# BANK OF FINLAND Monthly Bulletin 

No. 10
OCTOBER
1927

## THE FINNISH MARKET REVIEW.

## THE MONEY MARKET.

The state of the money market in September and in the beginning of October may still be described as a very easy one, although a slight stringency occurred in September. This is customary for the time of year and is partly connected with the expense of getting in the harvest and partly, too, with the repayment of the last instalments of the short-term credits of the exporting industries. In October, when the new credits begin to be received, a more pronounced easing of the money market is usually felt in consequence. As a contributory factor of a special kind it should be stated that the Municipal Mortgage Bank has withdrawn and will continue to withdraw considerable amounts from the banks in the near future, as its funds can be devated to their proper purpose.

The credits of the Joint Stock banks only increased slightly during September or by 18.1 million marks as compared with 108.9 million marks last year. Deposits, on the other hand, showed a falling off of 114.9 million marks, while in September, 1926, they rose by 31.4 millions. It must be noted, however, that actual deposits were increased in September, too, and that the drop is due to the accounts of home correspondents which showed a reduction of 156.8 million marks, for the most part as a result of the withdrawals by the Municipal Mortgage Bank already referred to. The
difference between credits and deposits was thus increased by 133.0 million marks to 971.8 millions. A year ago the corresponding figure was 1,159.2 million marks. This tightening of the money market did not cause the banks any trouble whatever. On the contrary, the rediscounting by the Joint Stock banks at the Bank of Finland was further reduced. At the end of September the total amount of rediscounts was quite insignificant, being only 15.7 million marks as against 51.9 millions a year before. - The cash of the Joint Stock banks, however, was reduced to some exten't during September, ibut at 276.2 million marks it nevertheless stood about 70 millions higher than at the same time last year.
The increased demand for credit was satisfied by the Joint Stock banks chiefly by means of changes in their position towards other countries. Foreign credit balances were reduced and foreign indebtedness increased. By this means the net foreign balances of the banks fell from 11.0.9 million marks at the end of August to 58.4 millions at the end of September. For the sake of comparison it should be added that at the end of September, 1926, the banks had a net indebtedness amounting to 153.2 million marks and that the net indebtedness in previous years was even greater.
In regard to the position of the Banle of Finland attention is called for, first of all, by the great increase of 1.35 .6 million marks in the
reserve of foreign currency during September. At the end of that month the reserve of foreign currency amounted to $1,230.8$ million marks as compared with only 956.1 millions a year earlier. The notes in circulation also increased greatly by 62.7 million marks. They therefore amounted to $1,476.2$ million marks, i. e. an amount they had never before risen to at this time of the year. This proves very clearly, how lively business enterprise is at present in Finland. It should further be noted that the total credits of the Bank of Finland again fell in September, but that they were, nevertheless, considerably higher than last year. The note reserve, on the other hand, was sligtly increased and amounted to 758.5 million marks at the end of September or about 20 millions more than a year ago.

In other respects it may be noted that deposits in the Savings banks have month by month exceeded the corresponding figures for previous years. While the increase for January -September last year represented 199.6 million marks, it amounted this year to 334.8 millions. It should also be pointed out that the clearing operations likewise show a great increase; in September, when this turnover reached a new record figure of $2,045.8$ million marks, it was approximately 570 million marks higher than during the same month last year.

The tendency of the level of prices is uncertain. The wholesale price index showed a rise of 1 point to 148 . Prices for foodstuffs, leather and timber advanced, besides those for textiles. On the other hand the cost of living index fell 7 points to 1,230 awing chiefly to the fact that the special index for foodstuffs dropped.

## TRADE AND INDUSTRY.

Foreign trade in September was both particularly lively and advantageous. Imports with a value of 621.7 million marks established a new record. Exports, it is true, did not attain any new monthly maximum, but with a value of 826.9 million marks they exceeded all previous figures for September. The difference between the value of exports and imports also establishes a new record
for the month under review. The surplus of exports was 205.2 millions or almost twice as. large as in September, 1926. As a consequence, while foreign trade had hitherto shown an unfavourable net result for the part of the year that had elapsed, a surplus of exports has now arisen amounting to 114.0 million marks. Last year the trade statistics for the same period showed a surplus of imports of 29.9 million marks. This year's favourable result is principally - though by no means solely - a consequence of the exceedingly lively timber shipments. As exports of sawn goods amounted to 938,600 standards by the end of September as against 705,000 last year, this proves, however, that the timber shipments still to be made this year are less than last year, even though a fresh record in this respect is undoubtedly likely to be attained.

Sales of sawn goods for delivery during the current year amounted in September to about 70,000 standards, representing chiefly the replenishing of stocks. The total sales are estimated to be $1,135,000$ standards at the end of September, which equals the total exports for last year. As the remaining stocks in exporters' hands are small, interest has been directed more and more to sales for delivery next year. During the latter half of September various sales were effected and the total quantity sold is calculated to amount to 75,000 standaxds. Among the buying countries Germany has shown special interest, while England has been inclined to adopt a waiting attitude. In regard to price importers will probably have to be prepared to pay higher prices than last year, for, as the price of timber in the forests has risen, the sawmills will also have to demand higher prices for the finished article.

## THE LABOUR MAREET.

The state of the labour market remains unchanged. The prolonged labour dispute in the metal trade has not yet been settled, as both sides stick to their demands stubbornly; a return to work has, however, occurred in some places. - The supply of work continues to be good.

## CONTENTS OF THE TABLES.

## I. MONEY MARKET.

Bank of Finland:
Balance sheet.
Note issue.
Note circulation and foreign correspondents. Note reserve and home loans.
Rediscounted bills and balances of current accounts.
Rates of exchange.
Joint Stock banks:
Home doposits.
Home loans.
Position with regard to foreign countries.
10. Position of the banks towards foreign countries.
11. Clearing.
12. Deposits in the savings banks.
13. Deposits in Post Office Savings Bank and on Consumers' Co-operative Societies' Savings Account.
14. Changes in Number and Capital of Limited Companies.
15. New risks insured by Life Assurance Companies.
16. Helsingfors Stock Exchange. Bankruptcies. Protested Bills.
17. Stock Exchange index.
II. STATE FINANCES.
18. National Debt.
19. State revenue and expenditure.
20. Miscellaneous State receipts collected by Customs.

## III. FOREIGN TRADE.

21. Value of imports and exports.
22. Value of imports and exports in different groups of goods.
23. Imports of the most important articles.
24. Exports " " " "
25. Foreign Trade with various countries.
26. Import-price index.
27. Export-price index.
28. Index numbers for quantities of imports and exports.
29. Value of imports and exports divided according to the purpose of the goods.
IV. TRAFFIC.
30. Foreign shipping.
31. Shipping with various countries and passenger traffic.
32. Railways, goods traffic and rolling stock.
33. Railways revenue, expenditure and traffic surplus.

