

## THE FINNISH MARKET REVIEW.

## THE MONEY MARKET.

The predominant feature of the economic development in June was the exceptional easiness of the Finnish money market which caused most of our Joint Stock banks to lower their deposit rate on short-term money to only 1 per cent from July list. The Treasury also profited by this, when raising 400 million marks for the new State loan on very favourable terms in the home markeit at the end of June.
Olwing to the paymen't of half-yearly interest deposits in the Joint Stock banks rose heavily in June. They increased altogether by 264.0 million marks of which 47.7 millions represented the share of other credit institutions. Actual deposits due to the public increased by 113.8 million marks or almost exactly the same amount as last year; relatively the increase was, however, a little less than in 1935, eeing that the total of these depoosit raccounts amounted to $6,051.6$ million marks at the end of June, 1936, as against $5,862.2$ millions at the same date last year. The demand for fresh credits was considenably less than in May, when the credits granted lby the Joint Stock banks to the public grew by 147.2 million marks, whereas in June they were reduced by 64.5 millions to $7,474.6$ million marks. The loans between the oredit institutions having kept on a more or less unchanged level, the total volume of credits granted by the Joint Stock banks at the olose of the half-year was somewhat smaller than a
year ago, viz, $7,658.9$ million marks in 1936 in comparisison with $7,680.7$ million marks in 1935. However, considering that during this period the cen'tral bank increased its grants of credit by over 150 million marks, the total volume of actual banking credit in the country at the end of June amounted to $8,624.4$ million marks this year las against $8,531.1$ million marks last year. - The amount of the cash held by the Joint Stock banks also showed the abundant supply of money and reached an unprecedented height at the end of June, as of its 865 millions a considerable part was reserved for the banks' share in the State dooan referred to above.

In conformity writh the favourable development of our trade with foreign countries the foreign payment position of the Joint Stock banks allso improved. Their foreign debts increased, it is true, owing to the lively international transactions, but their holdings abroad increased at the same time by 88.9 million marks, so that, if calculated in net figures, the foreign credit balances grew by 66.0 million marks in all.

We have already in earlier reviews referred to the gold purchases recently made by the Bank of Finland. As a result of such purchases the booked value of the Bank's gold reserve was raised by no less than 29.8 million marks in June and amounted, after a further rise of 13.6 millions, to 544.7 million marks according to the accounts for July 15th, the correspond-
ing amount being 324.8 millions one year earlier. To some exten't an exchange between the two main kinds of reserve held by the Bank of Finland, viz., foreign currency and gold, has thus taken place. From 1,247.9 millions at the end of May the reserve of foreign currency dropped too $1,114.4$ million marks at the end of June chirefly owing to the Treasury still buying foreign exchange for the large loan converstion that is to take place at the ibeginning pf September. The trend of the note circulation is as usual downward art this time of the year, but oiwing to exceedingly large funds being kept on private current accounts in the Bank, the liabillities payable on demand recorded very high figures and caused a reduction of the note reserve by 122.1 million marks in June. In spaite of rising aibsolute figures fior the cover reserve; the note reserve declined also during the first fortnight in July in consequence of the stilil increasing ballances on current account. The combined current wocounts due to the Treasury and to others totalled 795 million marks on Jully 15th or more than half of all the notes in circulation.

The stabillity of the Finnish price level is apparent in the wholesale price index ( 90 for June, 1936 and 1935 ; $1926=100$ ) as well as in the cost of living index (83 for June, 1936 and 1935; $1926=100$ ) and the consumption cost index, which at the middle of July stood at: 99.6 in 1936 as icompared to 100.4 in 1935 (July, $1931=100$ ). Thus, local prices have on the whole so far not been much influenced by the rising export prices, the index of which has risen lby no less than 10 points during the last 'twelve: months.

## TRADE AND INDUSTRY.

Exports that have got under way early this year amounted to: 703.7 million marks in June, thus exceeding the corresponding value last year愔: $\theta 1.3$ millions, although not reaching the record figure of 760.9 million marks for June, 19894: The value of imports in June was, on
the rother hand, at 559.9 million marks, larger this year than in either 1.935 or 1934, the figures at that time being 472.7 and 444.0 million marks respectively. During the month under review exports thus exceeded limponts by 143.8 million marks and the balance of trade for the first six months of the year provided a surplus of exports of 52.7 million marks. For the sake of comparison we give bellow a table showing how the bralance of trade has worked out during the first and second half of the year since 1933: -

As it may be assumed that foreign trade will develop quite normally during the latter thalf of 1936, too, a fairly large totail surplus of exports may be expected again this year, although there is reason to believe that imports will again reach higher fiigures.

By the end of the first half of the year Finnish timber shippers had sold nearly 825,000 standards of sawn woodgloods as against 610,000 standards last year. By the middle of July the total sailes amounted to 840,000 standands, i. e. almost 85 per cent of the quote alloted to Finland in the international timber agreement, which no doulbt will be fully covered by the end of the year.

## THE LABOUR MARKET.

The growing demand for labour predicted in our last review brought the number of unemployed registered at the Unemployment Boards down to 2,409 at the end af June. As the majority of these were engaged in the relief works ronganized by the State, only about 250 people were actually registered as unemployed in the whole country. Since the boom in 1928 conditions have not been so easy in the labour market, but disputes are, of course, also more likely to arise under such circumsbances.

