

## THE FINNISH MARKET REVIEW.

## THE MONEY MARKET.

On the money market, as in the whole economic situation, a clear turn for the better occurred in 1948. The reasons and the preceding stringency on the money market have been referred to in previous reviews. In particular the increase in savings, the basis of this change, has continued, and this implies permanent factors apart from the temporary and seasonal ones that caused the autumn's favourable movement. Yet the situation on the money market has not become normal. In real value savings are still much below pre-war level, which causes a certain amount of stringency; the demand for credit is still great although in the woodworking industry it is unexpectedly low because of restricted forest work and trade. In 1948 there was a noticeable change in the monetary situation of the public the recent ample supply becoming a scarcity, and this was badly felt in many branches. The real reason for this is probably that the supply of goods has increased out of proportion to the money in circulation, as new purchasing power does not get available nearly at the same rate as before the inflation slowed down. The improved conditions for saving had a similar effect.

All the banking figures for December are not yet available, and this survey is based on November data. They show that the deposit accounts of the public in the
credit institutions - the best barometer of saving - increased by 9,579 million marks, or 15 per cent, in January-November 1948 as against 5,891 million or 11 per cent, one year earlier. The turn for the better took place in Summer, and this reduced the total result as saving was weak early in the year. At the end of November deposit accounts of the public amounted to 72,616 million marks. The Commercial Banks' data for the last few months show a favourable movement, particularly in deposits, which increased each month. On the other hand the change in total deposits was not equally favourable, as in some months, e.g. in November, cheque accounts were considerably reduced, mainly because of taxes paid. As the Commercial Banks have been cautious in granting credits they have had a large surplus of deposits and this increased towards the end of the year. Their position is therefore stronger as seen from the reduction of re-discounts and the increase in cash holdings. At the very end of 1948 and in the beginning of 1949 rediscounts have again increased.

Thus the increase in savings did not increase credits, in spite of demand being active, less in some spheres but more in others owing to financing difficulties. Total credits granted by the Commercial Banks were reduced both in August and September but again rose in October and November when the sales tax was paid. In the first eleven months of 1948 they increased by

8,276 million marks as against 8,750 million in the same months of the year before. The high interest rate on credit has had the effect intended, to check somewhat the demand for credit. Some quarters now consider that the interest rate should be lowered, chiefly because of the burden it lays on trade and industry.

The great reduction in the Bank of Finland's credits to other banks in the autumn, i. e. in September and October, was due to the causes referred to above. Rediscounted bills were at their lowest in the last week of October when they fell as far as 78 million marks. Later they again increased reaching 1,697 million marks at the end of December. The other credits granted by the Bank decreased in Autumn, as seen from the Treasury bills which, 23,730 million marks at the end of October, amounted to 19,230 million at the end of December. They were at their lowest, 13,630 million marks, in the beginning of June. The central bank credits to trade and industry were also reduced in the autumn. At the end of June they were nearly 18 billion marks, decreasing to 15 . billion by the end of October and further to 13.6 billion in the last week of December. The total credits of the Bank of Finland, including those to other banks, amounted to 35,023 million marks at the end of the year as against 34,897 million at the end of 1947, thus showing little change on the whole. In the summer and early autumn they indeed were much larger, the peak 39,145 million marks occurring in the second week of August. Owing to the interruption in the increase of credits the note circulation at first remained unchanged and then was reduced. At the end of September it had reached its maximum - 28,189 million marks - but decreased in October and on to the end of the year, although slowly. On the last of December the notes in circulation amounted to 27,369 million marks, or only 2,207 million more than on the same day of 1947 , while in the spring this difference had been about 6 billion.

## PRICES.

The rise in prices that had lasted several years and continued earlier in 1948, became a slight decrease towards the end of the year. The cost of living index (August 1938 - July 1939. $=100$ ) slowly fell each month, beginning in September, and was 798 in December. The fall in the wholesale price index ( $1935=100$ ) began in August and has since been regular, the general index for home market goods being 1,104 in December. In July it was at its highest, or 1,124 . Prices indeed rose somewhat on the whole last year but much less than in 1947, the cost of living index by 10.6 per cent as against 53.8 per cent. For the stability of money it was very important that the special cost of living index on which wages are based has not risen since August when it was 112 points, so that no new general increase in wages has been necessary. Yet prices are not stable enough to eliminate the risks of inflation.

## TRADE AND INDUSTRY.

Data of total industry in the third quarter of 1948 show a slight reduction in production since the two preceding quarters. Yet it was about 20 per cent larger than in the same quarter of last year and about the same as in the maximum year 1938. The volume of the home market production is already slightly above peacetime production, while export production is slightly below it. Export industry had some marketing difficulties in the autumn and in consequence forest work has been reduced since last felling season.

The tightening on export markets is seen in foreign trade, the growth of which was interrupted towards the end of the year. Imports suffered from the lack of foreign currency which was not alleviated by foreign loans. In 1948 total imports amounted to 66,439 million marks and commercial exports to 56,505 million marks. The excess of imports was slightly less than war indemnity exports, 11,546 million marks.

## CONTENTS OF THE TABLES.

## I. MONEY MARKET.

Bank of Finland:

1. Statement.
2. Note issue.
3. Notes in circulation, foreign correspondents and cover for the issue of notes.
4. Note reserve, home loans and re-discounted bills.
5. Treasury bills and balances of current accounts.
6. Rates of exchange.

## Commercial Banks:

7. Home deposits and the credits from the Bank of Finland.
8. Home loans.
9. Position towards foreign countries.
10. Foreign Payment Position of all Banks.
11. Deposits in Post Office Savings Bank.
12. Deposits in the Savings Banks.
13. Deposits in Co-operative Credit Societies and Consumers' Co-operative Societies.
14. Deposits in all Credit Institntions.
15. Insurances in life assurance companies.
16. Changes in number and capital of limited companies.
17. Bankruptcies.
18. Stock Exchange.
19. Stock Exchange index.

## II. STATE FINANCES.

20. Public Debt.
21. State Revenue and Expenditure.
22. Collection of Customs.
23. Collection of Excise ducs.

## III. TRADE AND INDUSTRY.

24. Value of imports and exports.
25. Value of imports and exports in different classes of goods.
26. Imports of the most important articles.
27. Exports of the most important articles.
28. Foreign trade with various countries.
29. Unit value index of imports and exports.
30. Total sales of some wholesale firms.
31. Index of industrial production.
32. Building activity.

