

# BANK OF FINLAND

1936

## YEAR BOOK

COMPILED BY THE

STATISTICAL DEPARTMENT OF THE BANK OF FINLAND

VOLUME XVII

HELSINKI — HELSINGFORS 1937

**HELSINKI — HELSINGFORS 1937**  
**GOVERNMENT PRINTING OFFICE**

The present is the seventeenth annual issue of the Year Book of the Bank of Finland, compiled on the same plan as previous issues. Its main feature are the statistical tables, which contain detailed information regarding the position and business of the Bank of Finland during 1936. In addition it contains some reviews of the development of the Bank of Finland in previous years and some series of figures illustrating the business of the Joint Stock banks. Besides the tables this book includes a section that gives a condensed review of the most important events in 1936 for the economic development of Finland as well as a survey of the different branches of business of the Bank of Finland and its results during last year.

The Year Book has been compiled in the Statistical Department of the Bank of Finland, the undersigned head of the Department being principally responsible for its contents. As in former years, the Year Book is published in Finnish, Swedish and English; the tables include headings and other letterpress in French.

A. E. TUDEER, PH. D.  
Head of the Statistical Department.

Bank of Finland, Helsinki (Helsingfors),

April 12th, 1937.

## I. REVIEW OF THE ECONOMIC POSITION IN FINLAND IN 1936.

During 1936 the same favourable economic development continued in Finland as during the previous years. The timber market grew steadier and the market also improved in the case of other exporting industries. Industrial activity was extended in most spheres. The harvest, too, was satisfactory. Foreign trade increased in liveliness and there was a considerable surplus of exports which enabled the country to improve its foreign payment position still further. There was no longer any cyclical unemployment and the standard of living among the poorest classes of the population was on the rise. In spite of the great activity in economic life the money market remained very easy. Towards the end of the year there were signs in the country of the general rise in prices that had begun to show itself in the world markets, mostly on account of the large armament orders of the great powers. Thus the phenomena evoked by political uncertainty seemed likely to cast a threatening shadow over sound economic development.

**Economic policy of the Government.** There was no particular change in the economic policy of the Government, the same principles being observed as in previous years. The most important departure from the principle of the freedom of economic life consisted in the continued adoption of the measures introduced during the depression for stabilising the prices of agricultural produce.

**Trade and Industry.** Owing to favourable weather conditions the harvest last year was very satisfactory in general. According to preliminary estimates the number of fodder units was about 3,570 millions or rather more than in 1935, when the corresponding number was 3,409 millions, but slightly less than the record harvest of 1934. The prices of cereal products moved in a direction that was favourable to producers. For this reason the value of the harvest amounted, according to preliminary calculations,

to 5,400 million marks or more than in any previous year. In regard to the different plants cultivated, the rye crop fell off in quantity by about 7 per cent in comparison with 1935, but the other principal plants yielded a slightly larger crop than in the preceding year. The considerably larger crop of wheat is especially worth noting, this being the result of the extended cultivation of this kind of grain. The position is illustrated by the following table in which the crop results for the most important cultivated plants are given in tons, for 1936 according to preliminary calculations in comparison with the final quantities for the previous years.

	Wheat.	Rye.	Barley.	Oats.	Potatoes.	Hay.
1930 .....	23,600	336,400	164,800	626,700	928,400	2,925,000
1931 .....	30,500	315,200	165,600	669,700	977,900	2,904,300
1932 .....	40,400	329,400	178,900	669,500	983,400	3,016,200
1933 .....	67,000	372,700	178,500	635,500	1,281,800	2,753,100
1934 .....	89,300	394,900	208,600	776,300	1,139,400	3,070,900
1935 .....	115,200	349,500	165,900	608,900	1,269,000	3,312,800
1936 .....	148,100	324,000	188,900	651,200	1,322,600	3,346,600

In *cattlefarming* the output was considerably increased during the year owing to the ample crop of hay. The tendency of prices was uneven. The prices for milk and butter were below the average for the year before, but the prices for cheese and pork advanced. For eggs the average price was slightly higher than in 1935, but towards the end of the year it dropped suddenly. The price index for agricultural produce, according to the calculations of the Central Federation of Agricultural Producers, recorded an average of 77 points for last year as against 75 points for 1935 and 70 for 1934. At the same time prices for agricultural requisites rose in the same proportion and wages even more. The general index for costs rose to 91 points as against 87 for 1935 and 84 for 1934.

The level of prices for agricultural produce was affected by the export premiums. Exports of such produce increased considerably by means of the latter. Butter was exported to a total quantity of 13,987 tons or 37 per cent more than in 1935; cheese exports amounted to 4,928 tons or 16 per cent more and exports of hides to 5,044 tons or approximately 34 per cent more. On the other hand meat exports decreased to 5,574 tons or by 2 per cent and egg exports to 7,750 tons or by 12 per cent. Altogether the exports of foodstuffs obtained from animals brought in 538.4 million marks or over 18 per cent more than during the previous year.

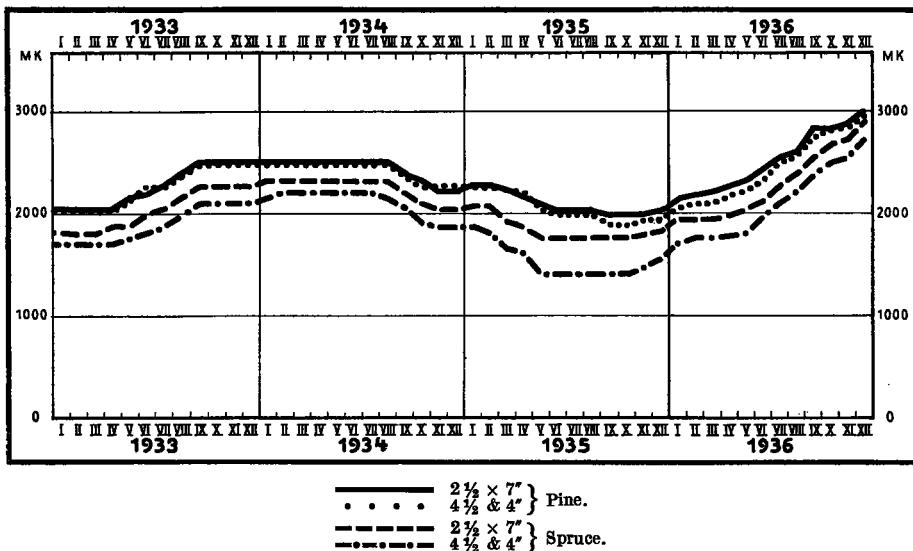

The other important source of income of the rural population, i. e., sales of timber and lumber work, did not yield as much during the felling season of 1935—1936 as during the previous one, at an estimate 1,880 million marks in comparison with 2,050 millions. However, the improvement in the timber market during the year produced a sharp rise in the price of timber in the autumn. As wages also rose and felling was planned on a larger scale than usual, this source of income already became more profitable in the autumn than during the previous felling season. The further lowering of rates of interest also had a favourable influence on the economy of the rural population. The improvement in the conditions due to all these circumstances is evident, among other things, in the reduced number of farms sold by auction. During the year 1,370 farms were put up to auction, whereas the corresponding figure in 1935 was 2,506 and still higher in the years before that or 3,428 and 4,267 respectively.

The advance in *industrial activity* continued during the year under review, the output being higher than in any previous year both as regards volume and value. According to the Unitas index the volume of industrial output increased from 146 to 160 points and its value from 127 to 140. Both value and volume increased by about 10 per cent, or to a greater degree than in 1935, when the volume increased by 4 per cent and the value by 6 per cent in comparison with the corresponding figures for 1934. According to preliminary estimates the gross value of industrial output is calculated to be 15,300 million marks as compared with 13,900 millions in 1935 and 13,710 millions in 1928.

Both the *exporting industries* and the home market industries contributed to the greater liveliness in industrial activity, though the former did so appreciably more than the latter. The volume of output in the exporting industries increased by about 11 per cent and exceeded the corresponding volume for the record year 1928 in the previous boom by 38 per cent. Owing to the rise in prices the value of the output in the exporting industries grew more than its volume or by 23 per cent. The value was therefore about 15 per cent higher than in 1928. All the principal branches of the exporting industries played their parts in the increase for the year.

The main cause of the improvement in the exporting industries was the change that set in during December 1935 in the *timber market*. When the sales of the principal countries had been restricted by agreement at that

MOVEMENT OF PRICES FOR SAWN WOODGOODS IN 1933-1936.<sup>1)</sup>  
MARKS PER STD.

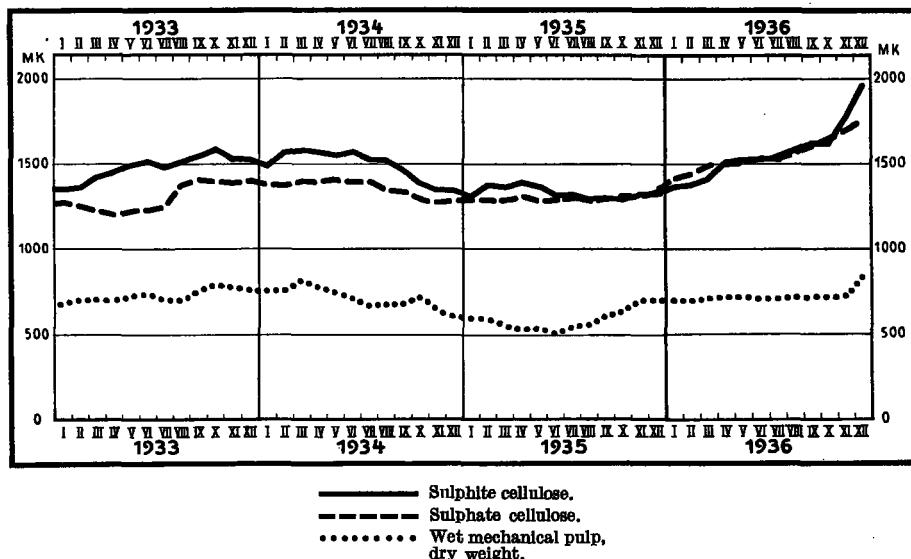

time, the timber market recovered rapidly and prices were raised on several occasions. Sales for shipment in 1937 began unusually early and thanks to a brisk demand about 625,000 standards had been sold by the end of 1936 or more than twice as much as at the same date in the year before. Exports of sawn timber amounted to 1,100,100 standards in 1936 as against 1,041,500 and 1,086,900 standards respectively during the previous years. Although sales were made for the greater part at the low prices ruling at the beginning of the year, these exports yielded the country 2,102.5 million marks as compared with 1,828.3 millions in 1935, but 2,213.2 millions in 1934.

There were only slight changes in the exports of *round timber*. Shipments of pitprops and mining timber were rather larger or 2,027,300 m<sup>3</sup> as against 1,817,700 and 1,808,000 m<sup>3</sup> respectively in the previous years. On the other hand rather less pulpwood was exported, viz., 1,071,200 m<sup>3</sup> as against 1,216,700 and 1,333,200 m<sup>3</sup> in the preceding years. For the exports of these 354.8 million marks were received as against 351.0 and 342.6 millions respectively in 1935 and 1934.

<sup>1)</sup> The curves indicate the prices quoted for timber during the respective months; towards the end of the year the quotations refer to the following year's shipments.

MOVEMENT OF PRICES FOR WOODPULP IN 1933-1936.  
MARKS PER 1,000 KG.

In the *plywood market* the demand was lively and the output increased owing to various extensions. Prices, which were very low at the beginning of the year, rose in the autumn, though this was not able to exert any influence worth mentioning on the value of exports for the year. Exports amounted to 146,100 tons and were larger than ever before. The corresponding exports for 1935 were 127,300 and for 1934 115,300 tons. The value of exports grew in the same proportion and amounted to 376.9 million marks during the year under review in comparison with 327.7 millions in 1935.

The output in the *spool industry* remained at about the same level as in the previous years. Exports of spools totalled 6,280 tons as against 6,050 tons in 1935 and the value of these exports was 48.0 million marks as against 47.2 millions in the previous year.

