## THE FINNISH MARKET REVIEW.

## THE MONEY MARKET.

The tendency of business was still determined in March by the lively work in the forests and the rising prices and increasing turnover in the wholesale trade and as a consequence also by a rapidly expanding note circulation. In the beginning of April the keen interest that had been shown in the Stock Exchange experienced a setback, but its repercussions were entirely limited to the dealings in stocks.

At the same time the prevailing easiness of the money market was apparent in the fact that the deposit business of the Joint Stock banks and other credit institutions was very lively during the first quarter of the current year. In comparison with the corresponding increase a year ago the increase in deposits in the various kinds of credit institutions turned out as follows:-

The actual deposits in the Joint Stock banks due to the public grew particularly in March. when several banks and companies paid their yearly dividends to the shareholders. As, moreover, the other credit institutions placed part of
their idle funds in the Joint Stock banks, the total deposits in the latter increased to $9,078.7$ million marks at the end of the month under review. The increase was 239.1 million marks in March and no less than 959.3 million marks during the last twelve months. Although credits granted by the Joint Stock banks have also expanded considerably of late - their increase was 184.7 million marks in March and 233.6 millions in February, - their total amount at the end of the first quarter, 1937, viz., 7,923.5 million marks, was nevertheless only 403.5 million marks higher than a year earlier. The margin between deposits and credits is therefore still more than 550 millions in excess of the corresponding amount in 1936.

Owing to the seasonal development of foreign trade in March the foreign credit balances of the Joint Stock banks declined to some extent. As their foreign indebtedness increased slightly at the same time, the net credit balances decreased from 330.9 to 274.1 million marks during March, while the corresponding figures at the end of that month in 1936 and 1935 were 327.9 and 228.7 million marks respectively.

In the position of the Bank of Finland the rapid increase in the note circulation alreadv referred to, was striking. As they rose by more than 150 millions both in March and in February, the notes in circulation amounted to $1,912.7$ million marks at the end of the first quarter of

1937 as against $1,520.3$ million marks in 1936. The increase during recent weeks is, of course, to a great extent of a seasonal nature. But even if the average of the notes outstanding during January-March this year is compared with the corresponding average last year, their level is now 21.3 per cent higher than a year ago. This does not, however, quite equal, for instance, the increase in the value of the turnover in wholesale trade, which amounts to 27.3 per cent if calculated in the same manner. As both the Treasury and the banks drew upon the balance of their current accounts at the Bank of Finland during March, the Bank's liabilities payable on demand rose much less than the notes in circulation, viz., by 84.1 million marks. As the reserve of foreign currency did not increase by more than 17.5 million marks to $1,764.2$ millions, the note reserve of the Bank of Finland consequently only declined from 503.2 to 436.5 million marks in March. During the first fortnight in April, however, the demand for notes still continued and, in spite of the reserve of foreign currency rising to $1,773.9$ million marks as against $1,353.5$ millions last year, the note reserve declined to 405.1 million marks.

The rise in prices to be reckoned with in Finnish wholesale trade during the last twelve months can be estimated at about 12 per cent in regard to agricultural products, 11 per cent in regard to products of our home industry and 16 per cent in regard to imported goods. The total wholesale price index $(1926=100)$ for March, 1937, amounted to 103 as compared to 101 in the preceding month. Measured by the Bank of Finland consumption price index (July $1931=100$ ), which only changed from 103.0 in February to 103.6 in March, the increase of prices in retail trade may be taken as 3 per cent during the last twelve month's period.

## TRADE AND INDUSTRY.

Foreign trade was unusually large in March both in regard to its value and to its volume.

But, while the actual timber shipping season has not yet begun, importers have been induced by the present market conditions to replenish their stocks rather suddenly. In March imports amounted to 571.5 million marks this year as against 394.9 millions last year and exports to 483.8 and 396.8 millions respectively. The surplus of imports that arose in March, 1937, viz., 87.7 million marks, should also be compared with the corresponding surplus of imports in 1935 which was 62.6 million marks.

As, however, imports have been livelier than exports during the whole year so far, the balance of trade for the first quarter of 1937 shows a surplus of imports of 249.2 million marks as against 32.7 and 41.1 millions respectively in 1936 and 1935. This year's result is the outcome of imports having risen 30.5 per cent in value and 16.2 per cent in volume in comparison with last year's figures, whila exports only increased by 13.2 and 7.1 per cent correspondingly.

