

## THE FINNISH MARKET REVIEW.

THE MONEY MARKET.
After the unfavourable change that occurred on the money market in the spring, its general tendency remained stringent. In June, in particular, the decrease in deposit accounts attained considerable proportions. Already in July the situation as regards deposits became more satisfactory, but the increase fell short of that in July last year. The slightly greater activity in deposit business during July and August was mainly due to the public growing calmer as their cash position improved. This was brought about by higher wages, paid retroactively to a considerable number of wage earners, by higher child allowances and the redemption of indemnity bonds and interest payments on them. Exports, too, rendered more than usual. The demand for credit was still large, so that the banks had to observe great restraint in granting credit. In the autumn the marketing of crops, the financing of timber purchases and other factors are expected to accentuate the demand for credit.

Information concerning all credit institutions is available for June and July. In June the total deposits by the public grew by 793 million marks, the corresponding increase a year earlier having been 2,854 million marks. Deposit accounts fell off by 1,162 million marks, whereas in June 1949 there was an increase of 634 million. Owing to the reduction in this and the two previous months, the increase in deposit accounts during the first half of this year,

5,432 million marks, was appreciably less than the corresponding figure for 1949 , 9,498 million marks. July was in so far more satisfactory as deposits accounts increased, but in comparison with July 1949 the increase was small, 828 million marks as against 1,878 million last year. At the end of July the total of deposit accounts was 106,368 million this year and 89,294 million last year.
Deposits by the public in the Commercial Banks increased in June by 1,314 million marks and in July by 833 million marks; in July last year the increase was as much as 2,521 million: The share of deposit accounts, 259 million marks, in the growth of the total deposits in July was considerably smaller than that of cheque accounts. In July 1949 deposit accounts increased by 618 million and in the first seven months of this year by 2,613 million as against 3,287 million last year.

The demand for credit was large on the whole money market especially during the last few months and was strongly felt also by the Commercial Banks, they being only able to satisfy it to a limited extent. In July their advances to the public thus grew by only 83 million marks, whereas in July 1949 the corresponding increase was 854 million. By the end of July the credits granted by the Commercial Banks had this year grown by 5,501 million, which was distinctly below the corresponding figure for 1949, or 9,021 million.

In the position of the Bank of Finland no great changes have occurred during the
last few weeks. Its credit granting displayed a rise in the spring owing to increased requirements of the Government, but in early summer it began to decrease; Treasury bills were then reduced while other credits remained unaltered, as the central bank pursued a cautious policy towards its own cients. The same restraint was exercised towards other credit institutions, partly in order to counteract the growing tendency towards inflation and partly because the credit of the Bank of Finland had then been given a "ceiling", a limit having been fixed that cannot be exceeded. This refers to all grants of credit. In July the credits granted by the Bank rose again owing to the stringency in the financial position of the Government and to the circumstance that other credit institutions required the help of the central bank to a greater extent than usual in consequence of the pressure of the money market. Rediscounted bills were at their highest in the last week of June, at 3,102 million marks, after which they began to decrease as the position of the Commercial Banks grew easier. Bill credits to the Government increased to an unexpected height, reaching 24,330 million on July 15, and after some fluctuations 25,230 million on August 31. Subsequently there was a slight drop. On account of grants of credit and the large demand for cash, the note circulation during the summer increased to record proportions. The peak so far was reached in the last week of August, when the note circulation totalled 34,014 million marks. One year before it was 28,677 million marks or close on 5,500 million less.

## PRIOES.

In regard to prices June was an uneasy and unfavourable month, a considerable rise occurring chiefly in the price of some agricultural produce and in rents. The cost of living index (August 1938-July 1939 $=100$ ) rose from 871 in May to 936 in June, an advance of 65 point or 7.5 per cent, or more than in any former month during the current year. The wholesale price index also rose, but not as much as the cost of living index, partly because rents are not included in it. The most detrimental effect of this powerful rise of the cost of living
index was that from July 15 wages had to be raised, in accordance with the wages agreement, by 5 per cent. As the index had risen dangerously near 946 points; at which the next increase in wages would have to be undertaken, the Government introduced special measures for lowering the index by reducing some prices, e.g. for sugar and coffee, and raising child allowances. Price control was also reintroduced in part at the beginning of August. For these reasons the cost of living index in July recorded a drop of 2 points to 934 . Wholesale prices, on the contrary, continued to rise in July to 1,272. The question of prices and wages and of the course of inflation is still at a critical stage owing to the trade unions making fresh demands for higher wages.

## TRADE AND INDUSTRY.

Foreign trade was very lively throughout the summer. Both imports and exports recorded fresh peaks, not only in value, but also in volume. As is generally the case early in the year, there was a surplus of imports until June; when exports exceeded imports by 844 million marks. In July the surplus of exports increased to fully 2,239 million marks. Imports for January-July, 47,444 million marks, were, nevertheless, still 5,742 million larger than exports for the same period, 41,702 million. In the previous year the surplus of imports for the corresponding period amounted to 3,884 million marks.

Figures for industry are now available for the second quarter of the year. They show that, although the volume index for all industry $(1935=100), 150$ points, had dropped in comparison with the first quarter, when it stood at 166, it was this year higher for the second quarter than a year ago, when it stood at 144. Increase in production has therefore continued in spite of many obstacles. For the home market industry the increase was comparatively modest, from 182 in 1949 to 184 this year, but the exporting industry which experienced a selling crisis a year ago, expanded much more, from 91 to 102. As building has been very lively during the past few months, employment was satisfactory during the whole of the summer.