## CONTENTS OF THE TABLES.

The term smports covers all imported goods which are placed on the market either immediately after importation or after storage. Exports coveas all goods exported from the open maxiket, including re-exports. Goods are declared to the Customs by their owner, who must at the same time state the value of the goods as calculated at the frontiers of the country.

| June | 884 | 962 | 1101 | 1069 | 1364 | 1175 | 1753 | 984 | +1 | June |

The Index is calculated by the Research Office of the Ministry for Social Affairs according to monthly reports from 30 different centres. It is based on the cost of living for the first half of $1914=100$ and refers to the normal budget of a workman's family. 'Ihe index for the total cost of living is the average of the weighted group indices.
36. - WHOLESALE PRICE INDEX.

The index is calculated by the Central Statistical Office, and is based on the average prices for $1926=100$. The first group of indices refers to goods appearing in local wholesale trade in Finland, whereas the indices for imported and exported goods refer to the total quantities of goods imported or exported, including the movement of such goods that are in no way intended for wholesale trade in Finland. An indirect welghting has been applied, by means of which each class of goods is represented by the number of commodities corresponding to the calculated importance of this class in wholesale trade. The averages are arithmetical ones.
87. - INDEX OF WORKING HOURS IN IND USTRY.

## CERTAIN PARTICULARS ABOUT FINLAND.

## 1. FORM OF GOVERNMENT.

Finland formed a part of the kingdom of Sweden from 1164 to 1809 ; from 1809 it was an antonomous Grand Duchy connected with Russia up to December 6th, 1917, when Finland declared its Independence, which was acknowledged by all the Powers including Sovlet Russia. It became a republic in 1919. The legislative power of the country is vested in the Diet and the President. The highest executive power is held by the President chosen for a period of 6 years. The present President $P$. IS. Svinhufvud is elected for the term March 1st, 1931, to March 1st, 1937.

The Diet, composed of 200 members, is elected by unlversal suffrage. The proportions of the different parties in the Diet elected in 1936 are as follows:

Number
\$ocial-Democratic party ............................................ . . . 83
Agrarian party ......................................................... . . . . 53
§wedish party ............................................................ 21

## 2. LAND.

THE AREA is 388,217 square kilometres $=149,900$ square malles (Great Britain's area is $89,047 \mathrm{sq}$. m. and Italy's area 117,982 sq. m.). Of the total area $11.5 \%$ are lakes. On an average $11.8 \%$ of the land in the south of Finland is cultivated, $1.1 \%$ in the North, $6.6 \%$ of the whole land. Of the land area 25.3 mill. ha ( 62.5 mill. acres) or $73.6 \%$ are covered by forests.

THE AVERAGE TEMPERATURE in the coldest month is in S. W. Finland - $5^{\circ}$ to $-6^{\circ} \mathrm{C}$., in Lappland - $15^{\circ} \mathrm{C}$. and during the warmest month $+15^{\circ}$ and $+13^{\circ}$ to $+14^{\circ} \mathrm{C}$. resp. The average temperature in Helsinki (Helsingfors) is $+4.6^{\circ}$ (in Oslo $+5.4^{\circ}$, In Montreal $+5.4^{\circ}$, in Moscow + 3. $6^{\circ}$ ). The ground is covered by snow in the South for about 100 days, in Central Finland for 150 to 180 days, in Lappland about 210 days.

## 3. POPULATION.

NUMBER OF INHABITANTS (1934): 3.8 millions (of whom 0.2 million emigrants), Sweden (1938) 6.2, Switzerland (1932) 4.1, Denmark (1932) 3.6 and Norway (1933) 2.9 millions.

DENSITY OF POPULAATION (1984): In South-Finland 18.5, In North-Finland 2.6 and in the whole country an average of 10.8 inhabitants to the square billometre.

DISTRLBUTION (1934): 79.6 \% of the population inhabit the country, $20.4 \%$ the towns and urban districts. The largest towns are (1934): Helsinki (Helsingfors), the capital, 272,427 inhabitants, Viipuri (Wiborg) 72,154, Turku (Åbo) 69,466, Tampere (Tammerfors) 50,184.

OCCUPATION (1930): agriculture $59.6 \%$, Industay and manaal labour $16.8 \%$, commerce $4.3 \%$, transport $3.8 \%$, other occapations $15.5 \%$.

LANGUAGE (1930): Finnish speaking $89.4 \%$, Swedish speaking $10.1 \%$, others $0.5 \%$.

RELIGION (1984): Lutheran $96.1 \%$, Greek-Orthodox $1.8 \%$, others $2.1 \%$.

EDUCATION (1930): Amongst persons over 15 years of age only $0.9 \%$ are illiterate. There are three universities founded in 1640, 1917 and 1920.

INCREASE OF POPOLATION (1984): Births $18.1 \%$, deaths $12.4 \%$ (in France in $193116.2 \%$, and in England in $198112.3 \%$ ), natural increase $5.7 \%$.