## IV. TRAFFIC.

33. Foreign shipping.
34. State Railways.

## V. LIEVEL OF PRICES.

35. Wholesale price index.
36. Cost of living index.
37. Bank of Finland building cost index.

Tables 24-29 according to Finnish Offlcial Statistics I, A, Foreign Trade of Finland, Monthly Reports.
The term imports covers all imported goods which are placed on the market either immediately after Importation or after storage. Exports covers all goods exported from the open market, including re-exports. Goods are declared to the Customs by their owner, who must at the same time state the value of the goods as calculated at the frontiers of the country.

* Preliminary figures subject to minor alterations.

Quarterly indices and yearly averages of them. For details concerning the calculation of the index see p. 35 in this
Bulletin Nos. 4-B. 1048.
The figures in brackets [ $\quad$ indicate the position at the end of the previous year.

## CERTAIN PARTICULARS ABOUT FINLAND.

## 1. FORM OF GOVERNMENT.

Finland formed a part of the kingdom of Sweden from 1154 to 1809; from 1809 it was an autonomous Grand Duchy connected with Russia up to December 6, 1917, when Finland declared its independence, which was acknowledged by all the Powers including Sovlet Russia. It became a republic in 1919. The legislative power of the country is vested in the Diet and the President. The highest executive power is held by the President chosen for a perlod of 6 years. The present President Juho Kusti Passikivi is elected for the term March 11, 1946, to March 1st; 1952.

The Diet, composed of 200 members, is elected by universal suffrage. The proportions of the different parties in the Diet elected in 1948 are at present as follows:

Number

| Agrarian party | 56 |
| :---: | :---: |
| Social-Democratio party | 54 |
| Democratic League | 38 |
| Unionist party | 38 |
| Swedish party | 14 |
| Progressive party | 5 |

## 2. LAND.

THE AREA is 337113 square kilometres (Great Britain's area is 245000 sq . km and Italy's area $310000 \mathrm{sq} . \mathrm{km}$ ). Of the total area $9.4 \%$ are inland waters. On an average $13.5 \%$ of the land in the South of Finland is cultivated, $1.6 \%$ in the North, $7.6 \%$ of the whole land. Of the land area 21.7 mill. ha ( 53.5 mill. acres) or $70.9 \%$ are covered by forests.

## 3. POPULAATION.

NUMBER OF INHABITANTS (1947); 4.1 millions (of whom 0.2 million emigrants). Sweden (1947) 6.8, Switzerland (1947) 4.5, Denmark (1947) 4.1 and Norway (1947) 3.1 millions,

DENSITY OF POPULATION (1947): In South FHnland 22.2, in North Finland 3.1 and in the whole country an average of 12.3 inhabitants to the square kilometre.

DISTRIBUTION (1947): $74.8 \%$ of the population inhahit the country, 25. 2 \% the towns and urban districts. The largest towns are (1947): Helsinki (Helsingfors), the capital, 371662 Inhabitants, Turku (Abo) 06 470, Tampere (Tammerfors) 89071.

OCCUPATION (1940): agriculture $51.6 \%$, industry and manual labour $21.0 \%$, commerce $5.1 \%$, transport $4.6 \%$, other occupations $17.8 \%$.

LANGUAGE (1940): Finnish speaking 90.0 \%, Swedish speaking $9.6 \%$, others $0.4 \%$.

RELIGION (1945): Lutheran $96.0 \%$, Greek-Orthodox $1.8 \%$, others $2.2 \%$.

EDUCATION (1947): Practically all persons over 1.5 years of age are literate. There are three universities (the oldest founded in 1640) and 7 colleges of university standard.

INCREASE OF POPULATION (1946): Births $26.4 \%$, deaths $11.4 \%$ (deaths in France in $104613.3 \%$ and in the United Kingdom in $194612.2 \%$ natural increase $14.7 \%$.

## 4. TRADE AND COMMUNICATIONS.

FOREST RESOURCES (1945): The growing stock of the forests is 1370 million cub. m ( 48379 million cub. feet), The stock of standing timber measuring 6 in , at a height of $18 \mathrm{ft}_{\text {. }}$ amounts to 1031 million trees. Of this number pine is represented by $68.6 \%$, spruce by $30.1 \%$, the conifers thus constituting $93.7 \%$ or 966 million trees, leat-trees, mostly birch, $6.3 \%$ or 65 million trees. The annual increment is 41 million
cub. m ( 1441 million cub, ft.). The total removal in the felling season 1945/46 was 47 million cub. $m$. ( 1672 million cub. ft.).

AGRICULTURE (1941): Cultivated land 2.3 million hectares, divided as follows: area under cultivation under 10 hectares $33.1 \%, 10-50 \mathrm{ha} 54.4 \%, 50-100 \mathrm{ha} 7.2 \%$, over 100 hs $5.3 \%$. Cultivated land (1947) is divided between the different kinds of crops as follows: $\mathbf{3 9 . 8} \%$ hay, $11.9 \%$ temporary grassland for grazing, $15.5 \%$ oats, $6.7 \%$ wheat, $6.6 \%$ rye, $5.8 \%$ barley, $3.8 \%$ potatoes, $9.0 \%$ other. The number of dairies in 1947 amounted to 517.

OWNERSHIP OF LAND (1941): The land area is distributed among different classes of owners approximately. as follows: private $49.2 \%$, State $41.6 \%$, Joint Stock Companies etc. $7.1 \%$, commanities $2.1 \%$.

INDUSTRY (1946): Number of industrial concerns 5691 , workpeople 236 723, gross value of products of industry 112090 million marks.

LENGGTH OF RAILWAYS (1947): 4966 km, of which 4713 km State railways and 253 km private. The gauge is in general 1524 m.

MERCHANT FLEET (1948): Steamships 383 (415 802 gross reg. tons), motor vessels 96 ( 61764 gross reg. tons), sailing ships with auxiliary engine 154 ( 14654 gross reg. tons), other sailing ships 11 (11 913 gross reg. tons). Total 644 ( 504139 gross reg. tons).

## 5. FINANCE AND BANKING.

CURRENCY. Since 1860 Finland has its own monetary systom. From 1877 up to 1914 the currency maintained its stable gold value, and after the disturbances caused by the war a gold standard was again introduced from January 1st, 1926. The unit of currency is the mark (Finnish markka: $=$ 100 pennian). According to the monetary law of December 21, 1925, a gold coln of 100 marks' value shall contain $3^{15} / \mathrm{ms}$ grams of fine gold. Since October 12, 1931, the redemption of bank notes in gold is, however, suspended.