## V. LEVEL OF PRICES.

34. Index number of cost of living.
35. Wholesale Price Index.
VI. LABOUR MARKET.
36. Number of unemployed.
37. Cessation of Work.

Turnover of Stock Exchange according to figures supplied by the Stock Exchange Committee.
The figures for bankruptcies are not comparable with those published earliar in 1923. The figures above; compiled by the Central Statistical Office according to the reports sent in by the various Courts, inclade all bankruptcy petitions, of which only about half will lead in due course to actual bankruptcy, whereas the rest owing to agreemant, lack of means etc. will be cancelled.

Protested bills according to figures published in the Report of Bills Protested in Finland.

* Preliminary figures subject to minor alterations.

## 17. - STOCK EXCRANGE INDEX.

| Year | Jan. | Febr. | March | April | May | June | Juiy | Aug. | Sept. | Oct. | Nov. | Dec. | Year |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1924 | 143 | 143 | 139 | 129 | 127 | 126 | 125 | 125 | 122 | 123 | 123 | 122 | 1924 |
| 1925 | 126 | 127 | 121 | 118 | 120 | 125 | 132 | 134 | 135 | 136 | 141 | 147 | 1925 |
| 1926 | 144 | 147 | 152 | 154 | 153 | 157 | 164 | 172 | 175 | 172 | 177 | 178 | 1926 |
| 1927 | -198 | 211 | 222 | 219 | 224 | 283 | 265 | 256 | 248 |  |  |  | 1927 |

According to Hgures pubisished in the sMeroators.
This revised index series is based on the prices bld at the end of each month for 18 representative sacurities, viz., 4 bank, 12 industrial and 2 other kinds of shares, By multiplying the price bid for each security by the number of shares in the corresponding company the so-called sxchange values has been arrived at for the share capital of the company, the sum of which values has been calculated in $\%$ of the total nominal value of the share capital of the same companies. These percentages in the above table usvally show a fall during March and April owing to the payment of dividends.
18. - NATIONAL DEBT.

The above table is based on the monthly report on the National Debt published by the Treasury in the Official Gazette. - The whole National Debt is funded.
${ }^{1}$ ) Internal loans are given at their nominal value. Foreign loans are given in Finnish currency according to the rate ruling on the date of the raising of the loan. As a regult of this, loans of an earlier date than 1914 are get down at par.
${ }^{2}$ ) Calculated as follows: The loans raised in the country have been calculated in dollars, according to the average rate of exchange of each month. The loans, negotiated abroad, which are all issued in different currencies, are grouped according to the proportion of currencies, shown by the coupons paid, and reduced to dollars at the rate of exchange just mentioned.

## 19. - STATE REVENUE AND EXPENDITURE.

According to figures supplied by the Statistical Department of the Board of Customs.
The country of import indicates (from January 1, 1918) the land in which goods were purchased, and country of export the land to which goods were sold.

- Preliminary figures subject to minor alterations.

26.     - IMPORT-PRICE INDEX.

| Jan.-Dec. |  |  |  |  |  |  |  |  | Jan.-Dec. |

The import- and export-indices have been calculated by the Statistical Dept. of the Board of Customs in the following manner: the quantities of imports and, respectively, exports for the current year have been multiplied by the average price for the class of goods in question in 1913, after which the import (or export) value for the current year has been calculated in percentage of the sum thus obtained for purposes of comparison.

The goods chosen for the setting-up of a total-index have been divided, according to their use, into the groups: foodstuffs, clothing, agricultural requirements and other goods. The three last-named have been further divided, according to their purpose into raw materials, machinery and industrial producta.
duties.
27. - EXPORT-PRICE INDEX.

| Year and Month | Total All Kinds | Details |  |  |  |  |  |  |  | Year and Month |

${ }^{1}$ ) From the beginning of 1921 onwards a new official index has been drawn up differing from that published in the Bulletin for 1022 in that the whole first half of 1914 forms the basls $(=100)$ for the game, and that the rise in taxation is also included. The index is calculated by the Social-Statistical Department of the Central Statistical Office and is based on monthly reports from 21 different centres; it shows the rise in the cost of living for a workingman's family of normal sige, the income of which amounted during the years 1908-1900 to $1.600-2000 \mathrm{Fmk}$, assuming that the average monthly consumption within the same remained unaltered. The index for total cost of Ifving is the average based on weight of the different indices.

| September | 139 | 168 | 118 | 159 | 129 | 164 | 121 | 149 | 148 | +1 | 149 | 146 | 147 | The index is worked out at the Central Statistical Office's Department for Economic Statistics. - In detarmining the bases of calculation for the index the combined value of the country's production and imports for 1913 are taken into accont without dedncting the value of exports. The figures show the change in the level of prices in relation to gold and are obtained from those previously pablished by dividing the latter by 7.8618. The total number of commodities included is 185, and the figures in brackets at the head of the columns indicate the number of commodities in the corresponding groups. In working out the index figures the method known as sproportionate pricesp is employed, i. e. the price of each commodity is taken in a percentage ratio to a corresponding figure for the basic period and the average is then calculated on the basis of the resultant proportionate figures. The correaponding months in 1818 are taken as a basis. In the calculations geometricai averages are employed. ino actual weighting of figures is undertaken; this is carried out, however, indirectly with the aid of the list of commodities.

| December | 1654 | 522 | $\left.{ }^{1}\right) 2176$ | 1528 | 644 | 2172 |  |  |  |  | December |

This table, prepared from the weekly reports of the Labour Exchange Department of the Ministry of Social Affairs, shows the number of unemployed registered in the books of the communal labour exchanges in the majority of towns and a very small part of the rural centres of population at the close of the week nearest to the month's ond. As agricultural labourers and skilled artisans proper register, up to the present, only in a minority of cases at the communal labour exchanges, the table does not give a complete review of the number of unemployed, but is to be regarded more as symptomatic.
${ }^{7}$ ) Owing to the new-year holidays a number of unemployed did not reglster at the communal labor exchanges.
37. - CESSATION OF WORK.

| September | 3 | 3 | 94 | 13 | 92 | 10478 | 16 | 95 | 10472 | September |

The above particulars which are of a preliminary nature, have been compiled by the Social-Statistical Department of the Central Statiatical Office. The majority of cases of cessation of work were deacribed as 白rikes.

## CERTAIN PARTICULARS ABOUT FINLAND.

## 1. FORM OF GOVERNMENT.

Finland formed a part of the kingdom of Sweden from 1154 to 1809; since 1809 it was an autonomons Grand Duchy connected with Russia up to December 6th, 1917, when Finland declared its Independence, which was acknowledged' by all the Powers including Soviet Russia. It became a republic in 1919. The Diet together with the President possess the legislative power of the country. The highest executive power is held by the President chosen for a period of 6 years. The present President L. Kr. Relander is elected for the term 1 March, 1925 to 1 March, 1831.

