

# BANK OF FINLAND MONTHLY BULLETIN 

## RECENT DEVELOPMENTS

## THE BALANCE OF PAYMENTS IN 1960

Sufficient information is now available for the presentation of a preliminary balance of payments statement for last year. As reported in the previous issue of this Bulletin, foreign trade resulted in a substantial deficit, as imports were stimulated by the expansion in internal activity. The deficit on merchandise account was thus 23700 million marks, against an almost even balance in 1959. Net transportation earnings are estimated to have been roughly 17000 million marks, or somewhat more than in the year bcfore. Net expenditure on investment amounted to 1900 million marks; on the debit side, this consisted mainly of interest on the long-term loans, and on the credit side of interest on the foreign exchange holdings. Net payments of 7300 million marks were occasioned by travel. Taken as a whole, the total balance of goods and services is estimated to have resulted in a deficit of 12400 million marks, compared with a surplus of 9400 million in 1959, and 25100 million in 1958.

Part of the imports was financed by foreign credit, available to importers of investment goods in the form of medium-term suppliers' credits. Private loans of this type were utilized to the extent of 11000 million marks. No new actual long-term loans were
raised, but the Mortgage Bank of Finland drew on earlier credits, 5500 million marks on loans from the World Bank, and 1000 million on other loans. All in all, the inward flow of medium and long-term capital amounted to 20100 million marks. The corresponding outflow in the form of repayments on loans was 11500 million marks. This figure included repayments on carlier suppliers' credits, but also considerable sums paid on the early post-war credits from the USA, Brazil and Columbia, and on the wartime credits from Sweden.

The foreign exchange reserve of the Bank of Finland did in fact decrease in 1960, but as a whole the banking system and the Treasury improved their foreign payments position. The disposable foreign exchange assets were reduced by 3300 million marks, but the amount reserved for documentary credits and the like increased by 800 million, and the gold reserve by 900 million. By replacements of funds, the considerable sum of 14700 million marks was invested in foreign bills and bonds, partly, in fact, as a prepayment of loans ahead of schedule. The liabilities on the banks' foreign accounts increased in consequence of the strained

[^0]liquidity on the money market on the one hand, and the increase in imports on the other.

Private short-term transactions played an essential part in the capital movement last year. The extent to which commercial credits on imports were utilized is not known exactly, but it is believed that they recorded an increase of some 13000 million marks. Instead, the outstanding amount of prepayments received on future exports was less by 5700 million marks at the end of the year than at the beginning. There was a decrease in the prepayments from the Soviet Union, and similarly in those for certain types of goods intented for Western markets. Conversely the prepayments on the shipping of timber and sawn goods increased. Certain private forcign assets were slightly reduced.

## TRANSPORT

In common with other forms of economic activity, transport was influenced by the expansion in 1960. Its volume grew continuously, although the pace slowed down towards the end of the year.

Shipping grew especially, by as much as 21 per cent. Early in the year, with the harbours locked by ice, the rise was far less, but subsequently the rate of increase rose rapidly. The favourable development during the concluding months of the year was largely due to the very extensive imports occasioned by the expansion. On the other hand, export shipments in the autumn increased rather less. - The proportion of
goods carried by Finnish vessels was 19 per cent higher than in 1959.

Railway transport (in terms of goods trucks loaded) increased by 11 per cent on 1959. The largest rise was in the transportation of import goods from the ports, by 34 per cent, whereas goods from the USSR fell off to some extent, so that the total of import goods carried increased by 23 per cent. A similar tendency was visible for export goods: the number of loads to the ports increased by 22 per cent, those to the USSR border fell off by 10 per cent, and the total increased by 18 per cent. The advance of inland transport was considerably less.

Road traffic, as illustrated by the sales of petrol and diesel oil,.increased by 10 per cent on 1959.

The expansion of transport has continued during the current year, but road traffic alone has shown a higher rate of increase than in 1960. Thanks to the mild winter, shipping has proceeded practically undisturbed, at least as far as the southern ports are concerned. In January, shipping activity was 11 per cent higher than one year previously, and road traffic 14 per cent higher. As for the railways, the total number of goods trucks loaded was 8 per cent above the January 1960 figure; the loads of export goods were 6 per cent more, while those of import goods were, seasonally, 12 per cent less. - No particular shortage of trucks has occurred, as the ports, with the exception of the northernmost ones, have been open all winter.