STATE FINANCES. According to the finance accounts for 1947 the State revenue was 94261 million marks of which 70207 million marks were carrent revenue, and State expenditure 87811 million marks, of which 66578 million marks were current expenditure. The principal sources of revenue were as follows: direct taxes 27855 , indirect taxes 9927 , sales tax 18288 , Interest and dividends, etc. 6429 , State property and undertakings (net) 2502 , and capital revenue 24054 . For Public Debt see table 20 in this issue.

MUNICIPAL FINANCES. According to the finance accounts for 1943 expenditure amounted to 4792 million marks. Income from taxation was. 2360 million marks, taxed income 29308 million marks. The municipal income tax (non-progressive) averaged $8.1 \%$ of the ratepayers' income.

THE BANK OF ISSUE. The Bank of Finland (founded In 1811) is a State Bank. Its head office is in Helsinki (Helsingfors) with branches in Turku (Åbo), Pori (Björneborg), Vaasa (Vasa), Oulu (Uleåborg), Kuopio, Joensuu, Mikkeli (S:t Michel); Tampere (Tammerfors), Hämeenlinna (Tavastehus), Jyväskylä, Kotka and Lahti (Lahtis).

THE COMMERCLAL BANKS (1947): Number 7, possess 464 offices, where all kinds of banking business is transacted. There is one banking establishment per 8734 inhabitants.

The largest banks are: Kansallis-Osake-Pankki, Oy. Pohjoismaiden Yhdyspankki - Ab. Nordiska Föreningsbanken and Helsingin Osakepankki - Helsingfors Aktiebank, all with head offices in the capital.

OTHER BANKS (1946): Mortgage banks 5, Savings banks 468, Co-operative Credit Societes 841 and a Central Bank for the latter.

# PUBLIC FINANCES IN 1947. 

BY<br>HEIKKI VALVANNE, MAG. PHIL.

## FELLOW OF THE BANK OF FINLAND INSTITUTE FOR ECONOMIC RESEARCH.

GENERAL REVIEW FOR 1947.
In 1947 the leading features of the State finances were still the fulfilment of obligations under the Peace Treaty, the compensation of private people for war losses, and reconstruction. This strain alone was so great that the ,,public sector" in national economy has not been reduced. On the other hand, public finance bore the impress of the inflation which could not be avoided at the close of the war. During 1947 the inflationary tendency continued, chiefly because it was impossible to check a further rise in wages. A successful policy necessitated considerable State financial support to keep wages at a low level and this meant an increase of State expenditure in the form of different subsidies. Consequently the State had to continue heavy taxation, even though partly at the cost of decreasing the efficiency of labour and saving.

Considering the difficult conditions public finance was fairly favourable in 1947. State expenditure - excluding redemptions of loans - was 75,701 million marks, an increase of 22 per cent on the 1946 figure. The average cost of living index rose by 30 per cent, the average wholesale price index by 20 per cent. The State revenue - excluding loans - amounted to 71,463 million marks, or 20 per cent higher than in 1946. The ratio of income to expenditure was 94 per cent, or practically the same as the year before. Thanks to credits received from abroad and unconsolidated inland credits an equilibrium was reached without a new note inflation.

Before entering upon a more detailed study of the different items of State income
and expenditure similar remarks must be made as in earlier articles of this Bulletin. The figures in the accounts include numerous nominal items but do not show all the actual State revenue and expenditure. Again, the grouping of income and expenditure in the accounts does not give a quite correct idea of the character of the different items. Until the structure of the budget has been reformed - as is under preparation by a special committee - these figures are not a sound basis in analysing public finance. In this article adjusted figures have been used, unless otherwise stated. ${ }^{1}$ )

## EXPENDITURE IN 1947.

The principal groups of public expenditure and their changes during 1947 are seen from the following table.

EXPENDITURE.
(Excluding redemptions, adjusted figures)

|  | $\begin{gathered} \text { 1946 } \\ \text { Mill. } \mathrm{mk} \end{gathered}$ | $\begin{gathered} 1047 \\ \text { Mill. mk } \end{gathered}$ |
| :---: | :---: | :---: |
| Current expenditure | 50,580 | 60,001 |
| Capital expenditure. | 7,543 | 11,117 |
| Unspecified extra-bu diture | 3,862 | 4,583 |
|  | 61,985 | 75,70 |

Current expenditure amounted in 1947 to 60,001 million marks, or 19 per cent higher than in the preceding year. The distribu-

[^2]tion of current expenditure is given in the following table.

## CURRENT EXPENDITURE

(According to the accounts)

| Maingroups | $\begin{gathered} 1946 \\ \text { M } 1111 . \mathrm{mk} \end{gathered}$ | $\begin{gathered} 1947 \\ \text { Mill. mk } \end{gathered}$ |
| :---: | :---: | :---: |
| 1. President of the Republic | 5 | 6 |
| 2. Diet | 64 | 101 |
| 3. Government | 110 | 113 |
| 4. Chancellery of | 35 | 1 |
| 5. Ministry for Foreign Affairs | 170 | 183 |
| 6. Ministry of Justice | 355 | 485 |
| 7. Ministry of the Interio | 2,361 | 2,564 |
| 8. Ministry of Finance | 300 | 421 |
| 9. Ministry of Defence | 6,510 | 2,688 |
| 10. Ministry of Education | 1,952 | 3,343 |
| 11. Ministry of Agriculiture | 2,085 | 2,956 |
| 12. Ministry of Communications | 1,080 | 1,439 |
| 13. Ministry of Trade and Industry | 422 | 561 |
| 14. Ministry for Social Affairs | 2,023 | 2,636 |
| 14. A. Ministry of Supply | 318 | 255 |
| 15. Sundry general expenditure | 52,296 | 40,927 |
| 16. Pensions and relief payments | 825 | 1,042 |
| 17. Interest and expenditure on the Public Debt | 4,566 | 6,567 |
| 18. State industrial undertakings | 682 | 260 |

Total 76,159 66,578
The figures in the accounts are misleading particularly as regards the changes in the main groups ,,Sundry general expenditure", „Interest and expenditure on the Public Debt", and „Ministry of Defence".

First, in 1947 as in the preceding year, the group "Sundry general expenditure" included by far the greater part of all current expenditure. In fact, this main group which - apart from the nominal entries - has increased since 1946 includes most of the expenditure due to the war. The largest item was the war reparation payments to the Soviet Union and the consequent administrative expenses, i. e. 12,133 million marks ( 8,840 million in 1946). „Sundry costs under the Armistice Agreement", 831 million marks, and ,"Transfers of German assets and administrative expenses due to them", 1,031 million marks, are also related to war reparations. The former item has decreased markedly since 1946 when it was 5,702 million marks. It included about 200 million marks Control Commission expenditure and about 500 million due to transfer of German property to the U.S.S. R. The latter item was the cost of deliveries which the State had agreed to make instead of former German assets claimed by the Soviet Union. When,
in addition to these items, the advances granted to suppliers of war reparations goods - 2,704 million marks - are included, the war reparations expenditure in 1947 totalled 16,699 million marks, or 28 per cent of the current expenditure. In 1946 the corresponding amount was 16,126 million marks, or 32 per cent of the current expenditure. The proportional decrease in war reparations expenditure in 1947. was chiefly due to the fact that the transfers of German assets were nearly all made in 1946.