The Diet, composed of 200 members, is elected by .universal suffrage. The proportions of the different partles in the Dlet elected In 1927 are as follows;

|  |  |  |  |  | Namber |
| :--- | :--- | :--- | :--- | :--- | :--- | | Per |
| :---: |
| cent |

## 2. LAND.

THE AREA is 388,483 square kilometres $=150,005$ square miles, (Great Britain's area is 89,047 sq̆. m . and Italy's area 117,982 $\mathrm{sq} . \mathrm{m}$ ). Of the total area $11.6 \%$ are lakes. On an average $10.8 \%$ of the land in the soith of Finland is cultivated, $0.9 \%$ in the North, $6.3 \%$ of the whole land. Of the land area 25.3 mill. ha ( 62.5 mill. acres) or $73.4 \%$ are covered by forests.

THE AVERAGE TEMPERATURE in the coldest month is In S. W. Finland - $5^{\circ}$ to - $8^{\circ} \mathrm{C}$., in Lappland $-15^{\circ} \mathrm{C}$. and during the warmest month $+15^{\circ}$ and $+13^{\circ}$ to $+14^{\circ} \mathrm{C}$. resp. The average temperature in Helsinki is $+4.6^{\circ}$ (In Oslo $+5.4^{\circ}$, in Montreal $+5.4^{\circ}$, in Moscow $+3.6^{\circ}$ ). The ground is covered by snow in the South during :about 100 days, in Central Finland daring 150 to 180 days, in Lappland about 210 days.

## 3. POPULATION.

NUMBER OF INHABITANTS (1925): 3.5 millions, of which 0.2 million emigrants, (in Sweden (1925) 6.1, in Switzerland (1924) 3.9, in Denmark (1925) 3.4 and in Norway (1925) 2.8 millions).

DENSITY OF POPULATION (1925): In South-Finland 17.9, in North-Finland 2.4 and in the whole country an average of 10.3 inhabitants to the square killometre.

IANGUAGE (1920): Finnish speaking $88.7 \%$, Swedish speaking 11.0 \%, others 0.3 \%.

RELIGION (1925): Lutheran 97.1 \%, Greek-Orthodox $1.7 \%$, others $1.2 \%$.

DISTRIBUTION (1925): $80.4 \%$ of the poprilation inhabit the country, $19.6 \%$ the towns and urban districts. The largest towns are (1925): Helginki (Helsingfors), the capital, 211,691 inhabitants, Turku (Abo) 61,031, Tampere (Tammerfors) 51,717, Vlipuri (Viborg) 48,367.

EDUCATION (1920): Amongst persons over 15 years of age only $1.0 \%$ are illiterate. Three universities founded 1640,1917 and 1920.

INCREASE OF POPULATION (1925): Births $22.8 \%$, deaths $18.5 \%$ (In France in $1925 \quad 17.6 \%$, and in England in $192512.2 \%$ (os) natural increase $8.8 \% \mathrm{o}$.

## 4. INBUSTRY.

PROPORTIONS OF OCOUPATIONS OF THE POPULATION (1920): agriculture $65.1 \%$, industry and manuel labour $14.8 \%$. commerce $3.5 \%$, other occupations $17.7 \%$.

OWNERSHIP OF LAAND. The land ares is distributed among different classes of owners approximately as follows: private $52.1 \%$, State $89.7 \%$, Joint Stock companies $6.5 \%$, communities $1.8 \%$.

FOREST RESOURCES. The growing stock of the forest is 1,620 million $\mathrm{m}^{2}$ ( 57,218 million cubic feet). The merchantable timber (measuring 20 cm at breast height $=6 \mathrm{in}$, at a height of 18 ft .) amounts to 1,557 million trees. Of this number pine is represented by $61 \%$, spruce by $28 \%$, the conifers thas constituting $89 \%$ or 1,584 million trees, leaftrees, mostily birch, $11 \%$ or 173 million trees. The annual increment is 44.5 million $\mathrm{m}^{2}(1,568$ million cub. ft.$)$. The annual working up according to earlier calculations is 40 million $\mathrm{m}^{2}$ ( 1,413 million cub. ft.). In North Finland the increment is much larger than the working up, but in South Finland excess working up occurs locally.

AGRICULTURE. Cultivated land 2.1 million hectars, divided as follows: area under cultivation $0.4-10$ hectars $33.7 \%, 10-50$ ha $48.9 \%$, $50-100 \mathrm{ha} 9.3 \%$, over $100 \mathrm{ha} 8.1 \%$. Cultivated land was divided between the different kinds of crops as follows: $46.8 \%$ hay, 20.4 \% oats, 11.1 \% rye, 5.3 \% barley, $3.2 \%$ potatoes, $13.1 \%$ other. The number of dairies in 1925 amounted to 565.

INDUSTRY (1925): Number of industrial concerns 3,317, hands 141,005 , gross value of products of industry 10,126 million marks.

LENGTH OF RAILWAYS (1926): 4,778 km, of wich 4,512 km State railways and 266 km private. The gauge is 1.524 m .

COMMERCIAL FLEET (1927): Sailing ships 511 (79,351 reg. tons net.), steam ships 548 ( 109,868 r. t.), motor vessels 92 ( 11,095 r. t.), lighters 3,779 (277,020 r. t.). Total 4,980 (477,329 r. t.).

## 5. FINANCE AND BANKING.

CURRENCY. Since 1860 Finland has its own monetary system. From 1877 up to the Great War the currency maintained its stable gold value and after the disturbances caused by the war Finland has again from January 1st, 1926 a gold standard. The unit of currency is the mark (Flnnish markkai) -100 pennies. The gold value of 100 marks is equal to $\$ 2.5185=£-10 / 4^{1 / 5} \mathrm{~d}$.

STATE FINANCES. According to the balance sheet for 1926 the State revenue was $3,434.5$ million marks of which $8,428.9$ million marks were ordinary revenue, and State expenditure $4,076.7$ million marks, of which 2,099.s million marks were ordinary expenditure. The principal sources of revenue were as follows: State property and undertakings 1,291.9, direct taxes 428.1, indirect taxes $1,205.8$, miscellaneous texxes 198.8, charges 178.0, miscellaneous revenue 126.8. The value of State property in 1922 is estimated at 11,150.6 million marks. For National Debt see table 18 in this issue.

MUNICIPAL FINANOES. According to the Budget for 1926 expenditure amounted to 901.7 million marks. Income from taxation was 397.3 million marks, taxed income $4,478.5$ million marks. The communal income tax (not progressive) sveraged $7.5 \%$ of the ratepayers' income.

THE BANK OF ISSUE. The Bank of Finland, (founded in 1811) is a State Bank. Its head-office is in Helsinki (Helsingfors) with branches in Turku (Abo), Pori (Björneborg), Vaasa (Vasa), Oulu (Uledborg), Kuopio, Joensuu, Sortavala, Viipuri (Viborg), Mikkeli (S:t Michel), Tampere (Tammerfors), Hämeenlinna (Tavastehus), Jyvaskyla and Kotka.