## CONTENTS OF THE TABLES.

## 1. MONEY MARKET.

Bank of Finland:

1. Statement.
2. Note issue.
3. Notes in circulation, foreign currency and cover for the issue of notes.
4. Note reserve, home loans and rediscounted bills.
5. Treasury bills and balances of current accounts.
6. Rates of exchange.

Commercial Banks:
7. Home deposits and the credits from the Bank of Finland.
8. Home loans.
9. Position towards foreign countries.
10. Foreign payment position of all banks.
11. Deposits in Post Office Savings Bank.
12. Deposits in the savings banks.
13. Deposits in co-operative credit societies and consumers' co-operative societies.
14. Deposits in all credit institutions.
15. Insurances in life assurance companies.
16. Changes in number and capital of limited companies.
17. Bankruptcies.
18. Stock Exchange.
19. Stock Exchange index.
II. STATE FINANCES.
20. Public Debt.
21. State revenue and expenditure.
22. Collection of customs.
23. Collection of excise dues.
III. TRADE AND INDUSTRY.

## Foreign trade:

24. Value of imports and exports.
25. Value of imports and exports in different classes of goods.
26. Imports of the most important articles.
27. Exports of the most important articles.
28. Foreign trade with various countries.
29. Unit value index of imports and exports.

Home trade and industry:
30. Wholesale trade.
31. Sales of petrol.
32. Volume index of industrial production.
33. Building activity.

## IV. TRAFFIC.

34. Foreign shipping.
35. State Railways.

## V. LEVEL OF PBICES.

36. Wholesale price index.
37. Cost of living index.
38. Bank of Finland building cost index.

## VI. LABOUR MARKET.

39. Index of working hours in industry.
40. Number of unemployed.
41. Cessation of work.

## CERTAIN PARTICULARS ABOUT FINLAND.

## 1. iFORM OF GOVERNMENT.

Finland formed a part of the kingdom of Sweden from 1154 to 1809; from 1809 it was an autonomous Grand Duchy connected with Russia up to December 6, 1917, when Finland declared its independence, which was acknowledged by all the Powers including Soviet Russia. It became a republic in 1919. The legislative power of the conntry is vested in the Diet and the President. The highest executive power is held by the President chosen for a period of 6 years. The President for the current period, March 1,1950, to March 1, 1956, is Juho Kustl Paasikivi who has been in office since March 11, 1946.

The Diet, composed of 200 members, is elected by universal suffrage. The proportions of the different parties in the Diet elected in 1948 are at present as follows:

Number
Agrarians ................................................ 56
Social Democrats . . . . ................................... . . . 54
People's Democrats . . . . . . . . . . . . . . ..................... 38
Conservatives ................................................ 33
Swedish Party . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 14
Liberals ................................................... 5

## 2. LAND.

THE AREA is 337009 square kilometres (Great Britain's area is $245000 \mathrm{sq} . \mathrm{km}$, and Italy's area 310000 sq . km.). Of the total area $9.4 \%$ are inland waters. On an average $13.5 \%$ of the land in the South of Finland is cultivated, $1.6 \%$ in the North, $7.5 \%$ of the whole land. Of the land area 21.7 mill . ha ( 53.5 mill. acres) or $70.9 \%$ are covered by forests.

## 3. POPULATION.

NUMBRR OF INHABITANTS (1949): 4.0 millions (present-in-area). Sweden (1948) 6.9, Switzerland (1948) 4.6, Denmark (1948) 4.2 and Norway (1948) 8.2 millions.

DENSITY OF POPULATION (1949): In South Finland 22.2, in North Finland 3.4 and in the whole country an average of 13.0 inhabitants to the square kilometre.

DISTIRIBUTION (1949): 74.9 \% of the population inhablt the country, 25.1 \% the towns and urban districts. The largest towns are (1949): Helsinki (Helsingfors), the capital, 359813 Inhabitants, Tarku (Åbo) 99 274, Tampere (Tammerfors) 95753.

OCCUPATION (1940): agriculture and forestry $51.5 \%$, industry and manual labour $21.0 \%$, commerce $5.1 \%$, trangport $4.6 \%$, other occupations $17.8 \%$.

LANGUAGE (1940): Finnish speaking $90.0 \%$, Swedish speaking $9.6 \%$, others $0.4 \%$.

RELIGION (1947): Lutheran $95.8 \%$, Greek-Orthodox $1.7 \%$, others $2.6 \%$.

EDUCATION (1948): Practically all persons over 15 years of age are literate. There are three universities (the oldest founded in 1640) and 7 colleges of university standard.

INCREASE OF POPULATION (1948): Births $27.2 \% 0_{0}$ deaths $11.8 \%$ (deaths in France in $194713.0 \%$ and in the United Kingdom in $194712.1 \%$ ), increase $15.8 \%$.

## 4. TRADE AND COMMUNICATIONS.

FOREST RESOURCES (1950): The growing stock comprises 1370 million of solid cub. m. incl. bark ( 48384 million cub. ft ), of which pine is $45.5 \%$, spruce $32.2 \%$, the rest $22.3 \%$ being leaf-trees, chiefly birch. Of the growing stock 7471 million cub. $\mathrm{ft}, 65.0 \%$ of them pines, are up to the standard required for logs (mindmum for sawmill logs $18^{\circ} \times 6^{\prime \prime}$ and for veneer $\operatorname{logs} 18^{\prime} \times 7^{\prime \prime}$ ). The anmual growth is about 41 million of solid cub. m. green wood excl. bark ( 1448 cub. ft). The total removal in 1946 calculated according to the use of wood was 40 million cub. m. ( 1413 million cub. ft). In the ypars 1923 to 1938 , in the then area of the country, it
averaged 41 million cub. m. ( 1448 million cub. ft) per year, the corresponding yearly growth belng 46 million cab. $m$. ( 1624 million oub. ft).

