 million kgs , plywood from 81 to 96 million kgs and cardboard from 56 to 60 million kgs. F'or all of them, however, especially for cardboard, prices tended downward and their proportion to the total value of exports dropped since 1932 for cellulose from 24.9 to 22.3 per cent and for paper from 14.0 to 12.2 per cent. For plywood the proportion remained unaltered at 4.3 per cent, but for mechanical pulp and cardboard it rose from 5.0 to 5.1 per cent.

Exports of animal foodstuffs, that play a considerable part in Finland, fell off in value since 1932 from 517 to 478 million marks and in relation to the total exports from 11.2 to 9.1 per cent. Prices fell in general, especially so in the case of the largest commodity, butter. Selling proved difficult and by means of special premiums the Government endeavoured to assist exports. The premiums amounted to considerable sums, in percentage of the f.o.b. prices on an average to over 25 per cent for eggs and pork, to about 15 per cent for butter and to about 10 per cent for cheese. The sales
were fairly satisfactory, except in the case of butter.

The classes of exports enumerated represented altogether about 92 per cent of the total Finnish export trade in 1933 or approximately the same as in the previous year. The remaining exports amounted to 400 million marks in value in 1932, but to 432 millions in 1933. For its minor articles of export, too, Finland thus secured a somewhat larger market.

In regard to the distribution of exports among different purchasing countries the following table shows that they increased in almost all cases.

Exports to different countries.

|  | $\begin{gathered} 1931 \\ \text { Mill. mks. } \end{gathered}$ | $\begin{gathered} 1932 \\ \text { Mili. mks. } \end{gathered}$ | $\begin{gathered} 1933 \\ \text { Mill. mks. } \end{gathered}$ |
| :---: | :---: | :---: | :---: |
| Great Britain | 1,991 | 2,165 | 2,429 |
| Onited States | 413 | 444 | 462 |
| Germany | 375 | 386 | 521 |
| France | 320 | 301 | 300 |
| Belgium | $\bigcirc 65$ | 247 | 262 |
| Holland | 226 | 164 | 264 |
| Sweden | 131 | 120 | 116 |
| Other countrie | 282 | 394 | 846 |

Of the increase since 1932 the share of Great Britain is 264 million marks, of Germany 135 millions, of Holland 100 millions, of the United States 18 millions and of Belgium 15 millions. The increase was proportionately larger in the case of countries on a gold basis than in the case of countries with a paper currency. The share in the total exports of Finland increased since 1932 for Germany from 8.3 to 9.8 per cent and, for Holland from 3.5 to 5.0 per cent, but fell off for Great Britain from 46.8 to 45.9 for the United States from 9.6 to 8.7 and for Sweden from 2.6 to 2.2 per cent.

## IMPORTS.

During 1933 imports, if measured by the standards of normal times, were still low, but both in volume and value they were larger than in the two previous years. The great increase in raw materials and other goods for productive activity was one of their conspicuous features in 1933. The division of imports into main classes is seen in the following table.

IMPORTS OF GOODS FOR PRODUCTION IN 1933
IMPORTS IN 1932

Value of imports in main classes.

|  | $\begin{gathered} 1931 \\ \text { Mill. mks. } \end{gathered}$ |  | $\begin{gathered} 1932 \\ \text { Mill. mks. } \end{gathered}$ |  | $\begin{gathered} 1933 \\ \text { Mill. mks. } \end{gathered}$ |  | 1931 |  | $\underset{\text { tal im }}{1932}$ |  | 1933 |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Raw materials and semiproducts | 1,383 |  | 1,491 |  | 1,803 |  | 40 |  | 43 |  | 46 |  |
| Machinery, means of trausport etc. | 512 |  | 463 |  | 550 |  | 15 |  | 13 |  | 14 |  |
| Goods for production |  | 1,895 |  | 1,954 |  | 2,353 |  | 55 |  | 56 |  | 60 |
| Other industrial goods | 880 |  | 688 |  | 724 |  | 25 |  | 20 |  | 18 |  |
| Foodstuffs and luxuries | 690 |  | 860 |  | 849 |  | 20 |  | 24 |  | 22 |  |
| Goods for consumption |  | 1,570 |  | 1,548 |  | 1,573 |  | 45 |  | 44 |  | 40 |
| Total imports | 3,465 |  | 3,502 |  | 3,926 |  | 100 |  | 100 |  | 100 |  |