## 4. TRADE AND COMMUNICATIONS.

FOREST RESOURCES. The growing stock of the forest is 1,620 million $\mathrm{m}^{3}(57,214$ million cubic feet). The merchantable timber
(measuring 20 cm at breast height $=6 \mathrm{in}$. at a height of 18 ft. ) amounts to 1,557 million trees. Of this number pine is represented by $\mathbf{6 0 . 7} \%$, spruce by $28.1 \%$, the conifers thas constituting $88.8 \%$ or 1,383 million trees; leaftrees, mostly birch, $11.2 \%$ or 174 million trees. The annual increment is 44.4 million $m^{2}(1,568$ million cub. ft.). The annual fellings according to earlier calculations are 40 million $\mathrm{m}^{3}$ ( 1,413 million cub. ft.). In North Finland the increment is much larger than the fellings, but in South Finland excess felling occurs locally.

AGRICULTURE (1934): Cultivated land 2.2 million hectars, divided as follows: area under cultivation 0.3 - 10 hectars $33.4 \%$, $10-50$ ha $52.1 \%, 50-100$ ha $8.4 \%$, over 100 ha $6.1 \%$. Cultivated land is divided between the different kinds of crops as follows: 49.7 \% hay, 19.2 \% oats, $10.0 \%$ rye, $5.8 \%$ barley. $3.4 \%$ potatoes, $12.4 \%$ other. The number of dairles in 1934 amounted to 594.

OWNERSHIP OF LAND. The land area is distributed among different classes of owners approximately as follows: private 52.1 \%. State $39.7 \%$, Joint Stock Companies $6.5 \%$, communities $1.7 \%$.

INDUSTRY (1934): Number of industrial concerns 3,747, hands 161,682, gross value of products of industry 13,120 million marks.

LENGTH OF RAILWAYS (1934): $5,711 \mathrm{~km}$, of which 5,455 km State railways and 256 km private. The gange is 1.524 m .

COMMERCIAL FLEET (1986): Steamships 533 (244, 933 reg. tons net), motor vessels 158 ( 16,788 reg. tons net), salling ships 163 ( 46,887 reg. tons net). Total 854 (308 608 reg. tons net).

## 5. FINANCE AND BANKING.

CURRENCY. Since 1860 Finland has its own monetary system. From 1877 up to the Great War the currency maintained its stable gold value and after the disturbances caused by the war Finland has again from January 1st, 1926, a gold standard. The unit of currency is the mark (Finnish markkas) $=100$ pennia. According to the monetary law of December 21st, 1925, a gold coin of 100 marks' value shall contain $3^{15} / 19$ grams of fine gold. Since October 12th. 1931, the redemption of bank notes in gold is, however, suspended.

STATE FINANCES. According to the balance sheet for 1935 the State revenue was $4,559.3$ million marks of which $\mathbf{3 , 4 8 2 . 2}$ million marks were current revenue, and State expenditure 4,533.4 million marks, of which $2,872.7$ million marks were current expenditure. The principal sources of revenue wers as follows; State property and andertakings (net) 302.3 , direct taxes 575.8 , indirect taxes $1,880.0$, stamp duty 173.9 , charges 96.1 , interest and dividends 235.4 and capltal revenue 1 077.1. The value of State property in 1922 is estimated at $11,150.6$ million marks. For Public Debt see table 19 in this issue.

MUNICIPAL FINANCES. According to the Budget for 1935 expenditure amounted to $1,343.3$ million marks. Income from taxation was calculated at 483.0 million marks, taxed income at $5,501.4$ million marks. The municipal income tax (non progressive) averaged $8.8 \%$ of the ratepayers' income.

THE BANK OF ISSUE. The Bank of Finland, (founded in 1811) is a State Bank. Its head-office is in Helsinki (Helsingfors) with branches in Turku (Abo), Porl (Björneborg), Vaasa (Vasa), Oulu (Uleąborg), Kuopio, Joensuu, Sortavala, Vipuri (Wiborg), Mikkeli (S: M Michel), Tampere (Tammerfors), Hämeenlinna (Tavastehus), Jyvaskyla and Kotka.

THE JOINT STOCK BANKS (1936): Number 9, possess 471 offices, where all kinds of banking business is transacted. Including all banks, there is one banking establishment per 7,200 inhabitants.

The Largest banks are: Kansallis-Osake-Pankki, Ab. Nordiska Föreningsbanken and Helsingfors Aktiebank, all with head offices in the capital.

OTHER BANKS (1935): Mortgage banks 6, Savings banks 482 Co-operative Credit Societies 1,299 and a Central Bank for the latter.

${ }^{1}$ ) From the beginning of 1935 new series of figures (see tables 7 and 8 in this Bulletin).

# THE HISTORICAL FOUNDATION OF FINLAND'S NORTHERN ORIENTATION. 

BY<br>K. N. RANTAKARI, M. A.<br>DEPUTY CHIEF OF DEPARTMENT OF THE MINISTRY FOR FOREIGN AFFAIRS.

Many, perhaps even most foreigners believe that Finland's political history and the political experience of the Finns only began after the end of the Great War or about eighteen years ago and judge of our political achievements, the economic progress based on them and our qualities accordingly. This is natural as regards those, who do not know the part played by the Finns in the administrative and political life of Stweden during the seven centuries of union between Finland and Sweden, and who are not aware that subsequently, when Finaland was connected with Russia for over a century, it was as an autoniomous state that had nothing in common with Russia except its ruler, the succession to the throne and foreign policy. In a previous article on „Some guiding principles in Finland's political orien'tation" (see Bulletin No. 5, 1936) we had occasion to draw the reader's at'tention chiefly to the geographical bases of this questrion and we will now lattempt to describe the influence of historical conditions on Finland's foreign policy.