March 28, 1961.

## EXPLANATIONS RELATING TO THE STATISTICAL SECTION

## BANK OF FINLAND

Page 3. The items of the statement of the Bank of Finland are described in Monthly Bulletin No. 10, 1955, p. 25.

Page 4. Other foreign assets $=$ Foreign bills + Foreign bonds + Prepayments for exports. Other foreign liabilities $=$ Mark accounts of holders abroad + Long-term foreign liabilities.

Page 5. Treasury bills and bonds: up to August 1953, bills, and thereafter Treasury bond loan + Treasury bill covering certain IMF and IBRD accounts (included in Other claims). Trade and industry, Other advances $=$ Inland bills in foreign currency + Cheque accounts (assets) + Other claims excl. Treasury's IMF and IBRD bill, Prepayments for exports and Advances for stand-by stocks. Liabilities $=$ Other short-term liabilities + Other cheque accounts + Deposits against import licences (in 1955-56) - Account of the Mortgage Bank of Finland Oy. - Diagrams. Left: Net claims on other than banks $=$ Net foreign assets + Net claims on the Treasury + Net claims on the public + Finnish bonds + Finnish coin - Equalisation accounts $=$ Notes in circulation + Bank's own funds - Net claims on the banks.

## DEPOSITS BY THE PUBLICADVANCES TO THE PUBLIC

Commercial bank and mortgage bank figures obtained from the official bank statistics, savings bank figures from the Central Statistical Office, other figures from the respective credit institutions or their central banks.

Page 6. Cheque accounts in all credit institutions relates to commercial banks, savings banks, co-operative credit societies, and mortgage banks. Term deposits in all credit institutions includes a small amount of deposits in mortgage banks. Indextied deposits, high-interest deposits and tax - concession accounts are included in term deposits.

Page 7. Money supply $=$ Finnish notes and coins in circulation - Finnish notes and coins held by the banks + Cheque accounts of the public + Postal giro accounts of the public.

## STATE FINANCES

Page 8. Official monthly figures adjusted by the Bank of Finland Institute for Economic Research. Revenue and expenditure: All extra-budgetary funds are included, and figures are reported on a payment basis. - Annual figures will be published in separate articles. Debt: Index-tied bond loans are given at their nominal values. Cash debt (net) $=$ net debt to the Bank of Finland plus short-term debt to the Post Office Savings Bank minus cash holdings (net) of State departments. In principle, the change in this item $=$ surplus (deficit) in the table on revenue and expenditure. The small divergence is due to the fact that the adjustment the of monthly figures is not as accurate as that of the annual (December) figures. Diagram. The 12 -month totals are plotted to the last month of the respective periods.

## FOREIGN TRADE

Pages 9-12. Figures supplied by the Board of CustomsThe unit value indexes (p. 9): The indexes are calculated first according to the Laspeyres formula but at the end of each
year adjustments are made according to the Fisher formula, and the level of the quarterly indexes is corrected so that their arithmetic mean equals the annual index. Thus the series above and below the line are not fully comparable. Seasonal variations are not eliminated. Terms of trade: the ratio of export indexes to import indexes. Foreign trade by countries (p. 12): imports by countries of purchase, exports by countries of sale.

## PRICE INDEXES

Page 13. Wholesale price index and Building cost index calculated by the Central Statistical Office. Cost of living index and Consumer price index calculated by the Ministry for Social Affairs.

