

BANK OF FINLAND

1927

YEAR BOOK

COMPILED BY THE

STATISTICAL DEPARTMENT OF THE BANK OF FINLAND

VOLUME VIII

HELSINKI — HELSINGFORS 1928

HELSINKI — HELSINGFORS 1928.
GOVERNMENT PRINTING OFFICE

The eighth annual issue of the Year Book of the Bank of Finland is now submitted to the public. It is compiled on the same plan as previous issues. In the letterpress, as before, the economic position in Finland during last year is dealt with, as well as the business of the Bank of Finland and its results. As in previous issues of the Year Book the most important series of figures illustrating the business of the Joint Stock banks have again been included in the present tables. In the letterpress it appeared as superfluous as last year to deal with the business of the Joint Stock banks. Only in the English edition has such a review been retained.

The Year Book has been compiled in the Statistical Department of the Bank of Finland, the undersigned head of the Department being principally responsible for its contents. As in former years the Year Book is published in Finnish, Swedish and English.

A. E. TUDEER, Ph. D.
Head of the Statistical Department.

Bank of Finland, Helsinki (Helsingfors),
March 29th, 1928.

I. REVIEW OF THE ECONOMIC POSITION IN FINLAND IN 1927.

The economic position in Finland during 1927 developed, generally, under favourable circumstances. The harvest was satisfactory, industry worked at high pressure, building operations were very lively and foreign trade was larger than in any previous year. The accumulation of capital was very great, and although the demand for credit grew considerably, the state of the money market became comparatively easier, rates of interest going down another step towards a more normal level. — Some of these points are dealt with at greater length in the following pages.

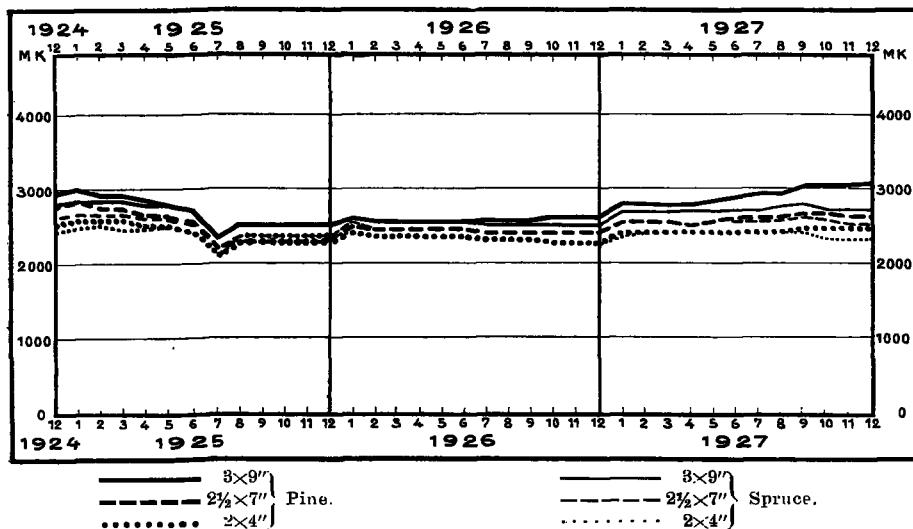

Economic Policy of the Government. No great change occurred in the general economic policy of the Government during 1927. The fact that the Social-Democratic party formed a Government towards the end of 1926, tended to cause a certain amount of uneasiness in business circles and some schemes were, indeed, proposed that might, undoubtedly, have caused some difficulty in certain spheres of economic life, had they been carried out. However, the changes that were actually made were, in their principal features, in accordance with the previous economic policy of the Government.

The preparatory work for the new, fixed Customs tariff that had been going on for a long time, has not yet led to any definite result. In spite of this the Diet made some important changes for 1928 in the rates of duty which had been in force during the last few years. It was decided, for instance, to reduce the import duty on such important articles of consumption as wheaten flour, sugar and coffee.

During the year trade agreements were concluded with Czechoslovakia, Switzerland, Austria and Sweden. These agreements are based on the same principles as the agreements made earlier with various other countries.

Trade and Industry. The beginning of the growing season proved favourable for agriculture, but in consequence of rain during the latter

MOVEMENT OF PRICES FOR SAWN WOODGOODS¹⁾ 1925–1927.
MARKS PER STD.

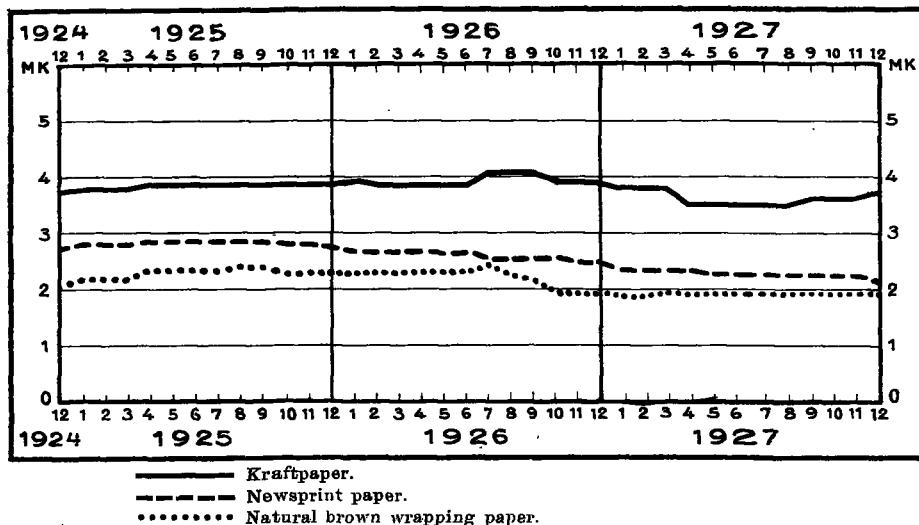

part of the summer and the autumn the harvest did not turn out, either in quantity or quality, as good as in the two preceding years. Nevertheless, the harvest for 1927 was in general satisfactory. The crops of the most important plants cultivated, compared with the figures for the preceding years, were as follows according to preliminary information (in tons):

	Rye.	Barley.	Oats.	Potatoes.	Hay.
1923	239,200	84,800	381,800	462,300	2,124,900
1924	286,000	130,000	492,200	634,100	2,400,100
1925	347,600	140,800	586,600	723,100	2,445,700
1926	302,500	156,100	592,700	851,000	2,353,900
1927	291,200	121,400	538,700	624,500	2,338,400

Production in cattle farming showed a rising tendency during the year. Exports of fresh meat were, indeed, considerably reduced in comparison with the year before, but exports of cheese and hides advanced slightly and butter exports rose 14.1 % to 15,077 tons, i. e. to a larger quantity than in any previous year with the exception of the record year 1905. After a great drop in prices in the spring the price of butter rose towards the end of the year to a higher level than during the year before and the price of cheese, which had at that time fallen very low, improved almost without interruption.

¹⁾ The curves indicate the selling prices for timber exported during the different years.

MOVEMENT OF PRICES FOR PAPER 1925-1927.
MARKS PER KG.

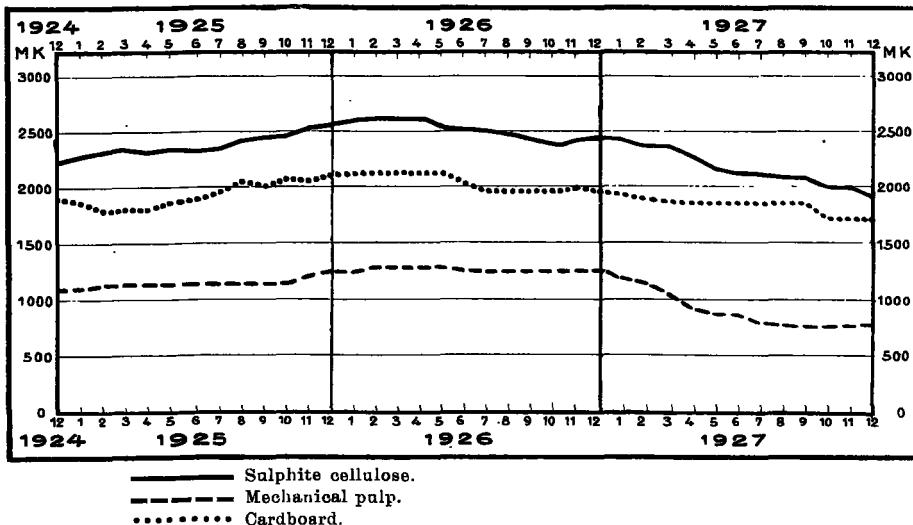

The timber market opened in 1927 under very good auspices. Before New Year about 660,000 standards, an unusually large quantity, had been sold. Although the desire to buy was not very great during the first half of the year, the market remained firm and prices rose gradually. Altogether exports of sawn goods amounted to 1,283,100 standards or more than shipments from Finland during any previous year. Such a large quantity of sawn goods has not been exported from any other country of late years. Sales for shipment during 1928 did not prove as lively as in the previous year, but the level of prices was higher and the quantity sold, about 360,000 standards, was quite satisfactory.

Exports of round timber increased very much, owing chiefly to shipments of props being doubled, while on the other hand pulpwood was exported to almost the same extent as in the previous year.