## THE FINNISH SOCIAL SYSTEM IN OLDEN TIMES.

Many facts seem to prove that social conditions in prehistoric or early medieval Finland, at any rate in South-Western Finland, were very similar to those in Sweden, corresponding in their main points to what was most essential in the social conditions of the Germanic tribes before the Great Migrations. Thus in South-

Western Finland, in its Finnish and Swedish speaking districts, 'there was, even prior to the politioal connection between Finland and Sweden, apparently an institution lof a people's assembly similar to the one in Siweden, i.e., provincial assemblies of the people belonging to several districts, at which, besides the administration of justice, laws were made and other measures of governmen't such as whar and peace were decided. It is also known that everywhere else among the ancient Finns people's assemblies were held, although even less is known about them than of the former.
The similarity between the circumstances prevalent in the 'two countries at the time, when Finland was annexed by Sweden, as well as the relatively insignificant numbers of the Swedes explain why the relationship of conqueror and conquered never arose between Swedes and Finns rand why the process of uniting the country with Sweden rwas in reality so painless that within less than awo generations after the last crusade against Finland the representatives of the Finnish peasants were grianted the right, in 1363, of partioipating in the election of the King. As early as in 1291 the first bishop of Finnish birth was given a seat among the King's counsellors and subsequently all the other Catholic bishops in Finland enjoyed the same privilege.

Thus, from the first phase of the union with Sweden the Finns were placed on an equality with Swedish-born subjects. So the simililar social phenomena proceeding from similar oniginal conditions continued to develop in both countries
in the same direction without coercive measures. When a class performing special military duties and freed from taxation arose in Sweden at the end of the 13th century, as even earlier in many other countries, and bectame the estate of the nobles, the same phenomenon was witnessed in Finland, though rather later. This Finnish aristocracy twas of local onigin, especially at first, even Finnish speaking for the greater part and not immigrated from Siweden. The alerical and secular posts and official positions of trust were in Finnish hands allmost without exception in the latter half of the Middle Ages. And the Finnish aristocracy attended the Diets, just as the Swedish, on the invitation of the King, though in considerably smaller numbers on account of the length of the journey. In these medieval State meetings the Finnish aristocracy generally sided with the S'wedish national group against the Dinnes and other foreigners, which should be regarded as a further proof of the similarity of the political conditions in these two countries. This is also shown by the fact that the nobles that performed special military duties did not succeed any better in Finland than in Sweden in depriving the peasants of their civil rights nor even of their political importance and corresponding position. There was never any serfdom in Finland, any more than in Sweden, and the peasant participated in deciding the most important Sitate questions. In 1435, however, the first Stitate Assembly of the whole realm was convened, in which the clerical and secular free estates, the burghers and the peasants took part. And from that time such Diets of the four estates formed the rivic and constitutional corner-stone in Finland, as in Sweden, lasting as an inheritance from Sweden in the history of Finland close on half a century longer than in Sweden itself. This unique representaitive system, in which the peasants have, broadly speaking, enjoyed the same rights of represenitattion as the nobles, the olergy and the burghers adll since the Middile Ages, continues to exiist in Finland as a single-chamber, in Sweden as a two-chlamber parliament.

The Swedish-Finnish social and political development differs entirely from the one that has fallen to the lot of other small nations living in proximity to the Finns, e.g., the Baltic states. The sacial development of the Germans and Danes, much stronger even numerically, had, at the time that they conquered these countries, already abandoned the stage of people's assemblies and entered upon the period of feudal chivalry, from which the nations they encountered were still remote. There could therefore be no question of equality ibetween these invading foreigners at a different stage of developmen't and representing a different condition of power, and the original population, but only the relationship of conquerors to conquered which became exceptionally pronounced in the special conditions and vicissitudes of these countries. On the other hand Finland and Sweden vied with each other in producing warriors and generals and fought side by side throughou't many centuries often against almost the half of Europe, at times victoriously; and the conquered countries were ruled by men of both nations.

Finland received Ohristianity at the hands of Sweden, but the Protestant faith was brought to Finland from the country of origin through men of its own people, as. was the case in Sweden. And even earlier, during the Middle Ages, Finland had sought higher education outside Sweden in the universities of the great civilised countries and had done so, at any rate comparatively, to an equally large extent as Sweden.

## THE COLLABORATION OF FINNS AND SWEDES.

In these circumstances a special kind of relationship developed that bound Finland to Sweden by many visible and invisible ties, but alliowed the country and people to develop a more and more independent spiritual and material life and continued to do $s$, when the Latin language was abandoned and Swedish became the
medium of culture in Finland, too. But though the Finnish language wras gradually pushed into the barckground towards the end of the Siwedish régime, the Finns were, nevertheless, at all times on an equality writh the Swedes, as an equally important factor in a relative sense.

For centuries the Finns were members of the King's council, they took part in the Diets, ecclesiastical assemblies and economic undentakings with the same rights as the ISiwedes and profoundly affected the fate of the realm. Finnish generals, admirials, statesmen and administrators became as important as the Swedish, though naturally in smaller numbers. The greatest change in Swedish social policy, known as the Great Reduction, was carried out principally by Finns under the guidance of the King.