At the end of March the sales of Finnisin sawn timber totalled 775,000 standards. Last year about 600,000 standards had been sold up to that date. According to the E.T.E.C. agreement only 230,000 standards of sawn goods remain to be disposed of from Finland. About the same quantity in unsold in Sweden, whereas the U.S.S.R. still can dispose of 300,000 standards.

## THE LABOUR MARKET.

In the metal trade the enhanced business has led to a movement among the workpeople in favour of higher wages. At the beginning of April a strike was proclaimed in some big metal works in Helsinki (Helsingfors) and Turku (Abo). So far the strike has not spread any further and negotiations are proceeding between the parties concerned.

${ }^{\text {1 }}$ ) According to data supplied by the Treasury. Internal loans are given at their nominal value and foreign loans in Finnish currency according to the rates ruling on the dates of the issue of the loans. - ${ }^{2}$ ) Calculated as follows: the outstanding amounts of both Internal and foreign loans have been converted into Swiss Franes at the monthly average rates of exchange of the respective currencies.
From September, 1936, the amounts have been converted into Swiss Francs of former gold value, in order to eliminate the influence of fluctuating currencies.

The term imports covers all imported goods which are placed on the market either immediately after importation or after storage. Exports covers all goods exported from the open market, including re-exports. Goods are declared to the Customs by their owner, who must at the same time state the value of the goods as calculated at the frontiers of the country.

* Prellminary figures subject to minor alterations.

1) Base $1913=100$; the indices are calculated by the Statistical Dept. of the Board of Customs in the following manner: after multiplying the quantities of imports and exports for the current year by the average price for the class of goods in question during the corresponding period of the basic year the values of imports and exports are calculated in percentage of the figures thus obtained. ${ }^{2}$ ) Base $1926=100$; the indices are calculated by PUnitasp according to the same main principles as above.

Calculated by the Central Statistical Office. The first group of indices refers to prices of goods appearing in local wholesale trade in Finland, whereas the indices for imported and exported goods refer to foreign trade prices. An indirect weighting has been applied, each class of goods being represented by the number of commodities corresponding to the calculated importance of this class in wholesale trade. The averages are arithmetical ones.

## CERTAIN PARTICULARS ABOUT FINLAND.

## 1. FORM OF GOVERNMENT.

Finland formed a part of the kingdom of Sweden from 1154 to 1809; from 1809 it was an autonomous Grand Duchy connected with Russia up to December 6th, 1917, when Finland declared its independence, which was acknowledged by all the Powers including Soviet Russia. It became a republic in 1919. The legislative power of the country is vested in the Diet and the President. The highest executive power is held by the President chosen for a period of 6 years. The present President Kyösti Kallio is elected for the term March 1st, 1937, to March 1st, 1943.

The Diet, composed of 200 members, is elected by universial suffrage. The proportions of the different parties in the Diet elected in 1936 are as follows:

Number
Bocial-Democratic party ............................................. . 83
Agrarian party ............................................................. . 53

# THE FINNISH JOINT STOCK BANKS IN 1936. 

BY

A. E. TUDEER, PH. D.

STATISTICIAN TO THE BANK OF FINLAND.

#### Abstract

GENERAL SURVEY. Last year was a calm one for all the Joint Stock banks which had already been able to overcome the consequences of the depression.

The number of Joint Stock banks remained unaltered at 9 and their funds, balance sheet totals etc. according to the balance sheets on March 31st, 1937, will be found in the table on page 31. The total number of banking offices underwent a change during the year under review, 7 new offices being opened and 12 offices being closed. At the end of the year under review there were therefore 481 banking offices transacting business, of which 180 were situated in towns and 301 in the country districts. On an average there was one office to about 7,500 of the population.

We give a review below, according to the official banking statistics, of the business of the Joint Stock banks during the past year and their position at the end of 1936 in comparison with the previous years for which fully comparable figures are available.

## BALANCE SHEETS OF THE JOINT sTOCK BANKS.

If we combine the balance sheets for December 31st, 1936, of the banks that carry on business, we obtain the following table:-

| Assets | $\begin{gathered} 1934 \\ \text { Mil. mks. } \end{gathered}$ | $\stackrel{1935}{\text { MiII. mks. }}$ | $\begin{gathered} 1936 \\ \text { MII. mks. } \end{gathered}$ |

| Sundry liabilities | 454.6 | 345.8 | 387.3 |
| Profits | 95.1 | 92.0 | 93.5 |

The rising tendency is clearly visible, if we regard the balance sheet totals. While the total amount for 1935 exceeded the figure for 1934 by 179.0 million marks or 1.8 per cent, the increase from 1935 to 1936 represented no less than 795.6 millions or 7.9 per cent. The combined balance sheet totals of the Join':

Stock banks thus exceeded the corresponding figure for 1932, when the trough of the depression was passed, by $1,313.6$ million marks or 13.5 per cent and very nearly reached the corresponding figure for the previous boom in 1928. At that time, however, there were 17 banks as against 9 at present.