The plywood market was generally unfavourable during the year. Stocks abroad were large and prices fell. By the end of the year, however, there were signs of increased activity, so that in some quarters an improvement in the position is expected. Exports of plywood reached a fresh highest point in spite of the bad market: the quantity exported amounted to 57,202 tons or fully 13 % more than the highest figure for the previous year.

MOVEMENT OF PRICES FOR WOODPULP AND CARDBOARD 1925-1927.
MARKS PER 1,000 KG.

The tendency of the paper market was unfavourable last year, obviously a consequence of production having grown more rapidly than consumption. Other disturbing circumstances may be found in the unsettled conditions in China, the formation of trusts by the British press and the increased duties on all kinds of wrapping paper in France. Sales of Finnish paper proceeded normally, but at constantly falling prices. Improvements were made in several mills and at Nokia a new papermaking machine was started. Paper exports amounted in all to 223,466 tons, thus establishing a fresh maximum in this branch, too.

In regard to the trade in cellulose last year proved a difficult one in many respects. Competition was keener than ever and prices dropped considerably, while on the contrary the price of raw material advanced. Activity in the cellulose industry was, nevertheless, lively; four new mills with a total productive capacity of approximately 80,000 tons were started and the output was larger than it had ever been. Exports, amounting to 363,572 tons, exceeded the record of the previous year by almost 10 %.

There was a very heavy fall in prices in the market for mechanical woodpulp occasioned partly by the appreciably greater production and partly by the fact there were considerable stocks in England after the coal strike. In Finland four new mills were started, in addition to which fresh building and extensions were undertaken at some of the older mills.

Exports of mechanical woodpulp were raised from 72,915 tons in 1926 to 102,185 tons in 1927.

Exports of cardboard, which had already been reduced considerably in the previous year, fell off further from 42,220 to 38,289 tons. The market was dull early in the year, but towards autumn buying became livelier. Prices were not as unsatisfactory as in the other exporting trades referred to above.

Those branches of industry, the production of which is chiefly intended for the home market, worked in general with satisfactory results. Although competition with foreign countries was sharper in some respects than before, various trades were able to show increased sales. The conditions were severest in the case of the metal trade in which regular work was interrupted for about 7 months by a labour dispute that proved difficult to settle. For the sweetstuffs and soap industries last year has also been described as a bad one.

Conditions on the *labour market* were good. There was no unemployment worth mentioning and even the customary seasonal unemployment during the winter was less marked than during the preceding years. It may be considered a consequence of the economic boom that the labour peace did not fulfil expectations. Already towards the end of the winter an interruption of work was threatened in the paper trade, but was fortunately avoided, however, several strikes started in the metal trade led to a general lockout in this trade in May. It was only at the end of December that, after many attempts, an agreement was arrived at.

Foreign trade. Finland's trade with foreign countries was larger in 1927 than in any previous year. Its value was fully 12 % higher than in the year before, when a highest point on record was also attained, and the increase in the »volume» of trade was 15 %. The advance in the last few years is shown by the following figures:

	Imports. Mill. mks.	Exports. Mill. mks.	Surplus of imports (-) or exports (+). Mill. mks.	Volume in % (1913=100), Imports.	Exports.
1923	4,600.3	4,392.5	— 207.8	101.5	94.8
1924	4,715.5	4,970.6	+ 255.1	99.3	112.7
1925	5,519.5	5,573.5	+ 54.0	105.9	123.9
1926	5,667.7	5,636.5	— 31.2	116.3	127.5
1927	6,367.6	6,322.6	— 45.0	136.0	143.1

Both imports and exports provided new record figures as regards both value and quantity. The net result of foreign trade was a surplus

of imports amounting to 45.0 million marks. Taking into consideration that the value of imports and the value of exports are calculated on different bases, the former being reckoned c. i. f., while the latter are calculated f. o. b., such a result must be looked upon as quite satisfactory.

The share of the different branches of trade in the exports and their influence on the changes in the total exports is illustrated by the following figures:

	Exports in 1926.		Exports in 1927.		Increase (+) or decrease (-).	
	Mill. mks.	%	Mill. mks.	%	Mill. mks.	%
Timber industry	3,165	56.4	3,721	59.2	+ 556	+ 17.6
Paper industry	1,629	29.0	1,678	26.7	+ 49	+ 3.0
Agriculture	674	12.0	734	11.7	+ 60	+ 8.9
Other branches	146	2.6	152	2.4	+ 6	+ 4.1
Total	5,614	100.0	6,285	100.0	+ 671	+ 11.9

It will be seen that all these branches of trade increased their exports, though the timber trade increased them much more than the others. It should also be noted that agricultural exports, although they increased during 1927, were not as large as in 1925, whereas the export figures for 1927 in the other branches represent a fresh maximum in every case. The rise in the quantity of products of the paper trade exported was considerably greater than the increase mentioned above in the value of exports; the difference is accounted for by the fall in prices for these goods.

The distribution of imports according to their purpose will be seen in the following table.

Imports divided according to purpose.

Year.	Articles of consumption.				Articles for productive purposes.			
	Foodstuffs and luxuries.		Finished products of industry.		Raw materials and semiproducts.		Means of transport, machinery etc.	
	Mill. mks.	%	Mill. mks.	%	Mill. mks.	%	Mill. mks.	%

Value and ratio of total imports.

1923.....	1,474.3	32.0	1,087.5	23.6	1,460.5	31.8	578.0	12.6
1924.....	1,666.2	35.3	936.8	19.9	1,529.2	32.4	583.3	12.4
1925.....	2,061.9	37.3	998.3	18.1	1,759.2	31.9	700.1	12.7
1926.....	1,477.1	26.1	1,260.3	22.3	2,016.3	35.6	905.9	16.0
1927.....	1,538.2	24.1	1,482.4	23.3	2,163.1	33.9	1,183.9	18.6

Value according to prices in 1913 and quantity index, if 1911—1913=100.

1911—1913.....	187.2	100	88.3	100	150.7	100	43.8	100
1923.....	153.1	82	131.7	149	157.7	105	79.4	181
1924.....	166.9	89	104.0	118	160.1	106	76.5	175
1925.....	185.8	99	107.6	122	169.6	113	80.7	184
1926.....	139.6	75	143.1	162	207.0	137	104.0	237
1927.....	143.5	77	177.7	201	234.4	156	134.7	308

In all four classes of goods the imports increased during 1927. It should, however, be noted that imports of foodstuffs and luxuries were still, even in absolute figures, considerably less than during 1924 and 1925 and also less than during the last few years before the war. On the other hand imports in the other classes of goods were heavier in 1927 than in any previous year. In particular the imports of goods for productive purposes were strikingly large.

A special calculation as to the extent to which goods were included among the imports which should be looked upon as capital investment (machinery, means of transport, metals, bricks, cement, furniture, works of art etc., of an estimated period of use of at least 10 years) gives as a result a value of 1,813 million marks. Of all imports, therefore, about 28.5 % were composed of such goods representing investment of capital. As imports of such goods in 1926 amounted to 1,439 million marks, in 1925 to 1,048 millions and in 1924 to 986 millions, equivalent to 25.4 %, 19.0 % and 20.9 % of imports respectively, it is obvious to what a great extent the increase in imports is a consequence of the growth that has taken place within the last few years in the productive mechanism of the country.

The movement of prices in 1927 was favourable, as in the previous year, seeing that prices of imported goods fell, while the price index for exported goods remained unaltered.

The value of imports and exports and the difference between them for each month was as follows (in million marks):

Month.	Imports.	Exports.	Surplus of imports (-) or exports (+).
January	393.3	255.2	— 138.1
February	364.7	236.8	— 127.9
March	452.9	237.2	— 215.7
April	466.0	267.3	— 198.7
May	605.8	411.0	— 194.8
June	600.4	670.4	+ 70.0
July	516.8	930.6	+ 413.8
August	574.4	874.8	+ 300.4
September	621.9	827.0	+ 205.1
October	608.8	675.3	+ 66.5
November	617.3	549.6	— 67.7
December	545.3	387.4	— 157.9
Total	6,367.6	6,322.6	— 45.0

The Money Market. The state of the money market was determined mainly by two mutually opposed factors. The activity to be observed in

the economic sphere, of which the above description has attempted to give an idea, naturally led to a large demand for credit and consequently to a tendency towards greater stringency on the market. At the same time the flow of savings into the financial institutions was strikingly great and more plentiful than in any previous year. As a result, the money market, on which a certain relaxation had already set in during the previous December, experienced a considerably easier tone throughout the year.

The monthly fluctuations of the money market are shown in the following table, which also illustrates how much more favourable conditions were in 1927 than in past years.

The money market during 1923—1927 in million marks.

End of	Deposits in the Joint Stock banks.			Difference between credits and deposits.	Bank of Finland's			note reserve.
	Deposit and savings accounts.	Current accounts and home corresp.	Total.		Credits of the Joint Stock banks.	direct credits.	re-discounts.