The second largest item among ,,Sundry general expenditure" consisted of the indemnities paid to the population of the ceded territories in compensation for their losses. According to the accounts these expenses amounted to 8,919 million marks in 1947 ( 25,037 million in 1946). They were chiefly ,"paid" by surrendering bonds belonging to the Second Indemnity Loan and trust certificates of the Holding Company to those entitled to compensation. The surrendering of these bonds and certificates is recorded as an expenditure in the accounts, but actually no cash payment occurs until interest and amortisation are paid on them. Including only the cash payments, indemnity expenses in 1947 totalled 9,192 million marks and were 15 per cent of current expenditure (in 1946 they were 7,249 million marks, or 14 per cent).
This main group also includes some large items due to State efforts to prevent the advance of prices. The largest item was ,,Stabilisation of prices and promotion of distribution of domestic agricultural products", which amounted to 3,812 million marks. This expenditure was due to the fact that milk, butter, cheese and grain were sold to consumers below production cost and the State paid the producers the difference. The second largest item was "Compensations for excessive import or production costs", 3,011 million marks, due almost entirely to the selling of imported grain to consumers below the purchase price. Other bounties to consumers are "Reduction of fertiliser prices", 318 million marks, and „Price reductions for milk and nutritive fats", 175 million marks.

The largest but one of the main groups of current expenditure is „Interest and

Expenditure on the Public Debt". Yet, if one omits the expenditure booked in this main group but included above among Indemnity expenses, the actual amount of interest on the Public Debt is 2,834 million marks ( 2,201 million in 1946). In the main group "Ministry of Defence" the actual expenditure was only 3,176 million marks in 1946 and decreased only slightly in 1947.

Among other current expenditure the great increase for the Ministry of Education claims special attention. The greater part of this was due to increased teachers' salaries. The expenses of the Ministry for Social Affairs still consisted chiefly in public assistance. The largest individual item is "Compensation for physical disability or illness contracted in the war or service", which amounted to 1,350 million marks in 1947 ( 1,209 million in 1946). The greater part of the Ministry of Agriculture's expenditure continues to be due to the resettlement of the displaced population and the carrying out of the Land Expropriation Act which explains its increase. Finally, as regards the expenditure of the Ministry of the Interior it should be noticed that this Ministry also controls public health. Most of the expenditure in this group was for hospital maintenance.

State investments were higher by 47 per cent in 1947 than in the preceding year, this being chiefly due to the increase of "Revenue-producing capital expenditure" of which the following table gives an idea.

> REVENUE-PRODUCING CAPITAL EXPENDITURE.
> (Partly adjusted figures, excluding redemptions)

Investments in State business undertakings, forests and landed property, which of those mentioned above are really the only
revenue-producing investments, remained almost unchanged in 1947. On the other hand, auxiliary grants, on which fairly low interest is generally paid, have doubled. Besides this an essential part of the transfers to State funds have been used to finance the auxiliary grants mostly granted to promote reconstruction and housing.

The main group "Capital expenditure not producing revenue" remained on the whole unchanged and amounted to 1,465 million marks in 1947. Of the same character are certain extra-budgetary expenses of which the largest item was the acquisition of stocks, 3,362 million marks ( 3,148 million in 1946).

## REVENUE IN 1947.

To cover State expenditure the share of taxes was practically the same as in 1946. In 1946 they sufficed to meet all current expenditure, and were 85 per cent of the total expenditure excluding the redemption of loans. In 1947 taxation yielded 17 per cent more than the year before, or 61,550 million marks. Thus, in spite of the increase of public expenditure the taxation receipts still exceeded current expenditure, and even of the total expenditure excluding redemption 81 per cent could be met from taxation.

The revenue from taxation was divided as shown in the table below.

REVENUE FROM TAXATION.
(Adjusted figures)

|  | 1946 |  | 1947 |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Mill. mk | $\begin{gathered} \% \text { of } \\ \text { all } \\ \text { taxes } \end{gathered}$ | Mill. mk | $\begin{aligned} & \% \text { of of } \\ & \text { all } \\ & \text { taxes } \end{aligned}$ |
| Direct taxes | 22,262 | 42.3 | 22,093 | 35.9 |
| Indirect taxes | 29,016 | 55:1 | 37,682 | 61.2 |
| Stamp duty | 1,372 | 2.6 | 1,775 | 2.9 |
|  | 52,650 | 100.0. | 61,550 | 100.0 |

In 1947 the yield from indirect taxes was -by far the largest. Direct taxes, which had been 40.9 per cent of the total taxation revenue in 1945 and 42.3 per cent in 1946, in 1947 fell as low as 35.9 per cent.

DIRECT TAXATION.
(Adjusted figures)

|  | 1946 |  | 1947 |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Mill. mk | $\begin{gathered} \text { \% of } \\ \text { all } \\ \text { taxes } \end{gathered}$ | Mill. mk | $\begin{aligned} & \text { \% of } \\ & \text { all } \\ & \text { taxes } \end{aligned}$ |
| $\begin{gathered} \text { Income and pro- } \\ \text { perty tax } \end{gathered}$ | 14,029 | 26.7 | 17,130 | . 27.8 |
| II Capital Levy 1) | 4,830 | 9.2 | 4,057 | 6.6 |
| Extraordinary income and pro- |  |  |  |  |
| perty taxes ... | 3,217 186 | 6.1 0.3 | 635 271 | 1.1 0.4 |
| Total | 22,262 | 42.3 | 22,093 | 35.9 |

As seen from the above table the diminished importance of direct taxes was due to the final abandonment of the extraordinary taxes introduced during the war. The regular State Income and Property tax hitherto the most important - increased both in absolute amount and proportionally, being 27.8 per cent of the total revenue from taxation. This increase is chiefly due to the progressive scales of taxation and to the fact that the social deductions allowed from taxable incomes are expressed in marks and not as proportions of the amount of taxes. The result of this is that when income and property values increase nominally because of the inflation, the taxes do not increase in proportion but considerably more.