At the same time it was a man of Swedish birth, who wrote the first Finnish grammar and the national revival of Finiland, even as regards the Finnish language, proceeded at first in Swedish; but on the other hand Finland, even after being separated from Sweden, produced the greatest patriotic poets, who wrote in Siwedish, so that even at the present day the Finns sing their own national anthem translated from the Swedish and the Swedes read the works of these Finns to their children to encourage a patriotic and moral spirit in the rising generation.

Finland has adopited the good Swedish laws as a ibasis for its future, but at the same time the Finns had a share in developing these laws in the Diets and various administrative posts. And in developing the jurisprudence common to both countries Flinland has played its part by giving birth to the greatest scientific interpreter of Swedish law in the Northern countries and by supplying Siweden, even after the separation of the countries, with prominent jurists and administrators. Swedes occupied Finnish episcopal seats alternately rwith Finns and made the Finnish people litenate, but on the other hand Finns also wore the mitres of Swedish bishops, even of a Swedish archbishop.

Honour is due to Sweden for having performed the greatest task in maintaining and developing the liberty of the Northern countries, but the Finns, too, participated in this work. This is proved by the fact that the freedom of the press was first gained in Siwe-den-Finlland chiefly through the efforts of a Finnish member of the Diet and that before Adam Smith the same man had published his liberal economic works that fought against the barriers of the prevaliling meroantile system.

## SWEDISH OPINION.

This collaboration for centuries with Sweden and through it with the whole of Scandinavia shows that neither Finland's political existence nor especially its sovereign'ty is a thing of yesterday, but is based on sure historical ground and that in such circumstances Finland possesses a firm foundation for the Northern orientation towlards which the Finnish Government has wished to guide the foreign policy of the country. In order that the evidence should not be conffined exclusively to the facts and arguments of the present author, we quote some passages from the historic speech delivered by the Swedish-born Commander-in-Chief of the Army of Sweden-Finland at the time that Finlland was separaited from Siweden and annexed by Russia, when the addressed the comblined Army on Siwedish ground in the autumn of 1809 after the conclusion of peace: "By this peace the Swedish crown loses a third of its territory, Siweden loses the great Finnish nation, its strongesit bulwark," said this Swede, and continued: "And not only this, but the Siwedish Army loses the kernel and the most valuable part of its military forces. The Swedish mothercountry is crushed, steeped in regret and sorrow for irrepanable sacrifices, but an omniscient providence has dectided our fate, it mus't be accepted patiently, submissively."
„Swedes, be proud that you have seen this remnant of the Finns! Remember them! Honour them! Look at their worn-out bodies, their pale
faces, the marks of their faithful, possibly vain efforts during the last few years! And you Finns! When you return to your birthplaces, tell there of the thanks of the Swedish people to your people. You return with torn garments, with mutilated or wounded limbs, but you take with you the visible beauty of honourable warriors' souls. None of you can become enemies of the Swedish mother country; of that I am certain; but remain its friends for ever. If the force of the new sovereign power should prevent the fulfilment of your hopes and your wishes, let your blessing go out to the mother-country
in the silent language of your hearts and minds! Remind your children of this, from generation to generation we bless you, we honour you."
„Finns! Brothers! If tears of blood from my eyes could confirm my words, they would flow now, and every drop would assure you of my respect, my friendship."

Such is the historic testimony the Finnish people received for its seven hundred years' comradeship with the Swedes from a man of Sweden, who had, in the most extreme trials, learn't to know the Finnlish people. It is as great in value as any historical documen't.

# FINLAND'S BALANCE OF PAYMENTS FOR 1935. 

BY<br>A. E. TUDEER, PH. D.<br>STATISTIOLAN TO THE BANK OF FINLAND.

As was to be expected on account of the large surplus of exports in the balance of trade for 1935, Finlland's ballance of payments for last year also records a considerable surplus of income. This is clearly evident from the figures regarding Finlland's balance of payments recently published by the Central Statistical Office. Before, however, giving the results of this calculation, we must say a few words as to the principles adhered to in making it.

## PRINCIPLES OF CALCULATION.

In the first place, the Finnish calculation of the ballance of payments only includes the actual income from abnoad and the expenditure made there, but neither issues of loans, nor redemption of delbt or any other items that in their essence represent the movement of capital. Also, a record of the actual payments made between Finland and other countries during this period has not been aimed at, but an attempt has been made to elucidate, how Finlland's balance of payments would have turned out in case all payments had been made in cash. In other
respects, too; the same principles have been adopted in the main on which the calculation of Finland's balance of payments has previously been ibased (see, e.g., Nio. 8, 1935, of this Bullettin). The fluctuations in the value of some foreign currencies, of course, introduce an element of uncertain'ty in'to the calculations that it has been imposstible to avoid. As far as possible the conversion of all amounts in forelign currency has, however, been made according to rates actually paid.

As we have pointed out in previous reviews, the following calculation of the balance of payments aannot be considered exact in its details. In some respects the figures of income and expenditure are based on precise statistical data, but in other points only on more or less summary calcullations. On the whole, horwever, they provide a correct idea of the balance of payments and the changes occurring in it from rear to year.