December	5,286.7	1,694.9	6,981.6	8,117.8	1,136.2	755.0	55.2	696.9

The actual deposits by the public (deposit and saving accounts) were increased during the year by about 638 million marks or 33 % more than during 1926 which was already a record year. Current accounts and home

correspondents also showed a greater increase than during the previous year, viz., 242 million marks as compared with 156 millions in 1926. As the banks raised their capital, besides, by approximately 320 million marks, they were able without difficulty to satisfy the greater demand for credit. The home credits of the Joint Stock banks grew altogether by 1,028 million marks, i. e. less than the increase referred to in the means at their disposal would have allowed of. In addition the Bank of Finland increased its direct credits by 188 million marks; the corresponding increase in 1926 was only 114 million marks. Finally, the savings that came in plentifully to other financial institutions were also at the disposal of the business world. The growth of depositors' balances during the last few years was as follows (in million marks), if the figures for 1927 are partly estimated:

	1924	1925	1926	1927
In the Savings banks	217.8	279.3	424.3	594.9
In the Post Office Savings bank	20.0	15.2	22.2	14.0
On the Consumers' Co-operative Societies'				
Savings accounts	42.8	53.9	59.1	90.6
In the Co-operative Credit Societies and their				
Central Bank	6.5	17.1	53.8	92.0
Total	287.1	365.5	558.9	791.5

The establishment of the Municipal Mortgage Bank was of advantage for the money market in two respects. The fact that a financial institution had come into being for making loans on house property in towns, meant the remedying of a defect that had been felt to a marked degree in our organisation of credit. At the same time the loan of 2 million pounds sterling which was taken up by that bank for its business was calculated directly to relieve the state of the money market. This loan was obtained on more favourable terms than the long-term loans taken up in the preceding years, which indicates that confidence in the business life of this country has grown abroad step by step. This loan was, indeed, the only foreign long-term loan received in Finland in the course of the year. Short-term credit was, however, resorted to to some extent; exporters' foreign credits against bank guarantee, however, remained practically unchanged as regards the amount, though the terms continued to improve. — On the other hand, the Government redeemed its foreign indebtedness, in accordance with the estimates of ordinary expenditure, to the extent of about 275 million

marks and paid in addition the last instalment of the so-called Gutzeit loan, amounting to 65 million marks, and purchased bonds abroad to an amount of approximately 28 million marks. This redemption, to a total amount of about 368 million marks, was, indeed, carried out chiefly with the help of funds that had been set aside for the purpose at the beginning of the year out of the loan taken up during the previous autumn. If, however, the redemption of foreign loans other than Government loans, estimated at not less than 50 million marks, and the increase in the net foreign balances of all the banks, altogether about 272 million marks, are considered, it can, nevertheless, be maintained that fresh money came into the country to a relatively limited degree.

The easing of the money market was in any case so pronounced that the Bank of Finland lowered its bank rate on three occasions. The rates charged by the Bank were the following:

	At the beginning of the year.	From March 22.	From August 10.	From November 24.
For purely commercial bills at not more than three months' date	7 $\frac{1}{2}$ %	7 %	6 $\frac{1}{2}$ %	6 %
For the same kind of bills at longer date	8 »	7 $\frac{1}{2}$ »	7 »	6 $\frac{1}{2}$ »
For other bills	8 $\frac{1}{2}$ »	8 »	7 $\frac{1}{2}$ »	7 »
For mortgage loans and advances on cash credit on security according to the guarantee	7 $\frac{1}{2}$ —8 $\frac{1}{2}$ »	7—7 $\frac{1}{2}$ »	7—7 $\frac{1}{2}$ »	6 $\frac{1}{2}$ —7 »
Opening commission on cash credits	$\frac{1}{2}$ »	$\frac{1}{2}$ »	$\frac{1}{2}$ »	$\frac{1}{2}$ »

The general level of rates of interest also fell to some extent during the year, although not as rapidly as the rates of interest in the Bank of Finland. At the end of the year the rates mentioned below were the most usual. The two largest banks charged rates of 7 $\frac{1}{2}$ —10 $\frac{1}{4}$ % on their credits, while the other banks charged from 8 $\frac{1}{2}$ —12 %. On deposits the former paid 5 $\frac{1}{4}$ —6 $\frac{1}{4}$ % and on current account 5 %, the other banks 5 $\frac{1}{2}$ —7 % and 5—5 $\frac{3}{4}$ % respectively. On credits in the Savings banks the rates varied between 8 $\frac{1}{2}$ % and 10 % and on deposits they paid rates of 7—8 %. The Post Office Savings bank employed a rate of 6 $\frac{1}{2}$ %, but was left behind in the competition for deposits. — At the end of the year some rates on deposits were reduced again and rates on credits are gradually following suit.

The investment of fresh capital in limited liability companies during 1927 and the preceding years is shown in the following statistics compiled by the Central Statistical Office.

	New companies.		All companies.			
	Number.	Capital. Mill. mks.	Number.	Increase.	Capital. Mill. mks.	Increase. Mill. mks.
1923	580	200.5	7,175	+ 412	4,631.7	+ 185.7
1924	564	323.6	7,611	+ 436	4,876.3	+ 244.6
1925	593	171.3	8,070	+ 459	5,117.6	+ 241.3
1926	583	226.0	8,510	+ 440	5,462.4	+ 344.8
1927	709	292.5	9,080	+ 570	6,486.1	+ 1,023.7

In judging the figures for last year it should be noted that various industrial concerns distributed bonus shares, the Diet having passed a bill for reducing the stamp tax on issues of shares made for the sake of readjusting the value of assets. The fresh capital is consequently less than shown by the figures with regard to the increase in the total capital. However, a factor that is independent of this circumstance, the establishment of new companies, nevertheless bears witness to the activity in the economic sphere.

Business on the Helsingfors Stock Exchange amounted to 784.4 million marks and was therefore more than twice as large as during the previous year and more than five times as lively as in 1925. The general tendency of prices was a distinctly upward one

The number of protested bills during the first few months of the year was considerably larger, but fell off later, so that during the latter half of the year it was as a rule less than during the year before. The total number of bills protested during the year was 7,578 as against 7,269 in the previous year. The amount remained almost unchanged.

The number of bankruptcies was also slightly larger than in the previous year, but less than in 1924 and 1925.

Further proof might easily be adduced of the activity and quiet progress in the economic sphere, but the particulars given above and other facts referred to in other connections should give a good idea of the characteristics of the past year.

Government Finance. The State revenue and expenditure during 1925—1927 were as follows (in million marks); the figures for 1927 are preliminary ones, the final figures not yet being available.

<i>Revenue.</i>	1925	1926	1927
Ordinary revenue	3,316.2	3,424.0	3,860
Extraordinary revenue	1.6	2.2	63
Revenue not included in Budget	12.6	8.4	—
Total	3,330.4	3,434.6	3,923
Loans	352.6	535.4	—
Utilised out of cash reserve of previous years	269.5	106.7	37
Grand total	3,952.5	4,076.7	3,960
<i>Expenditure.</i>			
Ordinary expenditure	2,829.4	2,999.5	3,310
Extraordinary expenditure	1,122.4	1,076.7	650
Expenditure not included in Budget	0.7	0.5	—
Grand total	3,952.5	4,076.7	3,960

Although the ordinary expenditure of the Government was again increased in 1927 by over 300 million marks or 10 % in comparison to the previous year, the result of Government finance for that year was better than for the two preceding years. On the one hand the extraordinary expenditure was reduced, and on the other the revenue amounted to considerably more than had been estimated in the budget. The result appears even better, if it is taken into consideration that a considerable part of the expenditure referred to objects calculated to increase the property of the State and raise its revenue in the future. At an estimate, 340 million marks were employed for productive purposes. Besides, altogether about 373 million marks were paid in redemption of the National Debt — partly, it is true, by using funds from the previous year obtained by loans not included in the budget.

The National Debt was reduced in 1927 to an appreciable degree. At the end of 1926 the booked value of the National Debt was 2,846.8 million marks, of which 2,349.9 millions were foreign indebtedness and 496.9 millions internal. Of the latter only an insignificant sum was paid off, but of the former, on the contrary, all the more, as, for instance, one-fifth of the so-called 1921 Scandinavian loan was paid off in accordance with the original loan agreement and the remaining portion of the Gutzeit loan was redeemed. At the end of 1927 the booked value of the National

Debt consequently amounted to 2,695.0 million marks or 151.8 million marks less than at the beginning of the year. Of this amount 491.9 million marks were internal and 2,203.1 millions foreign indebtedness, but it should be noted that part of the latter is in actual fact also invested in this country. As was pointed out in the last Year Books, these figures are only quite accurate in regard to the internal portion of the National Debt. The foreign loans are entered in the books in Finland, as is customary elsewhere, in the country's own currency at the rate of exchange current at the time the loan was taken up, loans negotiated before the war, consequently, almost at the par rate of exchange. In order to determine more exactly the amount of the National Debt, the Treasury has calculated every month, what sum in marks would have been necessary at each date in order to pay off the whole National Debt at current rates of exchange. According to this calculation the Finnish National Debt at the beginning of 1927 amounted to 4,067 million marks and at the end of the year to 3,629 million marks or 438 millions less. This considerable reduction, of course, was due in part to fortuitous circumstances and is not likely to occur in the next few years.

The National Debt of Finland is entirely funded and both absolutely and per head of population considerably smaller than the Debt of the other northern countries.

Foreign currency. The maintenance of the gold parity that was introduced at the end of 1925, caused no difficulty during the past year. As general economic conditions in Finland were favourable and the balance of payments satisfactory, foreign currency was available in sufficient quantity. The dollar was quoted throughout the year constantly at 39: 70 (par value 39: 7056). The quotations for foreign currency of other countries with a gold standard were sometimes above and sometimes below the par value, but the fluctuations were not on a single occasion as great as 1 %. The daily fluctuations will be found in table 26.