In the *cellulose market* there was a continuance of the rise in prices that had begun towards the end of 1935, and prices attained a satisfactory level, but as the greater part of the output had been sold already by the beginning of the year, the Finnish cellulose industry was not able to derive much advantage from this. Nevertheless, the output increased considerably. Sulphate pulp mills were in course of erection at Oulu (Uleåborg) and Su-nila and improvements were introduced elsewhere with a view to increasing

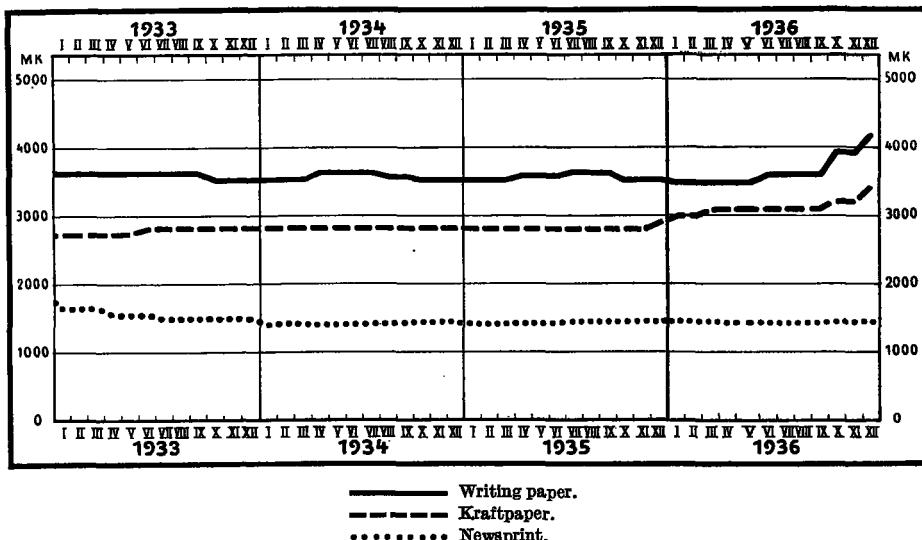

the efficiency of output. With regard to sulphite cellulose output was still restricted by an international agreement, so that only technical improvements were made in this branch; besides, some mills went over to the manufacture of bleached sulphite pulp. The exports of sulphite cellulose amounted to 757,600 tons as against 688,700 and 597,200 tons in 1935 and 1934. Of sulphate cellulose 323,200 tons were exported as compared with 235,200 and 204,900 tons in the two previous years. In both cases the quantity exported was larger than ever before. The value of cellulose exports totalled 1,660.5 million marks in comparison with 1,428.1 and 1,246.0 millions in 1935 and 1934.

The working of the *mechanical pulp mills* was interfered with during the dry summer by a shortage of water, so that the output proved less than had been anticipated. This circumstance, combined with the cautious selling policy of manufacturers and the fact that the international agreement regarding the limitation of output still remained in force, occasioned an appreciable rise in November in the prices that had until then been at a very low level. As the greater part of the annual output had been sold at the low prices ruling at the beginning of the year, the rise in prices did not affect the profits of this branch of industry, all the less so, as the price of raw materials and other costs increased. Exports of mechanical pulp fell slightly short of the record in 1935, viz., 277,700 tons as against 289,800 tons. The value of exports also fell of slightly, from 221.0 to 218.4 million marks.

The *cardboard industry* proceeded normally and was able to record some improvements. Prices were steady, but low, and rose towards the end of the year, but at the same time costs also increased. A total of 72,700 tons was exported abroad in comparison with 66,100 and 64,300 tons in the previous years. The value of exports amounted to 130.2 million marks, while in 1935 and 1934 it had amounted to 121.0 and 119.2 millions respectively.

In the *paper industry* last year was a very calm period. The rise in prices affected the paper output comparatively late and did not influence the prices for newsprint during the whole year. As the output had to a large extent been sold in advance and as costs also rose, the rise in prices had a very slight effect on this industry. Greater importance attached to the increased sales of most kinds of paper. Extensions and improvements were made in several mills, so that their productive capacity increased.

MOVEMENT OF PRICES FOR PAPER IN 1933-1936.  
MARKS PER 1,000 KG.

Paper was exported to a quantity of 453,100 tons or considerably more than in any previous year. The corresponding quantity amounted to 376,100 tons in 1935 and 355,800 tons in 1934. The value of exports amounted to 842.2 million marks as against 709.6 and 680.6 millions respectively in the previous years. The greater demand for newsprint contributed principally to the increase, but the sales of several other kinds of paper also grew.

The output of the *industry supplying the home market* increased during the year by 6 per cent in volume and fully 7 per cent in value. The output was larger than in any previous year and exceeded the maximum during the previous boom by 14 per cent in regard to value and 23 per cent in regard to volume. The increase in the volume of output was largest or 17 per cent in the building trade and next largest in the foodstuffs and luxuries industry, 11 per cent. There was a considerably smaller increase of output in the leather and footwear industry and in the textile industry, while the output in the metal and machinery industry did not surpass the high level attained in 1935. Owing to the rising level of prices the value of output increased more in some branches than its volume. — It is also worth mentioning that some branches of the home market industry endeavoured to find a market for their goods abroad.

The *building trade* was very lively. In the whole country the manufacture of cement was fully 24 per cent larger than in 1935 and 79 per cent larger than in 1926. In Helsinki (Helsingfors) 121 new houses were completed with a cubic space of 881,000 m<sup>3</sup> as against 124 new houses with 940,000 m<sup>3</sup> during the previous year and 4,943 new living rooms were built as against 4,205 in 1935 and 1,836 in 1934. In spite of an appreciable advance in building costs building operations appear still to be on the rise, seeing that a considerable number of buildings were in course of erection at the end of the year under review and that the number of building plans approved was on the rise.

**The labour market.** In consequence of productive activity constantly growing livelier the labour market was a good one. At the beginning of the year, indeed, about 20,000 people were still registered at the Unemployment Boards, but during the spring employment increased, so that at the end of August the number of unemployed had fallen below 1,000. In the autumn there was again a certain amount of unemployment, but this was in the nature of winter unemployment that is usual in Finland and is independent of cyclical business conditions. In some spheres a shortage of labour began to be felt.

With the exception of a few unimportant labour disputes the year was peaceful. In regard to wages there was a rise based on voluntary agreements.

**Foreign trade.** The development of Finland's foreign trade during recent years is illustrated by the following figures.

	Imports. Mill. mks.	Exports. Mill. mks.	Total foreign trade. Mill. mks.	Surplus of im- ports (—) or exports (+). Mill. mks.	Volume, % (1913 = 100). Imports.	Exports.
1928 .....	8,012.0	6,245.3	14,258.2	—1,767.6	169.4	141.2
1929 .....	7,001.4	6,429.7	13,431.1	— 571.7	154.8	149.8
1930 .....	5,247.7	5,404.1	10,651.8	+ 156.4	141.2	134.5
1931 .....	3,464.7	4,456.7	7,921.4	+ 992.0	110.4	136.5
1932 .....	3,502.3	4,631.5	8,133.8	+1,129.2	98.2	143.9
1933 .....	3,928.1	5,297.7	9,225.8	+1,369.6	115.0	165.8
1934 .....	4,776.4	6,226.0	11,002.4	+1,449.6	149.6	180.2
1935 .....	5,344.4	6,240.5	11,584.9	+ 896.1	165.7	191.6
1936 .....	6,369.0	7,222.6	13,591.6	+ 853.6	184.7	217.9

During 1936 foreign trade was again livelier. The value of the turnover in trade as a whole amounted to 13,591.6 million marks. The increase

represented 17 per cent as against only 5 per cent in 1935. Thus foreign trade was 72 per cent larger than during the worst year of the depression, 1931, and larger than in any previous year with the sole exception of 1928, the record year during the previous boom, when foreign trade was another 5 per cent larger than in 1936. In regard to volume foreign trade increased during the year by about 12 per cent and was considerably larger than in any previous year.

Exports and imports contributed in about equal measure to the greater liveliness of foreign trade. The quantity of imports was about 11 per cent above 1935. As the prices of imported goods had risen 7 per cent on an average, the value of imports increased to a greater extent than their volume or by 19 per cent. The quantities exported rose 14 per cent and the value of exports, owing to higher prices, slightly more or 16 per cent. The increase in the value of exports would have been appreciably larger, if, as already mentioned, a very large part of the principal exports had not already been sold before prices had begun to rise. In both value and quantity exports were larger than in any previous year, and the volume of imports was also the highest on record, but their value still fell considerably short of the value in 1928 and 1929.

Owing to the value of imports increasing by 1,024.6 million marks to 6,369.0 millions and the value of exports by 982.1 million marks to 7,222.6 millions the balance of trade turned out almost as favourable as for 1935, seeing that the surplus of exports amounted to 853.6 million marks as against 896.1 millions for the previous year and was thus below the figures for 1932—1934.

Some figures have already been quoted above regarding the exports of the principal products of agriculture and industry. In addition the following table may be given, showing the part played by the different branches of trade in the year's exports and the increase in them. Re-exports are not included in these figures.

	Exports in 1935.		Exports in 1936.		Increase.	
	Mill. mks.	%	Mill. mks.	%	Mill. mks.	%
Timber industry .....	2,710	43.8	3,053	42.7	+ 343	+ 12.7
Paper industry .....	2,516	40.6	2,900	40.5	+ 384	+ 13.2
Agriculture .....	561	9.1	668	9.3	+ 107	+ 19.1
Other branches .....	406	6.5	539	7.5	+ 133	+ 32.7
Total	6,193	100.0	7,160	100.0	+ 967	+ 15.6

The increase in the value of exports was considerable in all these groups. It should be noted that this increase in the timber industry was due in an appreciable degree to the rise in prices, while the quantity of paper and pulp products increased, whereas prices were lower on an average than in 1935.

The share of the timber industry in exports was still the largest, but proportionately it fell off in consequence of the large increase in exports of agricultural produce and products of »other branches». The proportionate share of the paper and pulp industry in the total exports remained unaltered, although there was an absolute increase in exports. The advance in the exports of agricultural produce has already been touched on. The comparatively large increase in exports of products of »other branches» is also striking. This increase referred principally to exports of yarn and ropework, cloth and other goods in the textile trade, furs, copper, articles of granite and china, and explosives.

The way in which imports were composed is illustrated in the table below, in which imports are divided according to their purpose.

*Imports divided according to purpose.*

Year.	Articles of consumption.				Articles for productive purposes.			
	Foodstuffs and luxuries.		Finished products of industry.		Raw materials and semi-finished products.		Means of transport, machinery etc.

1936.....	169.2	90	192.7	218	386.3	256	148.7	339

As imports in all classes of goods increased last year both in quantity and value, their mutual relationship only experienced slight changes. Imports of raw materials and semi-finished products increased most, so that the share of this class in the total value of imports grew from 45.5 to 46.5 per cent. Imports of raw materials were larger than in any previous year in value as well as in quantity. The next largest increase in imports occurred in the class »foodstuffs and luxuries»; this was to some extent due to the lower rates of duty that came into force at the beginning of the year and in connection with which many importers postponed their imports, especially of sugar, coffee and wheat, from December, 1935, to January, 1936. Imports of goods in this class represented 15.5 per cent of the value of imports as against 15.4 per cent in 1935. In spite of the considerable increase during the last few years imports of foodstuffs and luxuries were appreciably less than during the previous boom, the encouragement of grain growing in Finland having contributed essentially to this result. Imports of means of transport, machinery and other means of production and of finished products of industry also increased considerably, but the proportionate share of the former class in the total value of imports was almost unchanged, rising from 18.6 to 18.7 per cent, while the share of the latter class dropped from 20.5 to 19.3 per cent. Goods of these classes were imported to three times and twice the volume respectively of the imports before the Great War, but in neither class did the imports come up to the record figures for 1928.

The value of imports and exports and the difference between them for each month of the year under review was as follows:

	Imports. Mill. mks.	Exports Mill. mks.	Surplus of ex- ports (+) or imports (-). Mill. mks.
January .....	461.2	437.0	— 24.2
February .....	370.9	360.5	— 10.4
March .....	394.9	396.8	+ 1.9
April .....	469.4	398.4	— 71.0
May .....	564.2	573.7	+ 9.5
June .....	559.9	703.7	+ 143.8
July .....	566.5	820.7	+ 254.2
August .....	527.5	761.5	+ 234.0
September .....	601.0	712.4	+ 111.4
October .....	616.6	794.3	+ 177.7
November .....	637.7	662.2	+ 24.5
December .....	599.2	601.4	+ 2.2
Total	6,369.0	7,222.6	+ 853.6

The greater purchasing power of the population was clearly visible in the increased liveliness of *home trade*. The Unitas index rose from 132 for 1935 to 146 for 1936, if 1926 = 100. The total sales in wholesale trade are estimated to have amounted to 11,200 million marks as against 10,100 millions for 1935 and 9,000 millions for 1934. The greater part of the increase referred to local manufactures, but business in imported goods was also livelier.

**The money market.** The relaxation that characterised the money market in Finland in recent years continued during the year under review; the development even proceeded palpably in the direction of a more and more ample supply of money, as the following survey shows:

*The money market during 1928—1936 in million marks.*

<sup>1)</sup> Owing to the rearrangement of the banking statistics the figures since 1934 are not fully comparable to the figures for the preceding years.