THE JOINT STOCK BANKS (1926): Number 19, possess 494 branch offices, where all kinds of banking business is transacted. Including all banks, there is one banking establishment per $\mathbf{6 , 8 0 0}$ inhabitants.

The largest banks are: Ab. Nordiska Föreningsbanken, Kansallis-Osake-Pankki, Helsingfors Aktiebank and Ab. Unionbanken, all with head offices in the capital.

OTHER BANKS (1926): Mortgage banks 6, Savings banks 470 Co-operative Credit Societics 1,344 and a Central Bank for the atter.

${ }^{1}$ ) From February 1024 including the Credit abroad, which amounted to 244.8 mill, mks. to January 31st 1925, 256.2 mill. mks. to January 31st 1926, and has since amounted to 114.6 mill. mks.
${ }^{2}$ ) Loans granted to Joint Stock banks and the public.

[^4]
${ }^{1}$ ) Imports and exports in corresponding month $1913=100$, see footnote to table 28.

# MUNICIPAL PROPERTY IN FINLAND. 

BY<br>ARVI HÄLLFORS, m, A.<br>ACTUARY OF THE COMMUNAL CENTRAL BUREAU.

## INTRODUCTION.

Although the Finnish towns have long been considerable owners of property, early information as to the value of such property is extremely deficient. It was not until the towns had begun, early in the present century, to invest capital in technical plant, harbours, landed property, etc., and were in consequence more dependent on oredid than before, that attention was paid t. drawing up proper inventories of municipal property. Owing, however, to the lack of a common standard of valuation for such inventories, it was difficult to compide comparative statistics from them. The depreciation of the currency during the war and after completely revolutionised the value of municipal property and the standard of municipal wealth, and it was not until the value of money was stabilised again and a reliable index was found in the new currency that measures could again be taken to value municipal property. A further impulse towards this stop lay in the circumstance that it had become important to know to what extent the transfer of wealth brought about by the depreciation of the currency had affected municipal wealth. Consequently in 1924, the League of Finnish Towns again brought up the question of valuing municipal property, adressing a letter to each torm in which the municipality was called upon to take steps to value its propenty. Instructions were added which, it was hoped, would provide a common basis for the new valuations. It was intended to attain two objects simultaneously, viz., to obtain a reliable idea of the present wealth of the towns and to create a fixed standard for the valuation of property and for compiling statistics of property.

## PRINOIPLES OF VALUATION.

Valuations were to be made separately for real estate and movables. Property belonging to the former category was to be grouped for valuation purposes as follows: 1) buildings and their sites, 2) unsold and leased sites, 3) farms, forests and fisheries, 4) harbours and bridges, 5) technical plant. The basis of valuation for the various groups were defined in the following manner.

Buildings and their sites were to be valued according to the existing cost of building and the market price of sites. In appraising building costs allowance was to be made for age and general condition. The value of sites was to be calculated according to the lowest price obtained for a site in the same quarter of the town in the year of valuation.

The value of unsold sites was to be calculated separately for sites situated in streets already in existence and sites in areas that were planned, but not yet built on. The former were to be valued according to the lawest figure paid per square metre during the year of valuation, while in the case of the latter a fixed percentage was to be deducted from the lowest price paid in general in the town, to cover the cost of street building. Each municipality was to calculate its awn percentage on the basis of the average cost of street building in its area. The value of leased sites rwas to be determined in the same manner as that of the available unsold sites, the income from leases usully corresponding to the capital value thus abtained.

Farms were to be valued according to the current market prices for these with due regard to the lowest prices paid for that particular grade of land. In the case of forests the growing stock and the site were to be valued
separately. The value of the latter was to be calculated on the natural annual growth. Fisheries were to be valued according to the average annual income derived from them. Should there be no income, they were to be left unvalued as property surrendered for use gratis.

In the valuation of harbours attention was to be paid to the value of buildings apart from the value of the harbour area. Allowance was to be made in the former case for depreciation of harbour works due to age. As regards harbour areas valuation was to proceed from the existing value of building sites, though the direct income from a harbour-area was also to be taken into account. For harbours with large traffic, where harbour charges were high, good-priced building sites could be taken as the basis of valuation.

The basis for technical plant was to be the present cost of delivery and building; allowing in this case, too, for depreciation due to age.

## RESULTS OF THE VALUATIONS.

These general principles proposed by the League of Finnish Towns were applied by 30 out of the 38 towns in Finland in revaluing their propenty. In four cases slightly different principles were applied. In the remaining four no valuation has as yet been made, nor is there any prospect of its being carried out in the near future.

As in the 24 largest towns complete revaluations were made in accordance with the proposals of the League, and seeing that in those cases in which slightly different principles were applied, the figures obtained can ibe included without fear of appreciable error in a common system of statistics and that the towns which have hitherto failed to revalue their property are the smallest in the country and of least importance in an economic sense, so that the inclusion of their previous valuation figures can hardly affect the general result provided by these statistics, it is now possible to regard the revaluation of municipal property as practically
completed and on the basis of the material thus provided to review for the first time the present property and actual wealth of the municipalities in the light of the most homogeneous statistics obtainable.
For this purpose it is not necessary for the statistics to include the ready cash in the possession of the municipalities nor similar easily convertible assets, such as, for instance, their outstanding claims, stores, advance payments, etc. It is sufficient, if. they contain only funded property, i. e., real estate, movables and shares and other securities of a like nature. A general remark applicable to the statistics throughout is that the towns appear to have shown great caution in valuing their property, taking full advantage of the advice regarding the desirability of applying the lowest possible scales of value contained in the League's instructions. A contributory oause of the caution displayed may probably be sought in the unwillingness of the towns, for reasons of domestic policy, to reveal that their financial position since the depreciation of the currency is aotually such a favourable one.

## TOTAL MUNIOIPAL PROPERTY.

The total value of municipal property at the end of 1926 amounted according to the material collected to $4,205.7$ million marks. The share of the 10 largest towns in this total was as follows:

| Helsinki (Helsingfors) | 2,123.0 mill. mk |  |  |
| :---: | :---: | :---: | :---: |
| Tuniku (Å.bo) | 304.2 |  |  |
| Tampere (Tammerfors)' | 217.2 | " |  |
| Viipuri (Viborg) | 316.7 | " |  |
| Vaasa (Vasa) | 131.9 | " |  |
| Oulu (Uleabborg) | 63.2 | " |  |
| Kuopio | 95.9 | " |  |
| Pori (Björneborg) | 153.1 | " |  |
| Kotika | 137.1 | " |  |
| Lahti | 43.4 | " |  |

Amongst the remaining towns Hämeenlinna (Tavastehus) occupied first place with a total property of 72.1 mill. mks. Property exceeding 40 mill. mks. was owned by Rauma (Raumo) and Pietarsaari (Jakobstad). The rest failed to come up to that sum.