The fluctuations in the *internal purchasing power* of the mark are illustrated by the changes in the level of prices. The movements of the price index figures from month to month are shown in the following table; the index figures show the level of prices in comparison to gold.

	Wholesale price index.	Increase (+) or decrease (-).	Cost of living index.	Increase (+) or decrease (-).
1926.				
December	144	—	156	—
1927.				
January	144	—	155	— 1
February	144	—	155	—
March	143	— 1	154	— 1
April	143	—	153	— 1
May	142	— 1	152	— 1
June	144	+ 2	155	+ 3
July	144	—	157	+ 2
August	147	+ 3	161	+ 4
September	148	+ 1	161	—
October	148	—	161	—
November	149	+ 1	163	+ 2
December	148	— 1	162	— 1

The changes are partly due to seasonal fluctuations, but nevertheless clearly indicate a rising tendency. This is seen, too, if a comparison is made between the average price index figures for 1927 and the corresponding averages for the preceding years.

Average.	Wholesale price index.	Cost of living index.
1924	144	153
1925	147	158
1926	142	154
1927	145	158

To judge by these figures the level of prices appears to vary from year to year, though in such a manner that the fluctuations keep within very narrow limits. While the level of prices dropped in 1926, it rose again last year approximately to the same level as before.

II. THE BANK OF FINLAND IN 1927.

I. THE NOTE ISSUE.

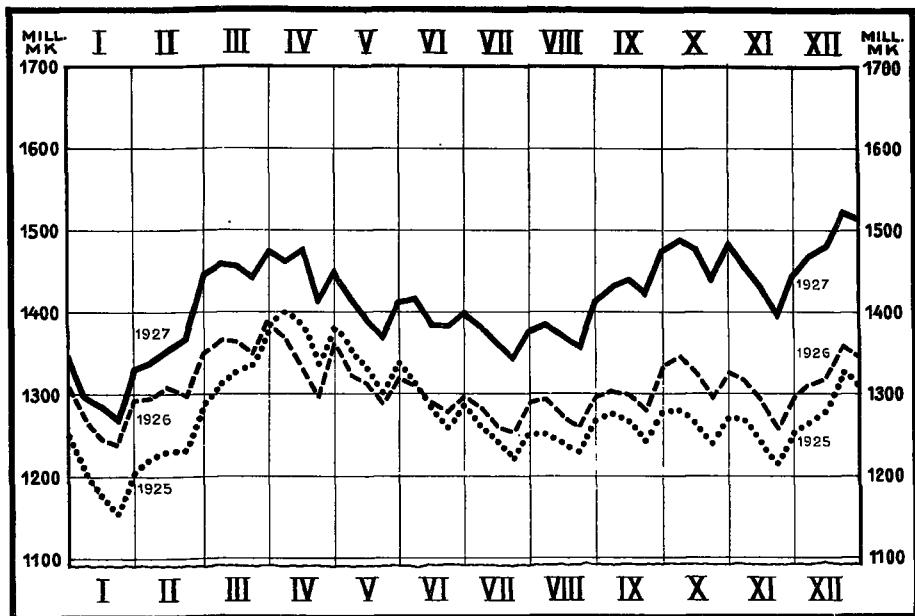

The note issue of the Bank of Finland is illustrated in tables 1—10 in the statistical part of this book. Of these, table 1 refers solely to 1927, whereas in the others a review is given partially for previous years, too. The tables are based on both the weekly and monthly balance sheets of the Bank, excepting table 2 which is based exclusively on the monthly returns. With regard to the latter table it should be borne in mind that the note issue is generally larger towards the end of a month than at other times.

The Right of Issue. According to the law of December 21st, 1925, the Bank of Finland's right of issue is equivalent to the amount of its gold reserve and its undisputed foreign balances plus 1,200 million marks, though with the proviso that such part of the note circulation and liabilities payable on demand as is not covered by gold or foreign balances, is covered by assets included in the so-called supplementary cover.¹⁾ This includes foreign bills, foreign bonds quoted on foreign Stock Exchanges, interest coupons in foreign currency which have fallen due for payment and foreign bank notes and inland bills subject to certain conditions.

In accordance with these regulations a distinction is made in the reviews of the Bank's balance sheets between two kinds of right of note issue, the one immediately available and the other dependent on increased supplementary cover. In view of the fact that the supplementary cover,

¹⁾ See the Bank of Finland Year Book for 1925 in which the regulations for the Bank are published.

BANK OF FINLAND NOTES IN CIRCULATION IN 1925–1927.

for instance in discounting bills, is immediately increased, the latter kind of right of note issue is, however, in reality also available.

The right of note issue in 1927 was, on an average, 2,647.1 million marks or a slightly higher amount than in 1926, when the corresponding average was 2,582.9 million marks.

The Note Circulation. At the beginning of 1927 the amount of notes in circulation was about 36 million marks larger than a year earlier. During the following weeks the difference grew larger, so that by the end of February it already amounted to approximately 100 million marks. After remaining at this level for some months the difference began to increase again in August. By the end of the year the amount of notes in circulation had therefore grown to such an extent that it was nearly 170 million marks larger than at the end of the previous year. It should be noted particularly that the amount of notes in circulation had never before been so large during the months of September-December as during last year. In this connection it should, however, be remarked that, if the increase in population

is taken into account and the fact that the present small notes have taken the place of the silver coins formerly in circulation, the notes in circulation are not quite as great in regard to purchasing power as during the last years before the Great War. — The fluctuations in the note circulation of recent years are seen in the following figures (in million marks):

	Notes in circulation.		
	Highest.	Lowest.	Average.
1923	1,555.1	1,298.1	1,409.8
1924	1,399.6	1,198.6	1,292.9
1925	1,399.9	1,154.8	1,276.6
1926	1,385.8	1,239.6	1,307.3
1927	1,522.1	1,269.6	1,413.6

The note circulation was consequently on an average 106.3 million marks larger in 1927 than during the previous year. The changes in the note circulation are illustrated in the diagram on page 16. The seasonal fluctuations, it will be noticed, were very regular, although the considerable increase in the note circulation during the latter half of the year in proportion to the movement in the preceding years forms an exception.

The Constitution of the Note Circulation. The constitution of the note circulation, as illustrated in table 8, has been almost unchanged for the last few years, although the quantity of notes has increased. The increase has principally affected the larger notes, besides which the new 20 mark notes reduced the use of 10 mark notes last year.

As regards the number of notes the following quantities of the different denominations were in circulation at the end of 1923—1927, disregarding older issues, among which in 1923 and 1924 all types of notes issued prior to 1909, and in 1925—1927 all types except those of the 1922 issue were classed.

	N u m b e r .				
	1923	1924	1925	1926	1927
1,000 marks	404,168	362,347	361,139	380,267	443,324
500 »	430,964	378,432	413,438	446,425	532,528
100 »	5,013,081	4,828,349	4,735,797	4,869,850	5,311,114
50 »	2,225,407	2,009,196	2,047,300	2,031,367	2,161,054
20 »	613,461	227,806	—	79,329	2,313,663
10 »	6,252,930	6,567,824	7,137,598	7,354,951	4,776,311
5 »	5,158,900	5,415,000	5,082,499	5,301,299	5,340,007
Total	20,098,911	19,788,954	19,777,771	20,463,488	20,878,001

Gold coins were struck, as prescribed in the currency law of 1925, but such coins are not in general circulation.

Nickel coins were in circulation at the end of 1922—1927 in the following quantities (marks):

	1 mark.	50 penni.	25 penni.	Total, marks.
1922	16,333,473: —	4,870,432: 50	2,047,480: 75	23,251,386: 25
1923	17,687,094: —	4,801,661: 50	3,745,783: —	26,234,538: 50
1924	17,951,151: —	5,211,036: —	4,261,588: 25	27,423,775: 25
1925	19,335,661: —	5,607,138: —	4,732,736: —	29,675,535: —
1926	20,828,895: —	6,191,649: —	5,216,748: 75	32,237,292: 75
1927	23,093,954: —	6,879,413: —	5,828,330: —	35,801,697: —

Production and Destruction of Notes. During 1927 a larger number of notes was printed at the note printing works than during the preceding years. The number of notes printed was 16,797,000, their value representing 976,880,000 marks. The notes withdrawn from circulation and destroyed amounted in number to 14,392,800 to a value of 622,784,500 marks.

The Note Reserve. The difference between the right of note issue and the total liabilities payable on demand (which are referred to in table 1 under the heading »Used Right of Issue») indicates the amount of the unused right of issue of the Bank of Finland or the note reserve. In that table the note reserve, both conditional and unconditional, is included.

Calculated according to the method last mentioned, the note reserve in 1927 averaged 763.5 million marks or 29.5 million marks more than in the previous year. The lowest amount of 661.9 million marks on October 31st considerably exceeded the corresponding amount in 1926 of 625.3 million marks. The highest amount was also rather higher than in the previous year, but the fluctuations only amounted to 166.4 million marks as compared with 184.2 million marks during the year before. In proportion to the right of note issue as a whole the note reserve constituted, on an average, 28.94 % as compared with 28.44 % for the previous year and varied from 32.16 % to 23.27 %.

2. COVER FOR THE NOTE ISSUE.

The Bank of Finland's cover for the note issue is shown in tables 11—15. These tables are based on weekly, as well as monthly balance sheets, with the exception of table 15 in which only the cover for the note issue at the end of 1926 and 1927 is dealt with, as it was taken at the closing of the books.