Actual deposits increased appreciably, as in 1935, during the first half of the year. During the latter half of the year the increase ceased, but there was no such reduction as in the previous year. Cheque accounts also grew very much. Deposits in the Joint Stock banks increased in this way during the year under review by 631.8 million marks or 7.9 per cent. They thus flowed into the Joint Stock banks on a considerably larger scale than for many years. At the beginning of the year, when lumber work in particular kept a considerable amount of capital tied up, the credits granted by the Joint Stock banks increased, but subsequently the loans were repaid to such an extent that the total credits at the end of the year were 75.8 million marks less than at the beginning. In accordance with what has become the rule since 1934, the deposits in the Joint Stock banks were in excess of their credits throughout the whole of last year. The surplus of deposits, which had risen in 1935 from 221.2 million marks to 517.6 millions, increased last year to 1,225.2 millions. Such a position is quite unique in Finland, as it has generally been marked by a considerable surplus of credits. In consequence of the plentiful supply of money no bills whatever were re-discounted, on the contrary the Joint Stock banks had to overcome some difficulty in finding investments. They therefore increased their holdings of bonds, which are not included in the actual credits, by 415.0 million marks, so that at the end of the year they amounted to 1,206.4 million marks. In spite of this the cash of the Joint Stock banks was exceptionally large, having risen from 633.3 millions at the end of December, 1935, to 851.3 millions on the same date in 1936. As foreign trade resulted in a surplus of exports, the foreign balances of the Joint Stock banks exceeded their foreign indebtedness throughout the year. The net foreign balances increased during the year from 181.9 million marks to 309.4 millions.

The figures concerning the business of the Bank of Finland also reflect the favourable economic conditions during the year. As a review of its business is given in the next chapter, only a few circumstances in this connection need be dwelt on. The home credits of the Bank of Finland increased during the year by 167.6 million marks. In connection with the greater liveliness in the economic sphere and the growing purchasing power of large classes of the population the note circulation increased from 1,380.7 million marks at the end of 1935 to 1,630.1 millions at the end of the year.

under review. The increase in the amount of notes in circulation thus amounted to about 250 million marks as compared with 100 millions in round figures during each of the years 1933, 1934 and 1935. Owing to the favourable foreign payment position of the country the balances of the Bank of Finland with its foreign correspondents increased according to the books by 224.7 million marks and therefore attained a maximum value at the end of the year, viz., 1,491.6 million marks. Besides, the Bank improved its position by acquiring considerable quantities of gold. On the other hand the note reserve and the percentage of the note cover fell off to some extent, this being due partly to the principles of accountancy referred to below.

The plentiful supply of money was clearly visible in the large increase of deposits in the institutions that accept them. This increase is illustrated by the following table, which does not include the deposits received by the Joint Stock banks and the Central Bank of the Co-operative Credit Societies from other credit institutions. The figures for 1936 are partly based on preliminary data.

	Deposits 31 Dec. 1936. Mill. mks.	Increase in 1936. Mill. mks.	Increase in 1935. Mill. mks.
Joint Stock banks .....	7,673.7	+ 525.1	+ 240.1
Savings banks .....	5,862.0	+ 673.9	+ 433.5
Post-Office Savings Bank .....	401.4	+ 25.1	+ 20.4
Co-operative Credit Societies .....	794.5	+ 178.8	+ 93.9
Central Bank of the Co-operative Credit Societies	59.6	+ 5.7	+ 8.6
Consumers' Co-operative Societies' Savings Accounts	504.6	+ 54.2	+ 29.6
Mortgage institutions .....	4.3	+ 0.6	— 0.7
Total	15,300.1	+ 1,463.4	+ 825.4

The accumulation of deposits was fully 77 per cent larger than in 1935 and incomparably larger than during the period of depression, when deposits even decreased in some years. There was considerable competition for good investments, and some Savings banks in the rural districts in particular were obliged at times to keep appreciable amounts deposited in their own Central Bank or in other Joint Stock banks. The market for bonds was exceptionally lively under these circumstances. New bond loans were issued to a total nominal value of approximately 1,700 million marks, either for converting dearer bond loans or for funding short-term credits or for obtaining fresh credit for the requirements of trade.

The relaxation of the money market was chiefly a consequence of the favourable balance of payments. All the data for calculating this are, indeed, not yet available, but an approximate estimate can be made. It is known that the surplus of exports amounted to about 850 million marks and it can further be taken as certain that the earnings of the merchant fleet increased, as well as that the expenditure on interest abroad was reduced on account of the decrease in the amount of indebtedness and the lowering of rates of interest. It can therefore be calculated that the income in the balance of payments exceeded the expenditure by an amount slightly in excess of the amount for 1935, when the surplus of income was 1,060 million marks. This income was employed, as in the previous years, for consolidating the foreign payment position of the country. A new loan was issued abroad for an amount of 2 million Swedish crowns, while on the other hand the 6 1/2 per cent State dollar loan of 1926, of which there were still bonds to a value of 8.2 million dollars placed abroad, was redeemed entirely. In addition considerable quantities of bonds were repatriated, though some bonds issued in Finnish marks were also sold abroad. As regular redemption proceeded in addition, it can be estimated that about 600 million marks were employed for the redemption of the foreign funded debt.

At the same time, owing to livelier foreign trade, short-term indebtedness was again increased, at an estimate by about 135 million marks, so that it can be assumed that the whole foreign indebtedness was reduced by 465 million marks. Simultaneously the foreign balances of the country were improved considerably. Short-term foreign balances increased, according to estimates, by 325 million marks, in addition to which, as stated below, the Bank of Finland increased its supply of gold during the year.

Although rates of interest had already dropped in 1935 to a level that is exceptionally low as regards Finnish conditions, their downward tendency continued in 1936, although the drop did not extend to all kinds of interest. The credit rates charged by the Bank of Finland remained the same as had been fixed on December 3rd, 1934, namely:

For purely commercial bills at not more than three months' date .....	4 %
For other bills, according to the bill and its maturity .....	4 1/2—5 %
For loans on security and advances on cash credit, according to the nature of the security .....	4—5 %

The credit institutions paid interest on deposits in accordance with the principles established by the joint delegation of the financial institutions at the end of 1934. On six months' deposits the rate of interest was  $3\frac{3}{4}$  and 4 and  $4\frac{1}{4}$  per cent and on sight deposits  $1\frac{1}{2}$  and  $1\frac{3}{4}$  and 2 per cent. At the end of the half-year the Joint Stock banks lowered their rates on sight accounts from  $1\frac{1}{2}$  to 1 per cent and at the end of the year the joint delegation of the financial institutions decided to lower the rates on all sight accounts from January 1st, 1937, to 1 and  $1\frac{1}{4}$  and  $1\frac{1}{2}$  per cent and on deposit accounts to  $3\frac{1}{2}$  and  $3\frac{3}{4}$  and 4 per cent.

The credit rates of the Joint Stock banks were also lowered during the year, so that the average rate at the end of the year was 6.24 per cent as against 6.35 and 6.82 per cent respectively at the same date in 1935 and 1934. In other spheres, too, rates of interest were continuously on the downward grade. For instance, in issuing bond loans there was a partial transition to the type of  $4\frac{1}{2}$  per cent, and loans at 5 per cent interest were the most usual, whereas in 1935 even the Treasury was obliged to pay 5 per cent interest and loans at  $5\frac{1}{2}$  per cent were the most general.

Owing to the improvement in the position in consequence of the fall in rates of interest and the constantly more favourable conditions for business enterprise and the abundance of capital seeking investment, the Stock Exchange constantly increased in liveliness and experienced a distinct boom during the concluding months of the year. The turnover amounted to 436.3 million marks as against 234.6 and 307.0 millions in the previous years and was, besides, larger than in any year since the boom in 1927 and 1928. According to the Unitas index the price of shares averaged 168 in comparison with 143 for 1935; in December the index rose to 191. Prices of bonds also rose, though relatively considerably less than the prices of shares, according to the Unitas index from 125 to 127 points on an average.

One consequence of the easy state of the money market and the rising trade conditions was that new companies were established in larger numbers than in the preceding years and especially that increases of capital occurred on a larger scale and reductions of capital and liquidations of companies on a smaller scale than for many years past. The changes in the number of companies and in the size of their capital is shown in the following table.

	New companies.		All companies.			Increase (+) or decrease (-). Mill. mks.
	Number.	Capital. Mill. mks.	Number.	Increase.	Capital. Mill. mks.	
1928 .....	777	447.6	9,731	+ 651	7,939.0	+ 1,452.9
1929 .....	558	280.8	10,082	+ 351	8,539.5	+ 600.5
1930 .....	547	185.0	10,410	+ 328	8,797.7	+ 258.2
1931 .....	682	383.7	10,742	+ 332	8,830.6	+ 32.9
1932 .....	787	548.1	11,096	+ 354	9,125.8	+ 295.2
1933 .....	688	105.7	11,528	+ 432	9,095.6	- 30.2
1934 .....	624	129.6	11,999	+ 471	9,034.0	- 61.6
1935 .....	600	92.5	12,463	+ 464	9,295.0	+ 261.0
1936 .....	679	246.5	13,025	+ 562	9,802.5	+ 507.5

In conclusion it is worth mentioning that the number of bankruptcy proceedings instituted in 1936 was unusually low or 594 as against 724 in 1935 and 2,417 during 1931, which was a year of depression. The number of protested bills, 2,983, was slightly larger than in 1935, but very small in comparison with the corresponding number in 1931, viz., 26,343. The value of these bills decreased to 10.8 million marks, whereas in 1935 it amounted to 23.5 and in 1931 to 162.7 millions.

**The State finances.** The favourable economic conditions also caused an increase in State revenue. The growing imports in particular increased the Customs revenue, but in addition the yield of most of the principal sources of revenue increased to such an extent that it exceeded the amounts collected for 1935 as well as the sums estimated in the Budget for 1936. At the same time the higher revenue also occasioned greater expenditure, as the following table shows.

Revenue.	1933 Mill. mks.	1934 Mill. mks.	1935 Mill. mks.	1936 Mill. mks.
Current revenue .....	2,872.6	3,366.9	3,482.2	3,725.2
Loans issued .....	200.0	503.6	860.0	900.0
Other capital revenue .....	227.9	265.2	217.1	245.1
Total	3,300.5	4,135.7	4,559.3	4,870.3
Expenditure.				
Current expenditure .....	2,543.6	2,599.2	2,872.7	2,983.6
Redemption of loans .....	68.9	394.2	815.3	915.0
Other capital expenditure ....	634.7	807.3	780.4	932.0
Transferred to the Budget Equalisation Fund .....	—	300.0	65.0	31.0
Total	3,247.2	4,100.7	4,533.4	4,861.6
Surplus .....	53.3	35.0	25.9	8.7
Grand total	3,300.5	4,135.7	4,559.3	4,870.3

In explanation of the figures in the finance accounts of the Treasury it should be mentioned further that the large figures for loans taken up and loans redeemed are due to the conversion of loans undertaken during the year. The surplus in the finance accounts amounted in reality to 38.7 million marks, but in accordance with the decision of the Government 30.0 millions were transferred to the Budget Equalisation Fund.

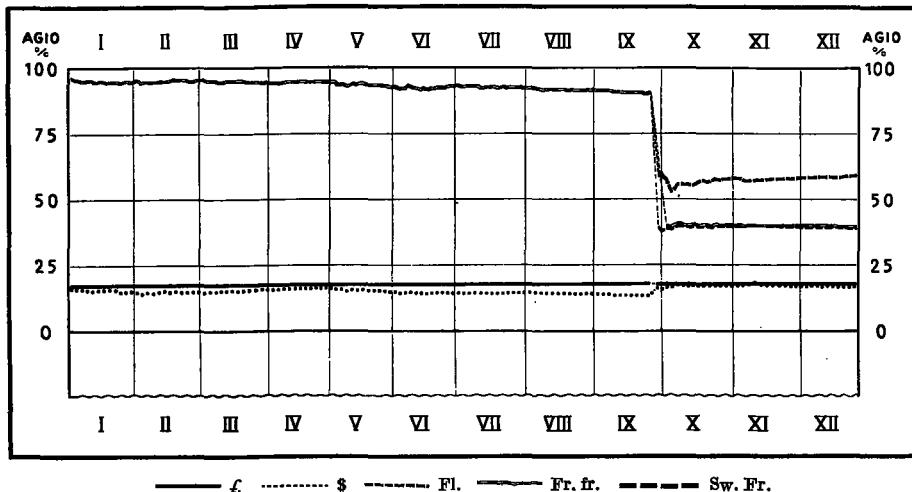

The amount and composition of the *Public Debt* are shown in the following table.