Since 1931, when imports reached their lowest point, the total increase up to 1933 was 461 million marks, and of this amount no less than 420 millions refer to raw materials and semiproducts. Imports of metal goods grew by 46 million marks to 240 millions, of minerals by 39 to 235 millions, of spinning and weaving materials by 82 to 227 millions, of oils by 43 to 189 millions, of cattlefood and seed by 16 to 183 millions, of chemical elements by 42 to 175 millions and of hides by 4 to 97 millions. The increase was thus quite general and is an expression of the improvement that has occurred of late in Finnish industry.
Imports of machinery, means of transport etc. increased during these two yeara by 38 million marks. The figure for 1933 is, however, not yet final, as the data with regard to ressels purchased in the course of the year, but not yet brought to Finland, will only be obtained later. The total value for 1933 will consequently be raised in all probability.

Of the total increase in imports since 1931 a further 159 million marks refer to foodstuffs
and luxuries; this increase is, however, proportionately smaller than in the case of other imported goods. Since 1931 imports of colonial produce have grown by 125 million marks to 411 millions, for the greater part owing to higher prices, certain kinds of cereals by 17 millions to 253 millions - the rise in prices alone is responsible for about 25 millions and of other goods also by 17 millions to 185 millions.

Imports of other goods intended for consumption, industrial semi-products etc. have been reduced in two years by 156 million marks. Imports of textiles decreased by 120 millions to 265 millions, of metal goods by 8 millions to 153 millions and of other goods by 29 millions to 306 millions.

This tendency in the import trade of Finland of late of restricting goods for actual consumption in a comparative degree, coincides with the fact that a comparatively large part of the imports consisted of goods with a prolonged period of consumption and can therefore be regarded as a form of capital investment.

Whereas such goods were imported in 1931 to a value of 826 million marks and in 1932 to a value of 785 millions, the corresponding imports, representing the investment of capital, were 967 millions last year. And, as already stated, particulars are still wanting for vessels purchased by Finland, but not yet cleared through the Customs. If we compare imports of such goods during the last two years, we will find that imports of machinery rose by 72 million marks to 273 millions, of all kinds of durable productive materials, such as metals etc., by 52 millions to 327 millions and of goods for consumption representing a capital value, such as works of art, ornaments and valuables, furniture and fittings etc., also by 52 millions to 200 million marks. This tendency is, of course, to some extent a sign of a return to more normal conditions.

The distribution of imports among different selling countries results in the following important items.

| Imports | different countries. |  |  |
| :---: | :---: | :---: | :---: |
|  | $\stackrel{1931}{\text { Mill. mks. }}$ | 1982 <br> Mill. mks. | $\begin{gathered} 1983 \\ \text { Mill. mks. } \end{gathered}$ |
| Germany | 1,210 | 1,003 | 1,085 |
| Scandinavia | 456 | 523 | 623 |
| Great Britain | 435 | 641 | 804 |
| United States | 379 | 269 | 289 |
| Holland | 174 | 154 | 137 |
| Russia | 96 | 178 | 184 |

Of the increase since 1932 the share of Great Britain is represented by 163 million marks, of the Scandinavian countries by 100 millions. of Germany by 82 , of the United States by 20 and of Russia by 6 million marks. In the case
of Holland imports fell off by 17 millions. It was therefore chiefly from countries with a paper currency that imports into Finland increased last year.