A. The Ordinary Cover.

The ordinary cover, i. e. the sum of the gold reserve and balances with foreign correspondents, averaged 1,447.1 million marks in 1927 and exceeded the corresponding average for the year before by 64.2 million marks. As usual, it varied considerably, the highest point being 1,715.1 and the lowest 1,162.5 million marks.

The Gold Reserve. The gold reserve fell off, as it had done the year before, to some extent. At the end of 1926 it amounted to 327.4 million marks, and at the same date in 1927 to 316.6 millions. The reduction was thus 10.8 million marks or 3.28 % of the value of the gold reserve at the beginning of the year. The gold taken from the Bank was used for technical purposes; it was not required at all for payments abroad.

The gold reserve represented, on an average, 22.88 % of the notes in circulation; this being a lower percentage than in the previous year owing to the growth of the note circulation. The variations were within comparatively narrow limits, viz., between 25.72 % and 20.81 %. If the gold reserve is compared with all liabilities payable on demand, the proportion is 17.54 % and the variations are between 20.05 % and 14.78 %.

Balances with Foreign Correspondents. At the end of 1926 the Bank of Finland's reserve of foreign currency amounted to 1,082.4 million marks, including a foreign credit of 114.6 million marks which had not to be employed once during the year. After a slight reduction up to the middle of February the reserve of foreign currency grew during the second half of February and during March. Then there followed the customary great falling off up to July 15th, when the lowest point was reached at 839.5 million marks. Apart from some small setbacks the reserve of foreign currency increased regularly thereafter and attained its highest point for the year, 1,396.8 million marks, on November 23rd. At the end of the year it amounted to 1,359.8 million marks or 277.4 million marks more than at the beginning of the year. On an average the reserve of foreign currency, excluding the foreign credit, was 1,009.6 million marks or appreciably more than in the previous year, when the corresponding average was 926.4 million marks.

B. The Supplementary Cover.

It has been mentioned before, on page 15, what kinds of assets may be included in the supplementary cover in accordance with the new regulations for the Bank of Finland. Of these the Bank had no foreign bonds quoted on foreign Stock Exchanges at all in its possession. The changes in the other assets belonging to the supplementary cover are shown in table 11.

Inland Bills. The largest of the items forming the supplementary cover is composed of inland bills. These are referred to later in connection with other home loans. It need only be mentioned here that they averaged 90.5 % of the supplementary cover.

Foreign Bills. In comparison with the foregoing the foreign bills were of very little importance as a factor in the supplementary cover; they represented, on an average, only 9.3 % of the latter. During 1927 foreign bills were discounted altogether to a value of 315.0 million marks or considerably less than during the year before, when the corresponding amount was 453.2 million marks. The amount in the portfolio of the Bank varied between 33.4 and 112.7 million marks and averaged 61.6 million marks as against 82.3 million marks in 1926.

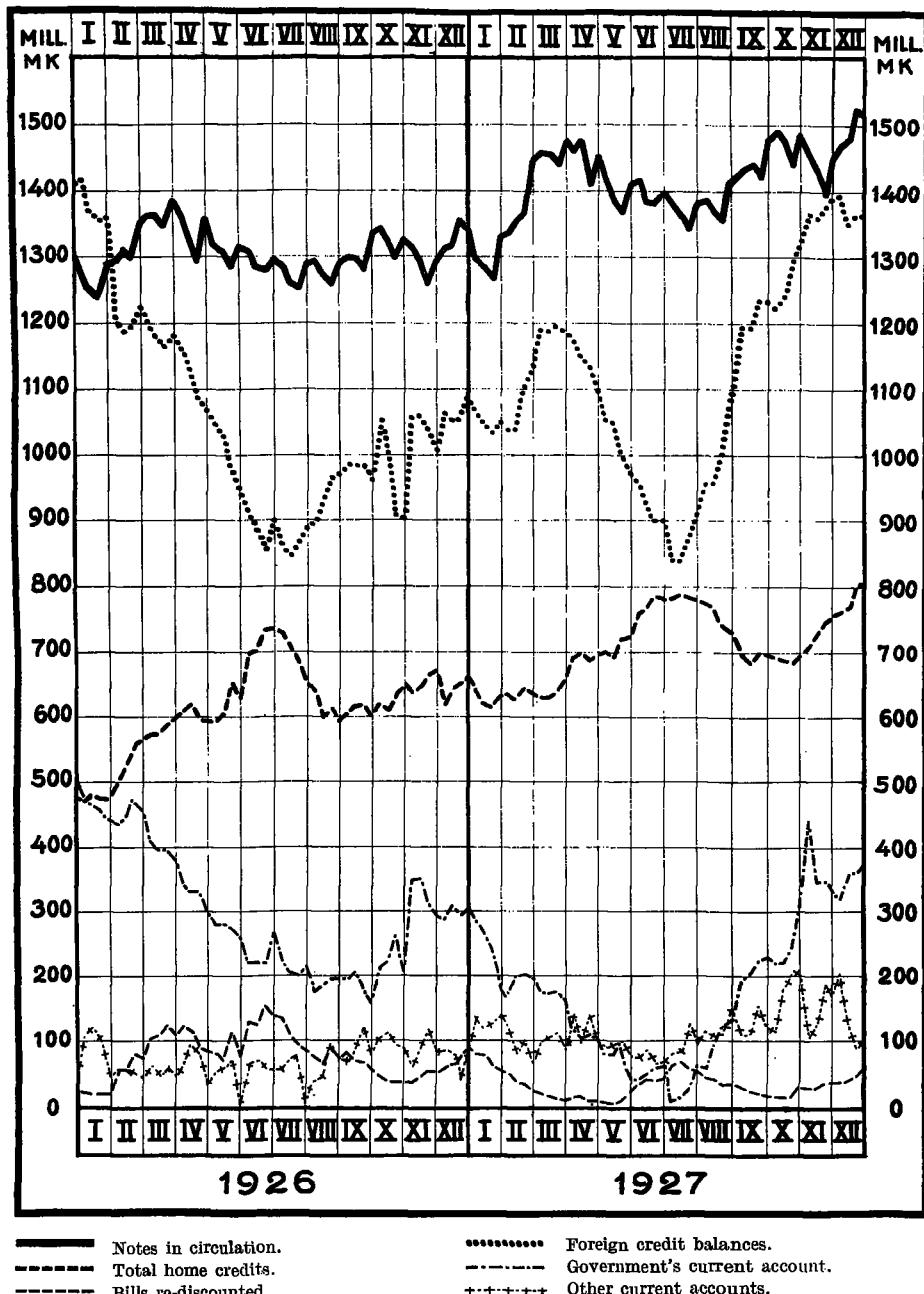

Foreign Notes and Coupons. The foreign notes and coupons held by the Bank are of no practical importance as supplementary cover. At the end of the year the Bank had them at its disposal to a value of only 1.4 million marks.

3. HOME LOANS.

The home loans of the Bank of Finland to the public and the Joint Stock banks for each week during 1927 are shown in table 17 and the loans at the end of each month during 1920—1927 in table 18.

Credits to the Banks. The credits granted to the banks took the form of re-discounts exclusively and were very insignificant throughout the year, as they only averaged 4.6 % of the Bank's actual credits. At the

THE PRINCIPAL ACCOUNTS OF THE BANK OF FINLAND IN 1926-1927.

beginning of the year there were re-discounts to an amount of 87.0 million marks, but this sum was reduced rapidly up to the beginning of May, when re-discounts only amounted to 4.5 million marks. Subsequently their value rose up to the middle of July and fell again up to the third week in October, only to rise again, as usual, towards the end of the year. During the whole year, however, the amount of re-discounts did not reach its level at the beginning of the year. At the end of the year they amounted to 55.2 million marks or 31.8 million marks less than at the beginning of the year. On an average the re-discounts amounted to 32.5 million marks. As the corresponding average for 1926 was 78.0 million marks, for 1925 125.5 millions and for 1924 373.6 millions, it is obvious that the progress indicates the constant improvement of the position.

Credits granted to the Public. As in the preceding years the Bank of Finland extended its direct credits to the public considerably during 1927, i. e. to industrial and commercial undertakings. Loans on security increased from 23.1 million marks at the end of the previous year, though after a slight drop, to 59.1 million marks at the end of 1927. Advances on cash credit also showed an upward tendency; apart from a few fluctuations their amount grew from 92.7 million marks at the beginning of the year to 111.1 millions at the end. Credits in their most important form, the discounting of bills, also increased. At the beginning of 1927 there were discounted inland bills in the portfolio of the Bank of Finland to a value of 451.5 million marks. This amount rose subsequently and reached its highest point, 631.1 million marks, on June 23rd, after which it was gradually reduced to 550.2 million marks at the end of October to rise again until the last balance sheet for the year in which the amount of bills appeared as 584.8 million marks. On an average the Bank had inland bills to a value of 566.3 million marks in its portfolio in 1927, whereas the corresponding amount for the previous year was only 461.6 million marks.

Direct credits as a whole amounted in 1927, on an average, to 676.4 million marks and varied between 547.6 and 755.0 million marks. For the previous year the corresponding average was only 538.2 million marks; the increase in credits was thus 138.2 million marks. — Of direct credits at the end of the year 77.5 % had been granted by discounting bills, 14.7 % in the form of advances on cash credit and 7.8 % in the form of loans on security.

4. BONDS.

The bonds held by the Bank of Finland, including the Government's short-term liabilities, are shown in table 17.