|  | INDIRECT TAXATION. <br> (Adjusted figures) |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | 1846 |  | 1047 |  |
|  |  | Mill, mk | $\begin{aligned} & \% \text { of } \\ & \text { all } \\ & \text { taxes } \end{aligned}$ | Mill.mk | $\begin{gathered} \% \text { of } \\ \text { ould } \\ \text { andes } \end{gathered}$ |
| Sales tax | ...... | 12,228 | 23.2 | 16,870 | 27.4 |
| Taxes on | alcohol | 10;307 | 19.6 | 11,608 | 18.9 |
| Excise |  | 4,345 | 8.2 | 4,807 | 7.8 |
| Tobacco |  | 3,585 | 6.8 | 4,022 | 6.5 |
| Matches |  | 245 | 0.5 | 241 | 0.4 |
| Beer |  | 236 | 0.4 | 239 | 0.4 |
| Other |  | 279 | 0.5 | 305 | 0.5 |
| Customs | revenue | 2,136 | 4.1 | 4,397 | 7.1 |
| Import | duties | 2,136 | 4.1 | 4,397 | 7.1 |
| Export | duties | 0 | 0.0 | - | 0.0 |
|  | Total | 29,016 | 55.1 | 37,682 | 61.2 |

The sales tax has continued to grow and is about to become the most important of all taxes. In 1947 it accounted for 27.4 per cent of the total tax. revenue, or nearly as

[^3]much as the regular Income and Property tax. In fact, the sales tax is the one which most sensitively follows the movements of prices and turnover. Taxes on alcohol are also important: they here include the surplus of the Alcohol Monopoly and all direct and indirect taxes paid by this firm; in fact, all these items are taxes on consumption which are included in the prices of alcoholic liquors. The importance of income from alcohol is decreasing. In 1947 it amounted to 18.9 per cent of the total revenue from taxation while in 1945 this figure was as high as 31.7 per cent. Of other consumption taxes the import duties increased in 1947 with imports to twice the figure recorded at the end of 1946. The yield from excise on tobacco was almost as high.

The importance of other State revenue is but slight. State undertakings, forests and farms brought in 2,241 million marks net in 1947, equal to 3 per cent of the total revenue excluding State loans. The group "Sundry revenue" was slightly more, but capital revenue - apart from loans - was only 1,754 million marks ( 527 million in 1946).

## THE PUBLIC DEBT IN 1947.

The accounts show that the Public Debt at the close of 1947 amounted to 117,763 million marks, and the year's increase to the booked value of the Debt was thus 12,994 million marks. The most important changes appear from the following table.

PUBLIC DEBT.

| (According to the accounts) |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | 1946 |  | 1947 |  |
|  | $\begin{aligned} & \text { Mill. } \\ & \text { mix } \end{aligned}$ | $\begin{aligned} & \text { \% of } \\ & \text { total } \\ & \text { debt } \end{aligned}$ | $\frac{\mathrm{Mill}}{\mathrm{mk}}$ | $\begin{aligned} & \text { \% of } \\ & \text { total } \\ & \text { debt } \end{aligned}$ |
| Foreign debt | 31,633 | 30.2 | 38,557 | 32.7 |
| Internal debt .. | 37,136 | 69.8 | 79,206 | 67.3 |
| Debt to the |  |  |  |  |
| Bank of Fin- |  |  |  |  |
| land ...... | 17,322 | 16.5 | 18,386 | 15.6 |
| Tndemnity loan | 11,984 | 11.4 | 14,533 | 12.4 |
| Other internal |  |  |  |  |
| debts. | 43,830 | 41.9 | 46,287 | 39.3 |
| Total | 104,769 | 100.0 | 117,763 | 100.0 |

Like the State revenue and expenditure, the debt figures in the accounts are not entirely correct. In the course of 1947 the actual net amount of loans received by the State was 7,787 million marks; new loans
totalled 13,604 million and old ones were redeemed to a value of 5,817 million marks. As State expenditure in 1947 exceeded the State revenue by 4,238 million marks, the deficit could thus be well covered by the loans, and the cash of the Treasury even increased by 3,549 million marks.

In studying the different groups of loans it should be noted that the amount of foreign debt at the end of 1946 - after some adjustments of the booked values - was 33,930 million marks, and thus actually increased by only 4,627 million during 1947. The largest new loans were 20 million dollars from the Export-Import Bank and two 10 million dollar loans for purchasing American Army surplus goods; all these were only partly used during 1947.

As regards the internal debt the bond loans decreased by 1,186 million marks. Long-term securities were sold to a value of over 1 billion marks, but amortisation of previously raised similar loans amounted to over 2 billion. The Indemnity Loan, on the other hand, increased by 2,549 million marks, but - as stated earlier - this increase does not mean income to the State but future expenditure.

According to the above table the debit of the State to the Bank of Finland inereased by 1,064 million marks during 1947. It must be stressed that this did not promote inflation, because the credits obtained from the Bank of Finland were not in reality used to finance State expenditure as the cash of departments and administration increased by 3,549 million marks. Thus the State actually reduced the amount in circulation by over 2 billion marks.

Such a marked increase in Treasury funds was due to the fact that the Post Office Savings Bank funds held by the State had increased. In Finland the Post Offices have Savings Banks, and the public's savings and postal giro accounts with them are automatically disposed of by the State. These credits, which are entirely independent of State measures, have been of very great importance to public finance in recent year: in 1947 the State received from the Post Office Savings Bank 4,900 million marks, if the State bonds bought by that bank are also included. In fact, just because of these credits the State was able to finance its trans-
actions in 1947 without a new note inflation.

## SURVEY OF 1948.

Economic life in 1948 on the whole began to show sings of stability. The goods available were much more numerous thanks to an increase in home production and in imports. The labour market was fairly calm and wages rose only slightly in comparison with the preceding years. Thus the pressure on prices was reduced, and their rate of increase was retarded until the end of the summer when they began to fall. In November the cost of living index was only 12 per cent and the wholesale price index 10 per cent higher than in December 1947.

In spite of this small rise in prices, State expenditure has increased very much since 1947, partly because earlier prise and wage increases were being fully felt. On the other hand large subsidies were used to keep prices down. In addition considerable sums were needed for many kinds of new and re-investments which could no longer be postponed. This large expenditure rendered any great reduction of taxes impossible.

In the ordinary budget for 1948 the total State revenue was estimated at 72,494 million marks and total expenditure at 72,445 million. In the course of the year three supplementary budgets were passed, the last one on December 30th. They added 11,003 million marks to revenue and 20,501 million to expenditure, whereby the estimate of total revenue rose to 83,497 million marks and that of total expenditure to 92,946 million. In these supplementary budgets the original estimates of taxation yield were not altered to correspond to current conditions, so the deficit of 9,449 million marks in the total budget is merely formal.