## INCOME.

The income in the balance of payments has been calculated by the Central Statistical Office at the following amounts: -

|  | 1934 |  | 1935 |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Mill. | $\begin{aligned} & \text { Mill. } \\ & \text { mks. } \end{aligned}$ | $\begin{aligned} & \text { Mill. } \\ & \text { mks. } \end{aligned}$ | $\begin{aligned} & \text { mill. } \\ & \text { mks. } \end{aligned}$ |
| Exports | 6,230 |  | 6,240 |  |
| stowage charges not included $\qquad$ | 15 | 6,245 | 10 | 6,250 |
| Haribour charges |  | 70 |  | 70 |
| Shipping freights |  | 385 |  | 410 |
| Emigrants' and seamen's remittances . ........... |  | 100 |  | 100 |
| Foreign travel |  | 210 |  | 250 |
| Foreign insurance |  | 130 |  | 120 |
| Post Office, Telegraph Office and State Railways' |  |  |  |  |
| revenue from abroad . . Foreign representatives . |  | 10 |  | 10 15 |
| Interest from abroad. |  | 95 |  | 15 |

It will be seen that the changes since the previous year in the income in the balance of payments were inconsiderable. The most striking increase is in the income from foreign tourists' journeys in Finland and in the greater yield from shipping freights. It is also worth noting that the already small income in interest from abroad fell off still more. Altogether the income in the balance of payments for 1935 is calculated at 7,240 milllion marks as companed with $\mathbf{7 , 1 9 0}$ millions for the previous year.

## EXPENDITURE.

The changes in the expenditure in the balance of payments were appreciably greater, as will be seen from the following figures for the principal items of expenditure: -

|  | 1934 |  | 1935 |  |
| :---: | :---: | :---: | :---: | :---: |
|  | $\begin{aligned} & \text { Mill. } \\ & \text { mks. } \end{aligned}$ | $\begin{aligned} & \text { Mill. } \\ & \text { mks. } \end{aligned}$ | $\begin{aligned} & \text { Mill. } \\ & \text { mks. } \end{aligned}$ | $\begin{gathered} \text { 30 } \\ \substack{\text { maill. } \\ \text { mks. }} \end{gathered}$ |
| Imports | 4,780 |  | 5,340 |  |
| less: marine and transport insurance paid to Finnish companies .... | 10 | 4,770 | 10 | 5,330 |
| Smuggling . ............. |  | 5 |  | 5 |
| Post Office, Telegraph Office and State Railways' expenditure abroad .... |  | 10 |  | 15 |
| Representation abroad and share in international expenses ............... |  | 35 |  | 30 |
| Remittances to emigrants |  | 10 |  | 10 |
| Travel abroad |  | 190 |  | 240 |
| Insurance premiums and claims .................. |  | 150 |  | 150 |
| Interest |  | 450 |  | 400 |
| of which: |  |  |  |  |
| State | 196 |  | 180 |  |
| banks | 5 |  | 5 |  |

This shows that it was above all the expenditure incurred for imports that increased. The increase under this heading amounted to 560 million marks. There was also an appreciable increase in the item "Travel abroad". Thiis rise of 50 million marks was even slightly larger than the increase in the corresponding item of income referred to. On the other hand the last item in the albove table, expenditure in interest, recorded a considerable decrease, viz., of $50 \mathrm{mil}-$ lions which is all the more worth noting, seeing that there had already been a reduction of 100 millitions during the preceding year. The reason should be sought in the appreciable reduction of Finland's foreign indebitedness and in the converstion of several loans to lower rates of interest.

According to these calculations the total expenditure amounted to 6,180 million marks. In comparison with the corresponding figure for 1934, 5,620 millions, the expendliture in the balance of payments had increased by no less than 560 midllion marks.

## THE DIFFERENCE BETWEEN INOOME AND. EXPENDITURE.

Owing to the income only having increased slightly, while the expenditure wals constiderably higher, the surplus of income was not quite as large as for 1934, when the surplus of 1,570 million marks was the bighest ever recorded. But as the income in the balance of payments exceeded the expenditure by 1,060 millions, the result may be considered grod. With the exception of the last three years, 1932-1934, when the balance of payments wras exceptionally satisfactory, it has never attitained such a high figure as last year.
Regarding the question as to how these considerable surpluses of inicome in the Finnish balance of payments have arisen, we find that the balance of trade proves the deciding factor. If smuggling is inoluded among the imports, to which it actually belongs, although it is not included in the trade statistics, the result shows that the ballance of trade pro-

vided a surpilus of expports amounting to 915 million marks in 1935 as against 1,470 milllions in 1934. At the same time the table on page 33 shows that interest (i. e., expenditure in interest less income in intterest) represen'ted a net expenditure last year of 385 million marks in comparision :writh 425 millions in 1934. Besides, lit is evident from the above tables that a net income was ob'talined from shipping (including tharbour charges) of 480 agalinist 455 million marks, from emigr'an'ts' and seamen's remititances of 90 millions, from tourist traffic and foreign travel of 10 agalinst 20 millitions and so on. Adding up all the items excepting those included in the bralanice of triade and interest, the result is tha't they yielded a surplus of inoome amountling to 530 million marks in 1935 and to 525 millitions in 1934. It will thus be seen that thlis income was slightily largrir than the net expenditure on paymen't of interest abroad and therefore was more than sufficien't to cover it, even learring a surplus. The final result, therefore, is that, as we have pointed out in previous reviews, the balance of trade and the changes that oocur in it are the decisive factor for Finland's balance of payments in different years.