## PRODUCTION - INTERNAL TRADE WORK CESSATIONS

Page 14. Index of industrial production calculated by the Gentral Statistical Office. The grouping by branches of industry is in accordance with the international nomenclature (ISIC). The weight of each group represents the ratio of its value added to the total value added of industrial production in 1954. Monthly figures are unadjusted for seasonal variations. Commodities according to use: investment goods weight 12.7 , other producer goods weight 54.6 and consumer goods weight 32.7. Special manufacturing indexes: wood industry ISIC no. 25, weight 8.6, paper industry no. 27, weight 8.6, metal industry nos. 34-38, weight 25.4, and other manufactures nos. $20-24,26,28-33,39$, weight 44.9. Commercial timber fellings calculated by the Ministry of Communications and Public Works. Milk received by dairies calculated by the Board of Agriculture. Figures cover about $50-60 \%$ of the total milk production. The share of the dairies having grown over the last few years, this series does not correctly reflect the development of total milk production during a prolonged period. Wholesale trade volume index, calculated by the Ministry of Finance. Based on sales statistics compiled by the daily Uusi Suomi, covering about $50 \%$ of all internal wholesale trade. Price fluctuations have been eliminated by means of the revised wholesale price index. Diagram. Left: Index of productive activity calculated by the periodical Mercator. It comprises all sectors of the economy. Annual averages are revised according to national income figures.

## BUILDING - WAGES - EMPLOYMENT - TRANSPORT

Page 15. Building figures supplied by the Central Statistical Office. Index of salary and wage earners' earnings calculated by the Central Statistical Office. Beginning 1957, the weights employed are determined according to the structure of toral earnings in 1957; for 1954-1956, the weights are in accordance with earnings in r951. Railway figures supplied by the Board of Railways. Shipping figures supplied by the Shipping Board. Employment and unemployment figures supplied by the Labour Research Bureau of the Ministry of Communications and Public Works, both based on the labour force sample survey. Employment represents the estimated average number of days worked. (See article in No. 10,1960 of this Bulletin.) Diagram. Number of persons unemployed for at least one week during each month.

## SYMBOLS USED

* Preliminary o Less than half the final digit shown. Logically impossible .. Nor available - Nil A line drawn across a column between two consecutive figures indicates that thefigures above and below che line are not strictly comparable

## SOME PARTICULARS ABOUT FINLAND

## FORM OF GOVERNMENT

From 1154 to 1809 Finland formed a part of the kingdom of Sweden. It then became an autonomous Grand Duchy connected with Russia until December 6, 1917, the date of Finland's declaration of independence. The republican constitution was adopted in 1919. The legislative power of the country is vested in the Diet and the President. The highest executive power is held by the President, elected for a period of 6 years. The President for the current period, March I. 1956, to March 7, 1962, is Urho Kekkonen.

The Diet, comprising 200 members, is elected by universal suffrage for a period of 4 years. The number of seats of the different parties in the Diet elected in 1958 are as follows: People's Democrats 50, Agrarians 47, Social Democrats 37, Conservatives 29, Swedish Party 14, Social Democratic League 14, Finnish People's Party (liberal) 8 and Finnish Small Farmers' Party r.

## LAND

THE AREA is 337000 square kilometres (Great Britain's area is $245000 \mathrm{sq} . \mathrm{km}$ and Italy's area $301000 \mathrm{sq} . \mathrm{km}$ ). Of the total, inland waters form $9.4 \%$. On an average $13.9 \%$ of the land in the South of Finland is cultivated (1950), $1.9 \%$ in the North and $8.0 \%$ of the land as a whole. Of the land area $2 x .8$ mill. ha ( 53.9 mill. acres), or $71.6 \%$, are covered by forests.

OWNERSHIP OF LAND (1950): The total land area was distributed among different classes of owners approximately as follows: private $56.9 \%$, State $\mathbf{3 5 . 0} \%$, ioint stock companies etc. $6.4 \%$, communes $\mathrm{r} .7 \%$.

## POPULATION

NUMBER OF INHABITANTS (1959): 4.4 million. Sweden 7.4, Switzerland 5.2, Denmark 4.5 and Norway 3.6 million.

DENSITY OF POPULATION (1959): In South Finland 24.7, in North Finland 4.0 and in the whole country an average of 14.5 inhabitants to the square kilometre.

DISTRIBUTION BY AREA (1959): $62.4 \%$ of the population inhabit the rural areas, $37.6 \%$ towns and urban districts The largest towns are: Helsinki (Helsingfors), the capital, 454192 inhabitants, Tampere (Tammerfors) 123 686, Turku (Abo) 122240.