<i>Funded debt.</i>	31 Dec. 1933 Mill. mks.	31 Dec. 1934 Mill. mks.	31 Dec. 1935 Mill. mks.	31 Dec. 1936 Mill. mks.
Foreign .....	2,384.0	2,282.6	1,852.0	1,128.7
Internal .....	716.0	990.7	1,180.8	1,852.7
Total	3,100.0	3,273.3	3,032.8	2,981.4
<i>Floating debt.</i>				
Foreign .....	358.9	59.0	56.5	56.5
Internal .....	48.8	49.5	76.7	81.3
Total	407.7	108.5	133.2	137.8
Grand total	3,507.7	3,381.8	3,166.0	3,119.2

The booked value of the funded debt of the State was reduced last year by 51.4 million marks. A far more significant change occurred in the composition of the debt, as the foreign debt was reduced by 723.3 and the internal debt increased by 676.5 million marks. The chief measures for carrying out this conversion were as follows. The outstanding part of the 6 1/2 per cent dollar loan of 1926, 12,994,000 dollars, was redeemed in its entirety. Besides 2,000,000 dollars were paid up according to agreement on the 4 per cent medium-term loan of 1935. In addition some matured internal loans were redeemed, viz., the short-term loan of 1933 and the unemployment loan of the same year, altogether 180 million marks. For the purposes of this redemption two internal loans at 4 1/2 per cent were issued in Finland to a total nominal amount of 900 million marks.

As explained in previous issues of this Year Book, these figures are only exact as regards the internal part of the Public Debt. Foreign loans are entered in the books in Finland, as customarily elsewhere, in the country's own currency at the rates of exchange current at the time the loans were issued, loans negotiated before the war, for instance, almost at the former parity of exchange. In order to determine the amount of

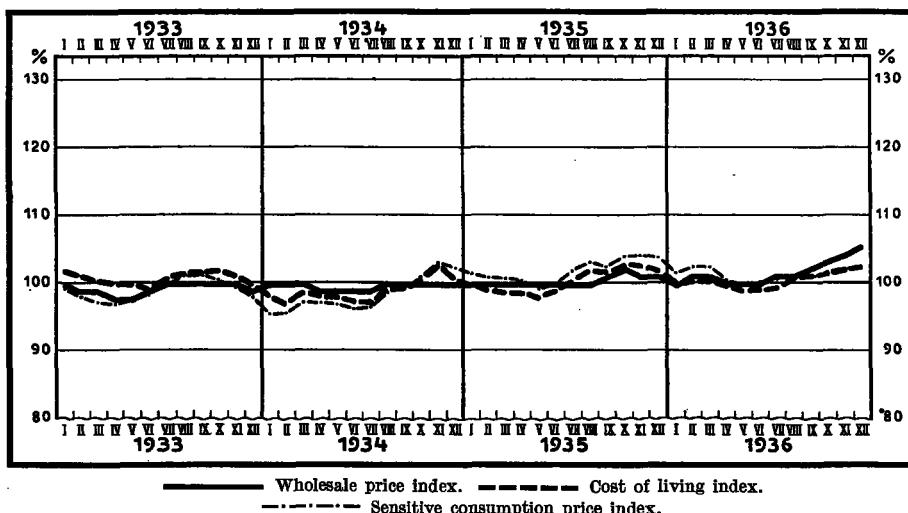

DAILY QUOTATIONS OF FOREIGN CURRENCIES IN 1936.  
PERCENTAGE ABOVE PAR.

the Public Debt more exactly, the Treasury calculates every month, what sum in Finnish marks would be necessary at each date in order to pay off the whole Public Debt at current rates of exchange. According to this calculation the Public Debt of Finland at the end of 1935 amounted to 4,035 million marks and at the end of 1936 to 3,818 millions or 217 millions less. The reduction was due to some extent, as will be seen later, to some rates of exchange having fallen.

**Currency and level of prices.** The Finnish mark followed the pound sterling closely during the year under review, the latter being quoted unchanged at 227 marks, as had been the case since March, 1933. The position of the mark in relation to other currencies was therefore entirely dependent on the relation of such currencies to sterling, and the changes in the latter relation were reflected in the quotations for these currencies. When some gold currencies were devalued in relation to sterling last autumn, the value of the Finnish mark rose immediately in relation to them. Thus the French franc, the rate for which had varied at the beginning of the year between Fmk. 302:75 and Fmk. 305:25 and gradually grew so much weaker in May that it dropped to Fmk. 296:—, fell to Fmk. 218:— in October. The rate for francs remained approximately at this level up to

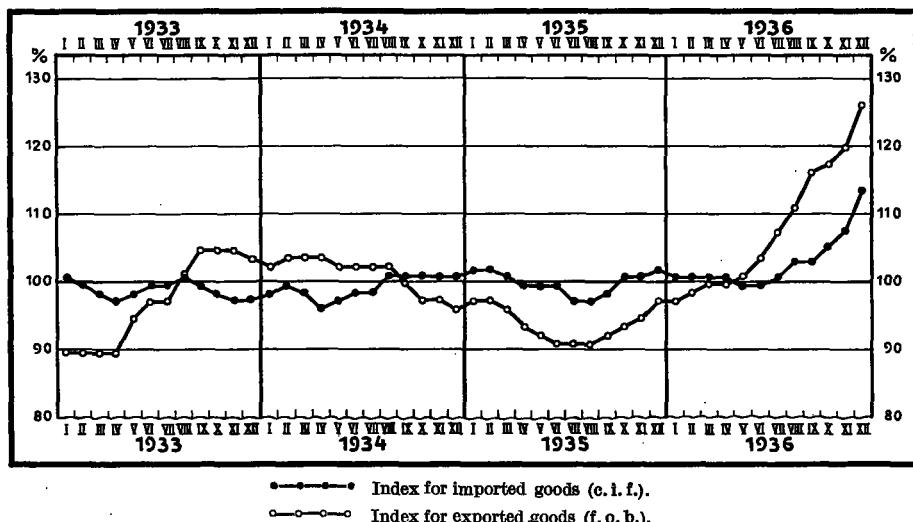

INDICES FOR WHOLESALE PRICES, COST OF LIVING AND SENSITIVE CONSUMPTION PRICES.  
AVERAGES FOR THE YEARS 1933-1936 = 100.

the end of the year, so that from the end of December, 1935, to the same date in 1936 it had fallen from Fmk. 305:— to Fmk. 217:25. The rate for Dutch florins and Swiss francs followed the same course; the former dropped from Fmk. 3,133:— to Fmk. 2,537:— and the latter from Fmk. 1,501:— to Fmk. 1,064:—. Finally, it should be stated that the dollar rate fluctuated during the year within very narrow bounds or between Fmk. 46: 70 and Fmk. 44: 95 and that it rose from Fmk. 46: 15 on December 31st, 1935, to Fmk. 46: 40 on the same date in 1936.

There was a slight decrease towards the end of the year in the internal value of the Finnish mark, calculated according to the level of prices. The great rise in the price of raw materials and some other goods abroad that was due to some extent to the failure of the crops in the United States of America and to the rising cyclical conditions, but that was to a considerable extent a result of the big armament schemes of the great powers, began in the course of the autumn to affect the prices of exported and imported goods in Finland particularly and thereby the wholesale prices in the country generally. In regard to the cost of living, however, no rise was noticeable as yet. The course of development of late is illustrated by the diagrams above and on the next page and in the following table.

PRICE INDICES FOR IMPORTED AND EXPORTED GOODS.  
AVERAGES FOR THE YEARS 1933-1936 = 100.

—●— Index for imported goods (c.i.f.).  
—○— Index for exported goods (f.o.b.).

	Wholesale price index. Increase (+) Points. or decrease (-).	Cost of living index. Increase (+) Points. or decrease (-).	Bank of Finland sensitive con- sumption price index. Increase (+) Points. or decrease (-).
1935			
December .....	91	. 86	109
1936			
January .....	90	- 1	107
February .....	91	+ 1	108
March .....	91	-	108
April .....	90	+ 1	106
May .....	90	-	105
June .....	90	-	105
July .....	91	+ 1	106
August .....	91	-	107
September .....	92	+ 1	106
October .....	93	+ 1	107
November .....	94	+ 1	107
December .....	95	+ 1	108

As the table shows, the wholesale price index stood 4 points higher in December, 1936, than a year before, while the cost of living index remained unchanged and the index for sensitive goods for consumption dropped 1 point during the same period.

The extent to which the rise in wholesale prices was attributable to the rise in prices of goods in foreign trade, is evident from the fact that the

price index for imported goods rose from 88 in December, 1935, to 98 in December, 1936, while the price index for exported goods rose even more or from 77 to 100. The greatest rise in price occurred in such classes of goods as exported timber and hides and imported cereals and cereal products, cattlefood and products of the metal industry, and in internal trade for grain, cattlefood, meat products and building materials. The course of prices was, however, very uneven. In the case of some classes of goods the price index was unaltered on the whole and in the case of some classes, including animal foodstuffs and products of the textile industry, the index even displayed a downward tendency.

The average price level of late years is illustrated in the following table.

	Wholesale price index.	Cost of living index.	Sensitive consump- tion price index.

1936 .....	92	84	106

## II. THE BANK OF FINLAND IN 1936.

### I. NOTE ISSUE.

The note issue of the Bank of Finland is illustrated in tables 1—10 in the statistical part of this book. Table 1 refers solely to 1936, while the others also contain reviews of several previous years. With the exception of table 2, which is based exclusively on the monthly statements, and tables 8—10, which refer to the end of the year or to full years, these tables are based on both the weekly and monthly statements of the Bank.

**The redemption of notes.** Since the autumn of 1931 the Bank of Finland has been released from its liability to redeem its notes in gold or in cheques made out in foreign currency. This right has been renewed by ordinances issued for a term of one year. As no change has occurred in the monetary policy of the leading financial countries that would justify the resumption of redeeming notes in gold in Finland, the right referred to was extended by an ordinance of November 20th, 1936, up to the end of 1937.

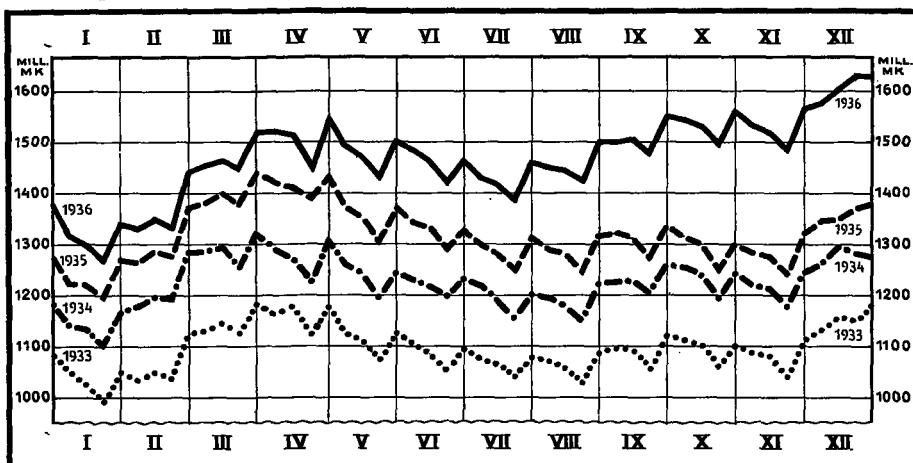

**The right of issue.** The amount of the Bank of Finland's notes in circulation may not exceed the total of its gold reserve and its undisputed foreign credit balances by more than 1,200 million marks, though with the proviso that such part of the note circulation and liabilities payable on demand as is not covered by gold or foreign balances, is covered by assets included in the so-called supplementary cover. This includes foreign bills, foreign bonds listed on foreign Stock Exchanges, interest coupons in foreign currency that have fallen due for payment, foreign bank notes and inland bills subject to certain conditions. In accordance with these regulations

a distinction is made in the Bank's weekly statements between two kinds of note reserve, the one immediately available and the other dependent on increased supplementary cover. In view of the fact that the supplementary cover, for instance in discounting bills, is immediately increased, the latter kind of note reserve is, however, in reality also always available.

The right of note issue of the Bank of Finland increased considerably during 1936 and again established a record. The right of note issue which amounted to 2,938.9 million marks at the end of 1935, increased at first to 3,061.8 millions on May 8th, but then fell off again and reached the lowest point for the year on June 23rd, 2,836.7 millions. Subsequently the right of note issue grew again and attained its highest point on the last day of the year at 3,294.8 millions. On an average for the year the right of note issue was 2,986.8 million marks or fully 100 millions more than for 1935, when the corresponding average was 2,876.9 millions. The increase was very considerable in comparison with the corresponding averages for 1934 and 1933, 2,594.9 and 2,320.1 million marks respectively.