REAL ESTATE AND MOVABLES.
The total propenty of the muncipalities was divided between real estate and movables in such a manner that real estate accounted for 4,078.5 mill. mks. and movables and securities for 127.2 mill. mks. The part played by movables and securities in the total municipal property is thus insignificant or not more than about 3 per cent of the whole. It is to be noted, however, that certain towns own the majority of shares in technical plant which in other towns is entirely municipally owned and adds, consequently, to the value of municipal real estate. As these towns have booked their shares at their nominal value, they are comparatively wrorse off as regards total property figures than the others. If such shares were booked at their market value, the figure in the statistics showing movables and securities would rise accondingly and the property figures for the towns concerned would show a corresponding increase. $N_{0}$ such revaluation of shares has, however, been made, nor can it be taken into account in the statistics.

The real estate owned by the 10 largest towns was valued as follows:

| Helsinki (Helsingfors) | 2,071.6 mill. mks. |  |  |
| :---: | :---: | :---: | :---: |
| Turku (Åbo) ........ | 296.0 | " | " |
| Trmpere (Tammerfors) | 206.4 | " | " |
| Viipuri (Viborg) | 3108.4 | " | " |
| Vaasa (Vass) .. | 129.2 | " | " |
| Oulu ( ${ }^{\text {(Uleăbiorg) }}$ | 59.1 | " | " |
| Kuopio | 92.5 | " | " |
| Pori (Bjönneborg) | 145.7 | " | " |
| Kotka | 131.9 | " | " |
| Lahti | 42.4 | " | " |

Other towns with real estate exceeding 40 mill . .mks. in value were Hämeenlinna (Tavastehus), Rauma (Raumo) and Pietarsaari (Jakobstad).

## BUILDINGS AND THEIR SITES.

According to the method of grouping already referred to the first group was to comprise buildings and their sites. Almost without exception the towns have referred to this group all buildings not situated on farms outside the municipality or belonging to harbour works or technical plant. Nevertheless, a degree of uncertainty appears to have existed in some
cases, judging by the fact that certain buildings attached to farms or harbours have been included in this first group of real estate. The few exceptions do not, however, owing to the small extent of the property concerned, affect the statistics to any appreciable degree. On the other hand, this group has been made to include all municipally owned buildings irrespective of whether they are used entirely for administrative purposes, such as municipal offices, elementary schools, municipal homes, etc., or yield an income, such as market halls; abattoirs, hospitals, dwelling-houses, etc. Consequently, interesiting as it would have been to deal with these different types of buildings in separate classes, the available material does not lend itself to such treatment.

Property in the form of buildings and sites was owned by the towns to the extent of $\mathbf{1 , 0 8 9 . 9}$ mill. mks. The figures, for the 10 largest towns were:

| Helsinki (Helsingfors) | 429.6 | mill. mks. |  |
| :---: | :---: | :---: | :---: |
| Turku (Åbo) | 61.3 | , | " |
| Tampere '(Tammerfors) | 1.06 .9 | " | " |
| Viipuri (Viborg) | 74.2 | " | ", |
| Vaasa (Vasa) .. | 64.7 | " | " |
| Oulu (Uleaiborg) | 26.1 | " | , |
| Kuopio | 39.0 | " | " |
| Pori (Björneborg) | 21.0 | " | " |
| Kotka | 22.2 | " | " |
| Lahti | 14.0 | " | " |

In the other towns investments in public buildings comparable !with those above had been made only by the town of Hämeenlinna (Tavastehus) and Pietarsaari (Jakobstad), the buildings of which were valued at 31.4 and 26.1 mill. mks. respectively.

## LANDED PROPERTY.

The actual source of municipal property in Finland is, however, land. This is due chiefly to the fact that according to the established interpretation of the law, additions to municipad areas have hitherto been restricted to land owned by the municipality. For this reason the State has presented the towns with considerable areas of land, while the towns, too, have been eager to add to their landed property by
new purchases. The result has been that of the total funded property of the towns almost half, or $2,040.7$ mill. mks., consists of land. If the building sites owned by the towns and the land used for harbours and other technical plant now valued separately were added, the figure for investments in landed property would be considerably higher.

The municipalities have entered their landed property in the inventories in two separate groups, viz., easily realisaible unsold and leased sites in one group and in the other their farms, forests and fisheries. The valuation of the former group was in general easier than that of the latter, the annual sales of building sites providing a reliable basis of valuation, whereas in the case of farms valuation was difficult. The greater part of the municipal estates is situated in the immediate vicinity of the towns and their value is consequently affected by the value of corresponding building sites. In accordance, however, with the general principle of valuation, fanms were valued as agricultural land and forests with regard to their annual growth, so that in all probability the figures for farms and forests are appreciably below their true market value. We find, therefore, the value of unsold building sites entered as $1,422.1$ mill. mks. and that of farms, forests and fisheries as 618.6 mill. mks., although the land reserved for building sites forms only a small fraction of the total landed property of the towns. The figures for unsold sites entered by the 10 largest towns were:

| Helsinki (Helsingfors) | 1,081.4 |  | mks |
| :---: | :---: | :---: | :---: |
| Turku (Åbo) | 70.8 | " | " |
| Tampere (Tammerfons) | 43.4 | " | " |
| Viipuri (Viborg) | 41.1 | " | " |
| Vaasa (Vasa) | 22.0 | " | " |
| Oulu (Uleåborg) | 4.2 | " | " |
| Kuopio | 11.5 | " | " |
| Pori (Björneborg) | 3.4 | " | " |
| Kotka | 68.8 | " | " |
| Lahti | 18.4 | " | " |

The considerable variations in the amount of this class of property owned by the largest towns is due partly to the fact that lively building activity has in some cases greatly raised
the value of building sites and partly to the inclusion by some towns of large areas in their town plans, with corresponding increases in their reserve of sites. The other towns appear, therefore, in the statistics in a less favourable light, as they have valued lands in their direct proximity as agricultural land, though the actual market price of these has been raised by the prices of adjacent building sites.

Of the total of 618.6 mill. mks. invested in farms, forests and fisheries, the 10 largest towns owned the following amounts:

| Helsinki (Helsingfors) | 218.8 | mill. mks. |  |
| :---: | :---: | :---: | :---: |
| Turku (ȦB0) | 9.4 |  | " |
| Tampere (Tammerfons) | 20.7 | \% | " |
| Viipuri (Viborg) | 79.3 | $\because$ | , |
| Vaasa (Vasa) | 17.5 | " | ", |
| Ovilu (Uleảbong) | 13.6 | , | . |
| Kuopio | 32.3 | , | . |
| Pori '(Björneborg) | 31.4 | .. |  |
| Katika | 5.6 | , | ", |
| Lahti | 5.3 | .. | " |

The largest owners of landed property amongst the smaller towns were Kajaani (Kajana) (18.6), Hämeenlinna (Tavastehus) (17.1), Iisalmi (14.6), Loviisa (Lovisa) (14.2), Kristiinankaupunki (Kristinestad) (12.0), Uusikaarlepyy (Nykarleby) (11.6) and Porvoo (Borgå) ( 10.9 mill. mks.).