AGRICULTURE (1941): Cultivated land 2.8 million hectares, divided as follows; area under cultivation under 10 hectares $33.1 \%, 10-50 \mathrm{ha} 54.4 \%$, $50-100 \mathrm{ha} 7.2 \%$, over 100 ha $5.8 \%$. Cultivated land (1949) is divided between the different kinds of crops as follows: 39.1 \% hay, 11.2 \% temporary grassland for grazing, $16.9 \%$ oats, $6.9 \%$ wheat, $5.8 \%$ rye, $5.0 \%$ barley, $4.0 \%$ potatoes, $11.1 \%$ other. The number of dairles in 1948 amounted to 476.

OWNERSHIP OF LAND (1941): The land ares is distributed among different classes of owners approximately as follows: private $49.2 \%$, State $41.6 \%$, Joint Stock Companies etc. $7.1 \%$, communities $2.1 \%$.

INDUSTRY (1947): Number of industrial concerns 5999 , workpeople 249 936, gross value of products of industry 156852 million marks.

LENGTH OF RAILWAYS (1950): 4969 km ., of which 4715 km . State railways and 254 km . private. The gauge is in general 1.624 m .

MERCHANT FLEET (1950): Steamships 387 (428 584 gross reg. tons), motor vessels 108 ( 78975 gross reg.tons), sallingships with auxiliary engine 153 ( 14965 gross reg. tons), other sailing-ships 9 (11 949 gross reg. tons). Total 657 (534 473 gross reg. tons).

## 5. FINANCE AND BANKING.

CURRENCY. Since 1860 Finland has its own monetary system. From 1877 up to 1914 the currency maintained its stable gold value, and after the disturbances caused by the war a gold standard was again introduced from January 1, 1926. The unit currency is the mark (Finnish markkap = 100 penniai). According to the monetary law of December 21, 1925, a gold coin of 100 marks' value shall contain $3^{15} / 19$ grams of fine gold. Since October 12, 1931, the redemption of bank notes in gold is, however, suspended.

STATE FTNANCES. According to the finance accounts for 1049 the State revenue was 125981 million marks, of which 111403 million marks were current revenue, and State expenditure 132827 million marks, of which 92926 million marks were current expenditure. The principal sources of revenue were as follows: direct taxes 29810 , indirect taxes 21738 , sales $\operatorname{tax} 29743$, interest and dividends, etc. 9208 , State property and undertakings (net) 1402 , and capital revenue 14 579. For Public Debt see table 20 in this issue.

MUNICIPAL FINANCES. According to the finance accounts for 1947 expenditure amounted to 19581 million marks. Total revenue was 20426 million marks, of which income from taxation was 11575 million marks. The municipal income tax (non-progressive) averaged $8.5 \%$ of the ratepayers' income.

THE BANK OF ISSUE. The Bank of Finland (founded In 1811) is a State Bank. Its head office is in Helsinki (Helsingfors) with branches in Turku (Ȧbo), Porl (Bjbrneborg), Vaasa (Vasa), Oulu (Uleáborg), Kuopio, Joensuu, Mikkeli (8:t Michel), Tampere (Tammerfors), Hämeenlinna (Tavastehus), Jyvaiskylä, Kotka and Lahti.

THE COMMERCLAL BANKS (1050): Number 6, possess 460 offices, where all kinds of banking business is transacted. There is one banking establishment per 8671 inhabitants.

The largest banks are Kansallis-Osake-Pankki, $\mathbf{O y}$ Pohjoismaiden Yhdyspankki-Ab Nordiska Föreningsbanken and Helsingin Osakepankki - Helsingfors Aktiebank, all with head offices in the capital.

OTHER BANKS (1950): Mortgage banks 5, Savings banks 444, Co-operative Credit Societies 726 and a Central Bank for the latter.

## PUBLIC FINANCES IN 1949.

BY<br>HEIKKI VALVANNE, MAG. PHIL.<br>FELLOW OF THE BANK OF FINLAND INSTITUTE FOR ECONOMIC RESEARCH.

## GENERAL REVIEW FOR 1949.

Economic progress in 1949 proved fairly satisfactory in spite of considerable difficulties. The volume of production of the home market industry exceeded the level for 1948, but the growth of production in the exporting industry ceased, when the export markets for timber products deteriorated greatly at the beginning of the year. Owing to the devaluation undertaken in July and September 1949 and to the improvement in the export markets towards the end of the year, however, the balance of trade proved more favourable than usual in the end, there being only a small deficit. The labour market was not favourable in 1949, for the falling off in the export industry caused considerable unemployment in the early spring and, for the same reason and owing to a partial failure of the crops, still greater unemployment in the autamn.

Although the real economic development did not quite fulfil expectations, 1949 was a comparatively favourable year from a monetary point of view, so that it was possible to maintain the internal value of the mark better than in any other post-war year. Prices could be kept so stable that the wholesale price index did not rise more than 3.1 per cent from December 1948 to December 1949 and the cost of living index correspondingly not more than 3.5 per cent.

As the rise in the level of prices and wages was comparatively slight and as the State was only caused fresh extraordinary expenditure chiefly for alleviating unemployment, Government expenditure in 1949 increased much less than in the preceding post-war years. The total expenditure, excluding the redemption of loans, was 112,823 million marks in 1949 as against 99,545 million in 1948, so that the increase only amounted to 13 per cent. The growth
of public revenue was still less, mainly owing to some reduction in taxation. The revenue, excluding loans, had amounted to 101,763 million marks in 1948, and rose last year to 107,044 million, the increase representing 5 per cent. As a result, while the total public revenue for 1948 had sufficed to cover all expenditure, the revenue for 1949 fell short of the expenditure by 5,779 million marks. ${ }^{1}$ )

## EXPENDITURE IN 1949.

The main categories of public expenditure are given in the following table.