**The note circulation.** The increase in the note circulation that had been a clearly perceptible phenomenon since 1933, continued during 1936 and was even intensified, an obvious consequence of the marked improvement in trade conditions. Whereas the note circulation had increased in 1933, 1934 and 1935 by 100 million marks annually in round numbers, the increase during the year under review amounted to about 250 millions. This increase was not even, however, but occurred with the usual weekly and monthly fluctuations. These are illustrated in the diagram on the next page which also shows that the greatest increase in the note circulation in comparison with previous years occurred in the autumn, when there was a general rise in prices and especially in the price of lumber. On an average the circulation in 1936 amounted to 1,470.9 million marks, whereas the corresponding average for the two previous years was 1,319.5 and 1,225.5 millions respectively. In spite of the large increase the note circulation still averaged less than during the previous record year of 1928. During the last weeks of the year under review, however, it advanced to a higher level than during the corresponding weeks of that year. The recent course of development is shown in the diagram and the table on the next page.

## BANK OF FINLAND NOTES IN CIRCULATION IN 1933—1936.

## Notes in circulation.

	Highest. Mill. mks.	Lowest. Mill. mks.	Average. Mill. mks.
1928 .....	1,660.9	1,446.7	1,548.0
1929 .....	1,596.0	1,300.9	1,439.3
1930 .....	1,447.2	1,212.5	1,330.7
1931 .....	1,319.5	1,137.6	1,229.0
1932 .....	1,299.4	1,004.0	1,135.1
1933 .....	1,183.6	992.8	1,095.6
1934 .....	1,321.8	1,102.7	1,225.5
1935 .....	1,441.5	1,197.3	1,319.5
1936 .....	1,631.0	1,269.8	1,470.9

**The composition of the note circulation.** As the note circulation increased, the quantity of most of the denominations of the notes also grew. Only small notes formed an exception, the number of such notes in circulation having dropped to an insignificant quantity, seeing that no new ones are printed. — At the end of 1928 and 1933—1936 the following quantities of the different denominations were in circulation, disregarding older issues than that of 1922.

	1928.	1933.	1934.	1935.	1936.
1,000 mks. ....	439,403	351,508	381,341	424,290	517,956
500 » ....	544,769	404,740	447,588	499,139	624,297
100 » ....	5,310,097	4,344,596	4,734,492	5,027,419	5,834,175
50 » ....	2,088,696	1,955,205	2,063,702	2,163,301	2,371,746
20 » ....	2,648,587	2,980,285	2,961,262	3,015,470	3,150,017
10 » ....	4,428,910	214,336	126,467	102,409	84,341
5 » ....	5,526,987	260,188	196,230	176,654	166,121
Total	20,987,449	10,510,858	10,911,082	11,408,682	12,748,653

It is especially interesting to observe the changes in the composition of the note circulation in comparison with the maximum circulation in 1928. While the small notes have disappeared from circulation, the number of 20 and 50 mark notes has increased by 19 and 14 per cent respectively. The number of 100 mark notes in circulation has only increased by 10 per cent, while the number of notes of the higher denominations in circulation, 500 and 1,000 mark notes, was 15 and 18 per cent higher in 1936 than in 1928.

**Metal coins.** According to the monetary law of 1925 *gold coins* were struck of a value of 200 and 100 marks. These are, however, not generally current, the insignificant number withdrawn from the Bank of Finland in the course of time having mostly been acquired by collectors of coins. The following amounts of gold coin were »in circulation» in this way:

	200 mks.	100 mks.	Total.
1931 .....	614,200: —	353,000: —	967,200: —
1932 .....	613,800: —	353,000: —	966,800: —
1933 .....	615,800: —	351,200: —	967,000: —
1934 .....	612,400: —	351,900: —	964,300: —
1935 .....	611,800: —	351,500: —	963,300: —
1936 .....	613,400: —	352,200: —	965,600: —

On the other hand *aluminium-bronze coins* have gained in importance from year to year in place of the small notes that have been withdrawn from circulation. The livelier circulation of money owing to the improvement in trade conditions has contributed towards increasing the number of aluminium-bronze coins in circulation. The development in this respect is illustrated by the following table.

	20 mks.	10 mks.	5 mks.	Total.
1931 .....	—	5,342,940: —	4,676,120: —	10,019,060: —
1932 .....	—	22,990,410: —	19,016,585: —	42,006,995: —
1933 .....	—	28,952,820: —	24,647,350: —	53,600,170: —
1934 .....	5,599,180: —	30,591,770: —	27,701,525: —	63,892,475: —
1935 .....	7,156,300: —	32,318,870: —	29,640,320: —	69,115,490: —
1936 .....	9,516,120: —	34,986,430: —	33,015,005: —	77,517,555: —

The advance in home trade and the improvement in the purchasing power of the population are also reflected in the greater quantity of actual

small change in circulation. The following quantities of *nickel coins* were in circulation at the end of the years referred to:

	1 mark.	50 penni.	25 penni.	Total.
1931 .....	25,572,849: —	7,611,592: 50	6,835,448: 50	40,019,890: —
1932 .....	25,393,757: —	7,432,155: 50	6,789,920: 75	39,615,833: 25
1933 .....	26,479,914: —	7,706,324: 50	7,059,443: 25	41,245,681: 75
1934 .....	28,479,404: —	8,253,161: 50	7,533,752: 25	44,266,317: 75
1935 .....	30,839,955: —	8,699,481: 50	8,018,417: —	47,557,853: 50
1936 .....	33,607,461: —	9,412,599: —	8,637,478: 75	51,657,538: 75

Of the various small coins in *copper* the following amounts were in circulation according to the statistics:

	10 penni.	5 penni.	1 penni.	Total.
1931 .....	3,196,434: 40	3,261,487: 75	746,049: 21	7,203,971: 36
1932 .....	3,152,027: —	3,272,951: 15	740,716: —	7,165,694: 15
1933 .....	3,206,699: 70	3,310,742: 25	739,837: 21	7,257,279: 16
1934 .....	3,358,922: 60	3,406,318: 95	739,304: 18	7,504,545: 73
1935 .....	3,504,775: 80	3,499,316: 55	738,920: 67	7,743,013: 02
1936 .....	3,682,898: 50	3,616,143: 85	738,563: 46	8,037,605: 81

In these calculations it has been impossible to deduct the notes and coins lost, the number of which must be considerable, especially in the case of small notes and small coins.

**Manufacture and destruction of notes.** The large increase in the note circulation affected both the manufacture of new notes and the destruction of old ones. New notes were manufactured during the year under review to the number of 10,159,000 or more than in any year since the printing of small notes ceased. Their total value amounted to 951.4 million marks as against 556.0 and 604.4 millions respectively during the two previous years. The value of the notes printed was larger than in any year since 1927.

A slightly larger number of notes was also withdrawn from circulation and destroyed than during the preceding years. The number of notes destroyed was 8,914,408 and their total value 736.0 million marks. During the two previous years notes were destroyed to a value of 704.9 and 620.0 million marks respectively.

**The note reserve.** The difference between the right of note issue and the total liabilities payable on demand, or the so-called used right of issue, indicates the amount of the unused right of issue of the Bank of Finland,

also known as the note issue reserve or, shortly, the note reserve. The note reserve, both conditional and unconditional, is shown in table 1 in the statistical section.

The note reserve, in the broader sense of the term, was fairly large at the beginning of the year under review or 861.0 million marks. During the year the note reserve decreased, after fluctuating up and down, gradually to 506.3 million marks on the last day of the year. The reduction during the year was thus 254.7 millions or very nearly the same as in 1935. On an average the note reserve amounted to 663.0 million marks in comparison with 954.5 millions in 1935, 865.1 millions in 1934 and 671.1 millions in 1933. The appreciable decrease in the note reserve was due on the one hand to an increase in the liabilities payable on demand and on the other to changes in the assets dealt with below.

Owing to the right of note issue having increased and the note reserve having fallen off, the latter was reduced more and more in relation to the former. After amounting to about 40 per cent at the beginning of 1935 this ratio had dropped at the beginning of the year under review to 29.3 per cent and subsequently fell off by degrees to 15.4 per cent on the last day of the year. On an average this ratio was 22.2 per cent during last year as against 33.2 and 33.3 per cent respectively during the two previous years.

## 2. COVER FOR THE NOTE ISSUE.

The Bank of Finland's cover for the note issue is shown in tables 11—18. All these tables are based on the weekly and monthly statements.

### *A. The ordinary cover.*

The ordinary cover is composed of the Bank of Finland's gold reserve and undisputed balances with foreign correspondents. At the beginning of 1936 the ordinary cover amounted to 1,738.9 million marks, i. e., it was considerably larger than it had been as a rule in the preceding years. It remained at this high level during the first few months of the year and rose at the beginning of May to as much as 1,861.8 millions. In the following months it was slightly lower and dropped on June 23rd to the lowest point for the year, 1,636.7 millions, but then began to rise again, especially

during November and December. By the last day of the year the ordinary cover had increased to 2,094.8 million marks and was 355.9 millions higher than a year before. On an average the ordinary cover amounted to 1,786.8 million marks during the year as against 1,676.9 millions in 1935 and 1,394.9 millions in 1934. It has not been so considerable in any previous year as during the past year.

While the ordinary cover increased in absolute figures, it fell off in some degree in relation to the total liabilities of the Bank payable on demand, this being a result of the appreciable increase in such liabilities. At the beginning of the year under review the ordinary cover represented 83.7 per cent of the amount of such liabilities, and on January 8th the ratio was increased to 84.0 per cent, but dropped afterwards to a slight extent and reached its lowest point for the year at 71.2 per cent on July 8th. Towards the end of the year a rise set in once more, so that the ratio was 75.1 per cent on the last day of the year. The ordinary cover averaged 76.9 per cent of the total liabilities payable on demand for the year. The relative cover was thus lower than the averages for 1935 and 1934, when the corresponding ratio was 87.2 and 80.6 per cent respectively, but on the other hand it was higher than the average ratios for the preceding years, 67.9 and 54.6 per cent respectively.

**The gold reserve.** As in 1935, the Bank of Finland increased its gold reserve to an appreciable extent in 1936. The latter was increased by gold to a value of 131.6 million marks, while the sales of gold only amounted to 0.4 millions. By this means the gold reserve which had been booked at 472.0 million marks at the beginning of the year, grew to a value of 603.2 millions by the end of the year. The net increase, 131.2 million marks, was rather less than in 1935, when it amounted to 149.5 millions. The gold reserve is still valued in the books in accordance with the monetary law of 1925.

The comparative importance of the gold reserve as cover for the notes also increased to some extent. After representing 27.1 per cent of the total amount of the ordinary cover at the end of 1935, the proportion of the gold reserve to the latter increased to 28.8 per cent during 1936. For the sake of comparison it may be mentioned that the corresponding ratio at the end of 1934 was only 19.5 per cent.

Not all the gold purchased in the course of last year was transferred to the gold reserve, part of it having been entered on a new account »gold deposited abroad, not included in the right of issue». This account appeared for the first time in the weekly statement of the Bank for September 8th at an amount of 50.9 million marks. During the autumn the amount of gold booked in this way increased gradually, so that its value at the end of December amounted to 211.4 million marks. This gold is valued in the books at its purchase value.

**Credit balances with foreign correspondents.** The balances of the Bank of Finland with its foreign correspondents which form the greater part of the ordinary cover, increased considerably in 1936, and the increase would have been even larger, if appreciable amounts of foreign currency had not been employed either for purchasing gold or redeeming loans. At the beginning of the year the foreign balances represented a value of 1,266.9 million marks. The reserve of foreign currency remained at this level during the first few months of the year and rose at the beginning of May to 1,360.5 millions, but subsequently it fell off for the reasons referred to to 1,103.9 millions in the middle of August. In October another rise set in with the result that on the last day of the year the foreign balances amounted to 1,491.6 million marks. Thus they increased during 1936 by 224.7 million marks or 17.7 per cent. On an average the foreign balances of the Bank of Finland amounted to 1,244.5 million marks during 1936 as against 1,305.3 millions in 1935. In comparison with the corresponding averages for the preceding years, 1,072.3, 633.0 and 377.3 millions in 1934—1932, the reserve of foreign currency was very considerable. It is also worth noting that this reserve was larger at the end of the year than ever before. — The balances of the Bank of Finland with its foreign correspondents are still booked at the par of exchange according to the monetary law of 1925 or at even lower rates.

#### *B. The supplementary cover.*

It has been mentioned before on page 23 what kind of assets may be included in the supplementary cover in accordance with the regulations for the Bank of Finland. Of these the Bank had no foreign bonds listed

on foreign Stock Exchanges at all in its possession. The changes in the other assets belonging to the supplementary cover are shown in table 11.

**Inland bills.** The largest of the items forming the supplementary cover was composed, as in former years, of inland bills. As these are referred to later in connection with credits, it need only be mentioned here that during the year under review they averaged 90.5 per cent of the whole supplementary cover. Their importance was therefore slightly greater than during the previous years, when the corresponding ratios were 88.2 and 71.0 per cent respectively.