So far only some very general preliminary data of public finance in 1948 are available. Many of the budget grants were very much exceeded so that actual expenditure may be estimated at above 100 billion marks.

More preliminary figures are available regarding taxes and loans. In JanuaryNovember 1948 the tax yield was a round
sum of 85 billion marks, or one-third more than assumed in the budget. Of this amount the income and property.tax, including taxes paid by the Alcohol Monopoly, yielded, about 28 billion and the sales tax about 25 billion marks. Import duties doubled, yielding about 8 billion marks. The profit of the Alcohol Monopoly gave the State about 7 billion marks, and the excise the same amount.

New foreign credits by the end of Novembes exceeded by 5 billion marks the redemption of previous foreign credits. On the other hand the redemption of internal credits considerably exceeded the new loans, the internal consolidated debt decreasing by about 2 billion marks and the unconsolidated debt by 3 billion. Thus the total public debt was almost the same as at the end of 1947.

# CONSOLIDATED BALANCE SHEET AND INCOME STATEMENT OF FINNISH INDUSTRY 1947. 

BY
ESA KAITILA, DOCT. PHIL.

To supplement studies of the present financial situation of industry in Finland the Economic Research Institute has drawn up a consolidated balance sheet and income statement of industry in 1947. An attempt has also been made to show the expenditure of industry in the same year.

## METHOD OF STUDY.

The basis of the investigation has been the balance sheets for 1947 of 189 industrial enterprises, as samples of the whole of industry, and supplementary data concerning them. The number of workers they employed was about 40 per cent of the total number of industrial workers in the country. The results obtained are naturally not absolutely accurate. The chances of error, however, seem to be fairly small, varying for particular figures perhaps from 3 to 10 per cent. The figures relating to the whole of industry have been calculated by multiplying the data given for the selected firms, each size class and branch of production separately, by ratios obtained by comparing the number of workers employed by the whole of industry run for profit with that of the selected 189 enterprises in 1945.

It should be noticed that, although the consolidated balance sheet and income statement have been drawn up like those of a Joint Stock company, they include also all industrial firms of Finland not operated on that basis (privately owned enterprises,
co-operative societies, and industrial enterprises of the State or local governments, not Joint-Stock).

## BALANCE SHEET AND INCOME STATEMENT.

Consolidated Balance Sheet of Industry in 1947.

| Assets | Million marks |
| :---: | :---: |
| Real property: |  |
| Financial property | 35,270 |
| Liquid property .. | 39,020 |
| Fixed property | 51,810 126,100 |
| Valuation items | 230 |
| Transfers | 790 |
| Special real property: |  |
| Financial property | 3,410 |
| Fixed property ... | 280 3,690 |
| Total | 130,810 |
| Liabilities |  |
| Loan capital: |  |
| Short-term | 73,220 |
| Long-term | 3,940 77,160 |
| Valuation items: |  |
| Sums written off | 7,100 |
| Adjustments of value ${ }^{-}$ | $810 \quad 7,910$ |
| Transfers (taxes, advances, reserves) | 3,870 |
| Capital: |  |
| Share capital: |  |
| Redeemed .........:.. 200 |  |
| With shareholders . ... . 17,300 |  |
| With Holding Company for Indemnity Shares 1,200 | 18,700 |
| Funds | 17,150 |
| Profit for previous years ...... | 1,790 |
| Profit for 1947 | 4,230 41,870 |
| Total | 130,810 |

Among the liabilities in the balance sheet the short-term loan capital includes a considerable amount of advances of which a large part were granted by the Commission for War Reparations (Soteva). Of amounts transferred, on the other hand, $3 / 4$ are tax reserves. It is further noteworthy that the amounts written off do not show the total cancellation on the industries' fixed property in the course of years. It has been impossible to obtain this figure because many enterprises write off according to the net method. Under the Share Capital the amount of 1,200 million marks held by the Holding Company for Indemnity Shiares and the dividends on this sum are surrendered as Capital Levy which was to compensate the displaced population for their losses by the cession of territory. About one-half of the "redeemed".shares have been re-acquired from the Holding Company by the enterprises.

As regards property the industrial firms have generally estimated their liquid property rather conservatively. During and after the war renewal of fixed property has not been possible to any great extent; as the appreciation in value has also been comparatively slow, book values are still rather low considering the depreciation of money.

The income statement is based on the net method so that rents, materials and ,other ordinary expenses" have been subtracted from the income. The wages and salaries in the table include also managers' salaries
to some extent, perhaps about $300-400$ million marks. (The distribution of wages expenses into three groups, i. e. those of the workers, personnel and managers, is shown later on page 27). The personnel includes foremen but not the higher managers. The total tax expenses, 5,410 million marks, do not denote the taxes and rates paid on the income of 1947 but the total amount booked that year or tax-reserves included in the costs of the year. The taxes actually paid may in some measure differ from the sum in the balance sheet.

## PROFIT.

The aggregate profits of Finland's industries in 1947 is shown as 4,230 million marks. In 1946 the corresponding total profit was 3,200 million marks, the increase for 1947 being about 33 per cent. In part this increase was due to the inflation the rise in the wholesale price index from the average for 1946 to the average for 1947 was 20.8 per cent - and, if this factor is eliminated, the increase of real profits can be estimated at only about 400 million marks. This rise was a result of the increase in production and turnover. It is interesting to study how the profits have been distributed.

Million marks Per cent

| Dividends to shareholders ..... | 922 | 21.8 |
| :--- | :--- | ---: | ---: |
| Dividends to Holding Com- |  |  |
| pany for Indemnity Shares | 106 | 2.5 |
| Reinvested capital........ | 3,202 | $\mathbf{7 5 . 7}$ |
|  | 4,230 | 100.0 |

Particulary notable is the amount reinvested which is about $3 / 4$ of the whole profits. Here it must be kept in mind also that the dividends paid to the Holding Company for Indemnity Shares are comparable with taxes, as already stated.

## PROFITABLENESS.

This can be measured in various ways, the most reliable, especially at a time when the internal value of money varies greatly, probably being the relation of profit to turnover. The total profit of Finnish industry in 1947 .(4,200 million marks) was 2.6 per cent of the total turnover which was 163,300 million marks. In 1946 the corresponding figure was 2.7 per cent. In the last pre-war years the ratio of profit to turnover was nearly twice as great.

In the most important branches of industry the ratio of profit to turnover varied from 0.8 to 5 per cent. Above the average were the printing industry, the lighting and power transmission industries, socalled ,industrial complexes", and the leather and rubber industries.