The most important items are dealt with below.

## BANK FUNDS.

The banks' own funds are given in the following table:-

|  | $\begin{gathered} 31 \text { Dec. } \\ \text { Mius. mks. } \end{gathered}$ | $\begin{gathered} 31 \text { Dec. } \\ \text { Mill. mks. } \end{gathered}$ | $\begin{aligned} & \text { Movement } \\ & \text { Mill. mkse. } \end{aligned}$ |
| :---: | :---: | :---: | :---: |
| Share capital | 714.3 | 714.3 |  |
| Reserve funds | 479.2 | 487.1 | + 7.9 |
| Pensions funds | 56.6 | 56.8 | + 0.2 |
| Undisposed profits and profit and loss accounts | 129.1 | 128.2 | -0.9 |
| Total | 1,379.2 | 1,386.4 | +7.2 |

It will be seen that the changes in the Joint Stock banks' own funds were slight. The small increases, however, indicate that development is once more moving in the right direction after the considerable depreciation that was necessary during the depression. The amount of undisposed profits includes the net profits for 1936, of which, however, only a small part was transferred to the banks' own funds, the greater part being paid in dividends to shareholders, as mentioned below.

## HOME DEPOSITS.

The deposit accounts of the Joint Stock banks and the changes in them will be seen from the following table:-

|  | $\begin{gathered} 31 \text { Dec. } \\ \text { Mill. mks. } \end{gathered}$ | $\begin{gathered} 31 \text { Dec. } \\ \text { Mill. mks. } \end{gathered}$ | $\begin{gathered} \text { Movement } \\ \text { 1936 } \\ \text { Mill. mks. } \end{gathered}$ |
| :---: | :---: | :---: | :---: |
| Deposits | 5,809.6 | 6,132.3 | + 322.7 |
| Cheque accounts | 1,339.0 | 1,541.4 | + 202.4 |
| Finnish credit institutions |  |  |  |
| Deposits | 535.6 | 643.5 | +107.9 |
| Cheque accounts | . 282.0 | 280.8 | - 1.2 |
|  | 7,966.2 | 8,598.0 | + 631.8 |

The deposits in the Joint Stock banks increased very much last year. The total increase
amounted to 631.8 million marks in comparison with 331.4 millions in 1935. There are no fully comparable figures available for previous years, but at any rate it is obvious that the increase is incomparably larger than during the period of depression, when deposits even fell off in some years. The considerable deposits from Finnish credit institutions are explained by the fact that the Savings banks deposit their excess cash to a large extent and part of the cash reserve prescribed by law in the Joint Stock banks, chiefly in their own Central Bank.

## HOME LOANS.

The home credits granted by the Joint Stock banks are shown in the following figures:-

|  | $\begin{gathered} 31 \text { Dec. } \\ 1935 \\ \text { Mill. mks. } \end{gathered}$ | $\begin{gathered} 31 \text { Dec. } \\ 1936 \\ \text { Mill. mks. } \end{gathered}$ | Movement 1936 <br> Mill. mks. |
| :---: | :---: | :---: | :---: |
| Finnish credit institutions | 174.5 | 155.9 | 18.6 |
| Inland bills | 1,391.3 | 1,347.4 | - 43.9 |
| Loans | 3,239.4 | 3,382.8 | + 143.4 |
| Cheque accounts | 2,643.4 | 2,486.8 | -156.6 |
| Total | 7,448.6 | 7,372.9 | -75.7 |

The credits granted by the Joint Stock banks were reduced last year by 75.7 million marks, whereas during the previous year they had increased by 35.0 millions. On the whole the credits of the Joint Stock banks have fallen off ever since 1928. Particular weight attaches to the circumstance that the decrease continued last year, when the economic improvement was so clearly marked. This fact is partly connected with a greater accumulation of capital in the business undertakings themselves, but it is partly due to the improvement in the bond market having provided the larger business concerns with an opportunity of satisfying their credit requirements by means of issuing bond loans. The Joint Stock banks contributed towards this development both by entering syndicates for issuing bonds and by investing considerable funds in bonds. The holdings of bonds by the Joint Stock banks increased last year by 415.0 million marks and attained a record amount of $1,206.4$ millions by the end of the year.