## HARBOURS.

The valuation of harbours appears to have been a difficult matter. Many towns have apparently seen no reason for including in their inventories the actual value of their harbours, but have probably been content to value only a part of their building expenses and of the land and water areas attached to the harbours. It seems as though in certain cases valuation had been restricted solely to bridges, railway sidings, buildings and other works connected with the harbours, leaving such expenses as the deepening of harbour areas and the land and water areas represented by the harbours wholly out of account. In consequence, the figures showing the value of harbours vary considerably. Variations have also been caused by the fact that the lake harbours of the inland towns are usually smaller and cheaper to build than the deep-sea
harbours of the coastal towns. The total value of the harbours is given as 545.7 mill. mks. This figure does not, however, represent more than a small part of the true value and building costs of the harbour areas. For the 10 largest towns the harbours were valued at the following amounts:

| Helsinki (Helsingfiors) | 151.1 mill. miks. |  |  |
| :---: | :---: | :---: | :---: |
| TMrku (Åbo) | '103.6 | " |  |
| Tampere (Tammerfors) ${ }^{\text {) }}$ | 6.8 | " |  |
| Viipuri (Viborg) | 106.5 | " |  |
| Vapesa (Vasa) | 15.8 | " | " |
| Oulu (Uleåborg) | 7.0 | " | " |
| Kuopio ${ }^{1}$ ) | 2.8 | " | " |
| Pori (Björneborg) | 82.4 | ", | " |
| Kotura | 26.4 | " |  |
| Rauma (Raurimo) | 9.2 | " |  |

With the exception of Loviisa (Lovisa), the harbour of which is valued at 5.4 mill. mks., the other towns valued their harbours at less than 3 mill. mks.

## TECHNICAL PLANT.

Under this heading the municipalities have valued their electrical plant, waterworks and gasworks. In one case, in the valuations of Rauma (Raumo), technical plant ineludes also railways. On the other hand, in no single case have tramways been included in the valuation of municipal property, in spite of the fact that two towns, Helsinki (Helsingfors) and Turku (Ảbo), are almost the sole owners of their tramway systems. This is due to the fact that in these towns, too, the tramways are still run as Joint Stock companies, with finances entirely separated from municipal finance. The inclusion of the tramways of the two towns referred to amongst technical plant would naturally alter the proportion of this item in the statistics to a considerable degree. According to the inventories, the towns have invested less in this form of property than in any other, or only 402.2 mill. mks., the share of the 10 largest towns being:

| Helsinki (Helsingfors) | 190.7 minl. mks. |  |  |
| :---: | :---: | :---: | :---: |
| Turku (Abo) | 50.9 | " | " |
| Tampere (Tammerfors) | 28.6 | " | " |
| Viipuri (Viborg) | 7.3 | " |  |
| Vaasa (Vasa) | 9.2 | " | " |

| Oulu (Uleãborg) | 8.2 mill. mks. |  |  |
| :---: | :---: | :---: | :---: |
| Kuopio | 6.9 |  |  |
| Pori (Björneborg) | 7.5 |  |  |
| Kotka | 8.9 | " |  |
| Lahti | 4.7 | ", |  |

Owing to the railway it owns, Rauma (Raumo) shows investments in this group amounting to 25.7 mill. mks.

## WEALTH OF THE MUNICIPALITIES.

Combining the results of the valuation as shown above, we find that the total municipal property is divided among the various groups in the following proportions, shown in absolute amount and percentage:

|  | Mill. mks. | \% |
| :---: | :---: | :---: |
| Buildings and their sites | 1,089.9 | 25.9 |
| Unsold sites | 1,422.1 | 33.8 |
| Farms, forests, fisheries | 618.6 | 14.7 |
| Harbours anid bridges | 545.7 | 13.0 |
| Technical plant | 402.2 | 9.6 |
| Movables and securities | 127.2 | 3.0 |
|  | 4,205.7 | 100.0 |

These figutes thus show the gross property of the municipalities at the end of 1926. It would, no doubt, be of interest to calculate their net property by deducting their total indebtedness. The revaluation of municipal wealth begun in recent years is not, however, completed yet in respect of indelbtedness. Those municipalities which had raised loans in foreign currencies befiore the war have continued, with a couple of exceptions, to book these loans at their former figure. A revaluation of municipal loans in present gold marks is, indeed, being made, but this work has so far been rendered difficult by the fact that certain currencies in which these loans are redeemable have not yet been stabilised. For this reason exact information as to the results of the revaluation is not yet available, and the net property of the municipalities cannot in consequence be strictly determined. The book value of municipal loans amounted at the end of 1926 to approximately 929.9 million marks of which 745.8 million marks were funded loans and 184.1 millions current indebtedness. The current indebtedness is more than balanced by the current cash of the towns and easily realisable assets, so that only the

[^5]funded debt should be taken into account in estimating the net property of the towns. As, according to the available information, the amount of old foreign loans would result, if calculated in present currency, in an addition of about 400 mill. mks. to this sum for the combined Finnish towns, we shall not be far wrong in estimating the actual indebtedness of the towns at 1,150 mill. mks. This would fix the net wealth of the Finnish municipalities at a minimum total of $3,055.7$ million marks or in round figures $\mathbf{3 , 1 0 0}$ million marks. The funded debt consequently amounts to about $27 \%$ of the landed property of the towns.

Although the financial position of the towns is a good one, it does not appear so brilliant according to the figures given above as in a preliminary estimate previously published (see Bulletin No. 9, 1924). The difference between the preliminary and final figures is, however, obvious. According to the instructions issued
by the League of Finnish Towns only saleabile property was to be reckoned as municipal property. For this reason the very considerable amounts of capital invested in the streets. market places, parks and drains, for instance, which were previously included in the accountancy of several towns, were totally left out of account. Further, in the final figures allowance was made for reduction in value of propertr owing to wear and tear, whereas the property was formerly inicluded at its cost price. Finally it should be pointed out that, in accordance with the instructions, all valuations were made at the lowest estimates.

The result has, of course, proved that the property of the towns was shown below its actual value. This drawback is, however, outweighed by the advantage that in the future the towns will base their calculations of property on actual principles approved in the business world.

## FINLAND'S BALANCE OF PAYMENTS FOR 1926.

## METHOD OF OALCULATION.

The Central Statistical Office has reckoned out Finland's balance of payments for 1926. The calculation has been carried out according to the same principles as were taken as a basis for the corresponding aalculations of the balance of payments for 1922, 1923, 1924 and 1925.