A REVIEW OF THE YEARS 1922-1935.
In order to illustrate the course pursued by the balance of payments we give the following
figures for the income and expenditure in it during the whole period for which it has been calculated. In doing so the data for the earlier yeiars have been corrected in acoordance with subsequent alterations, i. e., with improvements in the methor of calculating the bailance of payments.

| Year | Income Mill. mks. | Expenditure Mill. mks. | Surplus of income (+) or ex penditure ( - ) Mill mks |
| :---: | :---: | :---: | :---: |
| 1922 | 4,984 | 4,465 | + 509 |
| 1923 | 4,968 | 5,18:9 | - 227 |
| 1924 | 5,639 | 5,327 | + 312 |
| 1925 | 6,312 | 6;172 | + 140 |
| 1926 | 6,437 | 6,3167 | + 70 |
| 1927 | 7,218 | 7,140 | + 781 |
| 1928 | 7,256 | 8,8861 | - 1,605 |
| 1929 | 7,440 | 7,917 | - 477 |
| 1930 | 16,3445 | 6,156 | + 189 |
| 1931 | 5,315 | 4,32:8 | + 987 |
| 1932 | 5,630 | 4,453 | + 1,177 |
| 1933 | 6,190 | 4,840 | + 1,350 |
| 1934 | 7,190 | 5,620 | + 1,570 |
| 1935 | 7,240 | 6,180 | $+1,060$ |

This shows that in general Finland's balance of payments has recorded larger income than expenditure. The only exceptions are 1923 and 1928-1929. If we add up the surpluses on the one hand and the deficits on the other for the whole period from 1922 to 1935 , the net result is a surpolus of income amounting to approximately 5,100 million marks.
As already stated, the changes in the balance of payments are closely connected with the changes in the balance of trade. This con-
formity in the balance of payments and the balance of trade is clearly evident in the diagram on page 32 and is allso illustrated by the following figures:-

|  | Surplus of exports ( + ) or imports (一) | Excess of expenditure on interest over income from interest | Other items in the balance of payments |
| :---: | :---: | :---: | :---: |
| Year | Mill. mks. | Mill. mks. | Mill. mks. |
| 192,2 | + 468 | $-227$ | + 278 |
| 1923 | - 245 | - 254 | +269 |
| 1904 | + 238 | - 266 | + 340 |
| 1925 | + 61 | - 325 | +404 |
| 1926 | 38 | $-285$ | +393 |
| 1927 | - 40 | - 3118 | +436 |
| 1928 | - 1,740 | $-350$ | + 485 |

## THE BALANCE OF PAYMENTS AND MOVEMENT OF CAPITAL.

As we have already mentioned, the movement of capital is not included in the above figures. If complete and exact particulars were available regarding all the income and expenditure in the balance of payments and the actual movement of capithal, the latter should correspond exactly to the net result of the balance of payments. In practice, of course, this is not the case, yet in spite of this it is safe to assert that the surplus of 1,060 million marks in the balance of payments for last year indicates that it was possible to emplloy approximately the same amount for the redemption of Finland's foreign indebtedness. This result is confirmed in broad lines by the information available regarding the capital transactions that took place during the year under revierw.

In the course of 1935 two new loans were negotiated :abroad. The State issued 4 per cent Serial Notes for 10 mallion dollars for the purpose of converting its 7 per cent dollar loan of 1925 and its ${ }^{1} 1 / 2$ per ceent dollar loan of 1928. At the end of 1934 there were bonds of these
two loans outstanding altogether to a nominal amount of 22.2 milliion dollars, but over a quarter of this was in Finnish hands. The Oity of Helsinki (Helsingfors) issued a loan of 5 million Swedish crowns for redeeming its share of the Finnish Guananteed Municipal dollar loan of 1924, this loan being redeemed in its entirety. Further, the City of Viipuri (Wiborg) repaid its 8 per cent loan of 1933 in Siwedish crowns entirely, there having been 1.1 million crowns outstanding at the end of 1934. In addition tother foreign loans were amor'tised according to contract, besides which various quantities of bonds were repatriated either for future amortisation instalments or as an investment. On the other hand some minor items of Finnish bonds and shares were sold abroad. According to calculations Finland's funded foreign debt, calculated at current rates of exchange, iwas reduced from 6,010 to 5,070 milllion marks. Thus 940 millions were employed for this purpose or the greater part of the surplus in the balance of payments. The changes in Finland's shortterm foreign indebtedness and balances were of minor relative importance. According to calculations the short-term indebtedness was reduced by about 80 million marks, while the decrease in the corresponding balances amounted to about 330 millions. In this way Finland's net short-term foreign balances were reduced by 250 million marks. A third item must also be taken into considecration, for the Bank of Finland increased its gold reserve last year by about 150 million gold marks which is equal to nearly 300 million paper maxks. The greater part of this amoun't still remained abroad at the end of last year and thus constituted an increase in the foreign sight balances.

We find, therefore, that owing to the favourable balance of payments Finland was able last year, as in all years since 1930 , to reduce her foreign debt to a considerable deguee and in other respects, too, to stabilise her foreign payment position.