OCCUPATIONS (1950): Agriculture and forestry $42 \%$, industry $29 \%$, commerce $7 \%$, transport and communications $6 \%$, services $9 \%$, other economic activities I \%, economically inactive persons $6 \%$.

LANGUAGE (I950): Finnish speaking 9r.x \%, Swedish speaking $8.6 \%$, others $0.3 \%$.

EDUCATION (1960): Practically all persons over is years of age are literate. There are 5 universities (the oldest founded in 1640), 7 colleges of university standard, and 2 teachers' training colleges, besides teacher-training departments in two of the universities.

INCREASE OF POPULATION (r959): births $18.9 \%$, deaths $8.8 \%$ increase $9.4 \%$. Deaths in France $11.2 \%$ and in Great Britain $11.7 \%$.

## TRADE AND COMMUNICATIONS

NATIONAL INCOME (1959, in thousand million matks): Gross domestic product at market prices 1260 (excl. repairs and maintenance). Net domestic product at factor cost, by industrial origin: agriculture 121 ( $12 \%$ ), forestry and fishing 87 ( $9 \%$ ), manufacturing 312 ( $3 \mathrm{I} \%$ ), construction 103 ( $10 \%$ ), transport and communications $8 \mathrm{I}(8 \%)$, commerce, banking and insurance I 27 ( $12 \%$ ), general government 124 ( $12 \%$ ), other services 65 ( $6 \%$ ), total I 020. Index of real domestic product 106 ( $1957=100$ ).

FOREST RESOURCES (195I-1953): The growing stock comprised I 493 million of solid $\mathrm{cu} . \mathrm{m}$ incl. bark ( $\$ 2660$ million cu. ft), of which pine $43.7 \%$ and spruce $35.7 \%$, the rest $20.6 \%$ being leaf-trees, chiefly birch. Of the growing stock, 10900 million $\mathrm{cu} . \mathrm{ft}, 58.0 \%$ of them pine, was up to the standard required for logs. The annual growth is 46 million solid cu. m green wood excl. bark (i 620 mill. cu. ft). The total removal in 1954 calculated according to the use of wood was 45 million cu. m ( r 589 million $\mathrm{cu} . \mathrm{ft}$.)

AGRICULTURE (1959): Cultivated land 2.6 million hectares of which holdings of less than 5 ha amount to $17 \%$, 5 to 15 ha $48 \%$, 15 to 50 ha $30 \%$ and more than 50 ha $5 \%$. Number of holdings 388000 , of which 184000 are of more than 5 ha. Index of agricultural production 98 for 1958 ( $1954=100$ ). Measure of self-sufficiency in the crop year 1958/59: bread cereals $52 \%$, animal products $120 \%$.

INDUSTRY (1958): Gross value of industrial production 966000 mill. marks, number of workers 295000 , administrative employees 59000 , motive power (1958) 2.8 mill. HP. Index of industrial production 113 for 1958 ( $1954=100$ ).

RAIL WAYS (Jan. I, 196I): Length 6388 km , of which 6314 km are State and 74 km private railways. The gauge of State railways $x .524 \mathrm{~m}$.

MERCHANT FLEET (Feb. 28, 1961): Steamers 210 (304 540 gross reg. tons), motor vessels 221 ( 487289 gross reg. tons), sailing vessels with auxiliary engines 82 ( 8859 gross reg. tons). Total 513 ( 800688 gross reg. tons).

MOTOR VEHICLES (Dec. 31, 1959): Private cars 163000 , lorries and delivery vans 57900 , buses 5900 , others 2 100. Total 228900.

AIR TRAFFIC: (Dec. I, 1959) Number of aircraft in scheduled traffic 21, other aircraft 71. In 1958, 424000 passengers were carried by the two Finnish companies; over 177 million passenger kilometres and 2.3 million ton kilometres of freight and mail were transported.

## FINANCE AND BANKING

CURRENCY. Since 1860, Finland has had its own monetary system. From 1877 until 1914 the country was on the gold standard, and returned to it in 1926. Since r931, the redemption of bank notes in gold has been suspended. The currency unit is the mark (Finnish markka). Its official par value is 320 marks per one U.S. dollar. Finland has been a member of the International Monetary Fund since 1948.