**Foreign bills.** In comparison with inland bills the other assets belonging to the supplementary cover were of small importance. The most important of them were the foreign bills which averaged 9.4 per cent of the total amount of the supplementary cover during the year. The amount of these bills at the beginning of the year was 80.4 million marks, fluctuated in the course of the year within comparatively narrow limits, between 92.2 and 76.3 millions, and stood at 82.4 millions at the end of the year. The average for the year, 83.1 million marks, was slightly below the corresponding figure for 1935, 91.7 millions, and considerably below the averages for 1934 and 1933, 282.6 and 315.5 millions respectively.

**Foreign notes and coupons.** Regarded as supplementary cover, the foreign notes and coupons in the possession of the Bank were of no practical importance. At the end of the year the Bank of Finland had a supply at its disposal to a value of only 1.2 million marks.

### 3. HOME LOANS.

The home loans granted by the Bank of Finland to the public and the Joint Stock banks for each week during 1936 are shown in table 21 and the loans at the end of each month during 1929—1936 in table 22.

**Re-discounted bills.** As the Joint Stock banks had ample funds at their disposal, no bills whatever were re-discounted during the year. This

situation, which is evidence of the easiness of the money market, has continued for over three years or since October, 1933, when the last re-discounted bills were redeemed.

**Direct credits.** Owing to the improvement in trade the direct credits granted by the Bank of Finland increased to some extent during the year under review. Credits as a whole that amounted to 781.9 million marks at the end of 1935, increased during the initial months of the year to 1,027.8 millions on May 23rd. After the export season had set in the total credits were reduced and remained during the latter half of the year at a level of about 900—960 millions. On the last day of the year the total amount of credits was 949.5 millions, i. e., 167.6 millions or 21.4 per cent higher than at the beginning of the year. The credits of the Bank of Finland averaged 945.9 million marks or rather more than in the preceding years and approximately as much as in 1928, when the credits reached their highest point up to then. This is shown by the following table:

	Highest. Mill. mks.	Lowest. Mill. mks.	Average. Mill. mks.
1928 . . . . .	1,093.4	750.6	938.3
1929 . . . . .	945.9	824.2	886.1
1930 . . . . .	887.2	682.1	792.8
1931 . . . . .	890.9	655.9	750.5
1932 . . . . .	980.5	742.2	851.1
1933 . . . . .	969.3	715.6	872.5
1934 . . . . .	930.0	672.4	820.9
1935 . . . . .	905.4	671.6	803.0
1936 . . . . .	1,027.8	802.6	945.9

In comparing these amounts it should be noted that the figures for 1934—1936 also represent the total credits of the Bank of Finland, whereas, in order to obtain this figure for the previous years, the amount of re-discounted bills must be added, this being considerable especially for 1928 and 1929.

Direct credits are granted by the Bank of Finland in three forms: by discounting bills and by granting loans on security and advances on cash credit. Of these the first form of granting credit, being the most suitable for a central bank, unquestionably occupies the foremost place. Of the credits during last year 87.8 per cent on an average belonged to this form of credits, while only 5.9 per cent of the credits were granted in the form

## THE PRINCIPAL ACCOUNTS OF THE BANK OF FINLAND IN 1935-1936.

— Notes in circulation.  
 ..... Note reserve.  
 -·- Foreign credit balances.

— Total home loans.

of loans on security and only 6.3 per cent in the form of advances on cash credit. The relative importance of bills has been growing during recent years; their proportion to the total direct credits was 86.6 per cent in 1935, 84.7 per cent in 1934, and only 78.4 per cent in 1933.

The amount of *bills directly discounted* fluctuated during the year in the same manner on the whole as the total amount of direct credits, as the former have the greatest influence on the changes in the latter. At the beginning of 1936 the portfolio of the Bank of Finland contained bills to a value of 669.1 million marks. During the first few months of the year the bill portfolio increased, until in the second half of April the amount of bills reached the highest point for the year at 903.9 million marks. Later, the bill portfolio was reduced again, so that on the last day of the year it decreased to 823.0 millions. The increase during the year was therefore 153.9 million marks or 23.0 per cent. On an average for the year the amount of bills totalled 830.2 million marks as compared with 695.3 and 695.4 millions respectively during the two previous years.

However, not all these bills are included in the note cover, for a new account *discounted bills not included in the note cover* was introduced in the weekly statement on April 15th, embracing a small number of bills that do not conform to the conditions for bills to be referred to the note cover. To begin with an amount of 4.5 million marks appeared on this account, but the amount rose by degrees to 45.4 millions by the end of the year. If these bills are deducted from the total amount of the bill portfolio, the result will be that bills to an amount of 777.6 million marks could be referred to the note cover at the end of the year or 108.5 millions more than at the beginning of the year. On an average the amount of bills to be employed as cover for the notes totalled 798.7 million marks.

Among the *advances on cash credit* only slight changes occurred during last year, apart from certain seasonal fluctuations. At the end of 1935 the amount of advances granted on cash credit was 142.0 million marks and at the end of the year under review almost the same or 142.8 millions. However, only a comparatively small part of these were made use of. The amount of advances drawn on cash credit was 67.4 million marks at the beginning of the year under review, remained at this level or slightly lower during the initial months of the year, then rose in the latter half of May to 73.1 millions, but fell off again and dropped at the end of August

to 42.1 millions, the lowest point for the year. After rising to their former level again, the amounts drawn reached their highest point for the year, 74.9 millions, on December 23rd, but had come down once more to 66.7 millions by the last day of the year, i. e., 0.7 millions less than a year before. On an average 59.6 million marks were drawn on cash credits or almost the same amount as in 1935, when the average was 60.8 millions, but less than in 1934 and 1933.

*Loans on security*, on the contrary, recorded an increase. At the end of 1935 the total sum granted in loans on security amounted to 45.4 million marks. In the course of the year this amount grew gradually and was at its highest, 61.2 millions, in the first half of November. On the last day of the year the amount of loans granted on security was 59.8 million marks, so that the increase during the year represented 14.4 millions or 31.6 per cent. The average of loans on security for last year was 56.1 million marks as against 46.9 and 56.2 millions respectively during the two previous years.

#### 4. BONDS.

In addition to the direct credits referred to above the Bank of Finland also invests capital in bonds. The changes in the bonds are shown in the latter part of table 21, in which particulars are given separately regarding bonds issued in Finnish currency and bonds issued in foreign currency.

**Bonds in Finnish currency.** The Bank of Finland holds quantities of bonds in Finnish currency belonging to loans issued either by the Finnish State or by Finnish financial and industrial undertakings and by municipalities. As in previous years the Bank of Finland participated in 1936 in the issue of some new bond loans. As the Bank subscribed for a part of these loans for its own account and also bought and sold bonds, the value of the bond portfolio varied considerably during the year. At the end of 1935 the Bank's bonds in Finnish currency were booked at 190.7 million marks. This value increased by degrees and was at its highest, 405.8 million marks, at the beginning of July. Subsequently the sales again exceeded the purchases, so that the value of this bond portfolio amounted to 347.9 millions on the last day of the year. The value of the

bonds in Finnish currency had thus increased during the year by 157.2 million marks or 82.4 per cent.

**Bonds in foreign currency.** The Bank of Finland has a considerable quantity of bonds in its possession belonging to loans issued in foreign currency by the Finnish State and Finnish companies. At the beginning of the year under review these were booked at a value of 223.2 million marks. By means of some bond loans issued in foreign currency being redeemed and converted into loans in Finnish marks, the value of the bonds belonging to the former group was reduced, apart from some slight fluctuations, in February to 124.4 million marks and in November to 92.6 millions, at which value this part of the bond portfolio remained until the end of the year. Thus the booked value of the bonds in foreign currency was reduced during the year by 130.6 million marks or 58.5 per cent.

During last year the increase in the total value of the bond portfolio continued, as also the change in the latter in the same direction as in the preceding years: the bonds in foreign currency acquired less, but the bonds in Finnish currency greater importance. The booked value of the whole bond portfolio amounted to 315.6 million marks at the end of 1933, to 357.8 millions at the end of 1934, to 413.9 millions at the end of 1935 and finally to 440.5 millions at the end of 1936. In 1933 the main part of the portfolio consisted of bonds in foreign currency, only 22.1 per cent of the value of the bond portfolio consisting of bonds in Finnish currency. However, this ratio increased at first to 23.7 per cent at the end of 1934 and to 46.1 per cent at the end of 1935 and finally to 79.0 per cent at the end of last year. — The bonds are booked at rates considerably below their present quotations.

## 5. LIABILITIES PAYABLE ON DEMAND.

The liabilities of the Bank of Finland payable on demand during 1936 are dealt with in table 20 which is based on both the weekly and monthly statements.

The liabilities payable on demand may be divided into three main classes according to their nature, viz., notes in circulation, other actual sight liabilities and undrawn balances of cash credits.

**Notes in circulation.** The most important part of the liabilities payable on demand consists of the notes in circulation; in view of their special importance they have been dealt with separately in chapter 1. In this connection it need only be mentioned that the notes in circulation during the year under review represented an average of 63.3 per cent of all the liabilities payable on demand. For the two previous years the corresponding proportion was slightly higher or 68.6 and 70.8 per cent respectively.

**Current accounts.** Next to the notes in circulation the amounts deposited on current accounts generally form the largest item of the liabilities of the Bank of Finland payable on demand. The Bank does not pay any interest on such deposits. Current accounts are divided into two main groups: current accounts due to the Treasury and due to others.

The Treasury's balances on current account varied very greatly according to its cash position at various dates. At the beginning of 1936 there was an amount of 161.7 million marks on this account. In January and February the deposits exceeded the withdrawals, so that the account increased to 339.2 millions. But as the Treasury subsequently required funds for its purposes, the whole amount was gradually withdrawn, so that the account was exhausted in June. At the beginning of July, however, the account grew again to 180.1 millions, but fell off again in October to 4.7 millions until towards the end of the year funds received from the sale of timber and from taxation were deposited to such an extent that at the end of the year the account amounted to 376.5 million marks or 214.8 millions more than at the beginning of the year. The average on this account was 151.6 millions as against 133.2 millions in 1935, but only 84.9 and 66.1 millions in 1934 and 1933, when the State finances were not so favourable as last year.

The amounts deposited on current accounts due to others than the Treasury consist principally of the cash of the Joint Stock banks and were considerable during the year under review. At the end of 1935 the amounts on this account totalled 401.7 million marks. After remaining at this level during the first few months of the year they began to increase in April, though they fluctuated both upwards and downwards. The highest point for the year, 727.9 millions, was reached in the middle of October, after which the withdrawals again exceeded the deposits, so that the balance of

this account on the last day of the year decreased to 571.3 million marks. The amount deposited on this account during the year under review thus increased by 169.6 million marks. The average balance on this account for the year was 571.6 million marks or considerably more than in the preceding years, the corresponding averages for which were 359.9, 322.2 and 240.1 million marks.

**Bank-post-bills.** The actual liabilities payable on demand also include the bank-post-bills issued by the Bank of Finland. The extent of this class of business is shown by the following figures:

	Issued. Mill. mks.	Redeemed. Mill. mks.	Outstanding at end of year. Mill. mks.
1930 .....	1,344.1	1,345.6	12.1
1931 .....	1,097.8	1,094.5	15.4
1932 .....	916.1	904.1	27.4
1933 .....	890.1	910.9	6.6
1934 .....	1,114.0	1,110.8	9.8
1935 .....	1,343.6	1,341.2	12.2
1936 .....	1,814.6	1,803.4	23.4

Business in bank-post-bills advanced considerably, the value of the bills issued exceeding the corresponding value for 1935 by 35.1 per cent. This business also surpassed the level in 1928 and thereby exceeded the level of any previous year. This was, of course, due to the greater liveliness in the turnover of means of payment evoked by the improvement in conditions of trade. On an average bank-post-bills issued by the Bank of Finland were in circulation to a value of 11.3 million marks or considerably more than during the previous years, the corresponding averages for which were 8.4 and 6.9 million marks respectively.

**Bills collected.** Under this heading sums are included in the statements of the Bank of Finland that have come in through the collection of bills and have not yet been accounted for. These bills are almost exclusively foreign bills. Altogether bills were entrusted to the Bank for collection during 1936 to a value of 50.2 million marks or slightly more than in 1935, when they represented a value of 48.9 millions. In comparison with the corresponding amounts for 1934 and 1933, 60.8 and 88.6 million marks, however, this account showed a considerable reduction. The liabilities

of this kind appearing in the weekly statements of the Bank were quite insignificant, on an average only 0.2 million marks.