## FUTURE PROSPECTS.

It is not very likely that Finland's extraordinarily favourable balance of trade, which we have been able to record statistically for the last few years, will continue for long. The exporting industries have, it is true, increased their productive capacity very much during this time, so that, unless any special complications occur, Finland should be able to compete in the world market and maintain its sales. But on the other hand a still greater increase in imports may be expected. The latter have of necessity been kept down to an unusually low level in consequence of depressed trade and the state of the foreign exchanges. During this period local production has also increased its capacity in this sphere, so that heavier imports of finished products of industry can scarcely be anticipated. But on the other hand all kinds of raw materials that Finland does not produce, will probably have to be imported on a larger scale. - The final aspect of international trade policy is, of course, of great. importance for the future development of our trade. In this respect, however, there is the utmost uncertainty. It may be noted, nevertheless, that as regards Finland the position has been stabilised in so far as a new commercial agreement with Great Britain came into force in the autumn of 1933.

## ITEMS.

The Diet. The Diet assembled for the regular winter session on February 1st. As a legacy from the previous session it had inherited various matters that it had to conclude. As reports had already been submitted on some
of these subjects, the Diet was able to proceed immediately to deal with the matters. In some cases the decisions resulted in a definite defeat of the motions, but in other cases the Diet decided to submit motions on the questions
to the Government. Among the matters passed we can mention the question of land purchase by timber companies and the stabilising of agricultural credits.

The Public Debt. At the end of January the booked Public Debt amounted to $3,484.2$ million marks compared with $3,507.7$ millions at the end of December and $3,683.6$ millions at the end of January, 1933. Thus the booked Public Debt was reduced in the course of last year by approximately 200 million marks. During January the Public Debt was reduced by 24 million marks. The distribution of the Public Debt according to its nature and the changes in it are given in the following table in millions of marks:

|  | $\begin{aligned} & 31 \text { Jan. } \\ & 1938 \end{aligned}$ | $\begin{aligned} & 31 \text { Dec. } \\ & { }_{1933} \end{aligned}$ | 31 Jan. 1984 |
| :---: | :---: | :---: | :---: |
| Foreign debt: |  |  |  |
| Funded | 2,426.5 | 2,384.0 | 2,365.0 |
| Floating | 575.4 | 358.9 | 303.4 |
| Total | 3,001.9 | 2,742.9 | 2,668.4 |
| Internal debt: |  |  |  |
| Funded | 5.20 .4 | 716.0 | 746.0 |
| Floating | 161.3 | 48.8 | 69.8 |
| Total | 681.7 | 764.8 | 815.8 |
| Total Public Debt | 3,683.6 | 3,507.7 | 3,484.2 |

$\because$
Motor vehicles. The number of motor vehicles in the country at the end of 1933 was 34,793 with a total of $1,283,100 \mathrm{HP}$. The corresponding figures for the end of 1932 were 35,078 motor vehicles with $1,260,800 \mathrm{HP}$. While the total number of motor vehicles has thus been slightly reduced, the quantity of horse-power has risen to a small extent. If we divide the motor vehicles into classes, however, the actual changes are greater, as the following table shows.

|  | $\begin{array}{r} 19 \\ \text { Number. } \end{array}$ | ${ }^{3} \mathbf{H P}$ | $\begin{array}{r} 19 \\ \text { Number. } \end{array}$ | 2 HP |
| :---: | :---: | :---: | :---: | :---: |
| Passenger cars | 18,861 | 794,800 | 19,49\% | 804,500 |
| Motor buses | 1,306 | 69.500 | 1,214 | 61,800 |
| Motor lorries | 10,039 | 379,100 | 9,820 | 356,100 |
| Motor cycles | 4,987 | 39,700 | 4,549 | 38,400 |

This shows that the number of passenger cars has decreased, while small increases can be recorded in the other classes. Imports of
motor vehicles were very small last year, there only being a slight increase in regard to chassis for commercial vehicles.
$*$