The relation of profit and dividends to the whole capital is a fairly uncertain standard of profitableness, owing to inflationary factors. Fet it is good to remember that in 1947 on an average 5.3 per cent of the nominal value of the shares and 1.8 per cent of the taxation value of the share capital was paid as dividends to shareholders. The total taxation value of the share or corresponding capital was about 55,000 million marks, or nearly three times the nominal value. On the shares held by the Holding Company, 8.8 per cent of their nominal value and 2.6 per cent of the taxation value was paid as dividends. The lowest percentage fixed by law is 2.5 .

## LIQUIDITY.

The distribution of profits shows that in 1947 the characteristic feature was the need of industry for liquid assets. The causes of this are as follows: Stocks must be replenished after the depletion caused by the war, repairs, basic improvements and re-equipment of machinery are required, all of which were neglected during and immediately after the war because of the shortage of materials. In addition to all this, long-term investments are necessary. Social expenses, for instance child allowances and building of workers' houses, have increased the urgent need for money. Simultaneously wages have increased proportionally more steeply than the turnover, the rate of interest has risen, taxes demand considerable sums annually, and the controlled prices on their part have narrowed the margin of profit- for the home-market industries.

The lack of liquid assets is also clearly reflected in the consolidated balance sheet. The total capital of the industries has greatly increased compared with 1946, by about 45 per cent. This increase, however, concerns mainly the item "loan capital". The loan capital ( $=$ debts and amounts transferred) has risen from 48,000 to 81,000 million marks and thus has increased
by about 69 per cent in 1947. During this period their own capital (= share capital, funds and profit) has increased by only about 12 per cent. In 1946 loan capital accounted for 56 per cent of the capital of industry, but in 1947 for as muich as 66 per cent.

This increase in industry's own capital has been largely nominal, an adjustment of value of fixed capital. New transfers to the profit and loss account were fairly small in 1947 as new issues of shares were rather scarce, and probably only about 1,500 million marks of the profit from 1946 was reinvested. In this analysis it must be remembered, however, that - as mentioned already - the property is not valued at a level equivalent to the depreciated monetary value.

From the point of view of liquidity it is important that the greater part, 95 per cent, of the debts is short-term, although it must be remembered that part of what is booked as short-term, for instance debts to banks, is in reality long-term.

COSTS.
The next table is based on the consolidated income statement of industry and supplementary figures calculated in various ways - in the same way as a private firm would show its profit and loss account, without considering more closely the wider aspects of the payments. This classification may be inaccurate in many respects, but in all essentials it probably shows the situation in industry in 1947.

Costs of Industry in $194 \%$.

|  | Million marks | Per cent |
| :---: | :---: | :---: |
| Raw materials, semi-finished products and accessories ........... | 88,840 | 53.7 |
| Wages and salaries | 41,500 | 25.1 |
| Fuel, electricity, steam | 9,800 | 5.9 |
| Taxes and tax reserves | 5,410 | 3.3 |
| Social expenditure (child allowances, national pensions premiums, voluntary expenditure) | 3,590 | 2.2 |
| Repairs | 3,000 | 1.8 |
| Interest | 2,700 | 1.6 |
| Expenses, rent | 2,200 | 1.3 |
| Amount written off | 2,160 | 1.3 |
| Sales costs | 1,630 | 1.0 |
| Expenditure not connected with actual production .............. | 320 | 0.2 |
| Profit | 4,230 | 2.6 |
| Total | 165,380 | 100.0 |

According to the pay-roll of industry workers accounted for 19.7 per cent. of the total turnover, personnel for 4.3 per cent, and managers for 1.1 per cent. The profits remaining within the firm were 1.9 per cent of the gross income in 1947. The dividends paid to the Holding Company were 0.1 per cent and those paid to shareholders 0.6 per cent.

DISTRIBUTION OF WAGES AND SALARIES.
The total wages and salaries paid by industry in 1947 -were 41,500 million marks, or 25.1 per cent of the total turnover. They were divided among the different groups as follows.

| - | Million marks | Per cent of total pay-roll |
| :---: | :---: | :---: |
| Workers | 32,700 | 78.7 |
| Personnel | . 7,000 | 17.0 |
| Managers | 1,800 | 4.3 |

GROSS SURPLUS.
Gross Surplus of Industry in 1947.

| Cose | $\begin{aligned} & \text { MUllion } \\ & \text { marks } \end{aligned}$ | Per cent |  |
| :---: | :---: | :---: | :---: |
| Taxes | 5,410 | 45.8 |  |
| Amount written off | 2,160 | 18.3 | 64.1 |
| Profit: |  |  |  |
| Dividends to Holding |  |  |  |
| Company for Indemnity |  |  |  |
| Shares | 106 | 0.8 |  |
| Dividends to Shareholders | 922 | 7.8 |  |
| Transfers to Profit and |  |  |  |
| Loss Account etc. | 3,202 | 27.2 | 35.9 |
| Total | 11,800 |  | 100.0 |

A study of the above table reveals that taxes in 1947 amounted to 45.8 per cent of the gross surplus remaining after eliminating all expenses paid in money. The dividends to the Holding Company must also be reckoned as taxes; they amount to nearly 47 per cent of the gross surplus. The sums written off were 18.3 per cent, or 2,160 million marks. This low figure is chiefly due to the regulations of the present Income and Property Tax Law: the amounts written off have to be calculated according to the original acquisition or production value.

## GROSS PROFIT (,ppre-tax profit").

Perhaps more clearly than in the preceding table, the heavy taxation of industry is shown in the followning, which illustrates the gross profit of all industries in Finland and its distribution.

Gioss Profit of Industry in 1947.

|  | Million marks | Per cent |  |
| :---: | :---: | :---: | :---: |
| Taxes | 5,410 | 56.1 |  |
| Profit: |  |  |  |
| Dividends to Holding |  |  |  |
| Company for Indemnity |  |  |  |
| Shares .............. | 106 | 1.1 |  |
| Dividends to Shareholders | 922 | 9.6 |  |
| Transfers to Profit and |  |  |  |
| Loss Account etc. . ... | 3,202 | 33.2 | 43.8 |
| Total 9,640 |  | 100.0 |  |

The taxes, including the dividends to the Holding Company, were 57.2 per cent of the gross profit of industry. Yet it must be noted that the figure representing taxes does not state the amount of taxes paid on the 1947 income but the taxes booked during that year and the amounts reserved for future taxes.

## SUMMARY.

The profits of industry expressed in marks were about 33 per cent greater in 1947 than in 1946. As this increase was partly due to inflationary factors, the real increase in profit may be estimated at only 11 per cent. It should be particularly noted that the amount of profits reinvested was about $3 / 4$ of the total profit.