Government Short-Term Liabilities. The Bank of Finland's claims against the Government included in the balance sheets under this heading are made up of a compensation which the Government undertook to repay to the Bank by 1928 for certain Russian securities now rendered worthless. At the beginning of 1927 this amount was 24 million marks and of this 12 million marks were repaid during the year in accordance with the decision of the Diet passed on March 2nd, 1923. — No interest is paid by the Government on these amounts.

Finnish Government Bonds in Finnish Currency. At the beginning of 1927 the Bank of Finland held Government bonds in Finnish currency to a value of 112.0 million marks. No great changes occurred in the amount of these bonds in the course of the year; at the end of the year there were such bonds in the possession of the Bank to a value of 109.5 million marks. The greater part of such Government bonds is composed of bonds belonging to the loan taken up in 1919 for strengthening the position of the Bank of Finland and are to be redeemed during 1928 according to the decision of the Diet.

Other Bonds in Finnish Currency. The Bank of Finland holds a small number of bonds issued by Finnish municipalities and financial and industrial undertakings. Towards the end of 1927 the Bank participated in the issue of an internal debenture loan of Lojo Kalkverk Ab. As such bonds were bought and sold in the market, considerable changes took place during the year in the portfolio. On an average, the Bank of Finland held bonds of this nature to a booked value of 18.8 million marks.

Bonds in Foreign Currency. At the beginning of 1927 the Bank of Finland had in its possession bonds in foreign currency to a value of 232.5 million marks. During the year the Bank purchased such bonds, particularly bonds belonging to the so-called 1921 Scandinavian loan, so that the value of the stock was increased to 329.1 million marks, but later on it sold a

large part of these to the Government. At the end of the year, after depreciating these bonds, the Bank had them in its portfolio to a booked value of 256.2 million marks. The greater part of these bonds belongs to the 1923 and 1926 Government loans.

5. LIABILITIES PAYABLE ON DEMAND.

The liabilities of the Bank of Finland payable on demand during 1927 are dealt with in table 16 which is based on both the weekly and monthly balance sheets. In this connection the remark should be repeated that the total of these liabilities does not correspond exactly to the total used right of issue given in table 1, as the former amount does not include the undrawn amounts of advances on cash credit which figure only in the calculations respecting the right of note issue.

Notes in circulation. Owing to their special importance the notes in circulation have been dealt with separately in chapter 1 to which the reader is referred.

Bank-Post-Bills in Circulation. Bank-post-bills issued by the Bank of Finland are put into circulation either by the Bank's own or by the public's remittances of money in this form. Such bills are sold by the Bank without commission. During the last five years the Bank of Finland issued and redeemed bank-post-bills to the following amounts (in million marks):

	Issued.	Redeemed.	In circulation at end of year.
1923	525.8	524.2	7.6
1924	800.6	799.5	8.1
1925	1,031.1	1,031.1	8.1
1926	1,164.4	1,157.0	15.4
1927	1,515.4	1,512.4	18.5

According to these figures business in bank-post-bills has become livelier year by year and in 1927 it was increased to a particularly great extent. The total amount of bank-post-bills in circulation varied in the course of the year between 8.1 and 25.7 million marks and averaged 13.8 million marks, representing an increase of about 50 % in comparison with the previous year.

Current Accounts. Next to the notes in circulation the amounts deposited on current account usually form the largest item of the Bank of Finland's liabilities payable on demand. On such sums the Bank does not pay any interest.

The Government's balances on current account were 303.4 million marks at the beginning of the year, but were quickly reduced and reached their lowest point at the beginning of July, 8.0 million marks. In the autumn there was a sharp rise with the highest point for the year at 436.4 million marks at the beginning of November. At the end of the year the amount on this account was 371.3 million marks or 67.9 million marks more than at the beginning of the year. The average for the year was 179.2 million marks or about 120 million marks less than in 1926, when the corresponding figure was unusually high.

The amounts deposited on current account with others than the Government, which consist principally of the cash of the Joint Stock banks, varied between 62.4 and 206.9 million marks and averaged 114.6 million marks. In consequence of the easing of the money market this average was appreciably higher than in the preceding year, when the corresponding figure was 70.9 million marks.

Bills Collected. Under this heading sums are included in the balance sheets of the Bank of Finland which have come in through the collection of bills and which have not yet been accounted for. The bills entrusted to the Bank for collection were almost exclusively received from abroad. The equivalent of the bills collected in Finnish currency was a little larger in 1927 than during the year before, viz., 79.1 million marks. The liabilities of this nature included in the balance sheets were, however, quite insignificant, averaging only 0.5 million marks in 1927.

Foreign correspondents. One of the largest items among the liabilities payable on demand is made up of debts due to correspondents abroad. This debt consists of the credit balances of the Bank's correspondents in Finnish marks (conti lori) on which the Bank pays interest according to agreement. The amount of these varied in 1927 between 2.5 and 13.1 million marks and averaged 4.1 million marks or a little less than in the previous year.

Foreign Credit. The foreign credit taken up by the Bank of Finland for strengthening its reserve of foreign currency, which has already been referred to, is included in the balance sheet as a liability payable on demand in order not to increase the Bank's right of note issue.

Sundry Accounts. In these accounts, also belonging to the liabilities payable on demand, advances are chiefly entered, i. e. funds set aside for payments which have been received before the due date. Such liabilities fluctuated between 7.5 and 48.4 million marks and averaged 16.2 million marks.

6. BALANCE SHEET AND RESOURCES OF THE BANK.

The Balance Sheet of the Bank at the end of the Year. The balance sheets of the Bank of Finland at the end of 1926 and 1927 are given in table 20. This table is drawn up in accordance with the results published in the Bank's annual reports, but with the difference that among »Other assets» some minor items have been combined.

All the more important items in the Bank's balance sheet have already been dealt with above excepting the Bank's own resources, which are treated in detail below.

Resources of the Bank. The Bank of Finland's own funds during 1871—1927 appear in table 21.

The capital of the Bank of Finland was raised at the end of 1925 to the amount of 500 million marks which the new regulations stipulate. The reserve fund amounted at that time only to 50.7 million marks. By the transfer of the net profit for 1925 and 1926 in accordance with the regulations wholly to the reserve fund the latter grew to such an extent that at the beginning of 1927 it amounted to 240.5 million marks. The profit for last year, amounting to 116.7 million marks, will also be transferred wholly to the reserve fund according to the regulations.

Those assets which represent the value of the premises and furniture of the Bank, amounted to 12 million marks in 1927 without change. In addition to the premises on which its head office is situated, the Bank owns a house in Helsingfors for the staff and premises for branch offices in 10 other towns. The booked value of the premises, 12 million marks, is only a fraction of their actual value.

7. EARNINGS AND EXPENSES AND DISPOSAL OF PROFIT.

Earnings and expenses. The earnings and expenses of the Bank of Finland during 1921—1927 are seen in table 22 which constitutes a summary of its Profit and Loss accounts published in the annual reports.

The earnings of the Bank of Finland amounted to 144.0 million marks altogether in 1927. The increase in comparison with the previous year was consequently very slight. The earnings of interest on the internal credits were 5.4 million marks more than in 1926 in consequence of extended business, irrespective of the fact that the rates of interest had dropped. The corresponding earnings on foreign investments were reduced, on the other hand, by 4.7 million marks; the fall in the rates of interest abroad therefore exerted a greater influence than the increase in the amounts invested. There was a slight rise in the earnings of interest on bonds.

The actual expenditure amounted in all to 13.4 million marks or 0.7 million marks more than in the previous year. The amount written off, however, 14.0 million marks, was considerably less than in 1926.

The net profit of the Bank of Finland was thus 116.7 million marks. The progress made in this respect during the last few years is shown in the following figures.

	Net profit. Mill. mks.
1924	65.4
1925	82.7
1926	107.1
1927	116.7

The regular increase of the net profit is evidence of the continued consolidation of the position of the Bank of Finland and of the healthy progress of economic life.

Appropriation of Profit. As already pointed out, the profit for 1926 was transferred at the beginning of 1927 to the reserve fund of the Bank. In like manner, according to the regulations for the Bank, the profit for 1927 was transferred at the beginning of this year to the reserve fund. The latter, therefore, amounted in the first balance sheet for 1928 to 357.1 million marks.

8. CLEARING OPERATIONS.

The clearing operations of the Bank of Finland in 1927 and their progress during previous years will be found in tables 24 and 25. Of these the former refers to clearing operations at the head office which began on September 1st, 1906, and the latter to similar operations at the branch offices which were started partly in May, 1922, and partly later.

The progress of clearing operations at the head office during the last few years is shown in the following review.

Year.	Bank-Post-Bills.				Cheques.				Total.		
	Number.		Amount.		Number.		Amount.		Number.	Amount.	Mill. mks.
	Quant.	%	Mill. mks.	%	Quant.	%	Mill. mks.	%			
1923.....	546,406	80.5	4,583.8	31.9	132,142	19.5	8,555.1	65.1	678,548	13,188.9	
1924.....	556,950	78.6	4,800.3	40.2	151,528	21.4	7,128.0	59.8	708,478	11,928.3	
1925.....	607,559	76.8	5,034.9	41.6	184,014	23.2	7,103.0	58.5	791,573	12,137.9	
1926.....	676,242	73.0	5,909.7	44.7	250,400	27.0	7,305.0	55.3	926,642	13,214.7	
1927.....	686,885	70.3	6,723.2	39.2	290,219	29.7	10,410.3	60.8	977,104	17,133.5	

The clearing operations which increased regularly with few exceptions, grew in 1927 by 29.7 % as compared with the previous year. The number and amount of both bank-post-bills and cheques went up considerably, though in such a way that the use of cheques, as shown by the proportionate figures, showed an appreciably greater increase.