Owing to the increase in deposits and the falling off in credits the surplus of the former increased during the year under review from 517.6 to $1,225.1$ million marks. If it is considered that only a few years ago the balance sheets of the Joint Stock banks recorded a considerable surplus of credits, the figure just quoted gives the best idea, perhaps, of the degree to which the liquidity of the Joint Stock banks has grown and their position in general has improved.

## CASH AND CASH RESERVES.

Under these circumstances no bills were rediscounted. On the contrary, the Joint Stock banks experienced some difficulty in finding suitable investments. In spite of the increase in their holdings of bonds already referred to, the cash of the banks grew very much. Having already increased during the previous year from 399.3 to 633.3 million marks, it rose again to 851.3 millions during 1936.

The unusually great liquidity of the Joint Stock banks is distinctly visible, if we compare the cash and cash reserves with the total liabilities payable on demand. The former consist of the cash of the banks, funds deposited on current accounts in the Bank of Finland, extraneous bank-post-bills and cheques and the banks' net credit balances in other banks, commercial bills in foreign currency payable abroad, bonds in Finnish currency issued or guaranteed by the State and bonds listed on foreign Stock Fxchanges. The liabilities payable on demand include all the indebtedness of the banks payable at sight and the undrawn amounts of credits granted on cheque accounts. According to the Bank Law the cash and cash reserves must amount to not less than 20 per cent of the liabilities payable on demand. Already at the end of 1934 the proportion was 51.9 per cent and thus appreciably higher than the ratio prescribed by law, and this proportion has since improved still further. At the beginning of the year under review the proportion was
54.5 per cent and at end of the year it was no less than 65.3 per cent, i.e., the liquidity of the Joint Stock banks was more than three times as high as prescribed by the Bank Law.

## POSITION TOWARDS FOREIGN COUNTRIES.

The position of the Joint Stock banks towards foreign countries is illustrated by the following table:-

| Claims | $\begin{gathered} 31 \text { Dec. } \\ \text { 1935. } \\ \text { Mill. mks. } \end{gathered}$ | $\begin{gathered} 31 \mathrm{Dec} \\ 1936 \\ \text { Mill. mks. } \end{gathered}$ | Movement 1936 <br> Mill. mks. |

| Nostro | 211.1 | 394.5 | + 183.4 |
| Loro | 2.7 | 2.8 | + 0.1 |
| Foreign bills | 158.5 | 162.8 | + 4.3 |
|  | 372.3 | 56.0 .1 | +187.8 |

## Indebtedness

Foreign correspondents

| Nostro | 11.7 | 28.0 | + | 16.3 |

| Loro | 178.7 | 222.7 | $+$ | 44.0 |
|  | 190.4 | 250.7 |  | 60.3 |

As these figures indicate, the foreign balances of the Joint Stock banks increased by about 50 per cent or 187.8 million marks. Their indebtedness also increased, though not as much; the increase amounted to 60.3 million marks or barely 32 per cent. By this means the net foreign balances of the Joint Stock banks increased by 127.5 million marks to 309.4 millions. This net amount, as the following table shows, was larger than was usual in general with the sole exception of 1934, when the foreign balances of the banks were uncommonly large.

| 1936 | 560.1 | 250.7 | + 309.4 |

## DEPOSIT AND CREDIT RATES.

The deposit rates of the Joint Stock banks are directly dependent on the decisions come
to by the joint delegation of the financial institutions, while credit rates follow the former more indirectly. At the end of 1934 this delegation decided to lower the rate on 6 months' deposits by $1 / \mu$ per cent to $3 \frac{3}{4}$ per cent and the rate on cheque accounts by $1 / 2$ per cent to $11 / 2$ per cent, these rates having been in force since January 1st, 1935. On July 1st, 1936, all the Joint Stock banks except one lowered the rate on sight accounts to 1 per cent. At the end of the year this reduction became general by the decision of the delegation. At the same time the rate on 6 months' deposits was reduced to $31 / 2$ per cent. These decisions came into force on January 1st, 1937.