**Foreign correspondents.** The liabilities payable on demand further include the debts due to correspondents abroad. This indebtedness consists of the credit balances of the Bank's correspondents in Finnish marks. conti loro, on which the Bank pays interest according to agreement. The amount of these liabilities during 1936 was appreciably larger than during the previous years. The account fluctuated between 12.7 and 34.0 million marks and averaged 20.9 millions. The corresponding average for 1935 was 16.0 millions, but for 1934 and 1933, when there was less confidence in the Finnish mark, only 4.2 and 2.7 millions respectively.

**Sundry accounts.** These accounts, also belonging to the liabilities payable on demand, consist principally of advances, i. e., sums set aside for payments that have been received before the due date. At the end of December a new account *»foreign clearing accounts»* which appeared then for the first time in the statements of the Bank of Finland, was added to these accounts in the statistical section. This account, which is dealt with in greater detail in connection with the clearing operations, then showed a foreign debit balance of 68.4 million marks. With the exception of this item the indebtedness on the sundry accounts was very slight and varied with large fluctuations from week to week from 0.3 to 47.2 million marks.

**Undrawn advances on cash credit.** The undrawn amounts on cash credits granted occupy a special position among the Bank's liabilities payable on demand in the sense that they arise, as their designation implies, from the Bank's grants of credit. Like the sums drawn on cash credit that have already been dealt with in connection with the granting of credit, the undrawn amount on cash credit fluctuates appreciably in the course of the year according to the manner in which the clients, who have been granted credit in this form, utilise it at various times. During last year this unutilised credit varied between 100.4 and 66.7 million marks. On an average the sums remaining on cash credit amounted to 82.4 million marks as against 76.2 millions in 1935.

## 6. BALANCE SHEET AND FUNDS OF THE BANK.

**The balance sheet of the Bank at the end of the year.** The balance sheets of the Bank of Finland at the end of 1934—1936 are given in table 24. This table is drawn up on the basis of the results published in the annual reports of the Bank. All the more important items in the balance sheet of the Bank have already been dealt with above with the exception of the Bank's own funds which are treated in detail below.

**Funds of the Bank.** The Bank of Finland's own funds during 1876—1936 appear in table 27.

The Capital of the Bank of Finland underwent no change during the year and remained at 1,000.0 million marks. The Reserve Fund was increased in the manner prescribed by the regulations for the Bank. At the beginning of the year under review half of the profit for 1935, 50.1 million marks, was transferred to it and in addition, according to a special decision of the Diet, 0.1 million marks of undisposed profits. In this way the Reserve Fund increased from 262.1 to 312.3 million marks. Besides, after the books had been closed for last year, half of the net profit for 1936, 50.7 million marks, was transferred to the Reserve Fund, so that it has now increased to 363.0 millions.

Those assets that represent the value of the premises and furniture of the Bank of Finland, were valued in 1936 unchanged at 12 million marks. In addition to the premises in which its head office is situated, the Bank owns a house in Helsinki (Helsingfors) for its staff and premises for branch offices in ten other towns. The booked value of the premises, 12 million marks, only represents a fraction of their actual value.

## 7. EARNINGS AND EXPENSES AND DISPOSAL OF PROFITS.

**Earnings and expenses.** The earnings and expenses of the Bank of Finland during 1929—1936 are seen in table 25 which constitutes a summary of its Profit and Loss accounts published in the annual reports.

The earnings of the Bank of Finland were slightly larger in 1936 than in 1935, but considerably less than in the preceding years. The total earn-

ings amounted to 115.6 million marks as against 113.8 millions in 1935, but 124—170 millions in 1934—1930.

The increase in earnings from 1935 to 1936 was principally due to the earnings in interest on credits having risen from 38.4 to 45.1 million marks in consequence of the increase in such business already referred to. In connection with these earnings the agio income also increased, viz., from 15.0 to 16.9 million marks. On the other hand, other items of income fell off: interest on bonds from 41.0 to 37.4 million marks, interest on the accounts of foreign correspondents from 13.6 to 12.3 millions and commissions from 5.7 to 3.9 millions. The reduction in the interest on bonds was a natural consequence of the conversion of some loans to loans at lower rates of interest and the low rate of interest on new bonds. In the case of foreign correspondents' accounts the reduction in interest was due partly to lower rates of interest and partly to these accounts having been slightly smaller on an average than in 1935.

The changes in the expenditure were slight in comparison with 1935. The actual expenditure amounted altogether to 14.2 million marks as against 13.6 millions in 1935. The increase was caused by the fact that the printing of bank notes involved a cost of 2.6 million marks in consequence of the larger note circulation, whereas this expenditure amounted to barely 2.0 millions in the previous year.

The net profit of the Bank of Finland for 1936 was 101.3 million marks or 1.1 million more than for 1935, but slightly less than for the years before that in general. The changes in the net profits are shown in the following table:

	Net profits. Mill. mks.
1930 .....	130.6
1931 .....	110.7
1932 .....	115.2
1933 .....	112.4
1934 .....	111.4
1935 .....	100.2
1936 .....	101.3

**Disposal of profits.** The disposal of the profits of the Bank of Finland during 1900—1936 are shown in detail in table 26.

It has already been mentioned that half of the profit for the year under review, 50.7 million marks, was transferred to the Reserve Fund of the

Bank in accordance with the regulations. The amount of 50.0 million marks included in the State Budget was transferred to the Treasury to be disposed of for the general purposes of the State. The balance of 0.7 million marks remains for the present on the account of undisposed profits until the Diet comes to a decision as to its employment.

## 8. CLEARING OPERATIONS.

The clearing operations of the Bank of Finland in 1936 and their progress during previous years will be found in tables 28 and 29. The former of these refers to clearing operations at the head office which began on September 1st, 1906, and the latter to similar operations at the branch offices which were started partly in May, 1922, and partly later.

The progress of the clearing operations during the last few years is shown in the following review.

Year.	Bank-Post-Bills.				Cheques.				Total.		
	Number.		Amount.		Number.		Amount.		Number.	Amount. Mill. mks.	
	Quantity.	%	Mill. mks.	%	Quantity.	%	Mill. mks.	%			
1928	1,146,357	67.7	10,237.9	40.8	546,478	32.3	14,844.6	59.2	1,692,835	25,082.5	
1929	1,083,616	64.5	9,680.1	41.9	596,461	35.5	13,410.9	58.1	1,680,077	23,091.0	
1930	1,084,319	61.9	8,294.6	36.6	636,955	38.1	14,341.4	63.4	1,671,274	22,636.0	
1931	923,451	59.9	6,744.9	36.3	617,215	40.1	11,833.1	63.7	1,540,666	18,578.0	
1932	795,393	57.6	5,902.8	34.4	586,048	42.4	11,243.6	65.6	1,381,441	17,146.4	
1933	747,954	53.1	5,508.9	30.6	661,784	46.9	12,498.2	69.4	1,409,738	18,007.1	
1934	685,159	45.5	5,812.5	27.4	819,659	54.5	15,430.9	72.6	1,504,818	21,243.4	
1935	665,685	41.8	6,509.3	27.5	928,020	58.2	17,134.8	72.5	1,593,705	23,644.1	
1936	650,805	38.1	7,250.5	26.6	1,055,790	61.9	19,977.9	73.4	1,706,595	27,228.4	

In consequence of the improvement in trade the increase in clearing business continued last year and the turnover was considerably larger than in the previous years. The total value of cheques and bank-post-bills cleared was 3,584.3 million marks higher than in 1935. The increase thus represented 15 per cent as against 11 per cent during the previous year. Under such circumstances the turnover not only equalled the 1928 level, but even exceeded it and was therefore livelier than in any previous year.

Both cheques and bank-post-bills contributed towards the increased activity in clearing operations. In the case of the former the increase in the

turnover was about 17 per cent, in the case of the latter only 11 per cent. The development that could be noticed in the preceding years, thus continued last year, viz., that the relative importance of bank-post-bills in clearing business decreased continuously. In comparison with 1928 the clearing of cheques increased by 5,133.3 million marks or 35 per cent, while the clearing of bank-post-bills last year was 2,987.4 million marks or 29 per cent less than in 1928. The larger turnover of cheques was due to their number having increased, while their average size last year was only slightly larger than in 1935 and much less than in 1928 and the years immediately after. In regard to the clearing of bank-post-bills the increase last year was, on the contrary, a consequence of the considerable increase in their average size, while their number, as has been the case generally in recent years, fell off. The changes in the average size of cheques and bank-post-bills are seen in the following figures:

	Bank-Post-Bills. Marks.	Cheques. Marks.
1928 .....	8,931	27,164
1929 .....	8,933	22,484
1930 .....	8,019	22,516
1931 .....	7,304	19,172
1932 .....	7,421	19,185
1933 .....	7,365	18,886
1934 .....	8,483	18,826
1935 .....	9,778	18,464
1936 .....	11,141	18,922

Clearing operations are carried on at the head office of the Bank and at the branch offices in Turku (Åbo), Vaasa (Vasa), Oulu (Uleåborg), Viipuri (Viborg), Tampere (Tammerfors) and Jyväskylä. A turnover of 21,958.5 million marks referred to the head office or 80.6 per cent of the total clearing operations. The branch offices had a turnover of altogether 5,269.9 million marks or 19.4 per cent of the total turnover.

---

In addition to its actual clearing business the Bank of Finland has charge of the clearing business that is carried on on the basis of special ordinances regarding payments between Finland and some other countries. Besides the clearing business that was introduced with Germany in 1934, such business was arranged last year for effecting payments between Finland

on the one hand and Bulgaria, Italy, Roumania and Turkey on the other. The clearing business with the last four countries was, however, very small. Not a single payment was made on Bulgaria's account which was only opened in November, nor was any order for payment received from Bulgaria. The turnover with Germany was of incomparably greater importance than the rest.

Last year German importers, who had purchased goods from Finland, paid 701.5 million marks into the German Reichsbank. On the basis of the amounts received by the Bank of Finland, paid in by Finnish importers, who had bought goods from Germany, 808.0 million marks were paid to Finnish exporters. Whereas Finland had a credit balance in Germany of 51.5 million marks at the end of 1935, there was a reversal in 1936 under such conditions, Finland having a debit balance of 55.0 million marks at the end of the year. If all the foreign clearing accounts are taken into consideration, the debit balance at the end of the year amounted to 68.4 million marks, as mentioned on page 39.

---

### III. THE JOINT STOCK BANKS IN 1936.

As the business of the Bank of Finland and the changes occurring in its position are greatly influenced by the general state of the money market, a number of tables, viz., tables 35—38, illustrating the position of the Joint Stock banks and at the same time the state of the money market, are included in this Year Book. The following particulars with regard to the Joint Stock banks are based partly on these tables and partly on other information contained in the official bank statistics which are published in the middle of April by the Bank Inspectorate of Finland.

**Number of Banks and Banking Offices.** Last year was a calm one for all the Joint Stock banks which had already been able to overcome the consequences of the depression.

The number of Joint Stock banks remained unaltered at 9. The total number of banking offices underwent a change during the year under review, 7 new offices being opened and 12 offices being closed. At the end of the year under review there were therefore 481 banking offices transacting business, of which 180 were situated in towns and 301 in the country districts. On an average there was one office to about 7,500 of the population.

**Financial position and Own Funds of the Joint Stock Banks.** If we combine the balance sheets for December 31st, 1936, of the banks that carry on business, we obtain the following table:

<i>Assets</i>	1934 Mill. mks.	1935 Mill. mks.	1936 Mill. mks.
Cash .....	399.3	633.3	851.3
Finnish credit institutions .....	157.3	174.5	155.9
Foreign correspondents .....	483.2	213.8	397.3
Foreign bills .....	135.7	158.5	162.8
Inland bills .....	1,249.6	1,391.3	1,347.4
Loans .....	3,234.9	3,239.4	3,382.8
Cheque accounts .....	2,771.8	2,643.4	2,486.8
Bonds .....	686.7	791.4	1,206.4
Shares .....	205.7	202.5	212.3
Bank premises and shares in bank pre- mises .....	247.4	272.5	259.3
Other real estate .....	17.4	13.3	20.8

Foreign correspondents .....	247.3	190.4	250.7
Bank-post-bills .....	138.2	146.1	200.8
Sundry liabilities .....	454.6	345.8	387.3
Profits .....	95.1	92.0	93.5
Total	9,848.6	10,027.6	10,823.2

The rising tendency is clearly visible, if we regard the balance sheet totals. While the total amount for 1935 exceeded the figure for 1934 by 179.0 million marks or 1.8 per cent, the increase from 1935 to 1936 represented no less than 795.6 millions or 7.9 per cent. The combined balance sheet totals of the Joint Stock banks thus exceeded the corresponding figure for 1932, when the trough of the depression was passed, by 1,313.6 million marks or 13.8 per cent and very nearly reached the corresponding figure for the previous boom in 1928. At that time, however, there were 17 banks as against 9 at present.