EXPENDITURE
(Excluding redemption, adjusted figures)

|  | $\stackrel{1948}{\text { Mill. } \mathrm{mk}}$ | $\stackrel{1049}{\text { Mill. } \mathrm{mk}}$ |
| :---: | :---: | :---: |
| Current expenditure | 80,742 | 90,603 |
| Capital expenditure | 18,803 | 22,220 |
|  | 99,545 | 112,823 |

The current expenditure thus increased from 1948 by 9,861 million marks or 12 per cent. With regard to the classification of current expenditure according to its nature, adjusted figures are not available, for which reason its distribution among main groups, according to the Finance Accounts, is given in the following table.

[^5]| CURRENT EXPENDITURE (According to the Finance Accounts) |  |  |
| :---: | :---: | :---: |
| Maingroups | $\begin{gathered} 1943 \\ \text { Mill.mk } \end{gathered}$ | $\begin{array}{r} 1949 \\ \text { Mill.mk } \end{array}$ |
| 1. President of the Republic | 11 | 14 |
| 2. The Diet | 129 | 163 |
| 3. The Government | 40 | 49 |
| 4. Ohancellery of the Government | 52 | 57 |
| 5. Ministry for Foreign Affairs | 246 | 308 |
| 6. Ministry of Justice | 896 | 1,092 |
| 7. Ministry of the Interio | 4,529 | 5,381 |
| 8. Ministry of Finance | 812 | 968 |
| 9. Ministry of Defence | 3,974 | 4,502 |
| 10. Ministry of Education | 5,403 | 8,372 |
| 11. Ministry of Agriculture | 4,953 | 9,706 |
| 12. Ministry of Communications | 2,314 | 3,114 |
| 13. Ministry of Trade and Industry | 991 | 1,169 |
| 14. Ministry for Social Affairs .. | 8,001 | 16,456 |
| 14 A. Ministry of Supply | 422 | 229 |
| 15. Sundry general expenditure | 32,372 | 28,436 |
| 16. Pensions and relief payments.. | 1,394 | 1,606 |
| 17. Interest and expenditure on the Public Debt | 8,627 | 10,349 |
| 18. State industrial undertakings.. | 9 | 955 |
| Total | 75,175 | 92,926 |

Of the expenditure included in the largest main group, „Sundry general expenditure", the most important category consisted of the war indemnity paid to the Soviet Union. The actual war indemnity and the costs of administration due to it, taking into account, too, the advances paid to suppliers of war indemnity goods, totalled 13,288 million marks in 1949. In 1948 this expenditure amounted to 16,248 million marks, so that it was reduced by about one fifth. "Sundry costs under the Peace Treaty", totalling 160 million marks ( 361 million in 1948), and „Transfers of German assets and administrative costs due to them", amounting to 978 million marks ( 1,038 million in 1948), should also be regarded as war indemnity. Thus the war indemnity in various form amounted to 14,367 million marks in all in 1949, which represented 16 per cent of the current public expenditure. In 1948 the total war indemnity amounted to 17,647 million marks or 23 per cent of the current expenditure.

The main group "Sundry general expenditure" also includes the compensation paid to the population of the ceded territories for loss of property. It is appropriate, however, to include in this compensation not only compensation in cash, but also the interest and amortization paid on Government bonds issued instead of cash payments to persons entitled to compensation. By adding up the items of compensa-
tion included in different main groups, the total compensation amounts to 9,925 million marks for 1949 (9,850 million for 1948).

The main group referred to also contains a considerable part of the subsidies paid by the Government. The expenditure on these for lowering and levelling the prices of agricultural produce amounted to 3,711 million marks in 1949 ( 9,016 million in 1948). If the corresponding items included in the expenditure of the Ministry of Agriculture and in that of some funds not included in the Budget are taken into account, the total of subsidies for 1949 amounts to 8,094 million marks. From 1948, when it amounted to 12,286 million, it was thus reduced by one third.
The main group ,Interest and expenditure on the Public Debt" in the Finance Accounts also includes the interest paid on bonds employed for compensating the displaced population and the index-bound increase of the amortizations of these bonds. If these items, which are included above in the expenditure on compensation, are omitted, the total expenditure on actual interest was 3,785 million marks for 1949 (2,732 million for 1948).

Among the Government departments, the Ministry for Social Affairs incurred the heaviest expenditure. The doubling of the expenditure of this Ministry since 1948 was due almost entirely to child allowances which amounted to 2,104 million marks in 1948, but consumed 8,784 million last year. By way of explanation it should be mentioned that a system was introduced in October 1948, by which the State pays an allowance for every child under age instead of such payments being left to the discretion of each employer, as before. For the payment of these allowances the Government imposed a special child contribution on all employers. This contribution, which is in the nature of a tax and is included in the current public revenue, produced 6,627 million marks in 1949 (570 million in 1948). 1) Another large item of

[^6]expenditure in this main group consists of ,,Compensation for physical disability or illness contracted in the war or military service" which amounted in 1949 to 4,971 million marks, whereas in the previous year it totalled 3,909 million.