This circumstance, as well as the considerable increase of loan capital, from 48,000 to 81,000 million marks, indicates that the need for liquid assets has become urgent. The growth of the industries' own capital has, on the other hand, been very slight and even that partly nominal. It must be observed, however, that the booked values of their fixed capital are fairly low because of the marked depreciation in the value of money.

The profitableness measured by the ratio of profit to turnover has remained practically unchanged in the years 1946 and 1947, though varying greatly in the different fields of production.

Of the gross income in 1947 the costs of raw materials, semi-manufactures and necessaries accounted for 53.7 per cent, wages and salaries for 25.1 per cent and other expenses for 18.6 per cent, with a remaining booked profit of 2.6.per cent.

## ITEMS.

Supplementary budget. In December the Diet passed a third supplementary budget for 1948, thereby increasing revenue by 11.5 billion marks and expenditure by 11.1 billion.

War indemnity, penalties for delayed delivery. In compliance with the Finnish Government's request last autumn for the cancellation of delay penalties imposed in the fourth indemnity year, the Soviet Union, in connection with the new trade agreement, consented to forego two-thirds of the penalty or well over 600,000 , indemnity dollars". This decision was very important for Finland. - In the second indemnity year two-thirds of the penalty was similarly cancelled and in the third year the whole sum.

New foreign credits. According to an agreement of December 2nd, 1948, the Export-Import Bank of Washington granted the Bank of Finland credit to an aggregate amount of 10 million dollars for the purchase of machinery, appliances and requisites by the woodworking industry. The loan is to be repaid between 1952 and 1958; the rate of interest is $31 / 2$ per cent. An extensive purchase and delivery plan has been made according to which the credits will be used.

Trade agreements. In December a trade agreement for 1949 was signed between Finland and the Soviet Union. According to it the exchange of goods will be larger both in value and quantity than the 90 million dollars' worth agreed upon for 1948. Finnish exports to will exceed her imports from the Soviet Union.

The agreement secures an ample supply of cereals until the new harvest. Wheat, oats and maize will be imported but no rye, because the Finnish crop was very much larger last autumn than in 1947. As the cereals imported from the Soviet Union have been reduced from 70 to 40 per cent of the total, it will be possible to buy more of other important articles, even such as have not appeared in previous agreements. Sugar, liquid fuel, oils, fertilizers, iron, steel, machinery and accessories, automobiles, tractors, chemicals and textiles. Exports also will be more varied than before, the largest item being wooden houses and other wood products such as sawn timber, pulp-wood, cellulose, pulp, newsprint and piles. The export quota for metal goods, 5 million dollars, is much larger than before.

A new trade agreement between Finland and Norway was signed in December 1948 providing a considerable increase in trade. It refers to about 35 million Norwegian crowns' worth of Finnish goods and about 32 million crowns' worth of Norwegian goods. Of the quotas for the year beginning November 1st, 1948, the Finnish import list includes such articles as raw material for the margarine and soap factories, herrings, nitrate of lime, aluminium and chemicals. Finnish exports include timber, plywood, china and earthenware, iron, steel and other metal goods, and machinery and accessories.

A supplementary quota agreement was signed between Finland and France in December 1948. The agreement in force until April 1st, 1949, of which an account was given in Nos. 3-4; 1948 of this Bulletin, assumes a total trade of about 9 billion franes which, according to this supplementary agreement, is expected to
increase to about 14 billion francs. Finland's export increase comprises woodworking products. Her import increase refers to iron and steel products, electrical and other machinery and textiles.

A Finnish-Danish trade agreement was signed in November 1948 to supplement that agreed to in March 1948 (see Bulletin Nos. 3-4, 1948) ; it will be in force until May 1st, 1949. This includes about 1,600 million marks' worth of Finnish and 1,500 million marks' worth of Danish goods. Finland will export such goods as wood products, sanitary chinaware and machinery, and import butter, pork, seeds, clothing, pharmaceutical articles, colours and dyes, metal products, machinery and electrical appliances.

A new trade agreement between Finland and Belgium was signed in December 1948, to be in force until November 5th, 1949. The goods concerned are assumed to amount to 2 billion Belgian francs. Finland will export woodworking and paper industry products such as sawn timber, pit-props, telegraph poles, wooden houses, pulp, cellulose, plywood, pasteboard and newsprint; various machinery and accessories, zinc concentrate and glassware. The most important imports are iron, steel and their products.

In the beginning of 1949 trade agreements are expected to be made with England, Sweden, Western Germany, Italy and Rumania.

The ice-breakers. Among the ships delivered to the Soviet Union as war indemnity were Finland's only sea-going icebreaker, the State owned "Jääkarhu", the "Voima" built for the outer archipelago, and the harbour ice-breaker „Turso" of the city of Helsinki. At present the State owns only
three medium sized ice-breakers for the outer archipelago, "Sisu",. „Tarmo" and "Sampo", and Helsinki the "Otso", their capacity not being sufficient for severe winters. In consequence the "Murtaja" and ,Apu" which are intended for the inner archipelago, have had to be used for very difficult tasks.

Steps have been taken to relieve the situation. The construction of a new sea-going ice-breaker to replace „Jääkarhu" has recently been contracted with the Wärtsilä Concern. The total cost is estimated at 750 million marks and the work is expected to be finished early in 1952. The same firm is building a new harbour ice-breaker for Helsinki at a total cost of about 85 million marks. It will be provided with fire-fighting apparatus and will be ready by April 1949. The diesel engines for both boats have been ordered from Atlas Diesel Ab in Sweden.

Cessation of work in 1948. According to preliminary data from the Research Office of the Ministry for Social Affairs 80 labour conflicts in 1948 resulted in cessation of work; about 100 employers and about 15,400 workers being affected. In comparison with the year before - 228 cessations of work, 2,900 employers and 114,700 workers - this was a great reduction. The number of working-days lost is estimated at about 220,000 as against nearly 480,000 in 1947.

New economic periodical. The commercial bank of Kansallis-Osake-Pankki has started a quarterly publication of its own called Economic Review. It will include a general economic survey, statistical data and articles by experts in various spheres; and will appear in Finnish and English.

## BANK OF FINLAND

(Cable address Suomenpankki)

BOARD OF MANAGEMENT:
Tuomioja, Sakari, Governor
Kivialho, K.
Raittinen, Paavo
Kekkonen, Urho
Sundman, C. G., ad. int.

HEADS OF DEPARTMENTI:

Suviranta, Br., Economic Adviser