The division of the deposits made by the public in the Joint Stock banks at the end of 1934, 1935 and 1936 according to the rates of interest will be seen in the following table:-

| Below |  |  | $\begin{gathered} 1934 \\ \text { Mill. mks. } \end{gathered}$ |  | $\begin{gathered} 1935 \\ \text { Mill. mks. } \\ 20.4 \end{gathered}$ | $\begin{gathered} 1936 \\ \text { mil. mks. } \end{gathered}$ |

The corresponding division of credit rates is as follows:-

| Below |  |  | $\begin{gathered} 1934 \\ \text { Mill. mks. } \end{gathered}$ | $\begin{aligned} & \text { Mill. miss. } \\ & \text { Mịs. } \end{aligned}$ | $\begin{aligned} & 1936 \\ & \text { Mill. mks. } \end{aligned}$ |

| Above | 8 | " " | 749.4 | 6.9 | 0.1 |

These tables give a good idea of the downward movement of all rates of interest. On an average the Joint Stock banks paid a rate of 3.21 per cent on their deposits at the end of 1936 in comparison with 3.34 per cent a year before and 3.68 two years earlier. The average rates on credits were $6.24,6.35$, and 6.82 per cent respectively.

## THE YEAR'S RESULTS.

The annual results of the Joint Stock banks are given in the following table that shows
their income and expenditure in 1934, 1935 and 1936:-

| Income | $\begin{gathered} 1934 \\ \text { Mill. mks. } \end{gathered}$ | $\begin{gathered} 1935 \\ \text { Mill. mks. } \end{gathered}$ | $\begin{gathered} 1936 \\ \text { Mill. mks. } \end{gathered}$ |

| Net profits .............. | . 91.4 | 92.0 | 93.5 |
| Total | ] 297.2 | 288.7 | - 282.8 |

In consequence of the falling rates of interest and the reduction of credits the Joint Stock banks had an appreciably smaller income from the margin between interest received and paid than in previous years. On the other hand the income from interest on bonds, agio and other earnings increased slightly. As a final result the income of the Joint Stock banks was 5.8 million marks less than for 1935. In regard to expenditure the change was largest in the case of amounts written off, which were reduced from 32.0 to 24.4 million marks. This decrease is a sign that the losses of the period of depression had already been written off. As other income remained almost unchanged, the combined net profits of the Joint Stock banks increased from 92.0 to 93.5 million marks. All the banks earned a profit last year.

For the sake of comparison we give the following figures that show the net results of the banks' business in recent years:-

|  | Net profits ( + ) o net losses ( - ) Mill. mks. |
| :---: | :---: |
| 1928 | + 206.9 |
| 1929 | + 202.7 |

| 1933 | $+0.3$ |
| 1934 | + 91.4 |
| 1935 | + 92.0 |
| 1936 | + 93.5 |

In addition to the annual profits the shareholders' meetings of the Joint Stock banks had 34.7 million marks at their disposal that had been carried over on the profit and loss account from the previous year. The distribution of these funds, i.e., altogether 128.2 million marks, is shown in the following table in comparison with the corresponding figures for 1935 and 1934.

|  | $\begin{aligned} & 1934 \\ & \text { Mill. mks. } \end{aligned}$ | $\begin{aligned} & 1035 \\ & \text { Mill. mks. } \end{aligned}$ | $\begin{gathered} 1936 \\ \text { Mill. mks. } \end{gathered}$ |

The majority of the banks paid the same dividend to their shareholders as for 1935. Only two small banks raised their dividend by $1 / 2$ per cent and one bank lowered its dividend by 1 per cent. The division of the banks according to the size of the dividend paid was as follows:-

## ITEMS.

The Board of Management of the Bank of Finland. On March 25th, 1937, the President of the Republic appointed Mr J. W. Rangell, LL. B., a member of the Board of Management of the Bank of Finland. Mr Rangell is a member of the legal profession and since 1925 he has been a member of the Board of Management of the Central Bank for Co-operative Agricultural Credit Societies. In 1933 he became general manager of that bank, a post he is leaving in order to assume his new duties in the Bank of Finland on May 1st.

Central co-operative organisations in Finland in 1936. Laist year the total turnover of the central co-operative organisations surpassed the record figures of the previous boom for the first time. The turnover of the various organisations in 1936, 1935 and 1934 was as follows:-
sale Society (S.O.K.) .... 1,211.8 1,101.2 983.8 Co-operative Wholesale Association (O.T.K.) .......... $872.0 \quad 776.7 \quad 684.4$ Central Co-operative Butter
$\begin{array}{lllll}\text { Export Association Valio .. } & 678.4 & 562.2 & 505.8\end{array}$ $\begin{array}{rllll}\text { Hankkija Central Agricultural } & & & \\ \text { Supply Co-operative Society } & 344.2 & 283.9 & 239.7\end{array}$

The sales of all the central organisations together thus totalled $3,106.4$ million marks in 1936 and were 14.0 per cent larger than in 1935, when the total amount was $2,724.0$ millions. The corresponding amount in 1929 was 2,873.5 million marks which was consequently exceeded last year by 8.1 per cent.