The growth of the expenditure of the Ministry of Agriculture to nearly double its size from 1948 to 1949 is due in a great measure to the extension of settlement work in accordance with the Land Expropriation Act. Of the increase in the expenditure of the Ministry of Education about 2,000 million marks were due to grants for building and repairing elementary schools in rural districts and for acquiring furniture for them. The growth of the expenditure of the Ministry of Communications and Public Works, finally, was due to the increased costs of maintaining highroads and bridges. This expenditure, which represents the principal part of the outlay of this Ministry, rose from about 1,900 million marks in 1948 to about 2,500 million in 1949. In conclusion it should be stated that the figures in the Finance Accounts showing the expenditure of the industrial undertakings of the State refer only to the net losses of those undertakings that incurred a loss. The total yield of these undertaking is shown later.

The capital expenditure is shown in the following table, in which the investments are grouped according to their nature.

| CAPITAL EXPENDITURE <br> (Adjusted figures) |  |  |
| :---: | :---: | :---: |
|  | 1843 | 1949 |
| Investments in State business undertakings, forests and landed property $\qquad$ | 3,812 | 6,239 |
| Purchases of machinery and apparatus | 832 | 6,239 931 |
| House building | 1,037 | 1,364 |
| Roads, bridges and hydraulic undertakings | 506 | 2,614 |
| Lending ... | 8,706 | 11,048 |
| Purchases of shares | 3,910 | 24 |
| Totai | 18,803 | 22,220 |

The largest group of real investments, investments in State undertakings, forests and landed property, was in 1949 quite half as large again as in the previous year.

The principal part of such investments consisted of funds employed for the construction of railways and for the acquisition of rolling stock and machinery, which increased from 2,124 million marks in 1948 to 3,881 million in 1949 . Other expenditure in this group refers principally to investments in building and supplies for the Posts and Telegraphs and the extension of Government metal works. Investments in the construction of roads and bridges and in clearing waterways increased fivefold since 1948. This was due to extensive relief work instituted in the autumn of 1949 to alleviate unemployment. In 1949 altogether 2,615 million marks of total real investments referred to actual relief work, the corresponding figure for 1948 being only 187 million.

Of the loans granted by the State in 1949, 6,528 million marks ( 6,542 million in 1948) represented settlement loans granted to displaced persons, war disabled and exsoldiers out of the Settlement Fund and 3,000 million marks ( 800 million in 1948) loans granted in aid of housing in centres of population.

## REVENUE IN 1949.

Public revenue is shown in the following table.

| REVENUE |  |  |
| :---: | :---: | :---: |
| (Exc'uding loans, adjusted figures) |  |  |
|  | 1943 <br> MIII. mk | $\begin{gathered} 1949 \\ \text { MilI. } \mathrm{mk} \end{gathered}$ |
| Current revenue | 100,621 | 105,757 |
| Taxes | 88,809 | 91,232 |
| Charges | 4,085 | 9,394 |
| Interest and dividends | .. 716 | 1,232 |
| Net profits of State undertakings | $\begin{array}{cc} \text { 1siness } & \\ \ldots, \ldots & 382 \end{array}$ | 554 |
| Other current revenue | 3,429 | 3,345 |
| Capital revenue | 1,142 | 1,287 |
|  | Total 101,763 | 107,044 |

Current revenue in 1949 also was much larger than current expenditure, although its chief category, taxes, increased only slightly from 1948. Charges, which are similar to taxes in character, were more than doubled from 1948, entirely owing to the child contributions already referred to. On the other hand, the net profits of State
business undertakings fell off appreciably, mainly owing to the fact that the State railways suffered a loss of 936 million marks in 1949, whereas in the previous year they had yielded a profit of 1,684 million.

The course pursued by the principal categories of taxes will be seen from the following table.

REVENUE FROM TAXATION

For many years already the proportion of direct taxes to all taxes has decreased and the same tendency continued in 1949. Whereas this proportion was 42.3 per cent in 1946, 35.9 per cent in 1947 and 32.4 per cent in 1948, it was anly 27.3 per cent in 1949. This tendency was a result of continuously lowering the scale of the income and property tax and of the growth of the sales tax in consequense of the rise in prices.

| DIRECT TAXES <br> (Adjusted figures) |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| 19481949 |  |  |  |  |
|  | Mill. mk | $\begin{gathered} \% \text { of } \\ \text { all } \\ \text { taxes } \end{gathered}$ | Mill, mk | $\begin{gathered} \% \text { of } \\ \text { all } \\ \text { taxes } \end{gathered}$ |
| Income and pro perty tax ..... | $22,624$ | 25.5 | 18,295 | 20.0 |
| II Capital Levy | 4,475 | 5.1 | 5,900 | 6.5 |
| Extraordinary in come and pro perty taxes ... | 1,272 | 1.4 | 292 | 0.3 |
| Other direct taxes | 367 | 0.4 | 429 | 0.5 |
| Total | 28,738 | 32.4 | 24,916 | 27.3 |

The above table shows that the income and property tax yielded 4,329 million marks less in 1949 than in the previous year. The reduction was mainly due to the scale of the income tax for physical persons being lowered from the beginning of 1949. This was the first time since the war that the yield of the income and property tax had decreased in absolute figures.

|  | INDIRECT TAXES <br> (Adjusted figures) |  | 1949 |  |
| :---: | :---: | :---: | :---: | :---: |
|  | 1948 |  |  |  |
|  | Mill. mk | $\begin{aligned} & \text { \% of } \\ & \text { all } \\ & \text { taxes } \end{aligned}$ | Mill, mk | $\begin{gathered} \text { \% of } \\ \text { all } \\ \text { tax } \end{gathered}$ |
| Sales tax | 25,871 | 29.2 | 30,530 | 33.4 |
| Spirits tax | . 13,253 | 14.9 | 10,462 | 11.6. |
| Excise | - 9,443 | 10.6 | 10,563 | 11.6 |
| Tabacco | 6,805 | 7.6 | 7,238 | 7.9 |
| Coffee | 1,499 | 1.7 | 1,742 | 1.9 |
| Sweetstufis | 246 | 0.3 | 894 | 1.0 |
| Matches | 289 | 0.3 | 249 | 0.3 |
| Beer | 245 | 0.3 | 198 | 0.2 |
| Other | 359 | 0.4 | 242 | 0.3 |
| Customs revenue | 8,555 | 9.6 | 111,660 | 12.8 |
| Tmpont duties | 8,555 | 9.6 | 11,659 | 12.8 |
| Export duties | 0 | 0.0 | 1 | 0.0 |
|  | tal 57,1:22 | 64.3 | 63,215 | 69.3 |