Cheques are, on an average, much larger than bank-post-bills. It should be mentioned, by the way, that the average size of the former, after a considerable reduction during recent years, grew again in 1927. The average size of bank-post-bills, too, grew in 1927 in comparison with the preceding years. This movement is shown in the following figures:

	Bank-post-bills. Marks.	Cheques. Marks.
1923	8,389	64,742
1924	8,619	47,041
1925	8,287	38,600
1926	8,739	29,173
1927	9,788	35,871

Of the branch offices only the offices in Turku (Åbo), Vaasa (Vasa), Oulu (Uleåborg), Viipuri (Viborg) and Tampere (Tammerfors) carry on clearing business. This grew from 4,341.4 million marks in 1926 to 5,023.3 million marks in 1927. The increase was therefore 15.7 % or considerably

less than the corresponding increase at the head office. Of the total amount of clearing business, 22,156.8 million marks, 22.6 % fell to the share of the branch offices in 1927.

Finally it should be stated that both bank-post-bills and cheques were, on an average, considerably smaller in the clearing operations at the branch offices than at the head office and that the importance of bank-post-bills in comparison to that of cheques was greater at the branch offices than at the head office.

III. THE JOINT STOCK BANKS IN 1927.

As the business of the Bank of Finland and the changes occurring in its position are greatly influenced by the general state of the money market, a number of tables illustrating the position of the Joint Stock banks (tables 31—34) and at the same time the state of the money market, are included in this Year Book. The following particulars with regard to the Joint Stock banks are based partly on these tables and partly on other information contained in the official statistics concerning the Joint Stock banks. These statistics are published in the middle of May by the Bank Inspectorate of Finland.

Number of Banks and Size of their Turnover. The number of banks in existence was nominally the same in 1927 as in the preceding years, viz., 19. However, Södra Finlands Bank Ab. was acquired by Ab. Unionbanken and from New Year this amalgamation of banks was fully completed, so that the former bank has disappeared entirely as a separate financial institution. The Joint Stock banks had altogether 555¹⁾ offices and agencies. This represents an increase in the course of 1927 of no less than 42. Of these, 211 are situated in towns and 344 in the country. A large number of these offices and agencies is, however, comparatively unimportant.

In addition to the Joint Stock banks banking business is transacted by the offices of the Bank of Finland, 15 in number, one being an agency.²⁾ The total number of banking offices at the end of 1927 was consequently 570, so that to each office there was an average of about 6,300 inhabitants. It should also be mentioned that a large number of Savings banks and Co-operative Credit Societies also carries on a fairly manysided banking business. At the end of the year their number amounted to 471 and 1,398 respectively.

¹⁾ According to the Bank statistics.

²⁾ As the information given concerns the year 1927, the second agency of the Bank of Finland which was opened at the beginning of 1928 is not taken into consideration here.

The majority of the banks is comparatively small, as will be seen in the table appended to this article regarding the various banks' own funds and balance sheet totals. Only two of the banks have a total turnover in excess of 150,000 million marks. These are the Kansallis-Osake-Pankki and Ab. Nordiska Föreningsbanken. The grouping of the banks according to size is given in the following list which shows their division according to the extent of their total turnover.

Extent of turnover.	Number of banks.
Over 150,000 mill. mks.	2
30,000—50,000 » »	2
10,000—30,000 » »	4
5,000—10,000 » »	3
1,000—5,000 » »	7
Under 1,000 » »	1

If the banks are divided according to the totals of their balance sheets, the following table is arrived at.

Balance Sheet total.	Number of banks.	Balance Sheet total. Mill. mks.	%
Over 2,500 mill. mks.	2	5,204.7	54.6
500—1,000 » »	2	1,406.7	14.7
200—500 » »	6	2,033.2	21.3
100—200 » »	4	571.9	6.0
Under 100 » »	5	325.3	3.4

When taking a glance at the corresponding division a year ago, it will be noticed that the three last groups have increased more than the two first ones. The reason for this may be found, at any rate to a great extent, in the fact that the former — according to an agreement between the banks — pay a higher rate of interest on deposits than the latter.

Financial Position of the Joint Stock Banks. The combined balance sheets of the Joint Stock banks, at the end of the years 1924—1927, give the following position.

	<i>Assets.</i>			
	1924 Mill. mks.	1925 Mill. mks.	1926 Mill. mks.	1927 Mill. mks.
Cash	212.7	291.1	301.8	370.7
Foreign correspondents	102.3	126.0	195.9	241.8
Foreign bills	26.8	14.9	75.0	124.8
Inland bills	2,034.4	1,928.2	2,245.7	2,576.8
Loans	1,975.0	1,894.1	1,964.5	2,251.1
Cash credits	874.2	932.6	1,071.9	1,229.2

	1924 Mill. mks.	1925 Mill. mks.	1926 Mill. mks.	1927 Mill. mks.
Home correspondents	1,886.8	1,751.7	1,808.3	2,060.7
Bonds	139.7	124.6	126.5	152.4
Shares	138.3	131.5	125.0	151.5
Deposit certificates of other banks....	15.1	11.2	10.2	12.5
Interest accrued	61.4	62.5	67.8	75.0
Bank premises	102.7	116.3	155.2	165.4
Furniture	4.2	4.7	5.4	5.0
Sundry assets	83.9	89.4	93.9	124.9
Total	7,657.5	7,478.8	8,247.1	9,541.8

Liabilities.

Share capital	752.0	756.0	795.0	923.0
Reserve funds	286.5	307.1	330.6	456.7
Other funds	161.6	178.6	213.1	317.1
Deposits	3,273.2	3,684.4	4,111.5	4,677.9
Deposits on savings accounts	422.8	484.0	537.0	608.7
Current accounts	643.3	625.4	705.6	784.0
Bank-post-bills	169.9	192.3	176.4	215.1
Foreign correspondents	451.5	334.5	321.0	359.4
Home correspondents	1,062.6	671.0	747.2	910.9
Rediscounted bills	152.0	25.7	86.6	55.4
Sundry liabilities	282.1	219.8	222.2	233.6
Total	7,657.5	7,478.8	8,247.1	9,541.8

The most important items in the above balance sheets will be dealt with in the following.

Own Funds. As banking business was widely extended, it was natural that a large number of banks should have taken advantage of the comparatively easy tone of the money market to issue new shares. Altogether 12 of the banks took steps to issue new shares, one of them doing so twice. In addition, two banks passed resolutions at the beginning of this year to increase their capital. Of last year's issues of shares seven were completed, while in the other cases only a portion — in one case not even that — of the new capital was paid up. As a rule the new shares were issued at a price exceeding their nominal value and the difference was carried to the reserve fund. All the new issues of shares will thus raise the capital of the Joint Stock banks by 327 million marks and supply the reserve funds with an addition of over 150 millions. Further, the majority of the banks has,

according to custom, transferred a larger or smaller amount out of profits to the reserve funds. As such transfers only occur in connection with the annual meetings of shareholders and the latter are usually held in February or March, these changes first appear in the bank returns for the latter month. In accordance with previous reviews we therefore give a table of the banks' funds at the date last mentioned and the changes from the end of March to the end of the following March.

	Movement.				
	^{31/3} 1927 Mill. mks.	^{31/3} 1928 Mill. mks.	1925 Mill. mks.	1926 Mill. mks.	1927 Mill. mks.
Share capital	815.0	969.0	+ 1.0	+ 59.0	+ 154.0
Reserve funds	375.7	506.4	+ 23.4	+ 45.1	+ 130.7
New Issue accounts	5.2	113.3	+ 2.4	+ 2.0	+ 108.1
Total	1,195.9	1,588.7	+ 26.8	+ 106.1	+ 392.8

The above table shows very clearly, what a great increase there was last year in the banks' own funds in comparison with the preceding years. In this connection it should be mentioned that, as Södra Finlands Bank Ab. has given up business, its capital and reserves have also disappeared from the Bank statistics. In spite of this reduction the funds of the banks increased by 32.8 %, whereas the increase in 1926 and 1925 only amounted to 9.7 % and 2.5 % respectively. If the results of all the new issues of shares decided on are included, the capital of the banks will be found to have risen about 40 % calculated from the end of March, 1927.

Owing to these increases in the Joint Stock banks' own funds their position has been considerably strengthened. At the end of March, 1927, their own funds represented 18.5 % of the total internal deposits, but a year later the corresponding figure had risen to 21.2 %.

In addition to the actual reserve funds already dealt with the banks possess by no means inconsiderable funds set aside for special purposes, but to be reckoned actually as their own funds. At the end of March, 1928, the banks had unemployed profits to an amount of 28.6 million marks. To these must be added the pension funds to a value of 42.9 million marks. These funds, too, have grown considerably, as is pointed out later, in the course of the last year.

Home deposits. The home deposits of the Joint Stock banks (which include a comparatively insignificant amount of long-term deposits in Finnish marks by foreign depositors) amounted at the end of 1925—1927 to the following figures.