Exports of eggs. During last year exports of eggs from Finland increased rapidly and have grown to be of greater and greater importance in Finnish agriculture. Their growth is seen in broad lines in the following figures:

|  | Exported eggs, <br> millions. |  | Tons. | Value, <br> mill. mks. |
| ---: | :---: | ---: | ---: | ---: |
| 1929 | $\ldots \ldots$ | 0.6 | 39.8 | 0.9 |
| 1930 | $\ldots \ldots$ | 7.4 | 433.0 | 6.3 |
| 1931 | $\ldots \ldots$ | 33.4 | $\mathbf{1 , 8 8 5 . 3}$ | $\mathbf{2 5 . 6}$ |
| 1932 | $\ldots \ldots$ | 108.0 | $6,269.2$ | 88.2 |
| 1933 | $\ldots \ldots$ | 170.0 | $9,896.4$ | 132.5 |

The greater part of the exports of eggs went to Great Britain and Germany, which received about 95 per cent of these exports last year. Smaller parcels were sold to Siweden, Spain, Czechoslovakia, Russia etc. The average price of the eggs amounted to Fmk 13:39 per kg last year. In all the preceding years the price was slightly higher, the highest price being attained in 1929.

This active increase in the production of eggs in Finland is to a large extent a result of the premiums paid by the Government in order to stabilise prices within the country and thereby to grant the producers of eggs. mostly small farmers, a measure of financial assistance in their present difficulties owing to depressed trade. The premium amounted to Fmk 2:50 per kg.

Ice conditions and shipping. In January and February the weather was mild in general: the temperature was about $2^{\circ} \mathrm{C}$. above normal. On account of temporary cold spells, however. the ice conditions have at times caused trouble to shipping, especially when the ice has packed along the Finnish coast. With a north wind the ice has disappeared again and navigation has been very easy. It has therefore been possible to keep navigation open at more ports than usual in South Finland, viz., Mäntyluoto,

Rauma, Turku (Åbo), Hanko (Hangö), Helsinki (Helsingfors) and Kotka.

Statistical Year Book of Finland. The Central Statistical Office has published a new edition of the Statistical Year Book of Finland. In its contents the Year Book is approximately the same as in previous editions. It contains 292 tables of 370 pages illustrating the popul-
ation, cultural and economic conditions in Finland as well as international reviews. In form the Year Book differs from its predecessors, the text being in three languages: Finnish, Swedish and French, whereas former issues were printed in a Finnish and a Swedish edition. The size of the Year Book has also been altered slightly in order to provide space for the increased letterpress. The price of the Year Book is Fmk 60:-

## THE BANK OF FINLAND

 MONTHLY BULLETINis sent free of charge to anyone wishing to receive it. Finnish booksellers are, however, allowed to sell it at a price of 2 marks per copy. Back numbers are also willingly supplied. Should extracts from the Bulletin be printed, the source should be stated. Correspondence with regard to the Bulletin should be addressed to the Bank of Finland, Statistical Department, Helsinki (Helsingfors), Finland.

[^0]:    According to information supplied by the Central Statistical Office.
    *Preliminary figures subject to minor alterations.

[^1]:    ${ }^{1}$ ) According to data supplied by the Treasury Internal loans are given at their nominal value and foreign loans in Finnish currency according to the rate ruling on the date of the raising of the loan. - ${ }^{2}$ ) Calculated as follows: The outstanding amounts of both internal and foreign loans have been converted into Swiss francs at the monthly average rates of exchange of the respective currencies.

[^2]:    - Preliminary figures subject to minor alterations.

[^3]:    * Preliminary figures subject to minor alterations.

[^4]:    * Preliminary tigures subject to minor alterations.

[^5]:    The above particulars which are of a preliminary nature, are compiled by the Research Office of the Ministry for Social Affais. ${ }^{1}$ ) Approximately estimated.