From the table illustrating the course of indirect taxes it will be seen that the yield from the sales tax had again increased, so that in 1949 it amounted to one third of all taxes, despite the fact that from the middle of 1949 the scale of this taxation was reduced by about one quarter. The tax on spirits, which here includes both the profits of the Alcohol Monopoly and the taxes paid by it, was, on the contrary, reduced in absolute figures; which also occurred for the first time since the war. Excise revenue remained almost unchanged in 1949, but import duties were one third higher than in the previous year.

## FINANCING AND PUBLIC DEBT.

The total public revenue in 1949 fell short of the total expenditure by $5,779 \mathrm{mil}-$ lion marks, whereas in the previous year the revenue exceeded the expenditure by 2,218 million. The financing of the excess of expenditure in 1949 and the employment of the surplus of revenue in 1948 will be seen from the following figures.

## FINANCING

Bound capital means capital employed chiefly in financing stocks and other supplies required by, State business undertakings and extra-budgetary funds, that carried on commercial business; released capital means capital released from stocks etc. Of the total capital released in 1949, 622 million marks were released from stocks (of the capital bound in 1948, 4,427 million marks were used for supplying stocks).

As the foreign and internal loans obtained by the State in 1949 were 1,854 million marks less than the redemption of loans, 4,572 million marks were required to cover the cash expenditure. Of this amount, 3,244 million marks were granted by the Bank of Finland and the balance of 1,328 million was covered from the cash balance of the State. In 1948 the sums obtained from the Bank of Finland and the cash funds of the State used amounted in all to 2,191 million marks. The financing table thus shows that the State increased liquidity in the private sector in 1949 more than in the previous year.

In 1949 the State received foreign loans to an amount of 2,590 million marks and paid 2,729 million in redemption: Loans were obtained principally from Argentina, 1,484 million marks being employed in 1949 out of the credit of 18.3 million dollars granted by her in the previous year. Of the fresh credit received from Belgium for the supply of railway rails, 409 million marks were employed during the year, and of a private dollar credit 342 million marks. Among the redemption the largest item was the redemption of the Argentinian dollar credit just referred to, amounting to 924 million marks.

In internal loans 5,903 million marks were obtained during 1949 and 7,618 million were redeemed. A long-term loan of 4,039 million marks was received from the Savings Banks and the Post Office Savings Bank, besides a short-term loan of 1,690 million from the latter. In 1949 two large war-time bond loans and the compulsory
loan taken up in 1945 in connection with the exchange of bank notes were redeemed, which required 6,185 million marks in all.

The above figures concerning State loans are adjusted figures and do not include, among other things, the indemnity bonds employed. In conclusion, the Public Debt is shown, as it appears in the Government Finance Accounts.

| PUBLIC DEBT <br> (According to the accounts) |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | 1948 |  | 1849 \% |  |
|  | Mill. mk | $\begin{aligned} & \text { \% of } \\ & \text { total } \\ & \text { tetabt } \end{aligned}$ | Mill. mk | $\begin{aligned} & \text { \% of } \\ & \text { total } \\ & \text { debt } \end{aligned}$ |
| Foreign debt | 43,605 | 35.9 | 63,152 | 45.2 |
| Internal debt | 77,718 | 64.1 | 76,537 | 54.8 |
| Debt to the |  |  |  |  |
| Bank of Fin- |  |  |  |  |
| land | 19,230 | 15.9 | 22,030 | 15.8 |
| Indemnity bonds | 13,000 | 10.7 | 11,309 | 8.1 |
| Other internal |  |  |  |  |
| debts | 45,488 | 37.5 | 43,198 | 30.9 |
| Total | 121; 323 | 100.0 | 139,689 | 100.0 |

This table shows that, at the end of 1949, the foreign debt was almost half as large again as at the end of 1948. This great increase was due to the rates of exchange having been raised twice in the course of 1949. On the first occasion, on July 4, the mark was devalued and foreign rates of exchange were raised 17.7 per cent on an average. This involved an increase of 7,442 million marks in the amount of the foreign debt, expressed in marks. The second occasion occurred on September 19, when Finland, following the example of Great Britain, devalued the mark in relation to the dollar and raised the dollar rate by 44.4 per cent. The mark value of the foreign dollar debt grew in consequence by 11,212 million marks. Owing to the two devaluations, Finland's foreign debt thus increased during 1949 by 18,654 million marks in all. The internal debt, on the other hand, remained almost unaltered in total during 1949, although changes occurred in its composition.