MUNICIPAL FINANCES. In the finance accounts for 1958 expenditure amounted to 173143 mill. marks. Total revenue was 168199 million, of which income from taxation 8604 I million. The municipal income tax (non-progressive) averaged $11.64 \%$ of the ratepayers' ${ }^{2}$ taxable income.

THE CENTRAL BANK. The Bank of Finland functions under the guarantee and supervision of the Diet. Its Board of Management is appointed by the President of the Republic; the Bank Supervisors, nine in number, are elected by the Diet. The Bank has a head office in Helsinki and 13 branch offices in other towns.

OTHER CREDIT INSTITUTIONS (Dec. 3I, 1960). There are two big and three small commercial banks with in all 599 offizes, 390 savings banks, 537 cooperative credit societies and their central bank, six mortgage societies, and the Post Office Savings Bank. The savings departments of the cooperative stores accept deposits from the public.

RATES OF INTEREST (April 1, 1959). Bank of Finland discount rates $6 \rightarrow 71 / \mathrm{m} \%$. Other credit institutions: term deposits $4 \%$ ( 12 months'deposits $5 \%$, index-tied deposits $3 \% \%$ ) and sight deposits in savings banks and cooperative credit societies $1 / 2 \%$; lending rate $7 \%$ in general.

# FINLAND'S FOREIGN TRADE IN 1960 

BY<br>ERKKI MÄENTAKANEN, M. Sc. (Econ.)

## FELLOW OF THE BANK OF FINLAND INSTITUTE FOR ECONOMIC RESEARCH

Foreign trade played a predominant role in the favourable development of the Finnish coonomy during 1960. The dependence of the exceptionally high rate of growth of the Finnish economy on foreign demand on the one hand, and on the supply of foreign raw material, investment goods and other producer goods on the other, has during the present period of expansion been shown in an accentuated form.
During 1960, the cyelical development in the United Kingdom, and in the EEC countries in particular was favourable to Finland's foreign trade. The supply of wood-processing products could be increased immediately by virtue of a fuller use of existing capacity. At the same time, the first results of the expanded capacity of the wood-processing industry began to be evident in the export figures for pulp, kraft board and paper other than newsprint, even though the rise in exports thus occasioned was still of relatively minor importance. The recession experienced in the United States was scarcely felt in Finland's foreign trade, although the increased activity of Canadian exporters in United Kingdom markets should be mentioned in this connection.
As regards the measures of poliey which influenced Finland's foreign trade in 1960, there should be mentioned the extended liberalization of imports at the beginning of the year, whereby trade with France came on a multilateral basis and all discrimination be-
tween dollar imports from western European countries was removed. 1) The introduction of the new customs tariff ${ }^{2}$ ) at the beginning of June occasioned a sharp rise in imports in May, followed by a corresponding decline in June.

The coming into existence of EFTA at the beginning of July, and the measures taken by some countries for the advancement of their exports, had no appreciable effect on Finland's foreign trade in 1960.
In a sense, foreign trade was a stabilizing factor in the powerful growth of the Finnish economy. Instead of ending in marked price increases, the excess demand of the early months of the year found an outlet in imports. Towards the end of the year, again, when the influence of domestic demand factors began to weaken, exports continued on a high level. ${ }^{3}$ )

## GENERAL DEVELOPMENT

While the net national income rose in real terms by 8 per cent from 1959 to 1960 , the corresponding increase in the volume of imports was about 27 per cent, and in the volume of exports 16 per cent. A very sharp rise in imports was a feature of the early part of the year, the inerease being particularly marked in the groups of investment

[^1]goods and raw materials. After July, however, there was a distinct levelling-off in the imports of these goods, and the difference in the total volume of imports between 1960 and 1959 diminished slightly month by month. After a slack start attributable to seasonal factors, a steady increase in exports set in during the second quarter, and the high level attained in June was maintained until the end of the year. There was a steady increase in exports in all groups of goods except for agricultural produce and metal industry products; for these the rise on 1959 was relatively small.