	Movement.					
	1925 Mill. mks.	1926 Mill. mks.	1927 Mill. mks.	1925 Mill. mks.	1926 Mill. mks.	1927 Mill. mks.
Current accounts.....	625.4	705.6	784.0	— 17.9	+ 80.2	+ 78.4
Home correspondents ..	671.0	747.2	910.9	— 391.5	+ 76.2	+ 163.7
Deposits	3,684.4	4,111.5	4,677.9	+ 411.2	+ 427.1	+ 566.4
Savings accounts.....	484.0	537.0	608.7	+ 61.2	+ 53.0	+ 71.7
Total	5,464.8	6,101.3	6,981.5	+ 63.0	+ 636.5	+ 880.2

Deposits in the banks increased very greatly in 1926 and that was the first year since the war, when conditions in this respect were normal. It will be seen from the table given above that the growth of deposits was appreciably larger last year. The total increase in 1927 was 14.4 % as compared with 11.6 % during the previous year.

All four deposit accounts show a remarkably large increase, the increase being a little less than the year before only in the case of current accounts. The two last accounts are of special interest, representing as they do the actual long-term deposits of the public, while the two former, particularly home correspondents, include more temporary elements, for instance, borrowed means deposited on account. In the case of the two actual deposit accounts together the increase was as follows:

	Mill. mks.	%
1923	336.8	10.8
1924	245.5	7.1
1925	472.4	12.8
1926	480.1	11.5
1927	638.1	13.7

The growth of deposits consequently shows a generally rising set of figures. During 1927 the growth was not only absolutely, but also relatively greater than during any previous year. The result must be regarded as quite satisfactory, when it is considered that it has been achieved in competition with the Savings banks, the Co-operative Credit Societies and the Savings accounts of Consumers' Co-operative Societies which mostly pay a higher rate of interest on deposits than the Joint Stock banks. These

financial institutions, however, have succeeded to an even greater extent than the Joint Stock banks in increasing their deposits, so that the share of the latter has been relatively slightly reduced.

Home loans. The home loans of the Joint Stock banks at the end of the years 1925—1927 are illustrated in the following table.

	Movement.					
	1925 Mill.mks.	1926 Mill.mks.	1927 Mill.mks.	1925 Mill.mks.	1926 Mill.mks.	1927 Mill.mks.
Inland bills.....	1,928.2	2,245.7	2,576.8	— 106.2	+ 317.5	+ 331.1
Loans	1,894.1	1,964.5	2,251.1	— 80.9	+ 70.4	+ 286.6
Cash credits.....	982.7	1,072.0	1,229.2	+ 58.5	+ 139.3	+ 157.2
Home correspondents	1,751.7	1,808.3	2,060.7	— 135.1	+ 56.6	+ 252.4
Total	6,506.7	7,090.5	8,117.8	— 263.7	+ 583.8	+ 1,027.3

Credits in all their different forms increased very greatly in 1927, altogether by 14.5 % as compared with only 9.0 % in 1926, which also showed a lively demand for credit.

The increase in credits was larger than the growth of the deposit accounts of the banks. The difference between credits and deposits, which amounted to 989.2 million marks at the end of 1926, had risen by the end of December, 1927, to 1,136.3 million marks or by 147.1 millions. As the banks had, as already pointed out, increased their own funds in the course of the year by a considerably larger amount than this, their position was in reality easier at the end of last year than a year earlier. This is confirmed, too, by the improvement that set in in the position of the banks towards foreign countries to which we shall come immediately. If further proof were wanted for this opinion, it need merely be observed that the cash at the end of 1927 was in no small degree larger than a year before and that the banks resorted to the help of the Bank of Finland to an extremely small extent. Re-discounts, that were 87.0 million marks at the end of December, 1926, kept below this figure throughout the whole year and were only 55.2 million marks at the end of last year.

Position towards Foreign Countries. The foreign indebtedness and credit balances of the Joint Stock banks, the net indebtedness and the recent movements in the latter during past years are best seen from the following table.

End of year.	Credit balances. Indebtedness.		Net balances (+) or indebtedness (-)	Movement in net indebtedness.
	Mill. mks.	Mill. mks.		Mill. mks.
1917	57.9	75.6	— 17.7	+ 18.3
1918	60.6	158.7	— 98.1	+ 80.4
1919	108.9	561.3	— 452.4	+ 354.3
1920	54.6	795.9	— 741.3	+ 288.9
1921	86.8	994.6	— 907.8	+ 166.5
1922	72.3	971.8	— 899.5	— 8.3
1923	92.1	810.2	— 718.1	— 181.4
1924	129.1	451.5	— 322.4	— 395.7
1925	140.9	334.5	— 193.6	— 128.8
1926	270.9	321.9	— 51.0	— 142.6
1927	366.5	359.4	+ 7.1	— 58.1

After the abnormal period in which the foreign indebtedness of the banks, principally owing to foreigners' speculations on the anticipated rise of the Finnish mark, shot up and subsequently dropped rapidly, the last few years have recorded very quiet conditions. The net indebtedness has, broadly speaking, remained unchanged since the end of 1925, while the banks have gradually increased their balances in foreign banks, so that the net result improved year by year. At the end of 1927 the banks had returned to such conditions as were normal before the war. Then the banks had, as a rule, a net credit balance abroad, which, it is true, was converted into a net indebtedness at certain times of the year, seeing that the seasonal fluctuations were and are considerable.

The Year's Result. The balance sheets of all the banks for 1927 show greater or smaller net profits amounting altogether to 177.7 million marks. During the preceding years the profits had been considerably less, viz., 161.2 millions in 1926, 134.9 millions in 1925 and only 117.4 millions in 1924. The amounts written off were rather less than in previous years, amounting to no more than 21.1 million marks, of which 12.6 millions represented losses on credits.

Taking into account the amount brought forward on Profit and Loss accounts from the year before, the annual meetings of shareholders of the banks had 200.0 million marks to dispose of. Deducting the profit of Södra Finlands Bank Ab. which was distributed to the shareholders, when the bank ceased to exist, we get the following figures which show how the profits for the year were employed.

	1925 Mill. mks.	1926 Mill. mks.	1927 Mill. mks.
Distributed to shareholders	100.1	107.3	124.3
Distributed to depositors	0.4	0.5	0.5
Transferred to reserve funds	24.7	40.9	37.9
Transferred to pension and benefit funds	0.6	3.0	2.1
Additional writings off	1.9	2.0	1.2
Various public purposes	2.0	2.6	2.5
Gratuities	0.8	0.8	0.9
Left on Profit and Loss Account	18.1	22.3	28.5

It should be noted that the majority of the banks include directors' allowances in their expenditure, so that the small sums above only refer to such allowances to the members of the boards of some of the banks. Practically the whole increase in the net profits went towards increased dividends to the shareholders. If it is further taken into consideration that 6.2 million marks more than for the year before were carried forward on Profit and Loss account, it will be seen that the banks reserved slightly smaller sums for other purposes than in the previous year. Obviously there was competition to raise dividends, for, apart from one bank that is prevented by its regulations from distributing more, and another bank that paid no dividend at all, only two banks maintained their dividend unchanged. On the other hand all the other banks raised their dividend by $\frac{1}{2}\%$ —2%, besides which one bank that paid no dividend last year, now paid a dividend of 5%.

The following table gives a review of the dividends paid by the banks during the last few years.

Dividend.	Number of Banks.						
	1921	1922	1923	1924	1925	1926	1927
No dividend	6	5	5	5	4	2	1
3—5 %	—	4	2	1	2	1	1
6—7 $\frac{1}{2}$ %	5	3	5	3	1	3	1

20—22 »	1	—	—	—	—	—	—
Total	21	20	21	19	19	19	18

Summary. It will be seen from the review we have given that 1927 was in general a good year for the banks. Banking business showed a great

increase, the position of the banks was appreciably improved and the financial results were also satisfactory.

In comparing some of the figures quoted above it will be noticed that the net profits of the banks did not rise in the same proportion as their business. The net profits for 1927 were 10.2 % larger than for the preceding year, but the increase in the totals of the banks' balance sheets amounted to 15.7 % and the increase in their total turnover 17.5 %. The cause of these inequalities is clearly to be found chiefly in the fact that rates of interest, as was pointed out in another connection, were falling throughout 1927. It will be found, therefore, that both the earnings in interest (from credits granted) and expenditure in interest increased comparatively to a moderate extent, the former by 8.3 % and the latter by 8.1 %. If it is considered further that the increased credits were financed partly with the banks' own funds obtained through new issues of shares, it can be maintained that the margin of interest was slightly reduced. To what extent this has proved to be the case, cannot be calculated in the absence of detailed figures, but the fact itself is certain. — In the same way it will be found that the expenditure of the banks has, indeed, grown, but that, in spite of the greater number of banking offices, this has not occurred nearly in the same degree as business has increased.

The circumstances referred to above: falling rates of interest, the reduction in the margin of interest and the comparative reduction in the expenditure of the banks, are all signs of the fact that progress is being made in a sound direction. A comparison with other countries — further advanced and wealthier — indicates, however, that much can still be done in these respects. It will also be found that banking business, in spite of the good advance made in the last few years, has not yet attained that level in all respects on which the Finnish banks stood before the shocks of the Great War and the period of inflation. It must be added that the greatly extended economic life makes greater demands on the banks at present than before the war. Steady work is, therefore, still required before banking is equal to its task, but a few years such as the past one would clearly cause an advance that would enable the banks better than ever to meet the demands made on them by economic life.