## ITEMS.

Budget proposal for 1951. Late in August the Government introduced its Budget for the ensuing calendar year. The following figures give a general idea of it as compared with that of 1950 .

| Revenue |  | $\begin{aligned} & \text { 19.j1 } \\ & \text { Budget proposal } \\ & \text { Mill. } \mathrm{mk} \end{aligned}$ | 19.0 Budget <br> Mill. mk |
| :---: | :---: | :---: | :---: |
| Current |  | 117,386 | 95,279 |
| Capital |  | 7,614 | 9.184 |
|  | Totail | 125,000 | 104,46\% |
| Expenditure |  |  |  |
| Current |  | 99,159 | 77,583 |
| Capital | . . . . | 251817 | 26.796 |
|  | Total | 124,976 | 104,379 |

The proposal means an increase of about 21,000 million marks in public expenditure over this year's budget and about 25,000 million over 1949: Yet, in reality, the Government has tried to reduce expenditure by cutting down capital expenditure, in particular. This is evident considering that total expenditure, including supplementary budgets, rose to 132,000 million marks in 1949 and will be still greater this year and that, besides, prices and wages are now much higher than last autumn.

Supplementary Budget. On June 21, 1950, the Diet passed a Supplementary Budget containing increases in public expenditure amounting to 20,381 million marks and in public revenue to 6,252 million marks. The largest items of expenditure refer to the unemployment relief work, settlement work, higher pay for Government servants and the redemption of and interest on loans.

Trade agreements. Finland has recently concluded trade agreements with the following countries.

France. The agreement refers to the exchange of goods during a year from June 1, 1950, and provides for trade to the total value of about 14,000 million franes. Finnish exports will include cheese, pine oil, turpentine, asbestos, matches, mechanical pulp, pitprops and pulpwood, telephone
poles, sawn timber, boxboards, spools, walliboard, prefabricated houses and huts, newsprint and other paper, cardboard, granite, soapstone, electric pig iron, art porcelain, separators, electric motors and accessories, various machinery and apparatus, and furs. Among imports the principal ones are iron and steel, machinery, raw materials for textiles, chemicals, crude phosphates, wines and spirits.

The Soviet Union. On June 13, 1950, Finland and the Soviet Union signed two trade agreements, one of which refers to trade in 1950 and the other to trade in 1951-1955.

The agreement concerning the delivery of goods during the current year stipulates that exports from Finland and imports from the Soviet Union should amount to approximately 32 million dollars each in value. Finnish exports will consist of prefabricated houses, sawn goods, piles, pulpwood, mechanical pulp, technical paper, special steel, electric pig iron, tugs, barges, motor lorries for timber, railway engines and various machinery and apparatus. Imports include wheat, sugar, fodder cakes, fertilizers, petrol and other oil products, various raw materials for industry, chemicals, motor vehicles and machinery.

Owing to the reduction of war indemnity deliveries, the share of the shipbuilding yards and engineering works in Finnish exports should increase considerably this year in comparison with previous years and should now represent about one third of this year's deliveries to the Soviet Union.

The object of the trade agreement for 1951-1955 is to extend the economic relations between Finland and the Soviet Union to the advantage of both and to establish a sound basis for a long-term exchange of goods. During the period covered by the agreement Finnish exports, consisting of ships and their equipment, machinery and apparatus for the woodworking industry, means of transport, machinery and apparatus for power stations, prefabricated houses, timber and paper products and other goods, are to increase by degrees from at least 232 million roubles in 1951 to not less than 322 million roubles in 1955. The proportion of the output of engineering works, ships
and machinery to the total exports should increase year by year or from 40 per cent in 1951 to over 70 per cent in the last year of the 5 -year agreement.

From the Soviet Union deliveries to Finland during the five years will consist of grain, fodder cakes, sugar, oil products, fertilizers, billets, ferro-manganese, asbestos, motor vehicles, industrial machinery etc., so that deliveries in 1951 amount to a minimum of 152 million roubles and grow to not less than 222 million roubles in 1955. As, in addition, on the basis of multilateral agreements between Finland, the Soviet Union and other countries, these third countries are to deliver goods to Finland to the value of $80-100$ million roubles annually, Finland's annual imports from the Soviet Union and third countries together should equal Finnish annual exports to the Soviet Union.
The value of the rouble is pegged in the agreement to its present gold value, and the prices of goods to be supplied according to the delivery agreements are to be fixed on the basis of world market prices. The agreement is intended to be a minimum programme of mutual trade, and, therefore, both the Governments will endeavour to expand trade by means of supplementary agreements to be concluded later.
Holland and Indonesia. A trade agreement has been concluded by Finland on the one hand and Holland and the Federated States of Indonesia on the other for the period from July 1, 1950, to June 30, 1951, according to which the supply of goods in either direction is to amount to 90 million guilders. Finland will export to Holland woodgoods and products of the woodworking industry, paper, cardboard, paper and cardboard products and electric machinery, and will import from that country coke, iron and other metals, yarn and other textiles, chemicals, paints and dyes, edible fats, lubricating oil, electric machinery and apparatus, and requisites for the radio industry. Besides, the orders for vessels placed in Holland are taken into account in this agreement. Finnish exports to Indonesia will consist mainly of products of the woodworking industry, and imports from there of rubber, tea and tobacco.
Denmark. During the year beginning July 1, 1950, exports from Finland are
estimated to amount to about 180 million crowns and imports to about 150 million crowns. Finnish exports include sawn goods, chemical pulp, mechanical pulp, aspen wood, newsprint and other kinds of paper, cardboard, pasteboard, machinery and other products of the metal industry, glass, china and earthenware, while imports include machinery and apparatus, iron and metal products, pharmaceutical products, chemicals, textiles and clothing, dried fruit, canned milk, fish products, and field and garden seeds.