By reason of the large imports during the early months of the year, the deficit in the balance of trade amounted to 33000 million marks; at the end of May it had stood as high as 45000 million. The excess of exports in June-December was 22000 million marks, or about double that of the corresponding months of 1959. The influence of the large deficit upon the foreign exchange reserves was mitigated by the extended payment times for imports, along with the use of long-term credits, which was connected with the high capital goods content of the imports (about 34 per cent).

The course of prices also favoured Finland's foreign trade. After a slight rise early in the year, import prices declined a little, so that the annual average was somewhat below the previous year's level. Thus the rise in the value of imports also reflects, by and large, the increase in its volume. An exception is provided by fuels, the prices of which fell distinctly during the year. The average increase in export prices was about two per cent, so that in 1960 there was a 2-3 per cent rise in the ratio of export prices to import prices.

The share of multilateral trade in Finland's imports and exports increased last year, a phenomenon typical of a boom (see Table p. 12). As regards the regional distri-

bution of trade, the increase in the value of imports from the EEC countries was most marked ( +37 per cent), and this was especially true of imports from Western Germany, France and Belgium-Luxembourg ( $+37,+42$ and +54 per cent respectively). The exports to the EFTA countries rose relatively most ( +32 per cent; exports to the United Kingdom, +25 per cent). A comparatively large increase in trade with the Nordic countries (imports +42 per cent and exports +57 per cent), together with the rise in imports from the United States ( +44 per cent) should also be mentioned. Finland's trade with the bilateral sector also increased. The combined share of the ten largest supplier countries in the total value of imports was 85 per cent, against 83 per cent one year earlier. As for exports, the corresponding figures for the ten main

purchaser countries were 81 and 80 per cent respectively. Precisely one-half of Finland's imports and exports was accounted for by its three largest trade partners (United Kingdom, Western Germany and Soviet Union).

## EXPORTS

In export development, wood and woodprocessing products again stood well to the fore; they were responsible for 84 per cent of the increase in exports, and their share in the total value of exports was 75 per cent. Exports of these products rose by 16 per cent
in volume and by 21 per cent in value above 1959, when this share of the total was about one per cent lower.

The influence of the European boom was most clearly reflected in sawn goods exports. These amounted to 1140000 stds and thus exceeded the 1959 figure, already a postwar record. Sawn goods were also of major importance in raising the general level of Finnish export prices; in 1960 the average price of sawn timber was about 13 per cent higher than in 1959, though timber prices were admittedly exceptionally low that year.

A comparison with 1958 shows that both the volume and the value of the exports of sawn goods increased by 50 per cent over two years. As a result of a 26 per cent increase in plywood exports, in conjunction with the increase in sawn goods exports, the share of wood products in total exports rose from 23 to 25 per cent.

The volume of the exports of pulp industry products rose by 9 per cent, and the rise in their prices averaged 3 per cent. The increase related exclusively to sulphite pulp. The share of pulp in the total value of exports declined by one per cent to 17 per cent.

The increase in the volume and value of paper and board exports, at 16 per cent, corresponded to the increase in total exports, but the brisk demand for wood products meant that their share in the total of exports fell by about one per cent to 26 per cent. In this group, the most substantial rise was in exports of newsprint, other paper and kraft board, whereas the exports of kraft paper remained on the previous year's level.

In the latter half of the year, there was a sharp rise in the exports of round and hewn timber, the increase being primarily due to pulp wood. The share of this group in total exports was between 6 and 7 per cent.

As for commodities other than wood and wood-processing products, their export prices displayed no uniform trend. In most instances, the prices were no higher than in 1959. Taken as a whole, the exports of these goods rose by 15 per cent in volume but only by 11 per cent in value. The growth in exports of agricultural produce and metal industry products was relatively modest (see Table 2). In the latter group, the increase was mainly the result of an increase in the exports of vessels, whereas the exports of machinery and equipment fell off. The development of other exports was favourable. The value of these secondary exports rose by 30 per cent, and their volume still more.

As will be seen from the Table 4, in the EEC markets Finnish exports of paper and board experienced a gratifying increase on 1959. Western Germany was the main purchaser, but neverthcless the relative rise was greatest in exports to France ( +64 per cent): As regards the exports of sawn goods and plywood, on the other hand, the shipments to the EFTA countries increased most ( +26 and 28 per cent). Some increase was recorded in exports of metal industry products to western European markets.