In accordance with these principles loans taken up or repaid in the course of the year have not been taken into acount with the exception of amortisation of bond loans. Also, a reproduction of the actual payments made between Finland and other countries during this period has not been attempted, but an attempt has been made to elucidate, how Finland's balance of payments would have turned out, in case all payments had been made in cash. Thus, for instance, those values have been accepted for income and expenditure, as such, as exports and imports amounted to according to
the trade statistics for 1926 although payment. of course, did not occur at the time. These principles have been adopted partly because by such means more reliable data were obtainable, and partly because chance had in this way considerably less opportunity of exerting any influence.

As to how the calculation has been made in detail, explanations will be found in previous issues of this Bulletin and a repetition of such an explanation may safely be avoided here by referring the reader to a former article on the subject (see No. 8, 1925).

INOOME AND EXPENDITURE FOR 1.926.
The result of the calculation of the Central Statistical Office is presented as wa whole in the following table, showing the income and expenditure in Finland's balance of parments for 1926.

INCOME.

| INCOME. |  | Mill. mks. |
| :---: | :---: | :---: |
| Expor |  | 5,636.5 |
| Harthour, lighthousse, pilotage | \& other dues | 40.0 |
| Shipping freights |  | 170.0 |
| Emigrants' remittances |  | 200.0 |
| Seamen's remittances |  | 5.5 |
| Foreign travel |  | 133.0 |
| Foreign insurance |  | 101.0 |
| Post Office, Telegraph Office \& State Railways' revenue from abroad ............... 35.9 |  |  |
| Foreign representatives |  | 10.0 |
| Interest from abroad |  | 54.5 |
| of which: Government |  | 2.5 |
|  | Total | 6,386.4 |

## EXPENDITURE.

| Imports ( $5,667.7$ mill. mks.) | Mill. mks. |
| :---: | :---: |
| less: marime \& transport insurance paid |  |
| to Finnish companies ( 27.8 mill. mks.) | 5,639.9 |
| Smugeling | 85.0 |
| Post Office, Telegraph Office \& State Railways' expenditure abroad | 26.5 |
| Representation abroad and share in intermational expenses | 30.2 |
| Travel abroad | 138.0 |
| Insurance premiums and claims | 108.0 |
| Redemption of bonds and interest | 534.1 |
| of which: Government | 242.1 |
| banks' other: | 22.0 220.0 |
| Total | 6,561.7 |

Deficit
175.3

All the above figrures are, of course, not quite exact, part of them being based on estimates. In doing so; the principle has been followed of taking the figures as somewhat more unfavourable for the balance of payments rather than too favourable. It may therefore be taken for granted that the deficit arrived at by the method described, amounting to 175.3 million marks, is in no case less than the actual deficit, but that the balance of payments is probably actually rather more favourable.

## REVIEW OF THE YEARS 1922-1926.

In order to obtain a correct basis for judging the figures given above for Finland's balance of payments for 1926 we give a review of the results of similar calculations for the previous years. For the sake of lucidity the figures have been combimed in the following net balance in million marks.

It will be seen from the table below that shipping and the remittances of emigrants and seamen are the most important regular sources of income in Finland's balance of payments. Insurance, too, represents a gain in the balance of payments, but the sums are small. Regular sources of expenditure, on the other hand, are represented principally by interest and redemption which form the largest item of expenditure. Smuggling adso constitutes a regular form of expenditure, as well as the expenditure of Government depantuments and representation abroad. Foreign travel likewise results in a net expenditure in most years.

A special position is occupied by foreign trade which sometimes shows a surplus of exports and at other times of imports. A study of the figures proves that the result of foreign trade is the deciding factor in the changes oocurring in the net result of the balance of payments. As is shown in the table on the next page, the result of the other items in the balance of payments is regularly expressed by a deficit of 100 -150 million marks. In those years in which foreign trade results in a surplus of exports in excess of this amount, the balance of payments turns out positive, otherwise it is negative.

NET BALANCE FOR 1822-1926.

|  | $\begin{gathered} \text { 1922 } \\ \text { Mill. mks. } \end{gathered}$ | $\begin{gathered} 1923 \\ \text { Mill. mks. } \end{gathered}$ | $\begin{gathered} 1924 \\ \text { Mill. mks. } \end{gathered}$ | $\begin{gathered} 1925 \\ \text { Mill. mks. } \end{gathered}$ | $\begin{gathered} 1926 \\ \text { Mill. mks. } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Foreign trade | + 497.7 | - 207.8 | + 255.1 | + 54.0 | - 31.2 |
| Smuggling | - 90.0 | - 100.0 | --90.0 | - 70.0 | - 85.0 |
| Shipping | + 195.0 | $+165.0$ | + 188.0 | + 205.0 | + 210.0 |
| Emigrants' and seamen's remittances | + 132.0 | + 147.0 | + 200.5 | + 196.0 | + 205.5 |
| Insurance | + 15.0 | + 5.0 | + 4.1 | + 21.0 | + 20.8 |
| Foreign travel . . . . . . . . . . . . . . . . . . . . | - 22.0 | - 13.0 | - 16.0 | + 20.0 | 5.0 |
| Expenditure of Government departments and representation abroad <br> Interest and redemption | - 21.9 -293.0 | 11.4 $-\quad 310.3$ | -13.6 -381.0 | $\begin{array}{r} 10.5 \\ -514.3 \\ \hline \end{array}$ | $\begin{array}{r} 10.8 \\ \hline \quad 479.6 \\ \hline \end{array}$ |
| Surplus <br> Deficit | + 402.8 | - 325.5 | $+147.1$ | - 98.8 | - 175.3 |

## CONOLUSION.

The last item on the expenditure side of the balance of payments merits special attention, both because it is the largest item of expenditure, which showed a great rise until last year, and because it includes dissimilar elements, such as interest and redemption. As the balance of payments does not include new loans negotiated abroad on the income side, although the expenditure includes the redemption of foreign bond loans, the final result must prove less favourable than it is in actual fact. If this item is divided into interest and redemption, which has to be done partly by means of approximate estimates, the following figures are obtained.

| Year. | Interest. <br> Mill. mks. |  | Redemption. <br> Mill. mks. | Total. <br> Mill. mks. |
| :---: | :---: | :---: | :---: | :---: |
| 1922 | $\ldots \ldots \ldots \ldots$ | $\mathbf{2 4 8 . 4}$ | 55.0 | $\mathbf{3 0 3 . 4}$ |
| 1923 | $\ldots \ldots \ldots \ldots$ | .258 .7 | 77.0 | 335.7 |
| 1924 | $\ldots \ldots \ldots \ldots$ | 277.5 | 122.0 | 399.5. |
| 1925 | $\ldots \ldots \ldots \ldots$ | 363.6 | 189.0 | 552.6 |
| 1926 | $\ldots \ldots \ldots$ | .339 .4 | 194.7 | 534.1 |

From these figures it will be seen that, in the first place, the expenditure on interest has risen up to last year, when there was a slight falling off, and in the second, that redemption has grown regularly year by year. The tendency has therefore lbeen for the redemption of loans to constitute a comparatively larger part of the total during the last few years than before, i. e. such expenditure as there would be every reason to exclude from the balance. Deducting these amounts from the net results of the balance of payments just given, the following figures are obtained, which represent the corrected net result of Finland's balance of payments.