Lumber work. During the lumbering season from June 1949 to May 1950 about 21 million cub. metres, piled measure, are estimated to have been cut, the corresponding figures for 1948/49 being about 29 million cub. metres and for 1947/48 about 34.5 million. The quantities of the different kinds of timber cut were as follows:

|  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| Heavy trees |  | 12.0 | 10.7 | 8.8 |
| Round timber |  | 6.5 | 12.0 | 15.2 |
| Firewood etc. |  | 2.5 | 6.3 | 10.5 |
|  | Total | 21.0 | 29.0 | 34.5 |

The principal reason, why the cutting results for the last season were appreciably smaller than before, was, on the one hand, the fact that industry resorted in a greater measure to the use of previously accumulated stocks, and on the other, that, in view of increased imports of coal and coke, the demand for firewood has decreased from year to year.

Weather conditions and crop prospects. The crop prospects seem to be comparatively good for the current season. The weather conditions were favourable for autumn grain last autumn and winter, and although the cold spring interfered with growth to some extent, it is expected that the crop of autumn grain will at least be satisfactory throughout the country. The rye crop should be better than ever before since the war. The growth of spring sowings was affected by cold in the early summer and at midsummer as well as by
drought which retarded the normal course of growth considerably, especially in SouthWest Finland. The crop prospects for spring sowings have been estimated as average, while for hay a crop above the average is expected.

In comparison with last year the harvest in fodder units seems likely to be about 2 per cent larger this season and appreciably better in quality, as no damage worth mentioning has been done to the plants by frost this summer.

The following table shows the crop prospects in the middle of August 1950 and 1949 ( $8=$ very good, $7=$ good, $6=$ above the average, $5=$ average, $4=$ below the average, $3=$ poor, $2=$ almost failure, $1=$ failure).

|  | $\begin{aligned} & \text { August } \\ & 1950 \end{aligned}$ | $\begin{gathered} \text { August } \\ 1949 \end{gathered}$ |
| :---: | :---: | :---: |
| Autumn wheat | 5.7 | 5.9 |
| Spring wheat | 5.2 | 5.5 |
| Rye | 5.8 | 5.0 |
| Barley | 5.0 | 4.9 |
| Oats | 5.2 | 5.5 |
| Potatoes | 5.1 | 4.7 |
| Hay | 5.5 | 5.4 |

The table below is an estimate of the total crops in 1950, based on the situation in the middle of August, and gives the figures for 1949, in millions of kilogrammes.

|  |  | 1950 | 1949 |
| :---: | :---: | :---: | :---: |
| Wheat |  | 321 | 323 |
| Rye |  | 240 | 219 |
| Barley | .................. | 190 | 181 |
|  | Total bread grain | 751 | 723 |

|  | 1950 | 1949 |
| :---: | :---: | :---: |
| Oats | 685 | 725 |
| Potatoes | 1,340 | 1,157 |
| Field hay | 2,867 | 2,802 |

Year Book of the Bank of Finland. The thirtieth volume of the Year Book has been published in Finnish and Swedish; the English edition will shortly appear. As usual it contains a statistical section, and a review of the economic position of the country and of the Bank's business in 1949. It is published by the Bank of Finland Institute for Economic Research.

Economic Survey. A special economic review was appended to the Budget proposal for 1951. It examines the situation of public finance and the course of national income up to 1949, the economic situation in 1950, and the factors influencing the future tendency. The survey, which has been prepared by the Division for National Economy of the Ministry of Finance, has been published separately under the title of "Finnish Economic Survey" and is available in Finnish, Swedish and English. The Finnish and Swedish editions. can be obtained from the Government Printing Office and the English edition from the Press Bureau of the Ministry for Foreign Affairs and the Finnish Legations abroad.

# THE BANK OF FINLAND MONTHLY BULLETIN 

> is sent free of charge to anyone wishing to receive it. Finnish booksellers are, however, allowed to sell it at a price of 20 marks per copy. Should extracts from the Bulletin be printed, the source should be stated. Correspondence with regard to the Bulletin should be addressed to the Bank of Finland Institute for Economic Research, Helsinki, Findand.

[^0]:    ${ }^{1}$ ) From April 29, 1950, including bills payable abroad in foreign currency, foreign bonds listed on foreign Stock Exchanges, bonds and interest coupons in foreign currency which have failen due, and foreign money.
    5) Bills payable abroad in foreign currency, foreign bonds listed on foreign Stock Exchanges, interest coupons in foreign currency which have fallen due, foreign bank notes, and inland bills falling due not later than within three months. - This Law was abolished by the Law of April 141950.

[^1]:    Tables 24-29 according to Finnish Offlcial Statistics I, A, Foreign Trade of Finland, Monthly Reports.
    The term imports covers all imported goods which are placed on the market either immediately after importation or after storage. Exports covers all goods exported from the open market, including re-exports. Goods are declared to the Customs by their owner, who must at the same time state the value of the goods as calculated at the frontiers of the country.

    * Preliminary figures subject to minor alterations.

[^2]:    - Prellminary figures subject to minor alterations.

[^3]:    - Preliminary figures subject to minor alterations.

[^4]:    According to Monthly Statistics of the Finnish State Rallways.

[^5]:    1) The figures quoted in this article for public revenue and expenditure are not those of the Finance Accounts, except when expressly stated, but are adjusted figures, showing the actual cash transactions of the State in the years referred to. In calculating them nominal items of revenue and expenditure have been deducted from the figures in the Finance Accounts and items not included in the Budget have been added to them, besides which the classification of revenue and expenditure has been adjusted. Some corrections have also been made in the figures for the public finances in 1948 previously published in this Bulletin (see Heikki Valvanne: Public Finances in 1948, in this Bulletin, Nos. 11-12, 1949).
[^6]:    1) It is worth mentioning that, if the new items of expenditure and revenue, corresponding to each other, due to child allowances and payment of child contributions, are omitted, the increase in current. public expenditure from 1948 to 1949 was only 3,804 million marks and the current revenue in 1949 was 921 million less than in 1948.