## IMPORTS

In the group of investment goods, the increase in the imports of machinery and equipment for industry increased somewhat more than the average, and by the end of November amounted to 68 per cent of the total value of this group. The advancement of investment projects is reflected by the fact that during the second half of the year imports of power engines declined most, whereas the purchases of machines tools for the metal industry were substantially increased. By the end of June, the imports of industrial machincry and equipment were still 66 per cent higher than one year previously, but by the end of November the difference had declined to 25 per cent. Imports of motor vehicles other than private cars grew more than tenfold ( 15907 cars in January-November compared with 1424 cars in January-November 1959). The increase primarily related to delivery vans, for which import licences were generally given according to need.

| 5. REGIONAL DISTRIBU'IION OF SELECTED IMPORTS IN JAN.-SEPT. 1957 AND 1960, PER CENT |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Machinery and equipment, vehicles |  | Manufactures and other finished goods |  | Chemical products |  |
|  | 1957 | 1960* | 1957 | 1960* | 1957 | 1960* |
| EFTA | 35 | 42 | 35 | 33 | 29 | 35 |
| EEC | 35 | 41 | 37 | 49 | 38 | 43 |
| Eastern Bloc | 20 | 7 | 19 | 11 | 21 | 14 |
| Other | 10 | 10 | 9 | 7 | 12 | 8 |

The change since the devaluation of 1957 and the trade liberalization in the regional
distribution of specified imports is seen in the Table 5. Changes have principally taken place only in the three areas mentioned. There has been a particularly notable increase in the imports of finished goods from the EEC countries. No equally distinct shifts have been discernible in other product groups. ${ }^{1)}$

## ITEMS

Rates of interest and terms of rediscounting. On March 9, the Bank of Finland authorized the rediscounting banks to extend the differentiation of lending rates further to that stipulated on June 1, 1960 (see Bulletin No. 6, 1960, p. 22). The maximum amount of credit on which a rate above 7, but not more than 8 per cent, may be charged was raised to the equilavent of 20 per cent of the individual banks' total advances to the public on December 31, 1960. The condition is attached that the weighted average of any one bank's lending rates may not exceed 7 per cent. As the present level of rates is just below this limit, it entails that if some rates are raised, others have to be lowered correspondingly. As regards the loans which should be affected by the measure, the Bank of Finland's recommendations remain unchanged.

Trade and payments agreements. Finland has recently concluded the following trade and payments agreements.

Israel. The trade and payments agreements of March 1.960 ceased to be valid at the end
of 1960. On February 17, 1961, a new trade agreement was signed, under which trade will mainly proceed according to indicative lists appended to the agreement, and payments be made in convertible currencies. The agreement will be automatically renewed unless notice of its termination is given four months before the end of the calendar year.

Czechoslovakia. On February 6, a trade agreement was concluded for 1961. The Finnish export quota includes chemical wood pulp, sawn goods, wallboard, paper, machinery and copper, and her import quota cars, motor cycles, various metal and rolled products, chemicals and textiles.

Morocco. On January 27, the term of validity of the trade agreement signed on September 9, 1960 was extended retrospectively for one year from December 1, 1960.

New bond loans. On February 23, 1961, the Government issued a bond loan amounting to 2000 million marks. The bonds are dated March 1, 1961. This loan is to be subscribed by private credit institutions, and will run for ten years at a rate 2 per cent above
the general deposit rate of the two largest commercial banks. Amortization and interest are tied to the cost of living index to the extent of 50 per cent. It was issued at a price of 99.39 .

On the same day, the Government issued another bond loan to the amount of 1500 million marks. The bonds are dated March 1,1961 and the period of the loan is five years. The loan will run at a rate $21 / 4$ per
cent above the general deposit rate of the two largest commercial banks.

On February 2, 1961, the Government authorized The Central Bank of Co-operative Credit Societies, Ltd. to issue a loan of 2000 million marks. The bonds are dated February 1, 1961 and will run for 10 years. The rate of interest is $21 / 4$ per cent above the general deposit rate of the co-operative credit societies.