The banks' own funds are given in the following table:

	31 Dec. 1935 Mill. mks.	31 Dec. 1936 Mill. mks.	Movement 1936 Mill. mks.
Share capital .....	714.3	714.3	—
Reserve funds .....	479.2	487.1	+ 7.9
Pensions funds .....	56.6	56.8	+ 0.2
Undisposed profits and profit and loss ac- counts .....	129.1	128.2	— 0.9
Total	<u>1,379.2</u>	<u>1,386.4</u>	<u>+ 7.2</u>

It will be seen that the changes in the Joint Stock banks' own funds were slight. The small increases, however, indicate that development is once more moving in the right direction after the considerable depreciation that was necessary during the depression. The amount of undisposed profits includes the net profits for 1936, of which, however, only a small part was transferred to the banks' own funds, the greater part being paid in dividends to shareholders, as mentioned below.

**Home deposits and Home Loans.** The deposit accounts of the Joint Stock banks and the changes in them will be seen from the following table:

	31 Dec. 1935 Mill. mks.	31 Dec. 1936 Mill. mks.	Movement 1936 Mill. mks.
Deposits .....	5,809.6	6,132.3	+ 322.7
Cheque accounts .....	1,339.0	1,541.4	+ 202.4
Finnish credit institutions			
Deposits .....	535.6	643.5	+ 107.9
Cheque accounts .....	282.0	280.8	— 1.2
Total	<u>7,966.2</u>	<u>8,598.0</u>	<u>+ 631.8</u>

The deposits in the Joint Stock banks increased very much last year. The total increase amounted to 631.8 million marks in comparison with 331.4 millions in 1935. Owing to modified statistics there are no fully comparable figures available for previous years, but at any rate it is obvious that the increase is incomparably larger than during the period of depression, when deposits even fell off in some years. The considerable deposits from Finnish credit institutions are explained by the fact that the Savings banks deposit their excess cash to a large extent and part of the cash reserve prescribed by law in the Joint Stock banks, chiefly in their own Central Bank.

The home credits granted by the Joint Stock banks are shown in the following figures:

	31 Dec. 1935 Mill. mks.	31 Dec. 1936 Mill. mks.	Movement 1936 Mill. mks.
Finnish credit institutions .....	174.5	155.9	-- 18.6
Inland bills .....	1,391.3	1,347.4	-- 43.9
Loans .....	3,239.4	3,382.8	+ 143.4
Cheque accounts .....	2,643.4	2,486.8	-- 156.6
Total	<u>7,448.6</u>	<u>7,372.9</u>	<u>-- 75.7</u>

The credits granted by the Joint Stock banks were reduced last year by 75.7 million marks, whereas during the previous year they had increased by 35.0 millions. On the whole the credits of the Joint Stock banks have fallen off ever since 1928. Particular weight attaches to the circumstance that the decrease continued last year, when the economic improvement was so clearly marked. This fact is partly connected with a greater accumulation of capital in the business undertakings themselves, but it is partly due to the improvement in the bond market having provided the larger business concerns with an opportunity of satisfying their credit requirements by means of issuing bond loans. The Joint Stock banks contributed towards this development both by entering syndicates for issuing bonds and by investing considerable funds in bonds. The holdings of bonds by the Joint Stock banks increased last year by 415.0 million marks and attained a record amount of 1,206.4 millions by the end of the year.

Owing to the increase in deposits and the falling off in credits the surplus of the former increased during the year under review from 517.6 to 1,225.1 million marks. If it is considered that only a few years ago the balance sheets of the Joint Stock banks recorded a considerable surplus of credits, this figure gives the best idea, perhaps, of the degree to which the liquidity of the Joint Stock banks has grown and their position in general has improved.

**Cash and Cash reserves.** Under these circumstances no bills were rediscounted. On the contrary, the Joint Stock banks experienced some difficulty in finding suitable investments. In spite of the increase in their holdings of bonds already referred to, the cash of the banks grew very much. Having already increased during the previous year from 399.3 to 633.3 million marks, it rose again to 851.3 millions during 1936.

The unusually great liquidity of the Joint Stock banks is distinctly visible, if we compare the cash and cash reserves with the total liabilities

payable on demand. The former consist of the cash of the banks, funds deposited on current accounts in the Bank of Finland, extraneous bank-post-bills and cheques and the banks' net credit balances in other banks, commercial bills in foreign currency payable abroad, bonds in Finnish currency issued or guaranteed by the State and bonds listed on foreign Stock Exchanges. The liabilities payable on demand include all the indebtedness of the banks payable at sight and the undrawn amounts of credits granted on cheque accounts. According to the Bank Law the cash and cash reserves must amount to not less than 20 per cent of the liabilities payable on demand. Already at the end of 1934 the proportion was 51.9 per cent and thus appreciably higher than the ratio prescribed by law, and this proportion has since improved still further. At the beginning of the year under review the proportion was 54.5 per cent and at end of the year it was no less than 65.3 per cent, i. e., the liquidity of the Joint Stock banks was more than three times as high as prescribed by the Bank Law.

**Position towards foreign countries.** The position of the Joint Stock banks towards foreign countries is illustrated by the following table:

<i>Claims</i>	31 Dec.	31 Dec.	Movement
	1935 Mill. mks.	1936 Mill. mks.	1936 Mill. mks.
Foreign correspondents			
Nostro .....	211.1	394.5	+ 183.4
Loro .....	2.7	2.8	+ 0.1
Foreign bills .....	158.5	162.8	+ 4.3
	<hr/>	<hr/>	<hr/>
Total	372.3	560.1	+ 187.8
<i>Indebtedness</i>			
Foreign correspondents			
Nostro .....	11.7	28.0	+ 16.3
Loro .....	178.7	222.7	+ 44.0
	<hr/>	<hr/>	<hr/>
Total	190.4	250.7	+ 60.3

As these figures indicate, the foreign balances of the Joint Stock banks increased by about 50 per cent or 187.8 million marks. Their indebtedness also increased, though not as much; the increase amounted to 60.3 million marks or barely 32 per cent. By this means the net foreign balances of the Joint Stock banks increased by 127.5 million marks to 309.4 millions. This net amount, as the following table shows, was larger than was usual in general with the sole exception of 1934, when the foreign balances of the banks were uncommonly large.

End of year	Claims Mill. mks.	Indebtedness Mill. mks.	Net claims (+) or indebtedness (-) Mill. mks.
1928 .....	255.6	529.1	- 273.5
1929 .....	233.9	482.4	- 248.5
1930 .....	224.0	358.2	- 134.2
1931 .....	297.9	196.2	+ 101.7
1932 .....	129.8	132.3	- 2.5
1933 .....	327.4	184.1	+ 143.3
1934 .....	619.0	247.3	+ 371.7
1935 .....	372.3	190.4	+ 181.9
1936 .....	560.1	250.7	+ 309.4

**Deposit and credit rates.** The deposit rates of the Joint Stock banks are directly dependent on the decisions come to by the joint delegation of the financial institutions, while credit rates follow the former more indirectly. At the end of 1934 this delegation decided to lower the rate on 6 months' deposits by  $\frac{1}{4}$  per cent to  $3\frac{3}{4}$  per cent and the rate on cheque accounts by  $\frac{1}{2}$  per cent to  $1\frac{1}{2}$  per cent, these rates having been in force since January 1st, 1935. On July 1st, 1936, all the Joint Stock banks except one lowered the rate on sight accounts to 1 per cent. At the end of the year this reduction became general by the decision of the delegation. At the same time the rate on 6 months' deposits was reduced to  $3\frac{1}{2}$  per cent. These decisions came into force on January 1st, 1937.

The division of the deposits made by the public in the Joint Stock banks at the end of 1934, 1935 and 1936 according to the rates of interest will be seen in the following table:

	1934 Mill. mks.	1935 Mill. mks.	1936 Mill. mks.
Below $1\frac{1}{2}$ per cent .....	17.7	20.4	1,385.6
$1\frac{1}{2}$ — $1\frac{3}{4}$ per cent .....	0.6	1,142.1	154.7
2 » » .....	892.3	151.2	4.4
$2\frac{1}{4}$ — $3\frac{1}{2}$ » » .....	367.8	80.0	23.3
$3\frac{3}{4}$ » » .....	0.1	5,691.8	6,034.3
4 » » .....	5,461.1	2.6	4.4
Above 4 » » .....	169.0	60.5	67.0

The corresponding division of credit rates is as follows:

	1934 Mill. mks.	1935 Mill. mks.	1936 Mill. mks.
Below $4\frac{1}{4}$ per cent .....	560.8	631.9	607.7
$4\frac{1}{4}$ —5 » » .....	616.6	697.3	515.3
$5\frac{1}{4}$ —6 » » .....	482.2	808.1	1,185.7
$6\frac{1}{4}$ —7 » » .....	1,384.5	3,133.6	3,595.8
$7\frac{1}{4}$ —8 » » .....	3,462.8	1,996.3	1,312.3
Above 8 » » .....	749.4	6.9	0.1

These tables give a good idea of the downward movement of all rates of interest. On an average the Joint Stock banks paid a rate of 3.21 per cent on their deposits at the end of 1936 in comparison with 3.34 per cent a year before and 3.68 two years earlier. The average rates on credits were 6.24, 6.35, and 6.82 per cent respectively.

**The year's results.** The annual results of the Joint Stock banks are given in the following table that shows their income and expenditure in 1934, 1935 and 1936:

<i>Income</i>	1934 Mill. mks.	1935 Mill. mks.	1936 Mill. mks.
Interest .....	195.4	170.6	156.3
Income on bonds and shares .....	44.1	58.3	60.8
Agio .....	22.8	22.3	26.0
Recovered on claims previously written off	4.0	2.7	4.9
Income from bank premises .....	12.1	12.3	10.5
Sundry earnings .....	18.8	22.5	24.4
Total	297.2	288.7	282.9
<i>Expenditure</i>			
Expenses .....	160.8	160.6	161.0
Amounts written off .....	39.9	32.0	24.4
Transferred to pensions funds .....	1.9	1.4	1.0
Losses of mortgage departments .....	3.2	2.7	3.0
Net profits .....	91.4	92.0	93.5
Total	297.2	288.7	282.9

In consequence of the falling rates of interest and the reduction of credits the Joint Stock banks had an appreciably smaller income from the margin between interest received and paid than in previous years. On the other hand the income from interest on bonds, agio and other earnings increased slightly. As a final result the income of the Joint Stock banks was 5.8 million marks less than for 1935. In regard to expenditure the change was largest in the case of amounts written off, which were reduced from 32.0 to 24.4 million marks. This decrease is a sign that the losses of the period of depression had already been written off. As other income remained almost unchanged, the combined net profits of the Joint Stock banks increased from 92.0 to 93.5 million marks. All the banks earned a profit last year.

For the sake of comparison we give the following figures that show the net results of the banks' business in recent years:

	Net profits (+) or net losses (-) Mill. mks.
1928 .....	+ 206.9
1929 .....	+ 202.7
1930 .....	+ 153.2
1931 .....	— 73.9
1932 .....	+ 76.0
1933 .....	+ 0.8
1934 .....	+ 91.4
1935 .....	+ 92.0
1936 .....	+ 93.5

In addition to the annual profits the share-holders' meetings of the Joint Stock banks had 34.7 million marks at their disposal that had been carried over on the profit and loss account from the previous year. The distribution of these funds, i. e., altogether 128.2 million marks, is shown in the following table in comparison with the corresponding figures for 1935 and 1934.

	1934 Mill. mks.	1935 Mill. mks.	1936 Mill. mks.
Distributed to shareholders .....	85.0	86.0	85.0
Transferred to reserve funds .....	2.5	8.0	3.1
Additional amounts written off .....	3.8	0.1	[0.05]
Various public purposes .....	0.2	0.8	0.3
Left on profit and loss account .....	37.1	34.7	39.8

The majority of the banks paid the same dividend to their shareholders as for 1935. Only two small banks raised their dividend by  $\frac{1}{2}$  per cent and one bank lowered its dividend by 1 per cent. The division of the banks according to the size of the dividend paid was as follows:

Dividend	Number of banks						
	1930	1931	1932	1933	1934	1935	1936
No dividend .....	5	1	4	2	1	—	—
3—5 $\frac{1}{2}$ % .....	—	1	—	2	2	3	3
6—7 $\frac{1}{2}$ » .....	1	—	6	3	3	3	3
8—9 $\frac{1}{2}$ » .....	1	6	—	—	1	1	1
10—11 » .....	5	2	—	—	—	—	—
12—13 » .....	2	—	—	—	—	—	—
14—15 » .....	1	—	1	1	1	1	1
16—17 » .....	—	1	1	1	1	1	1
18—19 » .....	2	1	—	—	—	—	—