REVIEW OF FINLAND'S BALANCE OF PAYMENTS FOR 1922-1926.

| Year | Bulance of trade |  |  | Other items of the balance of payments |  |  | Total balance of payments |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Exports | Imports ${ }^{\text {a }}$ ) | Difference | Income | Eixpenditare | Difference | Income | Expenditare | Difference |
|  | Mill. mke. | Mill. mks. | Mill. mks. | Mill. mks. | Mill. mks. | Mill. mks. | Mill. mks. | Mill. mks. | Mill. mks. |
| 1922 | 4,467.6 | 3,969.9 | +497.7 | 466.2 | 561.1 | - 94.9 | 4,933.8 | 4,531.0 | +402.8 |
| 1923 | 4,392.5 | 4,600.3 | -207.8 | 529.6 | 647.3 | -117.7 | 4,922.1 | 5,247.6 | -325.5 |
| 1924 | 4,970.6 | 4,715.5 | +255.1 | 618.4 | 726.4 | -108.0 | 5,589.0 | 5,441.9 | +147.1 |
| 1925 | 5,573.5 | 5,519.5 | + 54.0 | 688.2 | 841.0 | -152.8 | 6,261.7 | 6,360.5 | - 98.8 |
| 1926 | 5,636.5 | 5,667.7 | - 31.2 | 749.9 | 894.0 | -144.1 | 6,386.4 | 6,561.7 | -175.3 |

[^6]For 1926 the expenditure and income in the balance of payments consequently nearly balanced each other, showing an insignificant surplus. The result of the balance of payments has thus ween favourable for all years except for 1923
only. For the whole period of five years for which comparable figures are available, the balance of payments, therefore, - ignoring the movements of capital - resulted in a net surplus of no less than 588.0 million marks.

## ITEMS.

Cheap loans to small farmers. Out of the funds obtained by means of the foreign loan taken up last autumn 40 million marks were apportioned to the Central Bank for the $\mathrm{C}_{0}$ operative Oredit Societies to be lent to small farmers through the Oo-operative Credit Societies. Requests for loans have been received from 950 societies to an amount of 78 million marks. The loans have been asked for chiefly for bringing new land under cultivation, for building farmers' offices and redeeming loans at higher rates of interest.

Settlement work. According to the report of the Settlement Board the Governmen't purchased 14,698 hectares of land in the course of 1925 and 1926 for settlement purposes. In addition the Settlement Board granted 3,614 loans to a total amount of 30.5 million marks during that period for the purchase of land. The area acquired amounts to 40,368 hectares purchased for 43.0 million marks. - Since 1899 altogether 353,726 hectares of land have been bought by means of loans received from the Settlement Credit Societies, on which 15,783 settlement holdings have been established.

Internal bond loan. The Mortgage Association of Finland intends to take up an internal bond loan of 1.00 million marks. The loan is to be taken up in small instalments and the funds obtained are to be employed in satisfying the demand for credit on real estate among
farmers. The Diet has agreed to a Government guarantee for the loan.
*
Prices of sawmill logs and sawn goods. According to statistios recently published the price per cubic foot of standing timber sold from the State forests and the price of the raw material in a standard of sawn timber has varied in the following way:

|  | Average price per cab. ft. | Average price of raw material in a standard of sawn goods. |
| :---: | :---: | :---: |
| Year. | Mks. | Mks. |
| 1021 | 1:37 | 335:65 |
| 1922 | 2:41 | 590:45 |
| 1923 | 2:53 | 619:85 |
| 1924 | 1:87 | 458:15 |
| 10.25 | 1:77 | 433:65 |
| 1926 | 2:79 | 683:55 |
| 1927 | 4:36 | 1,068:20 |

These changes, which in a measure reflect the market fluctuations, show that the raw material of the sawmilling industry has become very much dearer during the last few years. The average f. o. b. price obtained by sawmillers will be found in the following table. The percentages show what proportion of the average price is comprosed of the cost of logs.

| Year. | $\ldots \ldots \ldots \ldots \ldots \ldots \ldots$ | Average price <br> per standard <br> of sawn goods. <br> Mks. |
| :--- | :--- | :--- | | Cost of logs |
| :---: |
| in percentage |
| of price of |
| sawn goods. |

This goes to prove that the forest owner has received an ever increasing proportion of the price of sawn goods. This circumstance, taken in connection with the falling prices for the finished goods, explains, why the sawmilling industry has given very poor returns during the last few years. The tendency indicates that the price of sown goods must also rise, if the sawmills are to make both ends meet.

Ab. W. Gutzeit \& Co. Now that all the shares in Enso Alctiebolag have passed into the hands of Aib. W. Gutzeit \& Co. the shareholders' meeting of the latter has passed a resolution that Enso Aktiebolag is to cease and all its assets and diabilities are to be transferred to Ab. W. Gutzeit \& Co. In accordance with the
new regulations of the company, approved at the same meeting, the name of the company will be Enso-Gutzeit Osakeyhtiö, domiciled in Kotka.

Exports of whortleberries. The exportation of whortleberries proved satisfactory this autumn thanks to a plentiful crop. Up to the end of September exports amounted to 4.2 million kilogrammes as against 2.6 millions last year. The highest reoord was reached in 1925, when 6.5 million kilogrammes were exported. Financially the result would have been a better one, if importers had not succeeded in reducing prices. The value of the exports amounted to 15 million marks as compared with 1.2 millions last year and 19.5 millions in 1925.

## THE <br> BANK OF FINLAND MONTHLY BULLETIN

is sent free of charge to anyone wishing to receive it. Finnish booksellers are, however, allowed to sell it at a price of 2 marks per copy. Back numbers and reprints of some articles are also willingly supplied. Correspondence with regard to the Bulletin should be addressed to the Bank of Finland Statistical Department, Helsinki(Helsingfors),Finland.

[^0]:    ${ }^{1}$ ) Included in home loans, see table 4. Rediscounted Bills for 1913 according to Finland's Official Statistics VII, D, Bank

[^1]:    ${ }^{1}$ I Increased by 148.1 mill. Fmk interest for 1925. - $^{2}$ ) Increased by 172.6 mill. Fmk interest for 1926.
    Deposits in the Savings Banks, including long-term deposits and current accounts, according to figures supplied by the Central Statistical Office.