The financial results of the year under review were throughout better than in 1935. This is shown by the following figures:-

|  | Net profits |  | Own funds after disposing of annual profits |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |
|  | Mill. mks. | Mill. mks. | $\begin{aligned} & \text { Mill. } \\ & \text { mks. } \end{aligned}$ | $\begin{aligned} & \text { Mill. } \\ & \text { miks. } \end{aligned}$ |
| S. O. K. | 27.1 | 22.6 | 188.4 | 176.1 |
| О. Т.K. | 18.3 | 15.4 | 150.5 | 138.4 |
| Valio | 4.1 | 4.0 | 42.6 | 39.1 |
| Hankkija | 6.8 | 4.2 | 47.1 | 42.6 |

By transferring part of the annual profits to the reserve and other funds the total amount of the central organisations' own funds increased to 428.6 million marks as against 396.2 millions a year earlier.

New issues of shares. During the last few weeks the following issues of new shares have been proposed and undertaken by Finnish banks and companies.

As the progress of Kansallis-Osake-Pankkki has caused the share capital and reserve funds. to come within sight of the minimum amount prescribed by the Bank Law in relation to the bank's liabilities, and as the extension of business generally demands larger funds, the management of the bank has decided to propose that the share capital, at present 200 million marks, should be raised by 50 million marks by issuing 250,000 new shares of a nominal value of 200 marks each. The new shares are offered for subscription at a price of 420 marks each, by which means altogether ō5 million marks of the value of the shares will be transferred to the reserve funds. By this issue of shares the bank's own funds, excluding the pensions fund, will amount to 505 million marks in all.

The Board of Administration of the Central Bank of the Savings Banks has decided for the same reasons as above to propose that the share capital of the bank should be raised from

40 million marks to 60 millions by issuing 200,000 new shares of a nominal value of 100 marks each at a price of 125 marks. By this means the total of the share capital and reserve fund would be increased to 82 million marks.

De Förenade Yllefabrikerna Ab. have decided to raise their capital from 30 to 50 million marks by issuing 20,000 new shares at their parity of 500 marks each and by distributing an equal number of bonus shares to the present shareholders.

Wasa Anglvarns $A b$. has decided on an issue of bonus shares in order to increase the share capital from 10 to 20 million marks.

Motor vehicles in use. The statistics for 1936 concerning the motor vehicles in use in Finland have recently been published. Below we give a table showing the number of vehicles at the end of the following years:-

|  | Private cars | $\begin{aligned} & \text { Motor } \\ & \text { buses } \end{aligned}$ | Lorrles |  | 21 hous |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | Number | Number | Number | Number | HP |
| 1933 | 18,870 | 1,306 | 10,036 | 30,212 | 1,244 |
| 1934 | 18,941 | 1,510 | 10,872 | 31,323 | 1,355 |
| 1935 | 19,535 | 1,828 | 11,666 | 33,029 | 1,539 |
| 1936 | 20,395 | 2,127 | 13,005 | 35,527 | 1,808 |

The improvement in trade and traffic that has taken place during the years enumerated above is shown in the steady growth of this means of transport. Last year's increase, comprising 2,498 cars with a capacity of 269,000 HP , is the largest yearly increase since 1928, when the number of cars increased by 8,120 and their combined capacity by $346,000 \mathrm{HP}$.
*
Ice conditions. In April the temperature grew milder and the ice conditions improved in consequence. During the third week of the month the port of Viipuri (Viborg) in the east and the port of Vaasa (Vasa) in the north were opened for traffic with the assistance of icebreakers. Only the northernmost Bothnian ports still remain closed.

## THE BANK OF FINLAND MONTHLY BULLETIN

is sent free of charge to anyone wishing to receive it. Finnish booksellers are, however, allowed to sell it at a price of 2 marks per copy. Back numbers are also willingly supplied. Should extracts from the Bulletin be printed, the source should be stated. Correspondence with regard to the Bulletin should be addressed to the Bank of Finland, Statistical Department, Helsinki (Helsingfors), Finland.