## ITEMS.

General election. The general election of representatives to the Finnish Diet took place on July 1st and 2nd. Voting was fairly lively, $1,174,000$ votes beling recorded as compared iwith $1,108,000$ at the last election in 1933. The members of the Diet are elected on the system of proportional representation and the votes and seats were divided among the parties in the Diet as follows in accordance with the results for the whole country in 1936 and 1933: -

|  | ${ }_{\text {Votes }}^{1936}$ | Seats | $\begin{gathered} 1933 \\ \text { Votes } \end{gathered}$ | Seats |
| :---: | :---: | :---: | :---: | :---: |
| Social-Democratic party | 452,033 | 83 | 413,551 | 78 |
| Agrarian party | 2262,803 | $5: 3$ | 1249,758 | 53 |
| Swedish party | 131,251 | 21 | 115,433 | 21 |
| Unionist party | 121,341 | 20 |  | 18 |
| Patriotic National Movement party ........ | 97,4776 | 14 | 1877,527 | 14 |
| Progressive party | 73,865 | 7 | 82,129 | 11 |
| Small farmers' party | 22,406 | 1 | 317,544 | 3 |
| People's party | 7,3176 | I | 9,390 | 2 |

The representation of the parties among the 200 deputies in the Finnish Diet will therefore not differ to any marked extent from its former composition, when the new Diet assembles in the autumn.

Conversion of State loans. On June 30th the Finnish State issued an internal bond doan of 400 million marks nominal value through a bank syndicate consisting of the Bank of Finland, Ab. Nordiska Föreningsbanken, Kansallis-Osake-Pankki, Helsingfors Aktiebank, the Central Bank of the Savings Banks and Oy. Wilh. Bensow Ab. The State loan, issued at a rate of $981 / 2$ per cent, bears $41 / 2$ per cent interest and the term of redemption is 30 years. The proceeds are to the employed for the redemp.tion of the State's $6 \frac{1}{2}$ per cent dollar loan of 1926 which was notified for redemption on September lst this year. This loan, the final redemption of which was originally to fall due in 1956 according to the scheme of redemption, wras
originally issued for 15 million dollars, but at present there are bonds outstanding to a nominal value of 12.8 million dollars of which more than a third are held in Finland.

The Treasury has also given notice of redemption of all the bonds of a $5 \frac{1 / 2}{}$ per cent internal bond loan of the year 1919 on December 31st this year. Of this loan, the original term of redemption of which was to have expired in 1966, there were about 46.8 million Finnish marks outstanding at the end of last year.

Fresh investment in the woodworking industry. Äänekoski Ab. recently decided to build a sulphite cellulose mill with an annual output of albout 40,000 tons, chiefly of strong sulphite cellulose, in connection with its other mills at Äänekoski. The new mill is expected to be ready to start working in the summer of 1937.

In connection with this scheme the company has resolved to issue a bond loan of 30 million marks at 5 per cent interest, which is to be issued in the au'tumn through Ab. Nordiska Föreningsbanken.

Increase of capital. Ab. Wärtsilä Oy. has decided, with a view to consolidating its financial position, to increase the company's capital from 30 to 45 midlion marks by an issue of 50,000 new shares at a nominal value of 300 marks each. Of this quantity the affiliated company, A.b. Kareliawood Oy., is to take over 16,667 shares at par, while the remainder of 33,333 shares is to be offered for subscription. The company's share capital was last raised by an issue of new shares in 1934 from 24 to 30 million marks.

Crop prospects. The exceptionally fine and hot weather reported in our last review has continued in Finland. The prolonged period of heat and drought even had an adverse effect to a certain extent on the crop prospects, although the rain that fell fairly generally throughout the country after July 16th improved the growth very considerably, the latter being accelerated to such an extent by the warm weather that its development has reached a stage a fortnight in advance of normal conditions. The mowing of hay could also begin much earlier than usual and was in most parts of the country favoured by the fine weather.

The following preliminary estimates of the crop prospects drawn up by the Board of Agriculture for the middle of July are based in general on data regarding the growth before the rainy period referred to, so that at present the prospects, especially for spring sowings and hay, are better than the figures indicate. In the table a soale of figures is employed, 8 signifying a very good crop, 7 a good crop, 6 above medium, 5 medium, 4 below medium, 3 a poor crop, 2 almost a failure of crop and 1 a failure of crop.

|  |  | Middle of Joly |  | 1933 |
| :---: | :---: | :---: | :---: | :---: |
|  | 1936 | 1935 | 1984 |  |
| Autumn wheat | 5.3 | 5.3 | 5.1 | 6.0 |

Two new reference books on Finland. "The Finland Year Book 1936", containing 411 pages, was published recently. The year book is edited by Proferssor I. Leiviskä with the assistance of the Finnish Ministry for Foreign Affairs and a large number of experts on various aspects of the country's political, social, cultural, economic and financial conditions. Copies are abtainable from the Finnish booksellers.

The Anglo-Finnish Section of the London Chamber of Commerce has published a volume entitled "Anglo-Finnish Year Book 1936" which supplies useful information regarding commercial, political and social relations between Finland and Great Britain. Copies of this year book are obtainable from the Anglo-Finnish Section of the London Chamber of Commerce.

## THE BANK OF FINLAND MONTHLY BULLETIN

is sent free of charge to anyone wishing to receive it. Finnish booksellers are, however, allowed țo sell it at a price of 2 marks per copy. Back numbers : are also willingly supplied. Should extracts from the Bulletin be printed, the source should be stated. Correspondence with regard to the Bulletin should be addressed to the Bank of Finland, Statistical Department, Helsinki (Helsingfors); Finland.
